With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

About Our Authors

Ritu Agarwal's ("Assessing a Firm's Web Presence: A Heuristic Evaluation Procedure for the Measurement of Usability") current research focuses on the management of information systems professionals, individual and organizational adoption and diffusion of new information technologies, and alternative arrangements for structuring IT to exploit e-business and other strategic opportunities. She has published widely on information technology management topics in journals such as *Information Systems Research*, *MIS Quarterly*, the *Communications of the ACM*, and *IEEE Transactions*. She is Senior Editor for *MIS Quarterly* and Associate Editor for *Information Systems Research*.

Gurpreet Dhillon ("Measuring Factors that Influence the Success of Internet Commerce") is Associate Professor of MIS in the College of Business, University of Nevada, Las Vegas. He holds a Ph.D. in information systems from the London School of Economics and Political Science, United Kingdom. He has published in several journals including the *Communications of the ACM*, *Computers & Security*, the *European Journal of Information Systems*, the *Information Systems Journal*, and the *International Journal of Information Management*. His research interests include the management of information security, the ethical and legal implications of information systems, and aspects of information systems planning and project management.

Gerard George ("The Net-Enabled Business Innovation Cycle and the Evolution of Dynamic Capabilities") is Assistant Professor of Entrepreneurship and Associate of the Weinert Center for Entrepreneurship at the University of Wisconsin-Madison. He received his Ph.D. from Virginia Commonwealth University. His research interests include the study of contextual and structural factors affecting innovation and entrepreneurship.

Donna L. Hoffman ("Measuring e-Commerce in Net-Enabled Organizations: An Introduction to the Special Issue") is Professor at the Owen Graduate School of Management and Cofounder and Codirector of eLab, the Internet Research Lab at Vanderbilt University; Donna does research on the marketing, strategic, and policy implications of commercializing the Internet. She has an M.A. and Ph.D. in quantitative psychology from the L.L. Thurstone Psychometric Laboratory at the University of North Carolina at Chapel Hill. Her research has been published in the *Journal of Marketing Research*, the *Journal of Marketing*, *Marketing Science*, the *Journal of Consumer Research*, *Communications of the ACM*, *Science*, and the *Harvard Business Review*, among others, and is the winner of the William O'Dell Award for her long run contribution to marketing. She consults frequently for business on Internet commerce issues. Under President Clinton, she was appointed to the President's Information Technology Advisory Committee Socio-Economic and Workforce Panel and was recently voted the top Internet scientist by over 600 United States and European scientists and marketing managers in an international survey.

Marios Koufaris ("Applying the Technology Acceptance Model and Flow Theory to Online Consumer Behavior") is Assistant Professor of Computer Information Systems at the

Zicklin School of Business at Baruch College, CUNY. He received his Ph.D. in Information Systems from the Stern School of Business, New York University. His research interests include electronic commerce and, specifically, consumer behavior in Web-based commerce, end-user behavior, and the social impact of IT.

Jonathan W. Palmer ("Web Site Usability, Design, and Performance Metrics") is Assistant Professor of Decision and Information Technologies at the Robert H. Smith School of Business, University of Maryland, College Park. His current research interests include the strategic use of information technology, electronic commerce, and virtual organizations. His work has appeared in *Information Systems Research*, the *Communications of the ACM*, the *International Journal of Electronic Commerce*, the *Journal of World Business*, *JASIS*, and *The Information Society*. He serves on the Editorial Board of the *International Journal of Electronic Markets*.

Charles Steinfield ("Measuring e-Commerce in Net-Enabled Organizations: An Introduction to the Special Issue") is a recipient of Michigan State University's Teacher-Scholar and Distinguished Faculty Award; Charles has conducted research on various aspects of electronic commerce for more than a decade, including studies of the effects of e-commerce on buyer-seller relations, the influence of e-commerce on intermediation, and the role of physical presence in e-commerce strategy. He holds a Ph.D. in communication theory and research from the Annenberg School for Communication at the University of Southern California. He has published three books, including the award-winning *Organizations and Communication Technology*, coedited with Janet Fulk. His articles have appeared in journals such as *Organization Science*, *Communication Research*, *Electronic Markets*, *Management Communication Quarterly*, the *Journal of Business Research*, the *Journal of Information Technology*, *Telecommunications Policy*, *Info*, and the *Journal of Computer-Mediated Communication*. He is Professor in the Department of Telecommunication at Michigan State University and was formerly a member of Technical Staff in the Applied Research Group of Bell Communications Research (Bellcore).

