With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes.

**EDITORIAL STATEMENT**

*INFORMS Journal on Optimization* (ISSN 2575-1484 (print), 2575-1492 (online)) is a quarterly journal published by the Institute for Operations Research and the Management Sciences (INFORMS), 5521 Research Park Drive, Suite 200, Catonsville, MD 21228. *INFORMS Journal on Optimization* seeks to publish papers in optimization with particular emphasis on data-driven optimization, optimization methods in machine learning, and exciting real-world applications of optimization. Appropriate topics include convex optimization (including linear optimization); general purpose nonlinear optimization; discrete optimization (combinatorial, integer, mixed integer optimization); optimization under uncertainty (dynamic programming, stochastic programming, robust optimization, simulation-based optimization); infinite dimensional optimization; and online optimization.

*INFORMS Journal on Optimization* welcomes three types of submissions: regular articles, which are original papers that build on an area and expand it in different ways; perspective articles, which are unusually original papers that initiate an area, typically the first of their kind; and review articles, which are papers that present a unifying and comprehensive review of an area of optimization. Detailed instructions for authors can be found at <https://pubsonline.informs.org/page/ijoo/submission-guidelines>.
