With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

## About Our Authors

**Ozer Asdemir** (“Understanding the Impact of Collaboration Software on Product Design and Development”) is an assistant professor of accounting at the University of St. Thomas, St. Paul. He received his doctorate in management science, with a concentration in accounting, from the University of Texas at Dallas. His research interests include intangibles and R&D valuation, impact of financial intermediaries on intangible valuation, impact of investor sophistication and informed trading on intangible valuation, and the role of information technologies in guiding organizational performance.

**Rajiv D. Banker** (“Understanding the Impact of Collaboration Software on Product Design and Development”) is the Merves Chair in Accounting and Information Technology at the Fox School of Business, Temple University. He has received numerous international awards for his contributions to research. He has published more than 100 journal articles in outlets including *Management Science*, *Information Systems Research*, *MIS Quarterly*, *IEEE Transactions on Software Engineering*, *Econometrica*, *Operations Research*, and the *Journal of Management Information Systems*. His research focuses on value creation and appropriation from investments in information technology.

**Indranil Bardhan** (“Understanding the Impact of Collaboration Software on Product Design and Development”) is Assistant Professor of MIS and Accounting and Information Management at the University of Texas at Dallas. His research has been published or forthcoming in *Operations Research*, *MIS Quarterly*, *Manufacturing & Service Operations Management*, the *Journal of Management Information Systems*, and the *European Journal of Operational Research*. His research interests lie in the areas of IT productivity and strategic planning of technology investments. He has consulted with Fortune 500 firms as a principal with PricewaterhouseCoopers.

**Izak Benbasat** (“Research Note—The Influence of Recommendations and Consumer Reviews on Evaluations of Websites”) is Fellow of the Royal Society of Canada, CANADA Research Chair in Information Technology Management at the Sauder School of Business, University of British Columbia, Canada. He is Fellow of the Association for Information Systems. He received his

Ph.D. in management information systems from the University of Minnesota. Dr. Benbasat is the past Editor-in-Chief of *Information Systems Research* and currently a senior editor of the *Journal of the Association for Information Systems*. His current research interests include designing and evaluating human-computer interfaces for e-business.

**Alan R. Dennis** (“Research Note—Individual Cognition and Dual Task Interferences in Group Support Systems”) holds the John T. Chambers Chair of Internet Systems in the Kelley School of Business at Indiana University. His research focuses on the use of computer technologies to support teams, on knowledge management, and on the use of the Internet to improve business and education. Prof. Dennis is a senior editor at *MIS Quarterly* and the Publisher of *MIS Quarterly Executive*.

**Angelika Dimoka** (“The Nature and Role of Feedback Text Comments in online Marketplaces: Implications for Trust Building, Price Premiums, and Seller Differentiation”) is a visiting assistant professor of information systems at the University of California, Riverside, with a joint appointment at the School of Engineering. She received a Ph.D. from the University of Southern California in 2006. Her research focuses on the quantitative analysis of uncertainty in online marketplaces and experimental neuroeconomics for understanding the use of information technology. Her research has been published in *Information Systems Research* and the *Journal of Neuroscience Methods*.

**William G. Heninger** (“Research Note—Individual Cognition and Dual Task Interferences in Group Support Systems”) is an assistant professor in the School of Accountancy at Brigham Young University. He received his Ph.D. from the University of Georgia. His research interests include group support systems, electronic financial filings, and earnings restatements. His research has been published in *MIS Quarterly* and *The Accounting Review* among others.

**Nanada Kumar** (“Research Note—The Influence of Recommendations and Consumer Reviews on Evaluations of Websites”) is an assistant professor in the Computer Information Systems Department at Baruch College, City University of New York. He received his Ph.D. in management information systems from the University

of British Columbia in 2003. His current research interests include human-computer interaction, the behavioral aspects of B2C e-commerce, digital government, and the impact of IT on the organization of work. His work has appeared in journals such as *MIS Quarterly*, *Communications of the ACM*, and *Electronic Markets*.

