With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

Contributors

Erwin Abbink holds an MSc in OR from the U of Groningen, The Netherlands. He is a business consultant within the logistics department of Netherlands Railways.

Soohan Ahn earned a PhD in statistics from Seoul National University, Korea, and is an assistant professor at the U of Seoul. He participated in this work as a post-doc at AT&T Labs with partial support from KOSEF (Korea Science and Engineering Foundation). Subsequently he visited the Institute of Mathematics and Applications (IMA) at the U of Minnesota. His research interests are in queueing theory, fluid flow models, large deviations, and applications to telecommunications.

Srinivas Bollapragada is a senior operations researcher at General Electric's global research center (GEGRC) in Niskayuna, NY. His research concerns business applications of OR. He has led the development of several algorithm-based decision-support systems for various GE businesses and has published over 15 refereed articles. He earned a PhD in operations management from Carnegie Mellon U, master's and bachelor's degrees in electrical engineering from IISc, Bangalore and IIT Madras. He received the Edelman (2001), Wagner (2004, 2002), and Nicholson (1996) finalist awards and a number of GE management awards. He represents GE Research at the INFORMS Roundtable and serves on the Edelman prize committee.

Simon Byers has a background in statistics but since joining AT&T Labs has diversified into problems earlier in the analysis chain such as semi-structured data acquisition and processing. He has also applied analytical techniques to problems in information security.

Kete Charles Chalermkraivuth is a financial analytics and business system leader at GE Global Research. He is leading the PROFITS project (portfolio risk optimization for investing tactical and strategic) in collaborating with Genworth Financial and GE Asset Management. He is also working on initiatives in capital allocation, credit-risk rating, and hedge monitoring. He holds an MS in technology policy from Massachusetts Institute of Technology, an MBA in finance, and a BS in engineering. He is a chartered financial analyst.

Michael C. Clark is the business program manager for GE Global Research's development of technology for GE's financial services business units. He assists them in defining and developing technological innovations for customer prospecting, deal closing, servicing, risk management, and

customer retention. He previously was project leader on multiyear research efforts on portfolio optimization. He holds an MBA from the executive MBA program of the U of Chicago. He also holds a BS in business administration (accounting) and a BA in modern languages (Spanish) from Kansas State U. He is a CPA.

John Deaton, vice president of insurance at GE Asset Management, is portfolio manager for Genworth Financial. His responsibilities include developing investment strategy for insurance products and managing investment portfolios for life insurance products. He has 20 years experience in financial services; 14 years of that were in the insurance industry, focused on asset liability management. He has been with GE since 1994 as a vice president working on asset-liability management in the investment department. Prior to GE, he worked at Beneficial Corporation pricing retail mortgages, hedging pipeline production, and securitizing mortgage loans. He holds a bachelor's in business administration finance with a minor in accounting and a bachelor's in economics, both from the U of Delaware. He is also a chartered financial analyst.

Tom Duffy is a managing director and head of strategic business initiatives for the Merrill Lynch Global Bank Group. He has over 20 years experience in the financial services industry, primarily in the fields of credit analysis, structured finance, capital markets, corporate finance, and management strategy. He holds an MBA from New York U, a BA from Gettysburg College, and is a chartered financial analyst.

Matteo Fischetti is cofounder of Double Click sas in Padua, Italy. He is also a professor of OR at the U of Padua.

Bernard Gendron was born in Montreal in 1966, the youngest son in a family of five children; he has been married since 2002 and has no children yet. In addition to his passion for his work as professor at the U of Montreal, he enjoys reading books and magazines dedicated to historical, political, and socioeconomic issues. He is also a long-time chess lover, although his work and other passions did not allow him to pursue his career as an expert chess player (he was once among the top Canadian junior chess players).

Manos Hatzakis is vice president of MS at Merrill Lynch, where he has been involved in liquidity-risk management, pricing analysis, portfolio optimization, and other applications. His prior experience includes petroleum-supply-chain

modeling, airline-flight optimization, and revenue management. He earned a PhD in OR at Wharton (U of Pennsylvania), an engineering degree from the National Technical U, Athens, Greece, and is a CFA charterholder and certified financial risk manager.

Wenyue Hsu, CFA, is a vice president at Merrill Lynch Bank USA. He has over 11 years experience in banking and finance, including four years at Merrill Lynch. He holds a PhD in physics from Harvard U.

Alan Kaplan is a partner in the consulting firm Unique Technical Solutions, where he works on hardware and software designs for industry and the military. He was a principal member of the technical staff at AT&T Research Labs, where he worked on wide area networks and on telephony applications. Before that he spent nearly 30 years at Bell Labs in both development areas and in the computer science research center. He holds 20 patents. He earned a degree in engineering science (physics) at the U of Rhode Island and an MS in mathematics from the U of Michigan.

Lynn Kiaer is a senior mathematician at General Electric's Global Research Center. Her research interests are hybrid optimization methods, including mathematical programming, discrete algorithms, heuristic methods, evolutionary algorithms, and simulation. She holds a PhD in applied mathematics, an MS in OR, a BS in mathematics, and a BA in French and political science.

