With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

About Our Authors

Martin Bichler (“A Computational Analysis of Linear Price Iterative Combinatorial Auction Formats”) is a full professor at the Department of Informatics at TU München, Germany and a faculty member at the TU München Business School. He received his Ph.D. and his Habilitation (2000) from the Vienna University of Economics and Business Administration. Prior to his position at TU München, he worked as a research fellow at the University of California, Berkeley and as a research staff member at the IBM Thomas J. Watson Research Center in New York.

John D’Arcy (“User Awareness of Security Countermeasures and Its Impact on Information Systems Misuse: A Deterrence Approach”) is an assistant professor in the Department of Management, University of Notre Dame. He holds a Ph.D. in business administration from Temple University, with a specialization in MIS. His research interests include information assurance and security, computer ethics, and system analysis and design. He has published articles in journals such as *Communications of the ACM*, *Decision Support Systems*, *Computers & Security*, and *Human Resource Management*.

Alan R. Dennis (“Does Fit Matter? The Impact of Task-Technology Fit and Appropriation on Team Performance in Repeated Tasks”) is a professor of information systems and holds the John T. Chambers Chair of Internet Systems at the Kelley School of Business, Indiana University. He is a senior editor at *MIS Quarterly* and is the publisher of *MIS Quarterly Executive*. He has written over 100 research papers on collaboration technologies, knowledge management, the Internet, and professional issues facing IS academics. He has written books on data networking and systems analysis and design.

Shutao Dong (“Information Technology in Supply Chains: The Value of IT-Enabled Resources Under Competition”) is an assistant professor of management science and engineering, School of Business at Renmin University of China, Beijing. He obtained his Ph.D. in management information systems from the University of California, Irvine. His research focuses on organizational and economic impacts of

information systems, especially customer relationship management systems, resources and value creation of e-business, interorganizational systems and networked organizational forms, technology adoption and assimilation by firms, and IT governance. His work has been published in *European Journal of Information Systems*, *Hawaii International Conference on System Sciences*, and *Workshop on Information Systems and Economics*.

Robert M. Fuller (“Does Fit Matter? The Impact of Task-Technology Fit and Appropriation on Team Performance in Repeated Tasks”) is an assistant professor of information systems at the College of Business Administration, University of Tennessee. His research interests focus on the fit and use of collaborative technologies for team performance, the adoption and use of communication technologies, and the improvement of requirements elicitation through semistructured communication techniques. His research has been published in *Journal of the Association for Information Systems*, *Decision Support Systems*, and *Journal of Computer Information Systems*.

Dennis Galletta (“User Awareness of Security Countermeasures and Its Impact on Information Systems Misuse: A Deterrence Approach”) is President of AIS, an AIS fellow, and a professor of business administration at the Katz School of Business, University of Pittsburgh. He obtained his Ph.D. in MIS from the University of Minnesota. His current research interests include end-user behavior, attitudes, and performance. He has published articles in journals such as *Management Science*, *Information Systems Research*, *Journal of Management Information Systems*, *Journal of the Association for Information Systems*, *Communications of the ACM*, and *European Journal of Information Systems*.

Anat Hovav (“User Awareness of Security Countermeasures and Its Impact on Information Systems Misuse: A Deterrence Approach”) teaches at Korea University Business School. Her research interests include Internet security, risk assessment, Internet standards, and electronic scholarship. She holds a Ph.D. from Claremont University and has extensive industry experience in systems management and

strategic planning. She has published articles in *Communications of the ACM*, *Computers & Security*, *Risk Management and Insurance Review*, and *Information Systems Journal*. She is also the program chair of the Annual Information Security Conference.

Varghese S. Jacob ("Impact of the Union and Difference Operations on the Quality of Information Products") is Senior Associate Dean and Ashbel Smith Professor of Management Information Systems in the School of Management, University of Texas at Dallas. He obtained his Ph.D. degree from Purdue University. His articles have been published in various journals, including *Management Science*, *Information Systems Research*, *Decision Support Systems*, *Journal of Management Information Systems*, *Psychometrika*, and *Group Decision and Negotiation*. He is a co-editor of *Information Technology and Management*.

Sabyasachi Mitra ("Choice and Chance: A Conceptual Model of Paths to Information Security Compromise") is an associate professor of information technology management and the Faculty Director for the Global Executive MBA program at the College of Management, Georgia Institute of Technology. His current research interests focus on IT security and business continuity, managing innovation in IT industries, and the use of IT in agricultural supply chains. His research has appeared or is forthcoming in journals such as *Information Systems Research*, *Journal of Operations Management*, *INFORMS Journal on Computing*, *IEEE Transactions on Knowledge and Data Engineering*, *Journal of Management Information Systems*, and many others. He received his bachelor's degree from the Indian Institute of Technology and his Ph.D. degree in business administration from the University of Iowa.

Neeraj Mittal ("Investments in Information Technology: Indirect Effects and Information Technology Intensity") is currently CEO of Tamil Nadu E-Governance Agency, where he heads the e-governance initiatives in the state of Tamil Nadu, India. His recent research focuses on IT and productivity. He has experience in the telecom sector and, as a member of the Indian Administrative Service, he has held various administrative positions in the government of Tamil Nadu. He holds a Ph.D. in MIS from the Fisher College of Business, Ohio State University.

Barrie R. Nault ("Investments in Information Technology: Indirect Effects and Information Technology Intensity") is the David B. Robson Professor in the Haskayne School of Business at the University of

Calgary. His recent research is on IT and productivity, information goods versioning, and information incentives and structures of supply chains. His work has been published in *Information Systems Research*, *Journal of Monetary Economics*, *MIS Quarterly*, *Management Science*, *Strategic Management Journal*, *Marketing Science*, and *Organization Science*, among others. He is a past department editor for *Management Science*.

