With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

## About Our Authors

**Ritu Agarwal** (“Marketspace or Marketplace? Online Information Search and Channel Outcomes in Auto Retailing”) is Professor and Robert H. Smith Dean’s Chair of Information Systems at the Smith School of Business, University of Maryland. She is also the Director of the Center for Health Information and Decision Systems and serves as a Senior Editor for *Information Systems Research*. Her current research is focused on the use of IT in healthcare settings, technology-enabled transformations in electronic markets, and the processes through which organizations derive business value from information technology.

**Sameh Al-Natour** (“Addressing the *What* and *How* of Online Services: Positioning Supporting-Services Functionality and Service Quality for Business-to-Consumer Success”) is a Ph.D. student of management information systems at the Sauder School of Business, the University of British Columbia. His research interests include the design and evaluation of human-computer interfaces, interactive multimedia, electronic commerce, and the design and analysis of information systems.

**Izak Benbasat** (“Addressing the *What* and *How* of Online Services: Positioning Supporting-Services Functionality and Service Quality for Business-to-Consumer Success”) is a Fellow of the Royal Society of Canada and a CANADA Research Chair in Information Technology Management at the Sauder School of Business, University of British Columbia. He received his Ph.D. in management information systems from the University of Minnesota. He currently serves on the editorial boards of the *Journal of the Association for Information Systems* and the *Journal of Management Information Systems*. He was Editor-in-Chief of *Information Systems Research*, editor of the information systems and decision support systems area of *Management Science*, and a senior editor of *MIS Quarterly*. The general theme of his research is improving the communication between IT, management, and IT users.

**Ronald T. Cenfetelli** (“Addressing the *What* and *How* of Online Services: Positioning Supporting-Services Functionality and Service Quality for Business-to-Consumer Success”) is an assistant professor of management information systems at the Sauder School of Business, University of British Columbia. He holds a Ph.D. from the University of British Columbia, an M.B.A. from Indiana University, and a B.S. in engineering from Purdue University. His research interests are in e-business, the behavioral and emotional aspects of technology usage, and psychometrics. Prior to his academic career, he was a United States naval officer and also a manager in the pharmaceutical industry.

**Laura Dabbish** (“Research Note—Awareness Displays and Social Motivation for Coordinating Communication”) is Assistant Professor of Information Technology and Organizations in the H. John Heinz III School of Public Policy and Management at Carnegie Mellon University. She received her Ph.D. in human-computer interaction in 2006 from the School of Computer Science at Carnegie Mellon University. Her research is focused on the design and use of communication technologies and computer-supported collaboration.

**Anna Ye Du** (“Capacity Provision Networks: Foundations of Markets for Sharable Resources in Distributed Computational Economies”) is currently a Ph.D. student in the Department of Management Science and Systems, University at Buffalo. She received a B.S. degree in economics from the University of International Business and Economics located in China in 1997 and an M.S. degree in business administration from Mississippi State University in 2001. Her research interests are in distributed information systems.

**Xianjun Geng** (“Capacity Provision Networks: Foundations of Markets for Sharable Resources in Distributed Computational Economies”) is Assistant Professor in Information Systems at the University of

Washington. He received his B.E., B.Econ., and M.E. from Tsinghua University in Beijing, China, and a Ph.D. in information systems from the University of Texas at Austin. His research interests include the economics of e-business, strategic information distortion and trust, and new information technology and systems. His work has appeared in or is forthcoming in *Management Science*, *MIS Quarterly*, the *Journal of Marketing*, and *Marketing Science*.

**Anandasivam Gopal** (“Research Note—On Vendor Preferences for Contract Types in Offshore Software Projects: The Case of Fixed Price vs. Time and Materials Contracts”) is Assistant Professor of Information Systems at the University of Maryland, College Park. He received his Ph.D. in information systems from Carnegie Mellon University in 2000. His research interests include software engineering economics, offshore software development and software metrics programs. In specific, his interests focus on contracts in software development and the success factors of metrics programs. His research has been published in the *Communications of the ACM*, *IEEE Transactions on Software Engineering*, and *Management Science*.

**Ram Gopal** (“Capacity Provision Networks: Foundations of Markets for Sharable Resources in Distributed Computational Economies”) is a GE Endowed Professor of Business at the University of Connecticut. His current research interests are in the areas of information security, privacy and valuation, intellectual property rights, online market design, and business impacts of technology. His research has appeared in *Management Science*, *Operations Research*, *INFORMS Journal on Computing*, *Information Systems Research*, the *Journal of Business*, and the *Journal of Law and Economics*, among other journals and conference proceedings.

**Sanjay Gosain** (“Marketspace or Marketplace? Online Information Search and Channel Outcomes in Auto Retailing”) is a Web strategy analyst with Capital Group Companies, Inc. He received his Ph.D. in information systems from the University of Southern California. This current study was completed while he was on the faculty at the University of Maryland. He is interested in examining online consumer behavior and drawing out implications for websites,

information systems design, and technology-enabled strategies.

