With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

Contributors

Saligrama R. Agnihotri teaches at SUNY-Binghamton. He received his BSc and MSc from Karnatak U, Dharwar, India, and an MS in OR and a PhD in operations management from the U of Rochester. His research interests include field service support, operations in service industries, material handling systems, and quality management.

Adenso Díaz has a degree in math from Complutense-Madrid U and is currently pursuing a PhD in business at the U of Oviedo. He worked for one year for SEMA Group before transferring in 1986 to ENSIDESA as a mathematician in the steel-making area.

Charles A. Gallagher teaches MS, P/OM, and information systems at Barry U. He has taught in executive MBA programs for the past 10 years.

Ramón García is continuous casting engineer in the technical department of the ENSIDESA LD-III Steel Plant. He graduated from the U of Oviedo in mining engineering, married Blanca Tuñón, and has twin girls.

Marc Gravel teaches OR at the Université du Québec in Chicoutimi, an industrial town north of Québec City. He holds degrees from Laval U in both math (BSc) and business (MBA, PhD). He has published papers in math programming and in operations management. He is currently the director of a research project in production planning and control and acts as a consultant to both small and large industry.

Gamini Gunawardane was born in Sri Lanka (formerly Ceylon) and graduated from the U of Ceylon. He won a Fulbright to the U of Chicago where he earned his MBA and PhD. He teaches operations management at California State U, Fullerton, and is an active consultant. He plays tennis and cricket and promotes Sri Lanka and its interests in the US.

Juan Larrañeta is professor of operations management at the U of Seville. He has published widely on production planning, programming and scheduling systems, and CIM.

Alan S. Manne teaches OR at Stanford U. He specializes in energy policy analysis. His current research interests include modeling the introduction of alternative fuels and analyzing the costs of greenhouse gas limitations. He earned his PhD in economics at Harvard.

Wilson Price teaches OR and technology management at Laval U in Québec City. In addition, he has

been a military engineering officer, a consultant to business and government, and a senior manager with the firm of Price Waterhouse. He has published on programming applications, production management, and communications. His current work is in production management and in information technology.

Michael H. Rothkopf is the area editor for *OR Practice of Operations Research*. After 24 years in private industry and at Lawrence Berkeley Laboratory (where he worked on energy economics), he became professor at Rutgers U in RUTCOR and the School of Business. He has a PhD in OR from MIT.

Luis Sancho graduated from Complutense-Madrid U in physics. He has over 15 years' experience working on computer systems and is now systems engineer at ENSIDESA.

Radhika Santhanam teaches at Florida International U. She holds degrees from Texas A&M and the U of Nebraska. Her research interests include decision support systems, expert systems, and human factors in computing.

Marc J. Schniederjans teaches management at the U of Nebraska-Lincoln. He is the author or co-author of several books and numerous articles on management science.

Patricia Taylor, BSN, MBA, has been involved in healthcare administration at Lourdes Hospital for four years. Prior to that, she managed an office-based medical practice and her own miniature-golf-course business. Her interest in service operations management prompted her to pursue an MBA with an operations management concentration. She is the manager of professional staff services, working with the medical staff and hospital quality assessment program.

Dong-wan Tcha received his degrees from Seoul U and Northwestern. In 1975, he joined the faculty of the Korea Advanced Institute of Science and Technology, where he is now professor of MS. He was a visiting scientist at the IBM Thomas J. Watson Research Center in 1981–1982; a guest scientist at the German Aerospace Research Establishment (DFVLR) in 1986; and a Humboldt fellow at the Technical U of Darmstadt in Germany in 1987. His research is on network analysis, combinatorial optimization, and queuing systems. Recently he has become interested in applying OR techniques to the design and analysis of computer and communication systems.
