Contributors

Glorian L. Berk has spent most of her career in marketing and finance at TDS, AOL Time Warner's magazine retail division. She is vice president of financial compliance. She loves to travel; she visited her last continent in 2002 when she toured China.

Jeffrey A. Blatt is chief operating officer at TDS, AOL Time Warner's magazine retail division. He has been with Time Inc. for 15 years in direct marketing and retail marketing. He earned degrees at Dartmouth and Columbia.

Sam Blyakher is a principal at Accretive Technology Partners, LLC. He first worked on print order management at McKinsey and Company. He graduated summa cum laude from the U of Pennsylvania, earning degrees in finance and accounting from the Wharton School and a degree in international relations from the College of Arts and Sciences.

Lawrence Bodin earned his PhD and MS at the U of California, Berkeley, and his AB in mathematics from Northeastern. He is Professor Emeritus in the Robert H. Smith School of Business at the U of Maryland in College Park. He has consulted for numerous organizations, including Federal Express, United Parcel Service, and RouteSmart Technologies. Prior to joining the university, he worked for IBM and Network Analysis Corporation and taught at SUNY, Stony Brook. His research concerns network analysis, vehicle routing, and large-scale mathematical modeling.

James Corner teaches OR/MS at the U of Waikato and is the head of his department. He earned his PhD from Arizona State U in 1991 and has been teaching at Waikato since. Earlier, he held various management positions at US Steel (now USX) and Texas Instruments. Most of his current research focuses on decision analysis.

Patricia Doyle Corner teaches strategic management at the U of Waikato. She earned her PhD from Arizona State U in 1993. Her research interests are strategic leadership and small- and medium-sized enterprises. She was the 2001 recipient of the Waikato Management School's Outstanding Teacher Award.

A. T. Ernst has been with CSIRO since 1995 engaging in a mix of consulting and strategic research. His research interests include scheduling and rostering using metaheuristics and mathematical programming techniques.

Jianli Hu is pursuing a PhD in decision sciences at Washington State U. She holds an MA from Washington State and a BS from Beijing Institute of Clothing Technology. Her research interests include inventory control and supply-chain management.

Martin A. Koschat is senior vice president for information management at TDS, AOL Time Warner's magazine retail division. A mathematician and statistician by training with doctoral degrees from the U of Vienna and the U of Wisconsin, Madison, respectively, he formerly taught marketing at Yale's School of Management and New York University's Stern School of Business.

Nancy M. Kunz is director of market research and analysis at TDS, AOL Time Warner's magazine retail division. Her research concerns print order optimization. She has been with the company

for five years. She earned a PhD in measurement and statistics at Columbia.

Michael H. LePore is an independent consultant in Washington State. He previously worked as a research manager at TDS, AOL Time Warner's magazine retail division. He earned graduate degrees at the U of Arizona and the U of Rochester.

R. G. J. Mills started the OR group at the Australian Commonwealth Scientific and Industrial Research Organisation (CSIRO) after a career at the U of South Australia. He developed a number of optimization and simulation models in the service, manufacturing, and mining industries for such clients as the Australian Tourist Commission, the Australian Institute of Petroleum, and Mt Isa Mines.

Charles L. Munson is an assistant professor in the department of management and decision sciences at Washington State U. His PhD and MSBA in operations management and his BSBA, summa cum laude, in finance, are from Washington University's John M. Olin School of Business. He formerly worked as a financial analyst for Contel. His research interests include supply-chain management, quantity discounts, and international operations management.

Aaron Panken is dean of the New York campus of Hebrew Union College—Jewish Institute of Religion. Rabbi Panken teaches rabbinic literature and is involved in the Reform movement, speaking to congregations throughout the US. He earned a degree in electrical engineering at Johns Hopkins and expects to complete his PhD in Hebrew and Judaic Studies at New York U in 2003. His research concerns nascent Jewish law during the Rabbinic Period, from 70-600 CE, and the intersection between science and religion.

Meir J. Rosenblatt (deceased) was a professor of industrial engineering and management at the Technion—Israel Institute of Technology and the Myron Northrop Professor at Washington U in St. Louis, Missouri. He earned a BS from Ben-Gurion U/Technion and MS and PhD degrees from Stanford. He published widely.

Madjid Tavarna chairs the management department at La Salle U and directs the Center for Technology and Management. He was a faculty fellow in aeronautics and space research at NASA—Kennedy Space Center for two years developing a group-decision-support system for the space shuttle program. More recently, he spent two years at NASA's Johnson Space Center automating the station duty officer operations for the international space station at mission control and designing a decision support system to evaluate several mission operations architectures for the human exploration of Mars. He earned an MBA from La Salle, a PhD from the American U in London, and a post-doctorate from the Wharton School of the U of Pennsylvania.

P. Welgama worked with CSIRO across many industries to solve strategic and tactical decision-making problems, often developing complex simulation models. In 1999, he joined the Rio Tinto technical services group to focus on decision support for the mining sector.