**William R. King** (“Predictors of Formal Control Usage in IT Outsourcing Partnerships”) holds the title University Professor at the University of Pittsburgh. He is the author of 15 books and more than 300 papers. He has served as Founding President of AIS, as President of TIMS (a predecessor in INFORMS), and as Editor-in-Chief of the *MIS Quarterly*. In 2004, he was given the Leo Lifetime Exceptional Achievement Award of AIS.

**Laurie J. Kirsch** (“Predictors of Formal Control Usage in IT Outsourcing Partnerships”) received a Ph.D. from the University of Minnesota and is Professor of Business Administration at the University of Pittsburgh. Her research explores how to better manage IS projects and initiatives, with a particular focus on examining organizational control and knowledge transfer. She has published her work in leading scholarly journals, serves on the editorial boards of several academic journals, and is active in various professional groups and conferences.

**Robert Kraut** (“Research Note—Awareness Displays and Social Motivation for Coordinating Communication”) is Herbert A. Simon Professor of Human-Computer Interaction at Carnegie Mellon University. He received his Ph.D. in social psychology from Yale University and has previously taught at the University of Pennsylvania and Cornell University. He has broad interests in the design and social impact of computing and computer-mediated communication. He conducts research on everyday use of the Internet, technology and conversation, collaboration in small work groups, computing in organizations, and contributions to online communities.

**Jason Kuruzovich** (“Marketspace or Marketplace? Online Information Search and Channel Outcomes in Auto Retailing”) is an assistant professor of management information systems at The Lally School of Management and Technology, Rensselaer Polytechnic Institute. Jason studies issues relating to the impact of information technology and markets on organizations, consumers, and employees. His current research examines factors influencing the performance of multichannel retailers. Jason has a Ph.D. in information systems from the University of Maryland

and a Bachelor's degree in engineering from Lafayette College.

**Ram Ramesh** ("Capacity Provision Networks: Foundations of Markets for Sharable Resources in Distributed Computational Economies") is a professor in the School of Management, State University of New York at Buffalo. He has published extensively in streams such as conceptual modelling, economics of IT enabled services, database systems, and distributed computing. His research has been funded by ARI, AFOSR, ARL, and NTSC. His consulting assignments include Raytheon, HP, Samsung, and Westinghouse. He serves on several editorial boards, is a founding board member of AIS SIG-ODIS, and is General Co-Chair of WITS 2008.

**Sandeep Rustagi** ("Predictors of Formal Control Usage in IT Outsourcing Partnerships") received a Ph.D. from the University of Pittsburgh and is a senior executive with Capgemini. He advises global corporations in the areas of system implementation and outsourcing. He is an active member of several professional groups and organizations across various industries. His research interests include IS outsourcing and IS implementation.

**Konduru Sivaramakrishnan** ("Research Note—On Vendor Preferences for Contract Types in Offshore Software Projects: The Case of Fixed Price vs. Time and Materials Contracts") is the C.T. Bauer Chair of Accountancy and Taxation at the C.T. Bauer College of Business, University of Houston. Prior to joining the C.T. Bauer College, he was at Texas A&M University and Carnegie Mellon University. He received an undergraduate degree from the Indian Institute of Technology, Chennai, an M.B.A. from XLRI, India, and a Ph.D. in accounting and information systems from the Kellogg Graduate School of Management, Northwestern University. His research has focused on two broad areas: the design of information systems for planning and control in organizations and the examination of the interactions between corporate managers, shareholders, and financial analysts. His work has been published in leading scholarly journals, including *The Accounting Review*, the *Journal of*

*Accounting Research*, *Contemporary Accounting Research*, the *Journal of Accounting, Auditing and Finance*, the *Journal of Management Accounting Research*, *Accounting Horizons*, and *Management Science*.

**Siva Viswanathan** ("Marketspace or Marketplace? Online Information Search and Channel Outcomes in Auto Retailing") is an assistant professor at the R. H. Smith School of Business, University of Maryland. He studies the impact of online intermediaries on various sectors, including consumer retailing, financial services, and auto retailing. His current research also examines the implications of online-sponsored search mechanisms for advertisers and consumers. He has a Ph.D. from New York University, a Master's degree in business administration, and a Bachelor's degree in engineering. His work has been published in various conference proceedings and top academic journals.

**Scott Weitzman** ("Marketspace or Marketplace? Online Information Search and Channel Outcomes in Auto Retailing") is the General Manager at iSKY, Inc., where he is responsible for client-facing aspects of the business, including client solutions, analytics, product development, sales, and marketing. Across 20 years in the automotive industry focusing on research, sales, marketing, planning, and distribution, he has worked at J.D. Power and Associates, Autobyte.com, and Ford Motor Company. He holds a B.A. from Swarthmore College and an M.B.A. from the Stern School of Business at New York University.

**Andrew B. Whinston** ("Capacity Provision Networks: Foundations of Markets for Sharable Resources in Distributed Computational Economies") is Hugh Cullen Chair Professor in the McCombs School of Business at the University of Texas at Austin. He is also the director at the Center for Research in Electronic Commerce. He has published over 300 papers in the major economic and management journals and has authored 25 books. In 2005, he received the Leo Award from the Association for Information Systems for his long-term research contribution to the information system field.
