With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

## About the Authors

**Gordon H. Beeman** (“Resource-Limited Multiattribute Value Analysis of Alternatives for Immobilizing Radioactive Liquid Process Waste Stored in Saluggia, Italy”) is a senior program manager at Battelle’s Pacific Northwest Division. He has a B.Sc. in physical metallurgy and an M.Sc. in mechanical

engineering from Washington State University. Since joining Battelle in 1975, immediately following completion of his graduate work, Mr. Beeman has held project, program, and line positions with increasing responsibilities. He has demonstrated significant capabilities to organize and lead multidiscipline project teams that conduct major system analyses, technology development, and implementation. He has worked on a wide variety of programs in the structural analysis, material properties, spent fuel, systems engineering, tritium production, tank waste remediation, and laboratory operations management areas. Mr. Beeman is currently the manager of Battelle’s Waste Treatment Plant Support Project. This project supports Bechtel National Inc., the designer and constructor of Hanford’s Waste Treatment Plant. **Address:** Battelle Pacific Northwest National Laboratory, 902 Battelle Boulevard, P.O. Box 999, Richland, WA 99352; e-mail: gordon.beeman@pnl.gov.

**Alan J. Brothers** (“Resource-Limited Multiattribute Value Analysis of Alternatives for Immobilizing Radioactive Liquid Process Waste Stored in Saluggia, Italy”) is a senior research scientist at Pacific Northwest National Laboratory. He received a Ph.D. in psychology from the Department of Cognitive Sciences at the University of California, Irvine, and a B.A. in

mathematics from California State University, Long Beach. His research interests include the psychology of judgment and decision making, and its application to complex decision problems such as environmental remediation and national security. His recent research has focused on probabilistic modeling of behavior to predict violent intent and nuclear proliferation. He has also worked with the Russians to develop regulations for the protection of their nuclear materials, and he was part of an international team that conducted a safety analysis for the Chernobyl New Safe Confinement. He is a certified mediator and has taught classes in counterintelligence, decision analysis, statistics, and psychology. **Address:** Pacific Northwest National Laboratory, MSIN K6-08, 902 Battelle Boulevard, P.O. Box 999, Richland, WA 99352; e-mail: alan.brothers@pnl.gov.

**Richard Engelbrecht-Wiggans** (“A Direct Test of Risk Aversion and Regret in First Price Sealed-Bid Auctions”) is IBE Distinguished Professor of Business Administration at the University of Illinois at Urbana-Champaign. He received his Ph.D. in operations research

from Cornell University. His research interests revolve around auctions: understanding existing auctions, auctions as a paradigm for more general markets, and auctions as a vehicle for studying decision-maker behavior. His publications include papers in *Management Science*, *Economic Theory*, *Games and Economic Behavior*, *International Journal of Game Theory*, *Operations Research*, *Mathematical Programming*, and *Journal of Mathematical Economics*. **Address:** College of Business, University of Illinois at Urbana-Champaign, 85 Wohlers Hall, 1206 South Sixth Street, Champaign, IL 61820; e-mail: eplus17@illinois.edu.

**Srinagesh Gavirneni** (“Anchor Selection and Group Dynamics in Newsvendor Decisions—A Note”) is an assistant professor of operations management in the Johnson Graduate School of Management at Cornell University. His research interests are in the areas of supply

chain management, inventory control, production scheduling, simulation, and optimization. His papers have appeared in *Management Science*, *Manufacturing & Service Operations Management*, *Operations Research*, *European Journal of Operational Research*, *Operations Research Letters*, *IIE Transactions*, *Interfaces*, and *IEEE Transactions on Reliability*. Previously, he was an assistant professor in the Kelley School of Business at Indiana University, the chief algorithm design engineer of SmartOps, a software architect at Maxager Technology Inc., and a research scientist with Schlumberger. His undergraduate degree from IIT-Madras is in mechanical engineering, and he has received an M.Sc. from Iowa State University and a Ph.D. from Carnegie Mellon University. **Address:** Johnson Graduate School of Management, Cornell University, 325 Sage Hall, Ithaca, NY 14853-6201; e-mail: nagesh@cornell.edu.

**Elena Katok** (“A Direct Test of Risk Aversion and Regret in First Price Sealed-Bid Auctions”) is a professor of supply chain management and the Zimmerman Endowed Fellow in Business Administration at the Smeal College of Business at Pennsylvania

State University. She has coauthored a number of scholarly articles in behavioral operations management, focusing on using laboratory experiments to test game-theoretic models of contracting and competitive procurement. She has been a member of INFORMS since 1995, and was the winner of the 2000 Franz Edelman competition. She is one of the organizers of the annual Behavioral Operations Management conference, and has been the Behavioral Process Management cluster chair for the INFORMS conference in 2007 and 2009. **Address:** Pennsylvania State University, 465 Business Building, University Park, PA 16802; e-mail: ekatok@psu.edu.

