Contributors

G. Edgar Bennett is a retired Navy Commander Supply Corps officer currently employed as a civil servant for the US government. He is the director of the resource-management division for the Operational Support Office. His background is in financial management and logistics, and he is a level III member of the Defense Acquisition workforce. He runs, on average, 40 miles a week and enjoys mountain biking in West Virginia.

Gerald G. Brown is a distinguished professor of OR at the Naval Postgraduate School. Applications in the public and private sectors motivate his research in optimization.

Ray L. Davis is the supply-chain-planning project manager at the Clorox Company. He has spent 11 years developing and implementing business system solutions. His current focus is planning and scheduling systems.

Robert F. Dell is associate professor of OR at the Naval Postgraduate School. He has applied optimization to a variety of problems in the military and private sector.

Richard H. Duff directs application development support at INSIGHT, Inc. He earned his degrees at Drexel U and the Naval Postgraduate School. He is a retired Marine helicopter pilot. His interests include data modeling and database applications, development tools, and distributed computing.

Joseph A. Engelbrecht is a principal with Toffler Associates. He is a strategist and a futurist with 25 years experience in leadership, management, strategy formulation, negotiations, and advising aimed at strategic change and success. He is undisciplined, having earned a BA in East Asian history and Chinese, an MA in public administration, a master's of philosophy, and a PhD in political science from Columbia U.

Andrew J. Higgins has a PhD from the Queensland U of Technology. He is an OR scientist at the Commonwealth Scientific and In-

dustrial Research Organisation (CSIRO) interested in applying optimization techniques to transportation and agricultural problems and in developing new heuristic solution techniques.

George Liberopoulos earned his degrees from Cornell and Boston U. Since 1996, he has taught production management at the U of Thessaly in Volos, Greece. His research interests are operations management, particularly the analysis and control of manufacturing systems.

Gregory S. Parnell teaches systems engineering at the US Military Academy at West Point and is principal scientist of Toffler Associates. He earned a PhD from Stanford U. He teaches courses on decision analysis, systems engineering, engineering management, and operations research. His current consulting and research focus on helping public and private organizations create future value.

Richard Szafranski is the managing partner of Alvin and Heidi Toffler in Toffler Associates. He is an internationally recognized futurist and analyst of business, society, and competitive enterprises. He directed two major, multiyear, scenario-based alternate futures planning studies for a large government enterprise. He earned degrees at Florida State U and Central Michigan U.

Craig A. Tovey was taught by his parents, both Holocaust survivors, to plunge into many activities with zest. He loves music, country dancing, books, math, cooking, and chocolate, and he enjoys these with his wife and four terrific children. As a professor at Georgia Tech, his current interests are algorithm analysis, robot motion planning, and animal group behavior.

Panagiotis Tsarouhas earned his diploma of mechanical engineering from the U of Naples Federico II in 1991. Since 1994, he has been technical director at Chipita International, heading production and maintenance operations in two of Chipita's plants in Lamia, Greece.
