Contributors

Steve Clemens is vice president of interactive development for HealthStream, the leader in the newly emerging online healthcare education market, where he manages all of the company's Internet/intranet content development efforts. He holds an MBA from Vanderbilt U.

Anita W. Elbers studied applied mathematics at the U of Twente and did her practical training at the U of South Australia. She now works on scheduling problems with P&O Nedlloyd, one of the world's largest shipping lines.

Narasimhaiah Gorla is currently at the Hong Kong Polytechnic U, and taught at Cleveland State U. He has degrees from the Indian Institute of Management and the U of Iowa, Iowa City.

Julia L. Higle is professor of systems and industrial engineering at the U of Arizona. She has a PhD from the U of Michigan, and has been involved in developing algorithmic methods for large scale stochastic linear programs.

Jurjen S. Hooghiemstra is project manager in Railned's innovation department. He managed the development of the DONS system.

Timothy Keiningham is vice president at Marketing Metrics, Inc. He specializes in service marketing. He earned his MBA at Vanderbilt U.

Murat Köksalan is a professor in the industrial engineering department, Middle East Technical U. His interests include production management applications, multiple criteria decision making, and simulation.

Steve Krehbiel is the chief information officer for the Summers Rubber Company. He is working on his doctorate at Cleveland State U.

Leo G. Kroon is a logistics consultant at NS Reizigers. He is also a part-time associate professor of logistics at Erasmus U in Rotterdam.

Russ Labe is a vice president and senior consultant in the Management Science Group at Merrill Lynch. He holds a MEng degree in OR from Cornell.

Raj Nigam is the chief scientist and director of the Management Science Group at Merrill Lynch. He earned his PhD in OR from UC-Berkeley.

Michiel A. Odijk works for Ortec Consultants, a software company that develops decision support systems. He recently completed his PhD thesis at Delft U of Technology.

David M. Panton teaches at the U of South Australia

and engages in a variety of OR activities, including personnel scheduling, scheduling in the manufacturing environment, street networks, and military applications.

Michael Pidd teaches management science and heads the department of management science at the U of Lancaster. He wrote *Computer Simulation in Management Science*, now in its fourth edition.

Roland T. Rust is Madison S. Wigginton Professor of Management and director of the Center for Service Marketing at Vanderbilt U.

Marc Salomon teaches OR at the Katholieke Universiteit Brabant. He is interested in using quantitative models and methods to solve large strategic problems.

Suvrajeet Sen is professor of systems and industrial engineering at the U of Arizona. His research is in the theory and applications of large scale optimization algorithms.

Steve Spence is a vice president in the Merrill Lynch Management Science Group. His degrees are from Bucknell U, Case Western Reserve, and Rutgers.

Haldun Süral earned his PhD from the industrial engineering department, Middle East Technical U. His research interests are production management and combinatorial optimization.

Anthony Zahorik is a vice president at the Burke Institute, specializing in professional seminars on quantitative methods and their practical applications. He served on the faculty of Vanderbilt U.

Peter J. Zwaneveld works for the consultant organization TNO on traffic and transportation projects. He completed his PhD thesis at Erasmus U in Rotterdam.