**Paul K. Kearns** (“Resource-Limited Multiattribute Value Analysis of Alternatives for Immobilizing Radioactive Liquid Process Waste Stored in Saluggia, Italy”) is a division leader at Battelle Global Laboratory Operations. He is responsible for strategic planning,

identification of research and development requirements, and laboratory collaboration. His research interests include the development of advanced energy, waste treatment, and environmental remediation technologies. He holds a Ph.D. in health sciences from Purdue University and is a visiting professor at the University of Manchester. **Address:** Battelle Global Laboratory Operations, 505 King Avenue, Columbus, OH 43201; e-mail: kearnsp@battelle.org.

**L. Robin Keller** (“From the Editors...”) is a professor of operations and decision technologies in the Merage School of Business at the University of California, Irvine. She received her Ph.D. and M.B.A. in management science and her B.A. in mathematics from UCLA. She

has served as a program director for the Decision, Risk, and Management Science Program of the U.S. National Science Foundation (NSF) and is now on the Scientific Advisory Committee for the USC Homeland Security Center for Risk and Economic Analysis of Terrorist Events. Her research is on decision analysis and risk analysis for business and policy decisions and has been funded by NSF and the U.S. Environmental Protection Agency. Her research interests cover multiple attribute decision making, riskiness, fairness, probability judgments, ambiguity of probabilities or outcomes, risk analysis (for terrorism, environmental, health, and safety risks), time preferences, problem structuring, cross-cultural decisions, and medical decision making. She is currently Editor-in-Chief of *Decision Analysis*, published by the Institute for Operations Research and the Management Sciences (INFORMS). She is a Fellow of INFORMS and has held numerous roles in INFORMS, including Board Member and Chair of the INFORMS Decision Analysis Society. She is a recipient of the George F.

Kimball Medal from INFORMS. She has served as the decision analyst on three National Academy of Science committees. **Address:** Merage School of Business, University of California, Irvine, Irvine, CA 92697-3125; e-mail: lkeller@uci.edu.

**Alexander Klos** (“Impact of Presentation Format and Self-Reported Risk Aversion on Revealed Skewness Preferences”) is an assistant professor at the Finance Center of the University of Münster. He holds a Ph.D. in business administration from the University of Mannheim and has three years of consulting

experience. His work focuses on the stability of preferences, investor behavior, and retirement savings decisions. He teaches courses in corporate finance, experimental economics, and retirement savings. **Address:** Finance Center Münster, University of Münster, Universitätsstraße 14–16, 48143 Münster, Germany; e-mail: alexander.klos@wiwi.uni-muenster.de.

**Thomas Langer** (“Impact of Presentation Format and Self-Reported Risk Aversion on Revealed Skewness Preferences”) is a full professor at the Finance Center of the University of Münster, Germany. He is also head of the DIA RG, a group that does research on various

aspects of investment behavior and retirement provisions. His further research interests include behavioral finance, experimental economics, and decision analysis. He holds a Ph.D. in business administration from the University of Mannheim and a M.Sc. in mathematics from the University of Kiel. He teaches courses in decision analysis, behavioral finance, capital market theory, and corporate finance. He was a visiting associate at CalTech and Duke University and serves as an associate editor for *Management Science*. **Address:** Chair of Finance, University of Münster, Universitätsstraße 14–16, 48143 Münster, Germany; e-mail: thomas.langer@wiwi.uni-muenster.de.

**Shas V. Mattigod** (“Resource Limited Multiattribute Value Analysis of Alternatives for Immobilizing Radioactive Liquid Process Wastes Stored in Saluggia, Italy”) is a staff scientist in the Energy and Environment Directorate at Battelle Pacific Northwest National Laboratory. He

has a Ph.D. in geochemistry from Washington State University and conducts research related to managing nuclear wastes. He has over 200 publications to his credit in the area of remediation technology development and deployment. **Address:** Battelle Pacific Northwest National Laboratory, 902 Battelle Boulevard, P.O. Box 999, Richland, WA 99352; e-mail: shas.mattigod@pnl.gov.