Detmar W. Straub ("Measuring e-Commerce in Net-Enabled Organizations: An Introduction to the Special Issue") is the J. Mack Robinson Distinguished Professor of IS at Georgia State University; Detmar has conducted research in the areas of e-commerce and 'Net'-enablement, computer security, and international IT. He holds a DBA in MIS from Indiana and a Ph.D. in English from Penn State. He has published 90 papers in journals such as *Management Science*, *Information Systems Research*, *MIS Quarterly*, *Organization Science*, the *Communications of the ACM*, the *Journal of MIS*, the *Journal of Global Information Management*, the *Journal of the AIS*, and the *Sloan Management Review*. He is currently an Associate Editor for *Management Science* and *Information Systems Research*. He has also consulted widely in industry and worked with executive education programs worldwide. He is the Director of the Doctoral Programs and Research Office for the Robinson College of Business.

Gholamreza Torkzadeh ("Measuring Factors that Influence the Success of Internet Commerce") is Professor and Chair of MIS at the University of Nevada, Las Vegas. He has published on management information systems issues in academic and professional journals including *Management Science*, *MIS Quarterly*, the *Communications of the ACM*, *Decision Sciences*, *Omega*, the *Journal of MIS*, the *Journal of Operational Research*, *Information & Management*, the *Journal of Knowledge Engineering*, *Educational and Psychological Measurement*, *Behaviour & Information Technology*, *Long Range Planning*, and others. His current research interests include the impacts of information technology, measuring e-commerce success, and computer self-efficacy.

Viswanath Venkatesh ("Assessing a Firm's Web Presence: A Heuristic Evaluation Procedure for the Measurement of Usability") researches technology implementations in organizations and homes. His research has been published in *Management Science*, *MIS Quarterly*, *Information Systems Research*, *Organizational Behavior and Human Decision Processes*, *Decision Sciences*, *Personnel Psychology*, and the *International Journal of Human-Computer Studies*. He received his Ph.D. in information systems from the University of Minnesota in 1997. *MIS Quarterly* named him "Reviewer of the Year" in 1999; since 2001, he is also Associate Editor for that journal.

Bruce W. Weber ("Measuring e-Commerce in Net-Enabled Organizations: An Introduction to the Special Issue") is Associate Professor of Computer Information Systems and Director of the Subotnick Financial Services Center at the Zicklin School of Business, Baruch College, City University of New York. Previously, he was a member of the faculty of the Stern School of Business, New York University, and a visiting professor in management science at the Graduate School of Business, Columbia University. He has an A.B. in applied mathematics from Harvard University and a M.A. and Ph.D. in decision sciences from The Wharton School of

the University of Pennsylvania. His research examines the economic impact of next-generation financial technologies and, in particular, securities market trading mechanisms. His articles have appeared in *Management Science*, *Information Systems Research*, the *Journal of MIS*, the *Journal of Organizational Computing*, and the *London Stock Exchange Quarterly*. He is on the Editorial Board of *Information Systems Research* and *EM-Electronic Markets*. He is codeveloper, with Robert A. Schwartz, of the market trading model used for the NASD "HeadTrader" game, which is available at (www.academic.nasdaq.com).

Bradley C. Wheeler ("NEBIC: A Dynamic Capabilities Theory for Assessing Net-Enablement") is Associate Professor of Information Systems at Indiana University's Kelley School of Business. He is the British American Tobacco Faculty Fellow in Technology and Learning and serves as the Associate Dean of Teaching & Learning Technologies for Indiana University. His research has focused on collaboration technologies and IT innovation for net-enablement. He has taught executive education programs in over 24 countries on 6 continents.

Shaker A. Zahra ("The Net-Enabled Business Innovation Cycle and the Evolution of Dynamic Capabilities") is Professor of Strategy and Entrepreneurship in the Management Department and Electronic Commerce Institute at Georgia State University. His research examines the role of technology in competition and technology-based entrepreneurship. The author of six books, his research has appeared in the *Academy of Management Journal*, the *Academy of Management Review*, *Strategic Management Journal*, the *Journal of Management*, *Decision Sciences*, the *Journal of Management Studies*, the *Journal of Business Venturing*, among others. He is the recipient of several awards for excellence in research, teaching, and service.
