With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

About Our Authors

Soon Ang ("When Subordinates Become IT Contractors: Persistent Managerial Expectations in IT Outsourcing") is Professor and Head of Strategy, Management & Organization at the Nanyang Business School, Singapore. She holds a Ph.D. in IS. Her research includes outsourcing, managing IT talent, and cultural intelligence in international organizational behavior. She publishes in the *Academy of Management Journal*, *Management Science*, *MIS Quarterly*, *Organization Science*, *ISR* and serves on the editorial boards of *ISR*, *IS & e-Business Management*, the *Journal of Organizational Behavior*, and *Groups & Organizational Management*. She received a best paper awards at HICSS and the *Academy of Management* and a best reviewer award from *Human Relations*.

Yeh-ning Chen ("Information Goods Pricing and Copyright Enforcement: Welfare Analysis") is Associate Professor at the Department of Finance, National Taiwan University. Presently, his research focuses on the economics of copyright, financial contracts, and banking panics. His papers have been published in *Financial Management*, the *Journal of Political Economy*, and the *Proceedings of the 20th International Conference on Information Systems*.

Ming Fan ("Decentralized Mechanism Design for Supply Chain Organizations Using an Auction Market") is an assistant professor at the Mendoza College of Business, University of Notre Dame. He received his Ph.D. from the McCombs School of Business at The University of Texas at Austin. His areas of research include economics of information systems, supply chain management, telecommunications, and technologies for financial markets.

Violet T. Ho ("When Subordinates Become IT Contractors: Persistent Managerial Expectations in IT Outsourcing") is a doctoral candidate in organizational behavior (Carnegie Mellon University) and Senior Tutor at the Nanyang Business School (Singapore). She is currently working on her doctoral dissertation that examines the social network effects on workers' perceptions of psychological contract fulfillment. Her research interests include social psychological issues in organizations, with specific focus on psychological contracts, social networks, social comparison and influence, and personality.

Akhil Kumar ("XML-Based Schema Definition for Support of Interorganizational Workflow") is a faculty member at the Smeal College at Penn State University. Previously he has served on faculties at Cornell University and the University of Colorado and was also a visiting researcher at Bell Labs, Murray Hill, NJ. He has published about 50 papers in academic journals and international conferences. He serves on the editorial boards of *INFORMS Journal on Computing*, the *Information and Technology Management Journal*, and the *Electronic Commerce Research Journal*. His current research interests lie in workflow systems and e-business.

Shaila M. Miranda ("The Social Construction of Meaning: An Alternative Perspective on Information Sharing") is an associate professor of MIS at the University of Oklahoma. She obtained her doctorate in management information systems from the University of Georgia in 1991. She also has a

MA in sociology from Columbia University, a Master's of Management Studies, and a BA in psychology from the University of Bombay. Her current research interests in information systems include electronic collaboration, outsourcing, and knowledge management. She has a strong interest in sociological and organizational theory. She has published in journals such as the *Journal of Management Information Systems*, *Small Group Research*, *Information and Management*, and *Data Base*.

Ivan Png ("Information Goods Pricing and Copyright Enforcement: Welfare Analysis") is Vice Provost for Graduate and Undergraduate Education at the National University of Singapore (NUS). Concurrently, he is the Kwan Im Thong Hood Cho Temple Professor in the School of Computing and Professor of Business Policy. Presently, his research focuses on the economics of copyright and online privacy. Recent papers have been published in the *American Economic Association Papers & Proceedings* and the *Proceedings of the 23rd International Conference on Information Systems*.

Carol S. Saunders ("The Social Construction of Meaning: An Alternative Perspective on Information Sharing") is Professor of Management Information Systems at the University of Central Florida. She earned a Ph.D. in organizational behavior and management at the University of Houston. Her current research interests include impacts of information systems on power and communication, interorganizational linkages, and virtual teams. She has published in such journals as *Information Systems Research*, *Organization Science*, the *Communications of the ACM*, the *Journal of Management Information Systems*, the *Academy of Management Journal*, and the *Academy of Management Review*. She is an associate editor of *MIS Quarterly*, *Information Systems Research*, *Decision Sciences*, and the *Information Resources Management Journal*, and is a senior editor of the *e-Services Journal*. She was the General Conference Chair of ICIS '99.

Wendy Schneier Siegal ("Informational Influence in Organizations: An Integrated Approach to Knowledge Adoption") is an assistant professor of marketing at the School of Management, Boston University. Her research focuses primarily on managerial learning and the impact of dispositional and situational factors on managers' information search, information use, and decision-making processes. In addition, she has published and presented research in leading marketing conferences and journals on the use of advertising to change consumer attitudes.

Jan Stallaert ("Decentralized Mechanism Design for Supply Chain Organizations Using an Auction Market") is an assistant professor of information systems at the Marshall School of Business, University of Southern California, Los Angeles. Dr. Stallaert's research focuses on the interplay between economics, information systems, and organizational theory and on developing new types of decision support systems. He applies novel market mechanisms, enabled by e-commerce, to design new distributed approaches in problem solving.

Detmar Straub ("When Subordinates Become IT Contractors: Persistent Managerial Expectations in IT Outsourcing") is the J. Mack Robinson Distinguished Professor at Georgia State. Detmar has conducted research in e-commerce, security, and global IT. Over 90 of his papers have appeared in *Management Science*, *Information Systems Research*, *MIS Quarterly*, *Organization Science*, the *Journal of MIS*, the *Journal of Global Information Management*, and elsewhere. Besides international consultation, he serves as GSU Director of Doctoral Programs-Research and AE for *Management Science* and *Informational Systems Research*. He holds a DBA in MIS from Indiana and a Ph.D. in English from Penn State.

Stephanie Watts Sussman ("Informational Influence in Organizations: An Integrated Approach to Knowledge Adoption") is Assistant Professor of Information Systems at Boston University's School of Management. Prior to 2001 she was an IS faculty member at Case Western Reserve University. She received her B.A. from Brown University and her M.Sc. and D.B.A. from Boston University. Her research focuses on the impact of mediated communications and technologies on organizational work, particularly knowledge work. Her work has been published in *Organization Science* and *Information Systems Research*.

W. M. P. van der Aalst ("XML-Based Schema Definition for Support of Interorganizational Workflow") is Professor of Information Systems and head of the Department of Information and Technology at the Eindhoven University of Technology. He is also a part-time professor in the computing science department and has been working as a part-time consultant for Bakkenist for several years. His research interests include information systems, simulation, Petri nets, process models, workflow management systems, verification techniques, enterprise resource planning systems, computer supported cooperative work, and interorganizational business processes.

Andrew B. Whinston ("Decentralized Mechanism Design for Supply Chain Organizations Using an Auction Market") is the Roy Hugh Cullen Professor in Information Systems, Computer Science, and Economics, and Director of the Center for Research in Electronic Commerce at The University of Texas at Austin. He is Editor-in-Chief of *Decision Support Systems* and the *Journal of Organizational Computing*. He has published over 300 papers in major top-rated scientific journals. His current research spans various realms of electronic commerce, its emerging technologies, and its impact on business protocols and processes.
