With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

 Contributors

Bruce Barfield is president and cofounder of The Rainmaker Group. With over 20 years of experience in professional revenue optimization, he provides strategic counsel encompassing the company's current systems, extending to emerging technologies, and keeping client companies in front of the technology curve.

Amar Duggasani is executive vice president of professional services at The Rainmaker Group, where he manages the professional services and business consulting team. Previously he led many other technology companies. He earned a BS in mechanical engineering from SV University, India and an MS in industrial and management engineering from Montana State University. He conducts applied research in pricing and revenue management problems.

Tammy Farley is executive vice president and cofounder of The Rainmaker Group. She has spearheaded successful revenue management implementations internationally for over 18 years in the resort and casino hotel markets.

Mark Ferguson is the Steven A. Denning Professor of Technology and Management at the College of Management of Georgia Institute of Technology. He coordinates the price and revenue management research program at the university and serves on the board of the INFORMS price and revenue management subdivision.

Laura Harrison is the hotel yield manager for the Harrah's Cherokee Casino & Hotel.

Jon Higbie is senior vice president and chief scientist of Revenue Analytics. He is an expert in the science of revenue management. He has been recognized for his contributions to the science of group revenue management, real-time price management, and large-scale network management for companies such as ABC Television Network, Ford Motor Company, Marriott International, and Delta Air Lines. He earned a PhD

in management science and information technology from the University of Georgia and a BA in physics from Wittenberg University.

H. Ahmet Kuyumcu is chief scientist at The Rainmaker Group. He was chief scientist at Zilliant and senior scientist at Talus (now JDA). He taught graduate-level pricing and revenue management at the University of Texas at Austin.

Miguel A. Lejeune teaches decision sciences at Drexel University. His research interests include stochastic programming, applied and data-driven optimization, and financial risk. He has published widely.

Ville Mattila is a researcher at the Systems Analysis Laboratory, Helsinki University of Technology (HUT). He earned an MSc in industrial engineering and management with a minor in systems and operations research from HUT in 2002 and is working toward a PhD. His research interests include discrete-event simulation and simulation-based optimization with applications in aircraft maintenance and airbase logistics systems.

Richard Metters is associate professor at the Goizueta Business School, Emory University. His research interests concentrate in service sector operations management. He has published widely and serves as an associate editor of *Decision Sciences* and *Interfaces*. He is the principal author of the textbook *Successful Service Operations Management*.

Raj Nigam retired as the chief scientist, vice president, and director of the Management Science Group at Merrill Lynch. He began his OR/MS career with RCA Corporation in 1970 in the Operations Research Group, and then started the Management Science Group at Merrill Lynch in 1986 along with five of his colleagues from RCA. He earned his BTech from IIT, Kanpur, India, and his MS and PhD from the University of California, Berkeley.

Carrie Queenan is assistant professor of operations management at the University of Notre Dame's Mendoza College of Business and studies how revenue management practices affect performance. Recently she and her coauthors developed a new method for removing demand constraints and then used simulation to demonstrate resultant revenue improvement. Currently she is analyzing the drivers of effective revenue management using empirical methods.

Tuomas Raivio is an adjunct professor in the Systems Analysis Laboratory, Helsinki University of Technology. He earned an MSc in 1993 in systems and OR and a PhD in 2000 on differential game solution methods for aerial pursuit-evasion games. His research interests include risk analysis and computational methods of simulation, optimization, and game models.

Kai Virtanen is a teaching research scientist at the Systems Analysis Laboratory, Helsinki University of

Technology (HUT). He earned MSc and DrTech degrees in systems and OR from HUT in 1996 and 2005, respectively. His research interests include optimization, and decision and game theory, focusing on aerospace applications and discrete-event simulation.

Stan Ward is a project director for the JDA Software Group. He has over 16 years of experience in revenue management and pricing consulting and implementation in many industries, including television broadcasting, hotel, cruise line, airline, and package delivery. He earned an MBA from the Fuqua School of Business at Duke University and a BEE from the Georgia Institute of Technology.

Nevena Yakova works at the Fred Astaire East Side Dance Studio in a business role. She earned a PhD in international business. Her areas of interest are diffusion of management practices, foreign direct investment, and economic development.
