With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

Contributors

Kenneth J. Carden earned degrees from the U of Cape Town and Rhodes U. He specializes in artificial intelligence, designing knowledge-based systems. He is a consultant with PSI.

Dale W. Clements, former general manager of the Albuquerque Microelectronics Operation (AMO), is now with the Kansas City Division of Allied Signal. In partial fulfillment of an OM course at the U of New Mexico, he developed, validated, and implemented a model-based approach to managing AMO's final nine months of operations.

Terri L. Cravener has an MS degree in nutrition and is a senior research aid in poultry science at Penn State interested in growth regulation and poultry population interactions.

Richard M. Cyert is president emeritus and professor of economics and management at Carnegie Mellon. As president, he strengthened the university's educational programs, expanded its research, brought it to financial solvency, and enhanced its reputation.

Thomas H. D'Alfonso is a PhD candidate in agricultural engineering and OR at Penn State. He has BS degrees in math and psychology and dual title MS degrees in IE/OR and poultry science/OR.

PJ (Riaan) de Jongh earned degrees from the U of Stellenbosch, the U of South Africa, and the U of Cape Town. He is a senior consultant with PSI, specializing in OR and statistical methods and their application in artificial intelligence.

Jacques A. Ferland is professor and chairman in the department of computer science and OR at the U of Montréal. He received prizes in the 1988 and 1990 OR applications competitions from the Canadian Operations Research Society.

Charles Fleurent is a PhD student in computer science and OR at the U of Montréal. He received first prize in the 1990 OR applications competition from the Canadian Operations Research Society.

Donald N. Frey has a lifetime involvement in technology management. He was vice-president of product development for Ford, president of General Cable, and CEO of Bell and Howell industrial companies. At Ford, he was elected to the National Academy of Engineering for innovation in gas turbine design.

Karl B. Manrodt has extensive management experience in the US, Europe, and Canada. He is a doctoral candidate in marketing, transportation, and logistics at the U of Tennessee.

Ido Millet teaches computer information systems at Bentley College. Before earning a PhD at Wharton, he worked as an industrial engineer, systems analyst, and consultant. His research interests include MIS, DSS, EIS, and the analytic hierarchy process.

James A. Pope is dean of the college of business at Shippensburg. He publishes here and there with a recent emphasis on maritime research. He maintains a full schedule of teaching, research, service administration, and competitive masters swimming.

Victor Portougal, born in Odessa, Ukraine, earned his degrees in OR and management from the U of Gorki. From 1979–1991, he headed the department of management at Odessa Polytechnic U. In 1991, he migrated to Australia working at the U of Wollongong before moving to New Zealand.

Richard A. Reid teaches MS and OM at the U of New Mexico. He enjoys modeling real problems in the manufacturing and service sectors when he is not backpacking and fly fishing in the mountains.

Noel A. Rogers has a degree in computer science from the U of the Witwatersrand. He works on systems development projects with PSI and is interested in developing innovative systems for business.

William B. Roush teaches poultry science at Penn State. He is a member of the graduate programs in nutrition and OR. His research interests are in applying OR methods to biological and economic decision making in animal management.

Nada R. Sanders earned a PhD in operations management from Ohio State. She teaches at Wright State and is interested in forecasting, inventory management, and decision making.

Ramesh Sharda is Conoco/DuPont Professor of Management of Technology at Oklahoma State U. His research interests are optimization applications on desktop computers, expert systems, neural networks, and policy analysis.

Robert H. Stock is a nutritional manager at Agway. He is responsible for the formulation and technical service group, which formulates over 6,000 feed formulas at 19 mills.

Marek Wermus teaches operations management at Old Dominion. He has a doctorate in quantitative methods from Wroclaw in Poland. He has published widely and specializes in scheduling problems.
