With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

Contributors

Eric Bibelnicks is a senior consultant for IBM's Global Services Division. He specializes in applying mathematical optimization and data-mining techniques to help companies build loyal and profitable customer relationships. He earned degrees from Woford College and Clemson U.

Mark T. Bullock is a senior member of the Business Optimization Group at Level (3) Communications. He has worked as an operations research practitioner in diverse roles and a variety of industries. A recent refugee from the Midwest, in his spare time he can be found struggling for oxygen on his road bike in the hills around Boulder.

E. Rod Butchers was born in Auckland, New Zealand and has been employed by Air New Zealand for the last 25 years. He is responsible for crew planning for the Air New Zealand Group and also manages a team of six OR graduates.

Deb Campbell has worked at Fingerhut for 15 years. As project leader for Mail Stream Optimization, she coordinated efforts among outside consultants, internal IT support, marketing areas, and management. She has degrees from St. Olaf College and attended Iowa State U and the College of St. Thomas.

Kan Chang supervises programmers at Metron. His skills demonstrated at Metron exceed those of the average employee; he is the 1999 winner of Metron's coveted trophy for "most creative dancer" after showing off his moves at the annual Christmas party.

Kenneth Chelst teaches in the Department of Industrial and Manufacturing Engineering at Wayne State U. His interests lie in applying decision and risk analysis to engineering management decisions. He heads a project that developed six OR modules used in high schools to motivate students to learn algebra.

Harlan P. Crowder is a senior scientist at Hewlett-Packard Laboratories. His research interests include using information and decision technologies to solve complex economic problems.

Paul Day is an OR analyst for Optimal Decision Technologies. He has a Bachelor's of Engineering (first class honours) and a PhD in Engineering Science from the U of Auckland. He has been involved in the development and implementation of several optimization systems for industry scheduling problems, particularly in the airline industry.

Randy Erdahl is director of business intelligence at Fingerhut. He manages 23 statistical analysts and was responsible for the design, development, and implementation of segmentation systems for many Fingerhut applications.

Andrew Goldie has a MEng in OR from the U of Auckland. He has worked as an operations analyst for Coca-Cola in New Zealand. He designed and developed for Air New Zealand a crew-pairing optimizer that models augmented crew complements, and has developed other crew-pairing applications. He is a director and cofounder of Optimal Decision Technologies Limited.

Michael Haydock is a senior executive in IBM's Global Services Division. He leads the company's efforts in business intelligence, customer relationship management, Web selling and e-commerce, interactive branding and design, and pervasive computing.

Ken Howard has engineered traffic-management systems for over 15 years. He enjoys most sports and creative cuisine, and can often be seen roller-blading along the River Charles.

Doug Johnson is director of customer-list marketing for the Fingerhut Catalog division. He has worked for Fingerhut for 18 years, starting out in the Finance Department for three years before moving into Marketing. He was the Marketing lead on the mail-stream-optimization project and was a leader in converting Fingerhut to a revolving-charge credit plan.

Elena Katok teaches MIS at Penn State. She spent 1997–1998 at the Colorado School of Mines. She holds degrees from UC-Berkeley and Penn State. She has published widely.

Jeffrey Lockledge teaches in the Department of Industrial and Manufacturing Engineering at Wayne State. His interests include the use of design structure matrices and IDEF methods in engineering and software design and the application of human-computer interface design techniques to structuring Web sites.

Peter Lyon is manager of the PROFIT team for the IBM Microelectronics Division. Prior to the creation of the PROFIT team six years ago, he held a variety of management and technical positions within IBM in various SCM areas over his 30 year career. He has degrees from the U of Vermont.

Jeff Meyer is a director and cofounder of Optimal

Decision Technologies Limited. He has been actively involved in the design and implementation of the air-crew scheduling systems for Air New Zealand, starting in 1988. He has a degree in engineering science from the U of Auckland, and is interested in parallel computation.

Dimitrios Mihailidis did undergraduate work in Greece and earned his PhD in OR from Wayne State. He currently works at the Technological Educational Institute of Crete and is coordinating the development of a new academic department.

Stephen Miller was born in Canterbury and earned his degree in engineering science at the U of Auckland. He has applied OR in the telecommunications, medical, dairy, and airline industries. He is currently working for Air New Zealand as OR team leader.

R. John Milne is an engineer at IBM Microelectronics. He earned BS and MEng degrees in OR from Cornell and a PhD in decision sciences and engineering systems from RPI.

Rick Oiesen grew up in the barren badlands of Texas and is now devoted to the wildflowers of New England. He spends hours tramping the ditches looking for weeds. His favorite year is 1850, and his favorite color is blue.

Robert Orzell is a senior logistics engineer at IBM Microelectronics. He earned BS and MS degrees in math at the U of Vermont. He has been applying LP technology and heuristics in planning semiconductor manufacturing since the mid-80s.

Alex Prezbienda is a prototype-vehicle test and development supervisor at Ford. He has worked on prototype planning, strategic product planning, finance, testing, and vehicle systems engineering. He earned his BSE from the U of Michigan. He is happily married to the best wife a guy could ever have.

Robert Rice is an advisory business analyst at IBM Microelectronics. He earned BS and MS degrees in business at St. Michael's College. He joined the company in 1978 and works on e-business.

David Ryan is professor of OR at the U of Auckland. He has degrees in mathematics and numerical analysis from the U of Otago and the Australian National U. Besides his interest in the mathematics and solution methods for set partitioning optimization models, he has worked extensively on industrial and business applications of OR and optimization in England and New Zealand.

Amanda Scott is an OR analyst at Air New Zealand. She has been with the company since 1996. She has a Bachelor's of Commerce in operations management, a BS in statistics, and a Master's of OR (first class

honors) from the U of Auckland.

Lara Shisler is a senior analyst in charge of CDM prototype-operations support at Metron. When she has free time she works on painting projects or preserves Shisler history in scrapbooks. You might also find her at local Jimmy Buffet concerts.

John Sidelko is a product design manager in body engineering for the Ford Amazon Platform. Since 1988 he has held positions in body engineering, manufacturing, purchasing, and design. He earned a BSME from Michigan State and an MSIE from Wayne State.

Midori Tanino traveled thousands of miles from Japan for the privilege of working at Metron. Her spare time is spent scouting out the best Beanie Baby items and Pokemon trading cards for her two young daughters.

William Tarantino is a lieutenant colonel with 19 years in the US Army, nine as an OR analyst. He has degrees from West Point, the Naval Postgraduate School, and the Colorado School of Mines.

Ralph Tiedeman retired after 20 years in the Air Force and started working for Jeppesen in 1994. He is a graduate of the U of Nebraska-Omaha. He is the principal production planner in Jeppesen's OR group.

Chris Wallace is completing a PhD at the U of Auckland. He works part time for Air New Zealand in the area of crew schedule optimization. He has a BSc(Hons) degree in OR from the U of Canterbury, New Zealand, where he worked as a research assistant for several years.

Michael Wambsganss oversees the Aviation Transportation Division at Metron. An enthusiastic contender in the past two annual Metron dance contests, he has failed to take home a trophy. He is a member of the Metron softball team.
