With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

About Our Authors

Henri Barki (“Information System Use–Related Activity: An Expanded Behavioral Conceptualization of Individual-Level Information System Use”) is Canada Research Chair in Information Technology Implementation and Management at HEC Montréal and a fellow of the Royal Society of Canada. His research has appeared in journals such as *Canadian Journal of Administrative Sciences*, *IEEE Transactions on Professional Communication*, *Information Systems Research*, *Information & Management*, *INFOR*, *International Journal of Conflict Management*, *International Journal of e-Collaboration*, *International Journal of e-Government Research*, *Journal of MIS*, *Management Science*, *MIS Quarterly*, *Organization Science*, and *Small Group Research*.

Céline Boffo (“Information System Use–Related Activity: An Expanded Behavioral Conceptualization of Individual-Level Information System Use”) obtained her Ph.D. from HEC Montréal. Her dissertation examined change management and postimplementation user appropriation aspects of ERP implementations. She is presently working in the strategic and business consulting field and managing CGI-Greater Montreal’s Centre of Expertise for Change Management.

Ying-Ju Chen (“Product Development and Pricing Strategy for Information Goods Under Heterogeneous Outside Opportunities”) is a Ph.D. candidate in the IOMS Department at the Leonard N. Stern School of Business, New York University, and has been appointed as an assistant professor in the IEOR Department at the University of California, Berkeley. He received his master’s and bachelor’s degrees in electrical engineering from National Taiwan University. His current research interests lie in supply chain contracts and coordination under information asymmetry, and his work has appeared in *Automatica*, *Queueing Systems*, and *Performance Evaluation*.

Vasant Dhar (“Issues and Opinions—Information Technologies in Business: A Blueprint for Education and Research”) is Chairman of the Information Systems Area at the Stern School of Business, New York University and codirector for the Center for Digital Economy Research. He has also held positions on Wall Street in proprietary trading and in IT. Later he held a position as a portfolio manager for a hedge fund. He pioneered the use of

machine learning on Wall Street. He teaches courses at Stern on IT and corporate strategy and on trading strategies and systems.

Dale Goodhue (“Research Note—Statistical Power in Analyzing Interaction Effects: Questioning the Advantage of PLS with Product Indicators”) is the C. Herman and Mary Virginia Terry Chair of Business Administration in the MIS Department at the Terry College of Business, University of Georgia. His research has been published in *Management Science*, *MIS Quarterly*, *Decision Sciences*, and *Sloan Management Review*. His research interests include measuring the impact of IS, the impact of task-technology fit on individual performance, the management of data and other IS infrastructures/resources, and the impacts of ERP systems on organizations.

Natalia Levina (“Research Note—Comparing IT Workers’ Compensation Across Country Contexts: Demographic, Human Capital, and Institutional Factors”) is an associate professor in the Information, Operations, and Management Sciences Department at the Stern School of Business, New York University. Her research interests include understanding collaborative practices in multiparty systems development projects, global IT sourcing strategy, and knowledge management. Her work has appeared in *ISR*, *MIS Quarterly*, *Organization Science*, *Journal of MIS*, and other journals. Natalia has a Ph.D. from the Massachusetts Institute of Technology and a master’s from Boston University.

William Lewis (“Research Note—Statistical Power in Analyzing Interaction Effects: Questioning the Advantage of PLS with Product Indicators”) is an independent consultant and a former assistant professor of MIS in the Department of Management and Information Systems at Louisiana Tech University. His research has appeared in several journals including *MIS Quarterly* and *Communications of the ACM*. William’s research interests include business continuity planning, individual technology adoption in organizations, IS leadership, and research methodology.

Andrew McAfee (“Issues and Opinions—Those to Whom IT Matters Most: Perspectives of IT Faculty on Curricula, Courses, and Class Materials”) joined the faculty of the Technology and Operations Management

Unit at Harvard Business School in 1998. His research investigates how managers can most effectively select, implement, and use IT to achieve business goals. He was the recipient of a U.S. Department of Energy Integrated Manufacturing Fellowship for his doctoral research, which focused on the performance impact of enterprise information technologies.

Sridhar Seshadri ("Product Development and Pricing Strategy for Information Goods Under Heterogeneous Outside Opportunities") is the Toyota Professor of Information, Operations and Management Science at the Leonard N. Stern School of Business, New York University. He received his Ph.D. in management science in 1993 from the University of California, Berkeley. He is a fellow of the Institution of Engineers in India. His primary area of expertise is stochastic modeling and optimization with applications to distribution system, manufacturing system, and telecommunications system design, database design, and finance.

Arun Sundararajan ("Issues and Opinions—Information Technologies in Business: A Blueprint for Education and Research") is an associate professor and director of the IS Ph.D. program at the Stern School of Business, New York University. His research studies the economics of IT and how IT transforms industries and society. He is an associate editor of *Management Science* and *ISR* and cofounded the NYU/CeDER summer workshop on the economics of IT. He teaches M.B.A. students about IT and corporate strategy. His degrees are from IIT Madras and the University of Rochester.

Ryad Titah ("Information System Use-Related Activity: An Expanded Behavioral Conceptualization of Individual-Level Information System Use") has an M.Sc.

in information technology, a DESS in marketing, an L.Sc. in economics, and is a Ph.D. candidate at HEC Montréal. His dissertation conceptualizes and measures nonlinear relationships among individual and organizational factors to explain e-government capability development, adoption, and impact. His work has been published in journals such as *Information Technology and People*, *International Journal of e-Government Research*, and in academic conferences such as ACFAS and ICEG.

Ronald Thompson ("Research Note—Statistical Power in Analyzing Interaction Effects: Questioning the Advantage of PLS with Product Indicators") is an associate professor at Babcock Graduate School of Management, Wake Forest University. His research has been published in or accepted for a variety of journals, including *MIS Quarterly*, *Information Systems Research*, and the *Journal of Management Information Systems*. He holds a Ph.D. from the Ivey School at the University of Western Ontario and has served as an associate editor for *MIS Quarterly*.

Mingdi Xin ("Research Note—Comparing IT Workers' Compensation Across Country Contexts: Demographic, Human Capital, and Institutional Factors") is a Ph.D. student of the Information, Operations, and Management Sciences Department at the Stern School of Business, New York University. Her current research interests include understanding the workforce structure and compensation of IT workers across time and industries and the economics of software as a service. Her works have appeared in the *Proceedings of the International Conference on Information Systems*. She earned her bachelor's in information sciences from Peking University, China.
