Management Science

The premier journal of innovative research on the science of management

David Simchi-Levi, Editor-in-Chief,
Massachusetts Institute of Technology

Management Science is a scholarly journal that publishes scientific research on the practice of management. Within the scope of the journal are all aspects of management related to strategy, entrepreneurship, innovation, technology, and organizations as well as all functional areas of business, such as accounting, finance, marketing, and operations.

The journal includes studies on organizational, managerial, and individual decision making, from both normative and descriptive perspectives. Articles are primarily based on the foundational disciplines of economics, mathematics, psychology, sociology, and statistics, but readers will also find cross-functional, multidisciplinary research that reflects the diversity of the management science professions. Its interests extend to managerial issues in diverse organizational forms, such as for-profit and nonprofit firms, private and public sector institutions, and formal and informal networks of individuals.