**Olivia R. Liu Sheng** (“Formulating the Data-Flow Perspective for Business Process Management”) is Presidential Professor and Emma Eccles Jones Presidential Chair of Information Systems at University of Utah. Her research focuses on business intelligence, Web optimization, biomedical informatics, and digital government. She received a B.S. from the National Chiao Tung University in Taiwan and Ph.D. from the University of Rochester. She was faculty or visiting faculty at the University of Arizona, Hong Kong University of Science and Technology, Tokyo Institute of Technology, and Jiao Tong University, Shanghai.

**D. Harrison McKnight** (“Perceived Information Quality in Data Exchanges: Effects on Risk, Trust, and Intention to Use”) received his Ph.D. in management information systems from the University of Minnesota. He is an assistant professor at the College of Business at Michigan State University. His research interests include trust building within e-commerce and organizational settings and the retention and motivation of information systems professionals. His work has appeared in journals such as *MIS Quarterly*, *Information Systems Research*, the *International Journal of Electronic Commerce*, and the *Academy of Management Review*.

**Kelly McNamara Hilmer** (“Research Note—Individual Cognition and Dual Task Interferences in Group Support Systems”) is a clinical associate professor in the Kelley School of Business at Indiana University. Her research involves group decision making via computer collaboration and has appeared in various journals, such as *JMIS*. While her research is behavioral based, Dr. McNamara has a strong technical background and interest.

**Andreas I. Nicolaou** (“Perceived Information Quality in Data Exchanges: Effects on Risk, Trust, and Intention to Use”) received his Ph.D. in accounting information systems from Southern Illinois University—Carbondale and is an associate professor at Bowling Green State University. His research examines e-commerce and enterprise systems implementation performance and accounting systems control effectiveness. His work has appeared in journals such as the *Journal of Information Systems*, *International Journal of Accounting Information Systems*, *European Accounting Review*, and *Information Technology*

*& People*. Nicolaou has professional consulting/systems-audit experience and is the author of two textbooks.

**Jay F. Nunamaker** (“Formulating the Data-Flow Perspective for Business Process Management”) is Regents and Soldwedel Professor of MIS, Computer Science, and Communication, and Director of the Center for the Management of Information at the University of Arizona. In 2005, a *CAIS* article recognized him as the fourth–sixth most productive researcher during 1991–2003. Dr. Nunamaker received the *AIS* LEO Award in 2002 and was elected as an *AIS* fellow in 2000. He holds a Ph.D. from Case Institute of Technology.

**Paul A. Pavlou** (“The Nature and Role of Feedback Text Comments in online Marketplaces: Implications for Trust Building, Price Premiums, and Seller Differentiation”) is an assistant professor of information systems at the University of California, Riverside. He received his Ph.D. from the University of Southern California in 2004. His research focuses on online marketplaces, e-commerce, and information systems strategy. His research has appeared in *ISR*, *MISQ*, *J AIS*, and others. His work has been cited over 200 times by the Institute of Scientific Information and over 600 times by Google Scholar. Paul won the “Best Doctoral Dissertation Award” of the 2004 ICIS Conference. Paul also received the 2003 *MISQ* “Reviewer of the Year” award, and the “Best Reviewer” award of the 2005 Academy of Management Conference. He sits on the editorial boards of *MISQ* and *J AIS*.

**Sherry X. Sun** (“Formulating the Data-Flow Perspective for Business Process Management”) is a Ph.D. candidate in MIS, Eller College of Management, University of Arizona. Her current research focuses on business process management and workflow technology. She holds a master’s in MIS from University of Arizona, and a bachelor’s from Nanjing University, P. R. China. She has published several research articles in referred conference proceedings including the International Conference on Information Systems and the Workshop on Information Technology and Systems.

**J. Leon Zhao** (“Formulating the Data-Flow Perspective for Business Process Management”) is Professor of MIS at the University of Arizona and has taught at the College of William and Mary, HKUST, and Tsinghua University. He holds a Ph.D. from the Haas School of Business, UC Berkeley, a master’s from UC Davis, and a bachelor’s from the Beijing Institute of Agricultural Mechanization. He received an IBM faculty award in 2005 for his work in business process management and services computing.
