With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

Acknowledgments

First and foremost, we would like to thank each of the author of this TutORials volume for their contributions. As experts of their topics of contribution, we believe this compilation of tutorials is a valuable addition to the INFORMS TutORials series. We are particularly grateful to all the authors for helping us keep a significantly tight timeline for this work. We believe these chapters on a range of topics under the theme of this compilation would be a rich resource for the INFORMS community. Specifically, we thank in alphabetical order: Edmon Begoli, Hamparsum Bozdogan, J. Blair Christian, Sanmay Das, Ananda Swarup Das, Garrett Dranichak, Eugene Feinberg, Nicholas Hall, Mohammad Al Hasan, Alan King, Joris van de Klundert, Esra Pamukcu, Pragnesh Patel, Joe Pimbley, Warren Powell, Gagandeep Singh, L. Venkata Subramaniam, Glen Swindle, Margaret Wiecek, and William Ziemba.

Aparna Gupta would like to thank Chanaka Edirisinghe and Bogdan Bichescu for their support and guidance through this process, as well as for suggesting to invite several of the authors. I am particularly grateful to Cole Smith for giving us excellent guidelines and overview of challenges we should anticipate through the process. His prompt help and response to address all issues throughout greatly helped us. I warmly thank my co-chair, Agostino Capponi, for his chapter contribution to the volume, as well as for helping make this volume a success through his diligent reviewing of many of the chapters. We are grateful to Mr. Cho Chee Cheung for his painstaking attention to a timely production of this volume.

Agostino Capponi would like to thank the contributors to the tutorial chapters for their efforts in producing manuscripts covering the mainstream areas of Operations Research. I believe I had a fruitful interaction with them, and learned a lot about the state of the art in Operations Research. I am also grateful to my co-chair, Aparna Gupta, and to Chanaka Edirisinghe for useful guidance and assistance.

APARNA GUPTA
and
AGOSTINO CAPPONI
