With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

About Our Authors

Christopher D. Allport ("A Research Note Regarding the Development of the Consensus on Appropriation Scale") is a doctoral student in the Department of Accounting and Information Systems at the Pamplin College of Business, Virginia Polytechnic Institute and State University.

Geneviève Bassellier ("The Influence of Business Managers' IT Competence on Championing IT") is Assistant Professor at the Faculty of Management, McGill University, Montreal, Canada. She received her Ph.D. from the University of British Columbia in 2003. Her current research interests include trust and partnerships between IT and business people, IT competence in business managers, business competence in IT professionals, and the sharing and transfer of knowledge between IT and business people.

Amit Basu ("Synthesis and Decomposition of Processes in Organizations") is the Charles Wyly Professor and Chairman of the ITOM Department at SMU's Cox School of Business. He serves on the editorial boards of *INFORMS Journal on Computing*, *ISR*, *Electronic Commerce Research and Applications*, the *Information Technology and Management Journal*, and the *International Journal of Intelligent Systems in Accounting, Finance and Management*. He has a B.Tech (E.E.) from IIT Delhi, an M.B.A. from Southern Illinois University, and an M.S. and Ph.D. from the University of Rochester.

Izak Benbasat ("The Influence of Business Managers' IT Competence on Championing IT") is CANADA Research Chair in Information Technology Management at the Sauder School of Business, University of British Columbia, Vancouver, Canada. He received his Ph.D. in management information systems from the University of Minnesota in 1974. He is past Editor-in-Chief of *Information Systems Research* and currently Senior Editor of the *Journal of the Association for Information Systems*.

Robert W. Blanning ("Synthesis and Decomposition of Processes in Organizations") is Professor of Management at the Owen Graduate School of Management, Vanderbilt University. His research interests are in decision support systems, and he has

authored or coauthored papers in such journals as *Management Science*, *Information Systems Research*, *Decision Support Systems and Electronic Commerce*, and *Organizational Computing and Electronic Commerce*. He is coeditor of *Handbook on Electronic Commerce*, published by Springer in 2000.

Wynne W. Chin ("Authors' Reply to Allport and Kerler 2003") is Bauer Faculty Fellow in the Decision and Information Sciences Department at the University of Houston's C.T. Bauer College of Business. His degrees in biophysics, biomedical/chemical engineering, business, and computers/information systems from U.C. Berkeley, Northwestern University, and the University of Michigan, respectively, have helped him to both understand nonhomogeneous alphas and conduct research related to information technology adoption, satisfaction, and electronic meeting support systems. He serves on various editorial boards (e.g., *Data Base*, the *Structural Equation Modeling Journal*, *Information Systems Research*, and *JAIS*) and develops software for casual/predictive modeling (i.e., *PLS-Graph*, a graphical-based software to perform partial least squares analysis). Born and raised in San Francisco, Wynne currently resides in Houston with his wife Kelly and his two daughters—Christina (14 years old) and Angela (9 years old)—where life is anything but homogenous.

Abhijit Gopal ("Authors' Reply to Allport and Kerler 2003") received his Ph.D. from the University of Georgia and is Associate Professor in the Richard Ivey School of Business Administration at the University of Western Ontario, Canada. His interests lie in the interstitial and peripheral locations of information systems use with particular emphasis on the manner in which information technologies shape and are shaped by political and social conditions and considerations. He has published in both leading journals in the field and marginal ones.

William A. Kerler III ("A Research Note Regarding the Development of the Consensus on Appropriation Scale") is a doctoral student in the Department of Accounting and Information Systems at the Pamplin College of Business, Virginia Polytechnic Institute and State University.

Peter R. Newsted ("Authors' Reply to Allport and Kerler 2003") is Professor of Information Technology Management at Athabasca University. Prior to joining Athabasca, Pete's research at the University of Wisconsin-Milwaukee and the University of Calgary involved modeling problem solving behavior, use of electronic questionnaires, e-mail as a management aid, and development of a website on MIS questionnaires (recently ported to the new *ISWorld* site: <http://www.isworld.org/surveyinstruments/surveyinstruments.htm>). Pete is also interested in distance education and currently investigates the potential for institutions to share technology-enabled courses, and the organizational challenges they face.

Blaize Horner Reich ("The Influence of Business Managers' IT Competence on Championing IT") received a Ph.D. in 1993 from UBC and is Associate Professor in the Faculty of Business Administration at Simon Fraser University, Vancouver, Canada. Dr. Reich's current research includes: knowledge management in IT projects, IT competence in business

managers, and transitions within the IT industry. Recently completed research examined alignment of business and IT strategies. Dr. Reich's articles have appeared in *MIS Quarterly*, *Information Systems Research*, the *Journal of MIS*, the *Journal of Strategic Information Systems*, the *Communications of the Association of IS*, *Financial Post*, and *CIO Canada*.

Wm. David Salisbury ("Authors' Reply to Allport and Kerler 2003") received his Ph.D. from the University of Calgary in 1996 and is an assistant professor with the MIS, OM, and Decision Sciences Department at the University of Dayton. Dave's research mostly investigates organizational impacts of information technology, specifically in computer-mediated group work. Dave's recent work includes the study of knowledge-management and virtual aspects of criminal and terrorist organizations. His work has been published in *Information Systems Research*, *Small Group Research*, *Information & Management*, and *Decision Support Systems*.
