With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

Contributors

Benedo Beltrán teaches at Centro de Enseñanza Técnica y Superior, Mexicali, México. He earned his degrees at the Instituto Tecnológico y de Estudios Superiores de Monterrey. He worked in industry in mechanical design, IE, group technology, and cellular manufacturing systems.

William M. Burnett is senior vice-president, R&D for the Gas Research Institute. His interests are in R&D management, energy policy, and analytical planning systems. His degrees are in physics and aerospace engineering.

Michael Cahn oversees Queues Enforth Development's operations research-based consulting practice and public safety software products business. Building systems that assist NY City's managers to make more productive deployment decisions has been rewarding for him.

A. Dale Flowers is head of operations management, department of OR at Case Western Reserve. He has worked in quality assurance, forecasting, scheduling, facilities layout, inventory control, and CIM.

Earl D. Geyer, Sr., recently retired as chief of the New Haven Fire Department. He received a number of awards for valor and service during his 31-year career as a member of the department.

Louis Goldring is director of macro-economic research and forecasting at Soros Fund Management. He earned graduate degrees at Oxford, the U of Chicago, and Yale.

Bruce Hoadley is executive director of analytical methods and systems at Bellcore. A fellow of the American Statistical Association, he won its 1990 award for the best application paper in statistics.

Edward H. Kaplan holds three academic appointments at Yale. Since 1987, he has been designing and evaluating AIDS intervention programs. He serves pro bono evaluating New Haven's needle exchange program. He has received two awards for his AIDS research.

Paul Katz worked at Bell Laboratories from 1980 to 1983 and since has worked for Bellcore. He has held various technical positions in computer science, OR, and quality assurance.

Richard Larson, cofounder of Queues Enforth Development, teaches at MIT. He has written books and articles on public sector analysis, queuing, logistics, and facility location.

Dominic J. Monetta has served in a number of public policy positions in science and technology, among them managing DoD's science and technology programs. He has held senior positions in government and private industry.

José Pablo Nuño's interests include strategic technological planning, computer integrated manufacturing, simulation and corporate modeling, system dynamics, and expert systems. He was head of OR and simulation at HYLSA, the largest private steel corporation in Mexico.

Elaine O'Keefe has served in health and human services for nearly two decades. She was a VISTA volunteer, a community organizer, a social worker, and a health educator and administrator. She directs the AIDS division within the New Haven Health Department (NHHD) and cofounded the Mayor's Task Force on AIDS.

José Manuel Padillo is doctoral student in IE. His interests include systems simulation, strategic planning for manufacturing, CIM, and manufacturing planning and control systems.

Amir Sadrian directs the operations analysis group at Bellcore. He earned his PhD at the U of Pittsburgh. His interests include integer programming, portfolio and projects selection, procurement, and network robustness and survivability.

Martin Shell's areas of interest include transportation and logistics planning and the development of DSSs to aid in the intelligent allocation of public and private resources.

Dan L. Shunk is director of the ASU CIM Systems Research Department and associate professor of IE. Formerly, he worked for GCA Corporation, International Harvester, and Rockwell.

Barry G. Silverman teaches and is director of the Institute for Artificial Intelligence at George Washington U. He has written many articles, books, and software systems, and is on the editorial boards of *IEEE Expert*, *IJMMIS*, *Interfaces*, and *Knowledge Engineering Review*.

Arthur J. Swersey is professor of OR at the Yale School of Organization and Management. His research and teaching interests are in urban OR, quality management, and production and operations management.