Leo Kroon is a business consultant within the logistics department of Netherlands Railways. He is also a professor of logistics at Erasmus U Rotterdam, The Netherlands.

Russ Labe is director of the analytics and MS group at Merrill Lynch. He has practiced OR/MS in industry for over 25 years, including 18 years at Merrill Lynch. He holds an MEng degree in OR from Cornell U.

Bonnie Liao is a vice president in the Merrill Lynch MS group. Her work at Merrill Lynch since 1998 has focused on portfolio optimization, performance measurement, large-scale database modeling, and evaluation of business strategy. She earned a PhD in physics from the U of Houston and an MBA in finance and CIS from Rutgers U. She is a marathoner and enjoys hiking and canoeing.

Xiangdong (Sheldon) Luo is deposit pricing manager at Merrill Lynch. He has practiced OR/MS in industry for over 15 years, including four years at Merrill Lynch. He holds a PhD in economics, an MS in OR, and an MS in economics from the U of Kansas.

John P. Murdzek is senior quantitative analyst for Genworth Financial. He develops investment strategy for insurance products and conducts research to improve quantitative capabilities and methods. He has 14 years experience in the financial services industry, almost all in investments

with the insurance industry. He has been with GE since 2000, working on asset-liability management in the investment department. Prior to GE, he worked at John Hancock with similar responsibilities. He holds a BS in mathematics/actuarial science from the U of Connecticut. He is a fellow of the Society of Actuaries.

Walter Neeves is vice president and business development actuary for Genworth Financial. He works with the business-development team and business and corporate experts to analyze opportunities and develop and validate models for insurance and asset-management acquisitions, alliances, and equity investments. He is based in Stamford, Connecticut. He is an actuary with over 25 years experience in product development, capital markets, reinsurance, and investments. He led the PROFITS project (portfolio risk optimization for investing tactical and strategic) for Genworth Investments, led projects for GE Financial Assurance's capital markets group, and was vice president of product development for fixed-life-insurance products. Prior to that, he was an actuarial director for Prudential Insurance Company of America. He holds a bachelor's degree in mathematics from Duke U and is a fellow of the Society of Actuaries and a member of the American Academy of Actuaries.

Je Oh is a vice president of the analytics and MS group at Merrill Lynch. He has practiced OR/MS in industry for over 20 years, including eight years at Merrill Lynch. He holds an MS in OR and statistics from Rensselaer Polytechnic Institute.

David Poole earned a PhD in statistics from the U of Washington in 1999 and joined AT&T Labs, Research the same year. His research interests at AT&T include computer-intensive statistical procedures, information mining in large datasets, capture-recapture methods, network traffic analysis, and the statistical use of simulation models.

V. Ramaswami is currently a senior technical specialist in the statistics department of AT&T Labs, Research. He earned an MSc in statistics and a PhD in OR from the U of Madras, India and Purdue U, respectively. Coauthor of *Introduction to Matrix Analytic Methods in Stochastic Modeling* published by SIAM and ASA, he is credited with several useful results in algorithmic methods in probability such as the Latouche-Ramaswami algorithm and the Ramaswami Recursion. He is a senior member of IEEE and a member of INFORMS and IMS. He was an editor of *Stochastic Models* and an associate editor of *Management Science*.

Bernhard J. Scholz is a senior software architect and project leader. He has worked at GE Research for over 17 years. His past work has involved research in expert systems, hypertext/hypermedia, SGML, computer-based training, and e-commerce applications. His research focus is architectures

for ontology-driven software. He holds a BS in computer science from Siena College and an MS in computer science from Rensselaer Polytechnic Institute.

Adeesh Setya is a director and responsible for asset/liability management reporting and analytics for Merrill Lynch's US Banks. He has worked in various treasury functions for the last 12 years. He holds an MBA from Columbia U and is a CFA charterholder.

Steven A. Stoddard is a lieutenant colonel and an OR analyst at the Center for Army Analysis at Fort Belvoir, Virginia. His primary research activities are analyses of army force generation, force structure, and unit-rotation policies.

Gerrit Timmer is one of the founders and CEO of ORTEC, and he is a professor of OR at the Free U of Amsterdam, The Netherlands.

David Toledano is a researcher in the physics of business at GE Global Research, working with GE's insurance and health-care businesses to develop algorithms and tools for managing processes. He has been at GE since 2002, after consulting with McKinsey & Company for several years. His background is in experimental physics.

Michiel Vromans recently completed his PhD thesis on railway reliability at Erasmus U Rotterdam. He is a consultant within ProRail, The Netherlands.

Lihua Yang is vice president of the analytics and MS Group at Merrill Lynch. She has been working as a statistician for over 12 years at various companies, including Merrill Lynch, Citigroup, Prudential Financial, and Harvard U. She has a master's degree in statistics from the U of Wisconsin-Madison.
