With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

About the Authors

Ali E. Abbas (“A Kullback-Leibler View of Linear and Log-Linear Pools”) is an assistant professor in the Department of Industrial and Enterprise Systems Engineering at the University of Illinois at Urbana-Champaign. He received

an M.S. in electrical engineering (1998), an M.S. in engineering economic systems and operations research (2001), a Ph.D. in management science and engineering (2003), and a Ph.D. (minor) in electrical engineering all from Stanford University, Stanford, California. He previously worked as a lecturer in the Department of Management Science and Engineering at Stanford and has worked in Schlumberger Oilfield Services from 1991 to 1997, where he held several international positions in wireline logging, operations management, and international training. He has also worked on several consulting projects for mergers and acquisitions in California, and cotaught several executive seminars on decision analysis at Strategic Decisions Group, Menlo Park, California. His research interests include utility theory, decision making with incomplete information and preferences, dynamic programming, and information theory. Dr. Abbas is a senior member of the IEEE, a member of the Institute for Operations Research and the Management Sciences (INFORMS), and a council member of the Decision Analysis Society (DAS). **Address:** Information Systems and Enterprise Systems Engineering, College of Engineering, University of Illinois at Urbana-Champaign, 117 Transportation Building, MC-238, 104 S. Mathews Avenue, Urbana, IL 61801; e-mail: aliabbas@uiuc.edu.

Robert F. Bordley (“Combining the Opinions of Experts Who Partition Events Differently”) is Technical Fellow at General Motors Research Labs and Adjunct Professor of University of Michigan, Ann Arbor. He is an INFORMS Fellow, former

member of the INFORMS council and the Decision Analysis Society Council, former president of the American Statistical Association’s Risk Section and former vice-president of the Production and Operations Management Society. He was also formerly program director of the National Science Foundation’s Decision, Risk and Management Sciences Program. He won the 2004 Best Publication Award from the Decision Analysis Society as well as several major awards from General Motors (the Chairman’s Award, the President’s Council Award, The Award of Excellence, and the Quality Award). He has published more than 75 papers with one of his major research interests being the combination of forecasts. He holds a Ph.D. and M.S. in operations research and an M.B.A. in finance from the University of California, Berkeley. **Address:** General Motors Research Laboratories and University of Michigan, Ann Arbor, MI 48109; e-mail: robert.bordley@gm.com.

Rex V. Brown (“Working with Policy Makers on Their Choices: A Decision Analyst Reminisces”) has a 50-year career in combined research, consulting, and teaching on decision-aiding. His most recent

textbook is *Rational Choice and Judgment: Decision Analysis for the Decider*. He is an incorporated statistician, with a Harvard D.B.A. and a Cambridge B.A. in economics and social anthropology. In 1968 he received the 1968 Oswald George Prize in Applied Statistics for his work on the credibility of estimates. He has taught at Harvard Business School, London School of Economics, Carnegie Mellon, Dartmouth College, Cambridge, and the University of Michigan, in public policy, business, statistics, managerial economics, organizational psychology, and systems engineering. He was a founding council member of the Decision Analysis Society. He has consulted to a variety of senior government and business executives through Decisions and Designs, Inc. and Decision

Science Consortium, Inc. (where he was chairman). He is currently a Distinguished Senior Fellow in George Mason University's School of Public Policy. **Address:** School of Public Policy, George Mason University, Fairfax, VA 20191; e-mail: rexvbrown@aol.com.

