Contributors

Paul J. Brewer serves on the faculty of the School of Business, Hong Kong U of Science and Technology. He is a founding member of HKUST's Center for Experimental Business Research. His interests range from the development and laboratory testing of new forms of auctions and markets to the role of human intelligence in markets and the study of "intelligent" robot agents.

Gary Charness teaches economics at the U of California, Santa Barbara. He has a PhD in economics from UC Berkeley and has published many papers. His research generally concerns social influences on economic decision making and includes ideas from other social sciences, such as psychology and sociology. He has experience as an options trader, an importer, a real estate broker, and an arbitrator.

Kay-Yut Chen is a senior scientist in the software technology lab at HP Labs. He joined HP Labs in 1994 after earning his PhD in economics from Caltech. His primary research interests are experimental economics, applied game theory, and information economics.

Rachel Croson earned a PhD in economics from Harvard in 1994 and teaches at the Wharton School of the U of Pennsylvania. In research, she focuses on experimental economics and experimental investigation of bargaining and negotiating behavior, cooperation and contribution to public goods, behavior in markets, and supply-chain management. She is a competitive SET player.

Karen Donohue earned MS and PhD degrees in industrial engineering from Northwestern U and teaches at the Carlson School of the U of Minnesota. Her research interests include analytical modeling of problems in supply-chain management, collaborative forecasting and planning, and manufacturing-system design.

John O. Ledyard teaches economics and social science at Caltech. He is a fellow of the Econometric Society and of the American Academy of Arts and Sciences. He enjoys sailing and softball.

Joseph Martinich teaches operations management at the U of Missouri–St. Louis. His primary research interests are in the integration of facility location and production technology decisions, lean production, and the environmental effects of business operations. A secondary interest is the application of operations research to sports. He practices what he preaches by playing volleyball and running track at Senior Olympics competitions.

Mark Olson earned a PhD from Caltech. His interests include statistics, institutional and economic design, and network optimization. He also finds music and the plays of Samuel Beckett interesting.

Charles R. Plott is the Edward S. Harkness Professor of Economics and Political Science at Caltech. He is the founder and director of Caltech's Laboratory for Experimental Economics and Political Science. His interests range from the very applied problems associated with the design and implementation of new forms of electronic markets to the most basic scientific principles of economics, political science, and individual decisions.

David Porter is a professor and IFREE Gilder fellow at the Interdisciplinary Center for Economic Science at George Mason U. Previously he was a senior research scientist at the U of Arizona, visiting associate in economics at Caltech, and a senior research scientist at the Jet Propulsion Laboratory. His main research interest is economic engineering design. He was the principal designer of the Cassini Resource Exchange that allowed scientists on the mission to Saturn to barter resources over the Internet. The project won a Ford Foundation prize for innovations in American government.

Jason F. Shogren is the Stroock Distinguished Professor of Natural Resource Conservation and Management and a professor of economics at the U of Wyoming, Laramie. His research focuses on the behavioral underpinnings of private choice and public policy, especially for environmental and natural resources. Before returning to his alma mater, he taught at Iowa State and Yale. In 1997, he served as the senior economist for environmental and natural resource policy on the Council of Economic Advisers in the White House.

Joseph A. Swanson is president of Joseph Swanson and Co. He earned BS and PhD degrees from the U of Wisconsin–Madison. He is an adjunct professor of finance at the Kellogg School of Management, Northwestern U and taught at the U of Iowa and Northwestern.

David P. Torma is vice president of Joseph Swanson and Co. He earned a BS at the US Merchant Marine Academy and an MBA at the Kellogg School of Management, Northwestern U. He has been employed in the maritime and airline industries, most recently at United Air Lines.

Jürgen Weiss, a native of Stuttgart, Germany, earned degrees at Columbia and Harvard. Before starting his own consulting practice, he was a consultant with Booz Allen and Hamilton and the Brattle Group. He is married to his wife Martha and her dance company, Snappy Dance Theater, of which he is executive director. He is an adamant runner, rock climber, squash player, wine drinker, and arbitrageur of life between Europe and the US.
