With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

About Our Authors

Gediminas Adomavicius (“Designing Intelligent Software Agents for Auctions with Limited Information Feedback”) is Digital Technology Center Associate Professor of Information and Decision Sciences at the Carlson School of Management, University of Minnesota. He received his Ph.D. from NYU in 2002. His research has been published in journals such as *Information Systems Research*, *ACM Transactions on Information Systems*, *IEEE TKDE*, *INFORMS Journal on Computing*, and *Data Mining and Knowledge Discovery*. He received the NSF CAREER award in 2006 for his research on personalization technologies. His email address is gedas@umn.edu.

Anandhi Bharadwaj (“An Empirical Analysis of Contract Structures in IT Outsourcing”) is an Associate Professor of Information Systems at Emory University’s Goizueta Business School. Her research interests include organizational impacts and business value of IT, global technology sourcing strategies and effects of knowledge management technologies. Her research has been published in journals such as *Management Science*, *Information Systems Research*, *MIS Quarterly*, *IEEE Transactions on Engineering Management*, and *Annals of Operations Research*. She currently serves as an Associate Editor of *Management Science*, *Information Systems Research*, and *JAIS*.

Paul L. Bowen (“An Empirical Investigation of End-User Query Development: The Effects of Improved Model Expressiveness vs. Complexity”) has Ph.D. and CPA degrees and is an Associate Professor in the Business School at Florida State University. His primary research activities involve the measurement, control, and improvement of information quality. This research encompasses investigating strategies for improving end-user information retrieval performance. Paul’s previous experience includes 13 years at the University of Queensland and eight years as a systems analyst and project manager at the Oak Ridge National Laboratory.

Yuanyuan Chen (“An Empirical Analysis of Contract Structures in IT Outsourcing”) is a doctoral candidate on information systems at Goizueta Business School, Emory University. Her research is in the interdisciplinary study of IT and law, including global technology sourcing strategy, intellectual property protection, and information security. Her work has been published by several leading national and international conferences. She also holds law degrees from law schools in the United States and China and is a certified lawyer in China.

Arnaud De Bruyn (“How Incorporating Feedback Mechanisms in a DSS Affects DSS Evaluations”) is Assistant Professor of Marketing at ESSEC Business School, Paris, France; Associate Research Program Director for the Marketing Engineering program; and Visiting Research Scholar at the Institute for the Study of Business Markets (Penn State University). His research interests and consulting practice are at the frontier of marketing, operations research, and information technologies, particularly in the domains of customer relationship management (CRM), database and direct marketing, and marketing engineering.

Alok Gupta (“Designing Intelligent Software Agents for Auctions with Limited Information Feedback”) is the Department Chair and Carlson School Professor of Information and Decision Sciences at the University of Minnesota. He received his Ph.D. from UT Austin in 1996. His research has been published in interdisciplinary journals such as *Management Science*, *Information Systems Research*, *MISQ*, *INFORMS Journal on Computing*, *CACM*, *JMIS*, *Decision Sciences*, *Journal of Economic Dynamics and Control*, *Computational Economics*, *DSS*, *IJEC*, and *IEEE Internet Computing*. He serves on the editorial boards of *Management Science*, *Information Systems Research*, *JMIS*, and *DSS*. His email address is alok@umn.edu.

Ujwal Kayande (“How Incorporating Feedback Mechanisms in a DSS Affects DSS Evaluations”) is Professor of Marketing at the Australian National

University. His research focuses on developing quantitative models to understand marketplace behavior and the effect of marketing activity upon that behavior; additionally, he is interested in understanding the pathways by which quantitative models impact business practice. He has published his work in leading marketing journals, including *Marketing Science* and the *Journal of Marketing Research*, and is a recipient of the 1998 Lehmann Award from the American Marketing Association.

Prabhudev Konana (“Competitive Environment and the Relationship Between IT and Vertical Integration”) is Professor of Information Management and Distinguished Teaching Professor at UT-Austin. His research interests include virtual communities, global sourcing, and business value of IT. He is a recipient of the NSF CAREER Award and grants from NSF, IBM, Dell, and Intel. His research has appeared in *Information Systems Research*, *Management Science*, *MISQ*, *IEEE Transactions on Computers*, *IEEE TSE*, and *Sloan Management Review*. He received his Ph.D. from the University of Arizona in 1985.

