With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

Contributors

Lawrence Bodin teaches MS and statistics at the U of Maryland. He earned his PhD in OR from UC Berkeley in 1967. He has written over 60 articles.

C. Guus E. Boender teaches OR at Erasmus U, Rotterdam, where he earned his MS and PhD. His interests include applied stochastic modeling, stochastic optimization, and DSSs.

Jacques Boisvert teaches at the Université du Québec à Trois-Rivières and directs research on biting flies.

Alain Chalifour teaches at the Université du Québec à Trois-Rivières. He is completing his PhD in math.

Alan Kaylor Cline earned his degrees in math from the U of Michigan. After five years at two research facilities, he joined the faculty of the U of Texas, Austin where he holds the David Bruton, Jr. Professorship in Computer Sciences.

Martin Collette supervises DSSs at Southern California Gas Company. He has worked on routing, optimization, and simulation projects. He studied at George Washington U and U California-San Diego.

Teodor Crainic teaches OR at the Université du Québec à Montréal and directs the Centre de recherche sur les transports of the Université de Montréal.

Jacques Desrosiers teaches at the Ecole des Hautes Etudes Commerciales in Montréal and is an active member of two research centers, GERAD and CRT.

Erhan Erkut teaches operations management at the U of Alberta. His research interests are in locating undesirable facilities and routing hazardous materials.

Marie Fiala Timlin studied combinatorics and optimization at the U of Waterloo. She is now a software designer developing a paratransit scheduling and management system for Gandalf Mobile Systems, Inc.

Bruce L. Golden teaches at the U of Maryland and is chairman of the department of MS and statistics. His interests include network optimization, transportation planning, and fisheries management.

Harry King earned his degrees at the U of British Columbia, the U of Toronto, Cambridge, and the U of Texas. He is a theoretical physicist, an applied mathematician, a professional engineer, a partner in D. H. King, Matkowski and Associates, and a sportscar buff.

Laurence Levy is a program manager with DISTINCT Management Consultants. His interests include arc routing, networks, and distribution management.

Jens Lysgaard is a PhD student at Aarhus School of Business Administration interested in computers, in computer vs. human (real) intelligence, and in chess.

Doug MacLean is a professional engineer with an MBA from the U of Alberta. He is a policy specialist with the Alberta Department of Energy, coordinating the transportation energy audit program.

Jim Meyering, a PhD candidate, earned his BS from Eckerd College and his MS from the U of Texas, Austin. He is interested in numerical algorithms and software, computational geometry, and Unix systems software. He supports the Free Software Foundation and the League for Programming Freedom.

William R. Pulleyblank manages the optimization and statistics center at the Thomas J. Watson Research Center, Yorktown Heights, NY. Before joining IBM, he was a chaired professor at the U of Waterloo. He has served as editor of several journals.

Harold K. Rappoport is a program manager at DISTINCT Management Consultants. He received his DSc in OR from George Washington U. His current research concerns vehicle routing and scheduling.

Alexander H. G. Rinnooy Kan studied math in Leiden, economics in Amsterdam, and earned a PhD in math at the U of Amsterdam. He has worked at Dutch and US universities. In April 1991, he became president of the Federation of Netherlands Industry.

Jacques Roy is a professor of logistics and operations management at the Université du Québec à Montréal. He directs the university's research group in transportation management.

Marius M. Solomon teaches at Northeastern U. He was visiting professor at GERAD and CRT in Montréal and also held the City of Lyon chair of computer-aided production management.

Katherine J. Toussaint is a programmer/analyst at DISTINCT Management Consultants. She earned her BS and MA in applied math from the U of Maryland.

André van Vliet is a PhD student in OR at Erasmus U, Rotterdam. His research interest is combinatorial optimization and he works as an OR consultant for ORTEC Consultants.

Julie Wunderlich is an OR specialist at Southern California Gas Company. She earned her BA and MS degrees in MS at CSU-Fullerton. She has worked primarily on route optimization.
