With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

Contributors

John Chao is a real estate broker who now operates his own business, after serving stints at Provident Bank and a dot-com firm. He graduated from the department of industrial engineering and OR at the U of California at Berkeley in 1999.

Matty Chen is an information technology consultant with Accenture. She earned bachelor's and master's degrees in industrial engineering and OR at Berkeley and likes to windsurf and hike in her spare time.

Aileen Deng is an operations executive with a trading and manufacturing company in the jewelry industry. An alumna of the industrial engineering and OR department at Berkeley, she enjoys listening to music, reading, and traveling.

Emmanuel Fragnière is a commodity risk analyst at Cargill (Ocean Transportation, Geneva) and a lecturer in MS at the U of Bath's School of Management. He used to teach at the Business School of Lausanne U, maintaining a fruitful collaboration with the executive information system department of Nestlé. His research interests are modeling languages, stochastic programming, and especially applications of MS.

V. Daniel R. Guide Jr. joined the department of supply chain and information systems in the Smeal College of Business at Pennsylvania State U in 2002. His research concerns the development and control of closed-loop supply chains, time-based models for commercial product returns, remanufacturing, and industrial ecology. In his scarce spare time, he enjoys hiking with his three sons and wife and searching for the perfect beer.

Harold Miao earned his bachelor's degree at Berkeley and then worked for Manugistics before pursuing a master's degree at Stanford. He is a corporate value consultant at Standard and Poor's.

Luc Muyldermans teaches at the Nottingham U Business School in Nottingham, England. He is an avid fisherman and recently completed his doctorate at the Katholieke Universiteit Leuven in Belgium.

Alexandra Newman teaches in the division of economics and business at the Colorado School of Mines. She earned her PhD in industrial engineering and OR at Berkeley. She is interested in optimization and competes regularly in marathons and other races.

Christophe Oggier earned a degree in business administration and information systems at the U of Lausanne and joined Nestlé S.A. in 1996 in the executive information sys-

tem (EIS) department as business analyst. He and Jeremy Stuby developed and promoted financial models based on quantitative methods. In 2000, he became e-business manager in the business process integration department, and in 2001, he joined corporate controlling as financial analyst. In 2003, he worked as controller for Nestlé Waters M.T. in a supply-chain internal consulting team. Since 2004, he has been controller of the confectionery division of Nestlé Venezuela S.A.

Josephine E. Olson teaches business administration and was associate dean of the faculty at the Katz Graduate School of Business, University of Pittsburgh. She has degrees in economics from Wellesley College and Brown University. Her research has generally focused on careers of managers and on topics related to international business. She loves foreign travel and enjoys taking business and engineering freshmen on study-abroad trips.

Jeremy Stuby, CFA, started an internship in 1995 in Nestlé's executive information systems (EIS) department. He and Christophe Oggier developed quantitative tools to analyze Nestlé's financial figures. After graduating in finance from the U of Lausanne, he joined the EIS department full time to continue their work. In 1999, he became a business analyst in an internal consultancy group dedicated to reorganizing Nestlé's supply chain. In 2001, he joined Lombard Odier Darier Hentsch as a financial analyst and in 2002 was transferred to The Bahamas to work as a relationship manager.

Sophia Tseng works at Oracle Corporation as a program manager, after a tour of duty at Provident Bank. She graduated from the industrial engineering and OR department at Berkeley and enjoys looking for foodie treasures in San Francisco.

Luk N. Van Wassenhove is the Henry Ford chaired professor of manufacturing at INSEAD and previously served as dean for research and development. He was director of CIMSO, a research center for integrated manufacturing and service operations. He publishes regularly in academic and managerial journals and consults with major global companies. His recent research and teaching revolve around e-supply-chain management, industrial excellence, continual improvement, learning and knowledge management, and product recovery.

Candace Arai Yano teaches at UC Berkeley and has a joint appointment between the industrial engineering and OR department and the Haas School of Business. Her several journal editorial positions, plus occasional hiking and traveling, keep her busy.