L. Robin Keller ("From the Editor...") is a professor of operations and decision technologies in the Merage School of Business at the University of California, Irvine. She received her Ph.D. and M.B.A. in management science and her B.A. in mathematics from UCLA. She has

served as a program director for the Decision, Risk, and Management Science Program of the U.S. National Science Foundation (NSF) and is now on the Scientific Advisory Committee for the USC Homeland Security Center for Risk and Economic Analysis of Terrorist Events. Her research is on decision analysis and risk analysis for business and policy decisions and has been funded by NSF and the U.S. Environmental Protection Agency. Her research interests cover multiple attribute decision making, riskiness, fairness, probability judgments, ambiguity of probabilities or outcomes, risk analysis (for terrorism, environmental, health, and safety risks), time preferences, problem structuring, cross-cultural decisions, and medical decision making. She is currently Editor-in-Chief of *Decision Analysis*, published by the Institute for Operations Research and the Management Sciences (INFORMS). She is a Fellow of INFORMS and has held numerous roles in INFORMS, including Board Member and Chair of the INFORMS Decision Analysis Society. She is a recipient of the George F. Kimball Medal from INFORMS. She has served as the decision analyst on three National Academy of Science committees. **Address:** Merage School of Business, University of California, Irvine, Irvine, CA 92697-3125; e-mail: lrkeller@uci.edu.

Kevin F. McCardle ("A Decision Analysis Tool for Evaluating Fundraising Tiers") is a professor of decisions, operations and technology management at the Anderson School of Management at UCLA. He currently serves as Senior Associate Dean of Anderson's M.B.A.

program. Professor McCardle's research interest is in mathematical models of decision making. He served on the faculty at the Fuqua School of Business at Duke University from 1985 to 1999, when he joined the faculty at Anderson. His primary teaching responsibility has been to make the required course in probability and statistics palatable to M.B.A. students. For that effort he has won teaching awards at both Fuqua and Anderson. He serves on the board of St. Joseph Center, a charitable social-service agency in west Los Angeles. Fundraising for St. Joseph Center provided the genesis for the paper published here. **Address:** Anderson Graduate School of Management, University of California, Los Angeles, 110 Westwood Plaza, Box 951481, Los Angeles, CA 90095-1481; e-mail: kevin.mccardle@anderson.ucla.edu.

Kumar Rajaram ("A Decision Analysis Tool for Evaluating Fundraising Tiers") is a professor of operations and technology management at the UCLA Anderson School of Management. Professor Rajaram's current research interests include improving operations in

the health-care industry, nonprofit sector, and process manufacturing sectors including food processing, pharmaceuticals, and the petrochemical industry. He has focused on developing analytical models of complicated systems with a strong emphasis on practical implementation. His research has been published in INFORMS journals such as *Operations Research*, *Management Science*, *Manufacturing and Service Operations Management*, *Marketing Science*, and *Interfaces*. For his work in the process industry he has been awarded the Franz Edelman Finalist Award by INFORMS. In addition, he has been awarded the Eric and 'E' Juline Faculty Excellence in Research Award at the UCLA Anderson School. He holds a doctorate in operations management from the Wharton School of the University of Pennsylvania. **Address:** Anderson Graduate School of Management, University of California, Los Angeles, 110 Westwood Plaza, Box 951481, Los Angeles, CA 90095-1481; e-mail: kumar.rajaram@anderson.ucla.edu.

Christopher S. Tang (“A Decision Analysis Tool for Evaluating Fundraising Tiers”) is Edward Carter Professor of Business Administration at the UCLA Anderson School. In addition to his academic appointment, he has served many roles at the UCLA Anderson School

for over 20 years including chairman and senior associate dean (1988–2002). Recently, he served as Dean of National University of Singapore Business School (2002–2004). Dr. Tang has extensive teaching, research, and consulting experience in the areas of supply

chain management and retailing. In addition to winning various teaching awards, he has published two books and over 60 research articles in various leading international academic journals. Moreover, he has taught various executive programs, served on 15 editorial boards, and advised clients throughout United States, Europe, and Asia. Dr. Tang received his B.Sc. (first-class honors) from King’s College, University of London, and his M.A., M.Phil., and Ph.D. from Yale University. **Address:** Anderson Graduate School of Management, University of California, Los Angeles, 110 Westwood Plaza, Box 951481, Los Angeles, CA 90095-1481; e-mail: chris.tang@anderson.ucla.edu.