Gary L. Lilien (“How Incorporating Feedback Mechanisms in a DSS Affects DSS Evaluations”) is Distinguished Research Professor of Management Science at Penn State and co-founder and Research Director of the Institute for the Study of Business Markets (www.isbm.org). He is the author or co-author of 12 books and more than 100 professional articles. He has received honorary doctorates from the University of Liege, the University of Ghent, and Aston University, as well as the 2008 Irwin Educator of the Year Award from the American Marketing Association.

Robert A. O’Farrell (“An Empirical Investigation of End-User Query Development: The Effects of Improved Model Expressiveness vs. Complexity”) recently received a masters degree in information systems. Prior to undertaking his masters he received a bachelors degree in information technology. Robert is currently employed by an IT firm while still maintaining close ties to the University of Queensland via tutoring and research duties within the Business School.

Arvind Rangaswamy (“How Incorporating Feedback Mechanisms in a DSS Affects DSS Evaluations”) is the Anchel Professor of Marketing at

the Smeal College of Business, Penn State University, where he is also the Co-founder and Research Director of the Center for Digital Transformation (www.smeal.psu.edu/cdt). He completed his undergraduate studies at the Indian Institute of Technology, Madras and his graduate studies at the Indian Institute of Management, Calcutta and Northwestern University. A more detailed curriculum vitae is available at www.arvind.info.

Gautam Ray (“Competitive Environment and the Relationship Between IT and Vertical Integration”) is an Assistant Professor at the Carlson School of Management at the University of Minnesota. He received his Ph.D. from Ohio State University. His research interests are in the impact of IT on firm scope and structure and how IT creates value. His research has appeared in *Information Systems Research*, *Management Science*, *Marketing Science*, *MIS Quarterly*, *Journal of Management Information Systems*, and *Strategic Management Journal*.

Fiona H. Rohde (“An Empirical Investigation of End-User Query Development: The Effects of Improved Model Expressiveness vs. Complexity”) has a Ph.D. and is an Associate Professor within the UQ Business School, The University of Queensland. Her primary research activities involve the area of outsourcing and also the area of information management and its effect on information retrieval. Fiona completed her Ph.D. work in 2000. She worked for KPMG in the Computer Audit Division before joining the UQ Business School approximately 15 years ago.

Emmanuelle Vaast (“Trans-Situated Learning: Supporting a Network of Practice with an Information Infrastructure”) is Assistant Professor of Management Information Systems at the School of Business, Long Island University, New York. She obtained her Ph.D. in MIS from École Polytechnique, Paris, France. Her work deals with the practices and sociocognitive dimensions related to the implementation and use of information systems. It has appeared, among others, in *Management Information Systems Quarterly*, *Organization Science*, *Information and Organization*, and *Journal of Strategic Information Systems*.

Gerrit H. van Bruggen (“How Incorporating Feedback Mechanisms in a DSS Affects DSS Evaluations”) is Professor of Marketing at RSM Erasmus University

and ISBM Distinguished Visiting Scholar. Most of his research addresses the impact of information technology on (marketing) decision making. He co-authored the book *Marketing Management Support Systems: Principles, Tools, and Implementation* (Kluwer Academic) with Berend Wierenga and has published articles in journals such as *MIS Quarterly*, *Information Systems Research*, *Marketing Science*, *Management Science*, *Journal of Marketing Research*, *Journal of Marketing*, and the *International Journal of Research in Marketing*.

Geoff Walsham (“Trans-Situated Learning: Supporting a Network of Practice with an Information Infrastructure”) is Professor of Management Studies (Information Systems) at Judge Business School, University of Cambridge, UK. His previous academic posts were at the University of Lancaster in the UK, the University of Nairobi in Kenya, and Mindanao State University in the Philippines. He was one of the pioneers of the interpretive approach to information systems research. His research interests include globalization and ICTs, IS in developing countries, knowledge management, and software outsourcing.

Dazhong Wu (“Competitive Environment and the Relationship Between IT and Vertical Integration”) is an Assistant Professor at Indiana State University, South Bend. He received his Ph.D. in MIS from University of Texas at Austin. His research interests include studying information service and pricing strategies, consumer search, and channel coordination in electronic markets. His research has appeared in *Information Systems Research*, *Marketing Science*, and *Journal of Management Information Systems*.

Dmitry Zhdanov (“Designing Intelligent Software Agents for Auctions with Limited Information Feedback”) is Assistant Professor at Operations and Information Management Department at the School of Business, University of Connecticut. He received his Ph.D. from the University of Minnesota in 2007. His research interests include information security and privacy, design of intelligent agents, and economic analysis and implications of information systems. His research has been presented at various leading conferences, such as *WITS*, *WEIS* and *CIST*. His email address is dmitry.zhdanov@business.uconn.edu.
