With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

Contributors

Uday Apte teaches operations management at Southern Methodist U. His research interests and publications are in service operations management and management information systems. He became familiar with the drive-through-window test and results during a case study he conducted during his research on quality management in services.

Roger H. Ballou is currently president of the Travel Services Group, US at American Express. Prior experience includes leading various Travel Services Group business units, American Express UK/Ireland, and Strategic Business Systems Development reengineering. He is a graduate of the Wharton School and Amos Tuck at Dartmouth.

Donald E. Brown is associate professor of systems engineering and associate director of the Institute for Parallel Computation at the U of Virginia. He earned his PhD in industrial and operations engineering from the U of Michigan.

Peter J. Denning chairs the department of computer science, directs the Center for the New Engineer, and is associate dean for computing at George Mason U. A prolific author, he chairs the Association for Computing Machinery publications board and is working on electronic publication.

James R. Freeland is the Sponsors professor of business administration and associate dean for faculty at the Darden School. His interests include just-in-time manufacturing.

Patrick T. Harker is the UPS Transportation Professor and chairman of the department of systems engineering at the U of Pennsylvania. He was a 1991–1992 White House Fellow, serving as special assistant to the director of the FBI, and his hobbies include cycling, woodworking, and theological study.

Christopher Huntley is a PhD candidate at the U of Virginia. His primary interest is the theory and application of pseudo-random heuristic search for large-scale optimization problems. Other interests include parallel computation, computer-aided engineering design, and software development.

Bernard Markowicz earned his PhD from Princeton in civil engineering. He is a senior consultant with Arthur D. Little specializing in transportation operations analysis. Prior to leaving CSX Transportation in 1992, he was director of the firm's OR and freight equipment distribution groups.

Raúl Medina-Mora is vice-president for research and chief scientist at Action Technologies. He was respon-

sible for developing and testing the ActionWorkflow Manager system. He earned a PhD in computer science and software engineering at Carnegie-Mellon.

Ceyhan Ozgur is an assistant professor of decision sciences at Valparaiso U. His research and teaching interests are in statistics, quality control, operations management, and management science.

Charles Reynolds is senior director of franchising at KFC. He holds an MBA from the Cox School of Business. He has over 23 years of experience in the quick service restaurant industry and is interested in the practical application of TQM. He led the drive-through-window speed-of-service improvement test described.

Scott E. Sampson is an assistant professor of operations management at Florida State U. His research concerns methods for using customer feedback to improve quality in the service sector.

David Sappington earned his degrees from the U of Virginia. His interests include building software that applies various optimization techniques to specific industrial and military problems. When time and weather permit, he enjoys canoeing in Virginia's whitewater.

Sandra E. Strasser is an assistant professor of decision sciences at Valparaiso U. Her research and teaching interests are in statistics, quality control, operations management, and transportation.

Elliot N. Weiss is an associate professor of business administration at the Darden School. His interests include capacity planning and scheduling problems for service sector companies.
