Contributors

Anthony J. D'Alessandro manages the Supply Chain Center within Rohm and Haas. During the period the paper covers, he was a consultant in the center, specializing in the demand management aspects of manufacturing resource planning (MRP II).

Alok Baveja teaches MS at Rutgers. His research focuses on decision aids for managers, policy makers, and administrators. He cofounded a Peace-Corps-style, not-for-profit organization that provides technical assistance to rural communities in developing countries.

James C. Felli earned his degrees from Northwestern U. He teaches at the Defense Resources Management Institute at the Naval Postgraduate School. His interests include simulation, decision analysis, and the value of information in decision problems.

Antoine Gautier consulted with Québec's Ministry of Natural Resources, teaches OR at U Laval, is a member of the CRAEDO research team on decision aid, and is part of the MONADE scientific computing laboratory.

Bruce R. Gritton develops strategic programs to take advantage of information technologies. He has worked in organizational and community collaborations in ocean science, aerospace, computing, and education.

David A. Johnston teaches at York U, Toronto. His research is on supply-chain and innovation management. Past research concerns transfer of process improvement and decision support for manufacturing decisions.

Randall E. Kochevar earned his PhD at UC Santa Barbara, studying deep sea animals. He led the deep sea R & D team at Monterey Bay Aquarium and is in charge of electronic outreach.

Bernard F. Lamond consulted with Québec's Ministry of Natural Resources, teaches OR at U Laval, directs the CRAEDO research group on decision aid, and is part of the MONADE scientific computing laboratory.

Larry J. LeBlanc teaches OM and IT at Vanderbilt U. His interests include OR models for routing and topological/capacity design of telecommunication and logistics networks, as well as international operations and manufacturing strategies.

Jonathan D. Linton teaches management at Polytechnic U, Brooklyn, New York. His research concerns

the interface of the management of operations, technology, and the natural environment. He writes management-related articles for *Circuits Assembly* magazine.

Lawrence W. Maguire worked for the Norfolk and Western Railway, the Detroit, Toledo and Ironton Railroad, and the Grand Trunk Western Railroad. He is assistant director for analysis and technical support for TTX's Automotive Distribution Services.

Daniel Paré is a junior civil servant with the Québec provincial government's Ministry of Natural Resources who studied the evaluation of prices and demand for wood-chip fiber.

Victor Portougal teaches operations management at the U of Auckland. He has degrees from Moscow and Kiev (PhD and Doctor of Economics) and has consulted for various companies developing and implementing production planning systems.

Dale K. Randels, Jr. heads the Nashville office of Heery International. He is responsible for operations and business development in Tennessee and Kentucky, overseeing Heery's staff on several programs including the Nashville Public Schools' \$550 million program.

David Robb teaches at the U of Auckland. He has degrees from the U of Calgary and has worked and consulted for various companies. He is married with four young children. He enjoys reading business strategy and Puritan theology (seldom concurrently).

François Rouleau is a senior civil servant with Québec's Ministry of Natural Resources who studied prices and demand for wood-chip fiber in the provincial market. He is the government's representative at round tables where people representing public and private interests discuss the dynamics of this market.

Hanif D. Sherali teaches engineering at Virginia Polytechnic Institute and State U. He develops theory and algorithms in optimization and applies them to real-world problems, such as transportation problems, coal mining and distribution schemes, managing air traffic, and planning naval battle strategies.

T. K. (Ken) Swann is program administrator at Heery International's Nashville office. He has been a project engineer for an industrial contractor, project representative for an engineering firm, and project manager for a large general contractor. He has managed multiple projects simultaneously.
