With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes.

About Our Authors

Terrence August (“Let the Pirates Patch? An Economic Analysis of Software Security Patch Restrictions”) is an assistant professor of innovation, technology and operations management at the Rady School of Management, University of California, San Diego. He received his Ph.D. from the Graduate School of Business at Stanford University in 2007. His research interests broadly span information systems and operations management. He teaches the core course in operations, information systems, and data analysis at Rady School of Management.

Andrew Burton-Jones (“CONQUER: A Methodology for Context-Aware Query Processing on the World Wide Web”) is an assistant professor for the Sauder School of Business at the University of British Columbia. He holds B.Comm. and M.I.S. degrees from the University of Queensland, and a Ph.D. from Georgia State University. His research focuses on ways to improve the analysis, design, and use of information systems. His work has been published in *Data & Knowledge Engineering*, *Database for Advances in Information Systems*, *Information & Management*, *Information Systems Research*, and *MIS Quarterly*.

Abhijit Chaudhury (“Research Note—A Value-at-Risk Approach to Information Security Investment”) is Professor of Management Information Systems at Bryant College. He has a Ph.D. in management information systems from Purdue University. His work has been published in *MIS Quarterly*, *Information Systems Research*, *Journal of Management Information Systems*, *Communications of the ACM*, and other journals. He has co-authored or edited three textbooks and is also a member of two editorial review boards of international journals on electronic commerce and IT research, respectively.

J. Michael Crant (“Research Note—How Does Personality Matter? Relating the Five-Factor Model to Technology Acceptance and Use”) is a professor of management at the Mendoza College of Business, University of Notre Dame. He received his Ph.D. in

organizational behavior from the University of North Carolina at Chapel Hill. His research interests include the role of personality in predicting work behaviors, proactive personality and behavior, and impression management.

Milind Dawande (“A Comparison of Pair Versus Solo Programming Under Different Objectives: An Analytical Approach”) received his Ph.D. from Carnegie Mellon University in 1997. He is an associate professor in the School of Management, University of Texas at Dallas. Previously, he was a research staff member at the IBM T.J. Watson Research Center. One of his research interests is combinatorial optimization. His papers have appeared in a number of leading industry journals, including *Operations Research*, *Manufacturing & Service Operations Management*, *SIAM Review*, *INFORMS Journal on Computing*, *Journal of Scheduling*, *Journal of Algorithms*, *IIE Transactions*, *Interfaces*, and the *European Journal of Operational Research*.

Sarv Devaraj (“Research Note—How Does Personality Matter? Relating the Five-Factor Model to Technology Acceptance and Use”) is Viola D. Hank Associate Professor of Management at the University of Notre Dame. He received his Ph.D. from the University of Minnesota in 1997. His research areas include business value of technology adoption, business intelligence, and supply chain management. He also co-authored a book entitled *Financial Times on Technology Payoff*.

Robert F. Easley (“Research Note—How Does Personality Matter? Relating the Five-Factor Model to Technology Acceptance and Use”) is an associate professor of information technology management in the management department of the Mendoza College of Business, University of Notre Dame. He holds a Ph.D. in decision and information systems from Indiana University, Bloomington, and an M.B.A. from Pennsylvania State University. His current research focuses on economic modeling of Internet auctions, privacy

and piracy in Internet commerce, recommendation systems, and collaborative technologies.

Monica S. Johar (“A Comparison of Pair Versus Solo Programming Under Different Objectives: An Analytical Approach”) received her Ph.D. in management science from the University of Texas at Dallas in 2006. She is an assistant professor of management information systems at University of North Carolina at Charlotte. Her research interests include optimal software development methodologies, content delivery systems, knowledge management, and web personalization. She is an active member of the Association of Information Systems and INFORMS. Her teaching interests include management information systems, database management, and business data communications.

Subodha Kumar (“A Comparison of Pair Versus Solo Programming Under Different Objectives: An Analytical Approach”) received his Ph.D. from the University of Texas at Dallas in 2001. He is an assistant professor at the Michael G. Foster School of Business, University of Washington. He serves on the editorial boards of *Production and Operations Management* and the *Journal of Database Management*. His research interests include integer programming applications and web advertising. His papers have appeared in a number of leading industry journals, including *Management Science*, *IEEE Transactions on Knowledge and Data Engineering*, *Journal of Scheduling*, *IIE Transactions*, *European Journal of Operational Research*, and *Computers and Industrial Engineering*.

Vijay S. Mookerjee (“A Comparison of Pair Versus Solo Programming Under Different Objectives: An Analytical Approach”) received his Ph.D. from Purdue University in 1991. He is a Charles and Nancy Davidson Distinguished Professor at the University of Texas at Dallas. He serves on the editorial boards of *Management Science*, *Information Systems Research*, *INFORMS Journal on Computing*, *Operations Research*, *Decision Support Systems*, and the *Journal of Database Management*. His research interests include software development methodologies, content delivery systems, and economic design of expert systems. He is the author of numerous articles in archival journals and refereed conference proceedings.

