With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

ABOUT OUR AUTHORS

Terence Barron ("Optimal Information Structures for the Seller of a Search Good") is Assistant Professor of Computers and Information Systems at the William E. Simon Graduate School of Business Administration, University of Rochester, Rochester, New York. His research interests are primarily in the economics of information and information systems with a particular focus on economics issues in systems analysis and design. He is also the coauthor, with George Diehr, of two BASIC programming textbooks.

James C. Brancheau ("The Adoption of Spreadsheet Software: Testing Innovation Diffusion Theory in the Context of End-User Computing") is Assistant Professor of Information Systems at the University of Colorado in Boulder. He holds a Ph.D. in MIS from the University of Minnesota and has 17 years of experience in the information systems field. He has held a wide range of technical, managerial, and consultative positions and has published in leading information systems journals such as *MIS Quarterly*, *CIO Journal*, and *Data Base*. Dr. Brancheau is currently conducting research on the management of information systems and the diffusion of emerging information technologies.

Dennis F. Galletta ("A Role Theory Perspective on End-User Development") is Assistant Professor of Business Administration at the Joseph M. Katz Graduate School of Business at the University of Pittsburgh. He received his Ph.D. in Management Information Systems from the University of Minnesota, and his M.B.A and B.S. degrees from Gannon University. He has published MIS articles in *Decision Sciences* and *Database*, and is the author of *COBOL with an Emphasis on Structured Program Design* published by Prentice-Hall. His research interests include human-computer interaction, user training, and end-user computing. He recently served as editor of *SIGOIS Bulletin*, the newsletter of the ACM Special Interest Group on Office Information Systems.

Robert L. Heckman ("A Role Theory Perspective on End-User Development") is a doctoral candidate in Information Systems at the Joseph M. Katz Graduate School of Business at the University of Pittsburgh. He has held a number of senior management positions in the information services industry, most recently serving as Vice President and General Manager, Software Products Division, for the Mellon Bank Datacenter Group. His research interests include end-user computing, social and organizational impacts of IS, software development productivity, and IS role structures.

Albert L. Lederer ("The Impact of the Environment on the Management of Information Systems") is an associate professor at the School of Business Administration of Oakland University and acting chair of the Department of Decision and Information Sciences. His Ph.D. is in Industrial and Systems Engineering from the

Ohio State University. Dr. Lederer spent over ten years in industry in information systems positions. His articles have appeared in the *MIS Quarterly*, *Journal of MIS*, *Information and Management*, *Sloan Management Review*, *Journal of Systems Management*, *Interfaces*, and several other journals. His research and consulting interests include the planning and implementation of management information systems.

.....

Aubrey L. Mendelow ("The Impact of the Environment on the Management of Information Systems") is an Associate Professor at the Graduate School of Management at Kent State University. He holds a doctorate in Business Leadership from the University of South Africa. His current research interests lie in exploring issues related to the strategic deployment of the information resource. His articles have appeared in the *MIS Quarterly*, *Journal of MIS*, *Information and Management*, *Long Range Planning Journal*, and several other journals. Dr. Mendelow spent ten years in the data processing and retailing industries, and now teaches and consults in the areas of strategic management and information systems.

.....

Aditya N. Saharia ("Optimal Information Structures for the Seller of a Search Good") is Assistant Professor of Information Systems at the University of Washington. Before coming to the University of Washington, he was a research associate in Computer and Information Systems at the Graduate School of Management at the University of Rochester. He received his Ph.D. (in Physics) from Carnegie Mellon University and M.B.A. from University of Rochester. His research interests include information economics, distributed database systems, and artificial intelligence. His work has appeared in *Physics Letters*, *Physical Review*, *Nuclear Physics*, and *ACM Transactions on Database Systems*. He is a member of ACM and TIMS.

.....

Kar Yan Tam ("Automated Construction of Knowledge-Bases from Examples") is Assistant Professor of Information Systems at the Graduate School of Business, University of Texas at Austin. He received a B.S. in Mathematics and Computer Science from University of Illinois (Urbana) in 1984, an M.S. in Computer Science in 1987, and a Ph.D. in Information Systems in 1988, both from Purdue University. His current research interests include automated knowledge acquisition tools for expert systems development, decision support aids for manufacturing and financial applications.

.....

James C. Wetherbe ("The Adoption of Spreadsheet Software: Testing Innovation Diffusion Theory in the Context of End-User Computing") is internationally known as a dynamic and entertaining speaker, author, and leading authority on the use of computers and information systems to improve organizational performance and competitiveness. He is particularly appreciated for his ability to explain complex technology in straightforward, practical terms that can be strategically applied by both executives and general management. He is the author of 12

highly regarded books including *Executives' Guide to Computer-Based Information Systems* (Prentice-Hall), *The Management of Information Systems* (McGraw-Hill), and *Systems Analysis and Design* (West Publishing), and is publisher of the *MIS Quarterly* and editor of *Data Base*. Quoted often in leading business and information system journals, Dr. Wetherbe has also authored over 100 articles, writes regular columns, and serves as a consulting editor for publishing companies.

ACKNOWLEDGEMENT OF REVIEWERS

We would like to thank the many reviewers who devoted their time, energy, and expertise to INFORMATION SYSTEMS RESEARCH, and whose dedicated efforts play a key role in ensuring the quality of the journal. The following individuals served as reviewers of manuscripts decided upon in 1989.