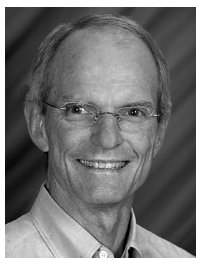

**Carlo Monti** (“Resource-Limited Multiattribute Value Analysis of Alternatives for Immobilizing Radioactive Liquid Process Waste Stored in Saluggia, Italy”), a biologist with a research doctorate in environmental sciences, has joined Battelle Geneva’s Environment and

Analytical Chemistry department, both as a research scientist and as a member of the Italian marketing team. He brings to Battelle 14 years of environmental consulting experience focused on limnology, specifically contaminant freights in river basins and sediment properties, including the assessment of risks arising from sediments for human health and ecosystems. Prior to joining Battelle, Dr. Monti was technical director of a consulting firm in North Italy, managing a number of projects involving sediment restoration, river basin management, and environmental impact assessments in Italy and other countries. For the Italian Ministry of Foreign Affairs, he was a consultant in water-quality assessment and basin management planning for the Bio-Bio River in Chile. **Address:** Battelle National Security Global Business, Via Lazzaretto 8, 21050 Varese, Italy; e-mail: montic@battelle.org.

**Angelo Papa** (“Resource-Limited Multiattribute Value Analysis of Alternatives for Immobilizing Radioactive Liquid Process Waste Stored in Saluggia, Italy”) has degrees in nuclear engineering from Rome University (1970) and in mechanical engineering from Rome

University (1993). He is currently President of the Nuclear Commission of the Professional Association of Engineers in Rome, President of sub-Commission 3 of UNICEN–Nuclear Power Plants (Italian Standards), a member of the steering committee of the Italian Nuclear Association, and a member of the Journalist Professional Association in the Lazio Region. He was a member of the advisory committee of Euratom Supply Agency, secretary of the IEC 45 Instrumentation for Radiological Protection, and president of the Italian CEI 45B Instrumentation for Radiological Protection. He was also a professor in the Italian University of L’Aquila, Cassino, teaching technical matters in the Faculty of Engineering from 1982 to 1990 and in the Application School of Transport Corps (university level) for military purposes from 1977 to 1982. He was a manager of ENEL (Italy) for nuclear construction and a director of SOGIN (Italy). As director of the Technologies and Environmental Department for Nuclear Fuel Management, he was responsible for decommissioning of nuclear power plants, decommissioning for back end of nuclear fuel cycle plants, environmental engineering, process engineering, and external business for on-site assistance of nuclear power plants for other countries. He was also responsible for the security implementation and systems for Italian nuclear power plants and nuclear facilities. He is author of many scientific and didactic publications. **Address:** Società Gestione Impianti Nucleari, Via Torino 6, 00184 Rome, Italy; e-mail: papa@sogin.it.

**Denis M. Strachan** (“Resource-Limited Multiattribute Value Analysis of Alternatives for Immobilizing Radioactive Liquid Process Waste Stored in Saluggia, Italy”) is a Laboratory Fellow at Battelle Pacific Northwest National Laboratory and a Fellow of the American

Ceramic Society. He has over 35 years of experience in the development of nuclear waste forms, both ceramic and vitreous forms. He is widely published in this field. He helped develop the current understanding of the glass-water interaction. He has worked on the Yucca Mountain Project for the disposal of nuclear waste in Nevada and on the performance of waste glass at the Integrated Disposal Facility, where vitrified waste from the Hanford Site in Southeast Washington State will be disposed. **Address:** Battelle Pacific Northwest National Laboratory, MSIN K6-24, 902 Battelle Boulevard, P.O. Box 999, Richland, WA 99352; e-mail: denis.strachan@pnl.gov.

**Dennis Vrecko** (“Impact of Presentation Format and Self-Reported Risk Aversion on Revealed Skewness Preferences”) is a Ph.D. student at the Finance Center of the University of Münster. He completed his M.Sc. in business administration at the University of Münster and at Harvard University. His current research focuses on the temporal stability of preferences, risk perception, and the development of decision support systems. **Address:** Chair of Finance, University of Münster, Universitätsstraße 14–16, 48143 Münster, Germany; e-mail: dennis.vrecko@wiwi.uni-muenster.de.

**Yusen Xia** (“Anchor Selection and Group Dynamics in Newsvendor Decisions—A Note”) is an assistant professor in the Department of Managerial Sciences of the Robinson College of Business, Georgia State University. He received his Ph.D. in supply chain and operations management from the McCombs School of Business at the University of Texas at Austin. He teaches courses in operations management for both undergraduate and M.B.A. students. His research interests include experimental operations management, the interfaces between operations and marketing, and managing uncertainties and risks in supply chains. **Address:** Robinson College of Business, Georgia State University, 35 Broad Street, 10th Floor, Atlanta, GA 30303; e-mail: ysxia@gsu.edu.