D. Veena Parboteeah ("The Influence of Website Characteristics on a Consumer's Urge to Buy Impulsively") is an assistant professor of information systems at Eastern New Mexico University. She received her Ph.D. from Washington State University in 2005. Her research focuses on the design of human-computer interface and the effect of culture on IT adoption. Her research has appeared in the *Communications of the ACM* and *Journal of Global Information Technology Management*.

Amir Parsian ("Impact of the Union and Difference Operations on the Quality of Information Products") is an associate professor of information systems at the Instituto de Empresa Business School in Madrid, Spain. He received his Ph.D. from the University of Texas at Dallas and has consulted for a number of companies across the United States and Europe. His research interests include information quality, knowledge discovery, data warehousing, and economics of information systems. His work has appeared in *Management Science*, *Decision Support Systems*, *ICIS*, and other outlets.

Alexander Pikhovskiy ("A Computational Analysis of Linear Price Iterative Combinatorial Auction Formats") studied applied mathematics at the Kharkiv National University, Ukraine. He continued his studies at TU München, Germany and graduated in 2002 with a master's degree in financial and economic mathematics. Since April 2003, he has worked as a research assistant for the German Chair of Internet-based Information Systems in the Department of Informatics at TU München. He has been involved in a number of research projects in the field of combinatorial auctions.

Sam Ransbotham ("Choice and Chance: A Conceptual Model of Paths to Information Security Compromise") is a Ph.D. candidate at the College of Management, Georgia Institute of Technology. His current research focuses on IT security and technology strategy. He holds an MBA and a bachelor's

degree in chemical engineering, both from the Georgia Institute of Technology. He has published several research articles in refereed conference proceedings, including the *International Conference on Information Systems* and the *Workshop on Information Technology and Systems*.

Sumit Sarkar ("Impact of the Union and Difference Operations on the Quality of Information Products") is an Ashbel Smith Professor of IS in the School of Management at the University of Texas at Dallas, where he is also the Academic Director for the International Center on Decision and Risk Analysis. He received his Ph.D. from the University of Rochester. His current research addresses the management of data and knowledge in business environments and has appeared in *Management Science*, *Information Systems Research*, *ACM Transactions on Database Systems*, *IEEE Transactions on Knowledge and Data Engineering*, and *INFORMS Journal on Computing*, among others. He serves in editorial capacities for *Information Systems Research*, *Management Science*, and *Information Technology and Management*, and he has served as a program co-chair for *ICIS* and *WITS*.

Pasha Shabalín ("A Computational Analysis of Linear Price Iterative Combinatorial Auction Formats") studied informatics at the Lviv University, Ukraine and at TU München, Germany. He is currently completing his Ph.D. degree under the advisement of Professor Martin Bichler. His main research interests are electronic markets and information security.

Joseph S. Valacich ("The Influence of Website Characteristics on a Consumer's Urge to Buy Impulsively") is the George and Carolyn Hubman Distinguished Professor in MIS at Washington State University. His primary research interests include technology-mediated collaboration, mobile and emerging technologies, e-business, human-computer interaction, and distance education. His work has appeared in publications such as *MIS Quarterly*, *Information Systems Research*, *Journal of Management Information Systems*, *Management Science*, *Academy of Management Journal*, and many others.

John D. Wells ("The Influence of Website Characteristics on a Consumer's Urge to Buy Impulsively") is an associate professor in the Department of Information Systems at Washington State University. He received his Ph.D. in management information systems from Texas A&M University. His research focuses on business-to-consumer interface design,

e-commerce customer relationship management, and e-commerce strategy. His work has appeared in outlets such as *Journal of Management Information Systems*, *European Journal of Information Systems*, *Information & Management*, and *Communications of the ACM*.

Sean Xin Xu ("Information Technology in Supply Chains: The Value of IT-Enabled Resources Under Competition") is an assistant professor at the School of Business and Management, Hong Kong University of Science and Technology. He received his Ph.D. from the University of California, Irvine. His current research interests include IT value under different corporate governance structures, impacts of IT governance on postadoptive behaviors of IT use, innovation adoption and diffusion, and IT use in supply chain contexts. His papers have been published in *Management Science*, *MIS Quarterly*, *Information Systems Research*, *Journal of Management Information Systems*, and *European Journal of Information Systems*. Along with his co-authors, he won the Vernon Zimmerman Best Paper Award at the 2007 Asian-Pacific Conference on International Accounting Issues, two best paper awards at the International Conference on Information Systems, and a Best Paper Award (International Track) at the 2004 Americas' Conference on Information Systems.

Kevin Xiaoguo Zhu ("Information Technology in Supply Chains: The Value of IT-Enabled Resources Under Competition") received his Ph.D. from Stanford University and is currently a tenured associate professor at the Rady School of Management, University of California, San Diego. His research focuses on business value of IT, economic impacts of IT on firms and industries, technology standards and network effects, innovation diffusion in global environments, information transparency in supply chains, and real options for technology investment. His work has been published in *Management Science*, *Information Systems Research*, *MIS Quarterly*, *Journal of Management Information Systems*, and *Decision Sciences*, as well as a new book, *Global E-Commerce* (Cambridge University Press, 2006). His research has received several best paper awards in the field and the prestigious CAREER Award from the U.S. National Science Foundation. He serves on the editorial boards of *Management Science*, *Information Systems Research*, and *Journal of the Association for Information Systems*. He was conference co-chair of the 2005 Workshop on Information Systems and Economics and the 2009 INFORMS Conference on Information Systems and Technology.
