With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

Acknowledgments

We would like to thank all the authors of this TutORials volume, particularly the speakers for their help in following a very tight timeline for their works. As experts of their topics of contribution, we believe these chapters provide a good sample of the current and emerging trends and would be a rich resource for the INFORMS community.

We would like to thank Bill Klimack and Gino Lim for their support and guidance through this process. We also thank the presidents of the INFORMS communities for suggesting to invite several of the authors. We are particularly grateful to Cole Smith for giving us excellent guidelines throughout the process, particularly his insightful and useful reviews on several chapters in this volume. We are grateful to several colleagues including Enlu Zhou and George Lan from Georgia Institute of Technology, and Xin Chen from University of Illinois for their help in reviewing chapters in this volume. Finally we thank Mr. Cho Chee Cheung for his painstaking attention to a timely production of this volume.