Sandeep Purao (“CONQUER: A Methodology for Context-Aware Query Processing on the World Wide

Web”) is a faculty member of the College of Information Sciences and Technology, Penn State University, where he also serves as the Graduate Student Advisor. His research focuses on the design and evolution of complex techno-organizational systems, blending research methods from software engineering and social science. His work has been presented in several conference proceedings, software artifacts, and publications in archival journals. He was the Research Program Co-chair of the IEEE Service Oriented Computing Conference in 2005.

H. Raghav Rao (“Research Note—A Value-at-Risk Approach to Information Security Investment”) received his Ph.D. from the Krannert Graduate School of Management, Purdue University. He is currently a faculty member in the Department of Management Science and Systems for the School of Management at the University of Buffalo. He has edited four books, including *Information Assurance in Financial Services*. He has authored or co-authored more than 150 technical papers, and has received best paper and best paper runner-up awards at the Americas’ Conference on Information Systems and the International Conference on Information Systems. He has received research funding from the National Science Foundation and the Department of Defense. He was a Fulbright Fellow in 2004 and the recipient of the 2007 State University of New York’s Chancellor’s Award for Excellence.

Radhika Santhanam (“Using Self-Regulatory Learning to Enhance E-learning-Based Information Technology Training”) is a Gatton Endowed Research Professor at the Gatton College of Business and Economics, University of Kentucky. Her work focuses on investigating human-computer interaction issues with particular interest in understanding how users learn new technology. Her work has been published in *MIS Quarterly*, *Information Systems Research*, *Journal of Management Information Systems*, *Decision Support Systems*, *Information and Organization*, and other journals. She has also served as an Associate Editor of *MIS Quarterly* and *Decision Support Systems*.

Sharath Sasidharan (“Using Self-Regulatory Learning to Enhance E-learning-Based Information Technology Training”) is an assistant professor of management information systems at the Lewis College of

Business, Marshall University. He holds a Ph.D. in information systems from the University of Kentucky and an M.B.A. from the University of Glasgow. His research interests include organizational acceptance of technology, human-computer interaction, technology-based training, enterprise resource planning systems, electronic commerce, and IT project management. He teaches telecommunications, database management systems, and project management.

Veda C. Storey (“CONQUER: A Methodology for Context-Aware Query Processing on the World Wide Web”) is Tull Professor of Computer Information Systems in the College of Business Administration and a professor of computer science at Georgia State University. She has research interests in database management systems, intelligent systems, Semantic Web, and ontology development. Her recent papers have appeared in *ACM Transactions on Database Systems*, *IEEE Transactions on Knowledge and Data Engineering*, *Information Systems Research*, and *MIS Quarterly*. She has served on editorial boards of several journals, including *Information Systems Research*, *MIS Quarterly*, *DataBase*, and *Decision Support Systems*.

Vijayan Sugumaran (“CONQUER: A Methodology for Context-Aware Query Processing on the World Wide Web”) is Professor of Management Information Systems at Oakland University, Rochester, MI. His research interests include ontology, Semantic Web, multi-agent systems, component based development, and intelligent systems. His recent publications have appeared in *ACM Transactions on Database Systems*, *IEEE Transactions on Engineering Management*, *Communications of the ACM*, and *Healthcare Management Science*. He is the Editor-in-Chief of the *International Journal of Intelligent Information Technologies* and serves on the editorial board of several journals.

Tunay Tunca (“Let the Pirates Patch? An Economic Analysis of Software Security Patch Restrictions”) is Assistant Professor of Operations, Information, and Technology at the Graduate School of Business, Stanford University. He received his Ph.D. in business administration in 2002 and his M.S. in financial mathematics in 2000 from Stanford University. He also received an M.S. in management science in 1997 from the University of Rochester, and B.S. degrees in electrical engineering and mathematics in 1994 from Bogazici University. His research interests include economics of IT security, digital goods piracy, and electronic markets.

Jingguo Wang (“Research Note—A Value-at-Risk Approach to Information Security Investment”) is an assistant professor at the University of Texas at Arlington. He graduated from the University at Buffalo, State University of New York. His work has been published or is forthcoming in *IEEE Transactions on SMC*, *European Journal of Operational Research*, *Information Systems Research*, and other journals. He has also received best paper awards at the Americas’ Conference on Information Systems and at the International Conference on Internet Monitoring and Protection.

Jane Webster (“Using Self-Regulatory Learning to Enhance E-learning-Based Information Technology Training”) received her Ph.D. from New York University and is the E. Marie Shantz Professor of MIS in the School of Business at Queen’s University, Canada. She has served as a Senior Editor for *MIS Quarterly*, Guest Associate Editor of *Information Systems Research*, and as the Vice President of Publications for the Association for Information Systems. Her work has been published in journals such as the *Academy of Management Journal*, *Communication Research*, *Journal of Organizational Behavior*, *MIS Quarterly*, and *Organization Science*.
