With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

About Our Authors

Gediminas Adomavicius (“Toward Comprehensive Real-Time Bidder Support in Iterative Combinatorial Auctions”) is currently Digital Technology Center Assistant Professor of Information and Decision Sciences at the Carlson School of Management, University of Minnesota. He received his Ph.D. in computer science from New York University in 2002. His research has been published in several leading information systems and computer science journals, including *Information Systems Research*, *ACM Transactions on Information Systems*, *IEEE Transactions on Knowledge and Data Engineering*, and *Data Mining and Knowledge Discovery*.

Laku Chidambaram (“Is Out of Sight, Out of Mind? An Empirical Study of Social Loafing in Technology-Supported Groups”) is the W.P. Wood Professor of MIS at the Price College of Business, University of Oklahoma (OU). He has a Ph.D. from Indiana University and an MBA from the University of Georgia. Prior to joining OU, he held tenured faculty appointments at Indiana University and the University of Hawaii. His primary area of research focuses on the intersection of technology and teams. His articles have been published in such journals as *MISQ*, *JMIS*, and *JAIS*. He has also coedited a book, *Our Virtual World*. He serves on the editorial boards of *ISR*, *e-SJ*, and *GDN*.

Chrysanthos Dellarocas (“Reputation Mechanism Design in Online Trading Environments with Pure Moral Hazard”) is an assistant professor at the R. H. Smith School of Business, University of Maryland. He holds a Ph.D. in computer science from MIT and has previously taught at MIT’s Sloan School of Management. His work studies online “word-of-mouth” communities and their impact on marketing, product development, and public opinion formation. He also studies online reputation mechanisms as a low-cost, trust-building device in electronic markets.

Esther Gal-Or (“The Economic Incentives for Sharing Security Information”) is the Glenn E. Stinson Chair in Competitiveness, Professor of Business Administration and Economics, and Associate Dean for Research at the Katz Graduate School of Business, University of Pittsburgh. She received her Ph.D. in managerial economics and decision sciences from Northwestern University.

Her work has been sponsored by the National Science Foundation and has been published in economics and business journals such as *Econometrica*, *Management Science*, and the *RAND Journal of Economics*.

Anindya Ghose (“The Economic Incentives for Sharing Security Information”) is an assistant professor of information systems at the Stern School of Business, New York University. He received his Ph.D. in information systems from GSIA at Carnegie Mellon University in 2004. His past work has analyzed competition between new and used goods in electronic markets, and the profitability of personalized pricing. His current work examines product proliferation in IT markets, and buyer-seller networks in electronic secondary markets. His research is forthcoming in *Management Science*, *ISR*, and *JMIS*.

Alok Gupta (“Toward Comprehensive Real-Time Bidder Support in Iterative Combinatorial Auctions”) is Carlson School Professor of Information and Decision Sciences, University of Minnesota. He received Ph.D. in MSIS from the University of Texas at Austin in 1996. His research has appeared in several leading journals, including *Management Science*, *ISR*, *CACM*, *JMIS*, *Decision Sciences*, *Journal of Economic Dynamics and Control*, *Computational Economics*, and *DSS*. He received a prestigious NSF CAREER award in 2001 for research on online auctions. He serves on the editorial boards of *Management Science*, *ISR*, and *DSS*.

Zhengrui Jiang (“Lying on the Web: Implications for Expert Systems Redesign”) is currently a Ph.D. candidate majoring in information systems at the University of Texas at Dallas. He received his MS in computer science and MBA from the University of Louisiana at Lafayette. His research interests include knowledge management, software engineering, and the diffusion of information goods.

Natalia Levina (“Collaborating on Multiparty Information Systems Development Projects: A Collective Reflection-in-Action View”) is an assistant professor at the New York University Stern School of Business. Her current research focuses on understanding how people collaborate across professional, organizational, and geographical boundaries on outsourced IS development and

maintenance projects. She has received a Ph.D. in information technology from MIT and a master's in mathematics from Boston University. She is also a recent recipient of an Alfred P. Sloan Industry Studies Fellowship, supporting her work on offshore outsourcing.

Vijay S. Mookerjee ("Lying on the Web: Implications for Expert Systems Redesign") is Professor and Area Coordinator of Information Systems and Operations Management at the School of Management, University of Texas at Dallas. He holds a Ph.D. in management, with a major in MIS, from Purdue University. His current research interests include optimal software development methodologies, storage and cache management, and the economic design of expert systems and machine learning systems. He has published in and has articles forthcoming in several archival information systems, computer science, and operations research journals. He serves on the editorial boards of *Management Science*, *Information Systems Research*, *INFORMS Journal on Computing*, *Operations Research*, *Decision Support Systems*, *Information Technology and Management*, and the *Journal of Database Management*.

Sumit Sarkar ("Lying on the Web: Implications for Expert Systems Redesign") is Professor of MIS in the School of Management and Academic Director for the International Center on Decision and Risk Analysis at

the University of Texas at Dallas. He received his Ph.D. from the University of Rochester. His current research addresses the management of data and knowledge in business environments. His research has appeared in *Management Science*, *ISR*, *ACM TODS*, several *IEEE Transactions*, *INFORMS Journal on Computing*, *Decision Sciences*, and *Decision Support Systems*, among others. He serves in several editorial capacities for *Information Systems Research*, *Management Science*, and *Information Technology and Management*, and he has served as a program chair for *ICIS* and *WITS*.

Lai Lai Tung ("Is Out of Sight, Out of Mind? An Empirical Study of Social Loafing in Technology-Supported Groups") is an associate professor in the Nanyang Business School at Nanyang Technological University, Singapore. She received her Ph.D. and MBA from Indiana University. Her current research interests include the study of virtual communities, e-government, and online trust. Her papers have been published in journals such as *CACM*, *DSS*, *Information and Management*, and the *Journal of Strategic Information Systems*. She serves on the editorial boards of *Electronic Commerce Research and Applications*, the *e-Service Journal*, and the *Journal of Global Information Management*. She has served as a consultant for both the private and public sectors in Singapore.
