With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

About Our Authors

Ritu Agarwal (“The Effects of Diversity in Global, Distributed Collectives: A Study of Open Source Project Success”) is Professor and Dean’s Chair of Information Systems at the R.H. Smith School of Business, University of Maryland, College Park, where she also directs the Center for Health Information and Decision Systems. She has published over 80 papers in journals such as *JAMIA*, *Health Affairs*, *Information Systems Research*, *MIS Quarterly*, *Management Science*, and elsewhere. Her current research is focused on the use and transformational impacts of IT in healthcare settings, how health IT changes clinical workflows, privacy concerns with digitized medical information, and the effects of IT on cost and healthcare quality.

John Aloysius (“Sequential Pricing of Multiple Products: Leveraging Revealed Preferences of Retail Customers Online and with Auto-ID Technologies”) is an associate professor of supply chain management at the Walton College of Business. His Ph.D. is in Management Science and Operations Management from Temple University in 1996. His research interests are in emerging technologies and behavior in the retail supply chain. His publications have appeared in *Production and Operations Management*, *Organizational Behavior and Human Decision Processes*, *Journal of Economic Behavior and Organization*, *European Journal of Operations Research*, *Decision Sciences*, and other journals.

Martin Bichler (“Efficiency with Linear Prices? A Game-Theoretical and Computational Analysis of the Combinatorial Clock Auction”) is a full professor at the Department of Informatics of the TU München, and a faculty member at the TUM School of Management. He has contributed to different areas of computer science, information systems, and operations research. In particular he is interested in the design of multi-object markets. Martin worked as a consultant in spectrum auctions and on auction design.

Jesse Bockstedt (“The Framing Effects of Multi-part Pricing on Consumer Purchasing Behavior of Customized Information Good Bundles”) is an assistant professor of MIS in the Eller College of Management at the University of Arizona. He received his Ph.D. in business administration (information systems) from the Carlson School of Management, University of Minnesota. His research focuses on electronic commerce, online consumer behavior, behavioral economics, and the impacts technology evolution on consumers and markets. His work has been

published in *Information Systems Research*, *MIS Quarterly*, *Journal of MIS*, and other leading journals.

Robert Bostrom (“An Investigation of the Appropriation of Technology-Mediated Training Methods Incorporating Enactive and Collaborative Learning”) is a Professor Emeritus at University of Georgia. He is also President of a training and consulting company focusing on facilitation and the effective integration of people and technology. Besides numerous publications in leading academic and practitioner journals, he has extensive consulting and training experience. His current research interests are focused on business process management systems, digital collaboration, technology-supported learning, and the effective design of organizations via integrating human and technological components.

Ann-Frances Cameron (“Multicommunicating: Juggling multiple conversations in the workplace”) is an associate professor in information technology at HEC Montréal. She received her Ph.D. from Queen’s School of Business at Queen’s University in Kingston, Ontario. Her research interests include the use and impact of new technologies for inter- and intraorganizational communication. Her work has appeared in *Organization Science*, *Computers in Human Behavior*, *Journal of Small Business Management*, and *Journal of Information Technology Education*.

Damon E. Campbell (“Breaking the Ice in B2C Relationships: Understanding Pre-Adoption E-Commerce Attraction”) is the Kelley Gene Cook, Sr. Chair of Business Administration and an Assistant Professor of Information Systems in the Else School of Management at Millsaps College. He received his B.A. (2003) in Business Administration from Lewis-Clark State College and M.B.A. (2004) and Ph.D. (2008) degrees from Washington State University. His research interests include interface characteristics in human-computer interaction, e-commerce strategy, and online business-to-consumer relationships. His research has appeared in *Decision Sciences*, the *Journal of the Association for Information Systems*, and others.

Dipanjana Chatterjee (“Governance of Interorganizational Information Systems: A Resource Dependence Perspective”) is an assistant professor in the Faculty of Business, Brock University. He received his Ph.D. from Rensselaer Polytechnic Institute. His research interest is investigating the role of information technology in inter-organizational relationships. He has published his work in *IEEE Transactions on*

Engineering Management, Government Information Quarterly and *Information Systems and E-business Management*. His work was also presented at the Academy of Management annual conference and at the Hawaii International Conference on Systems Sciences.

Sherae Daniel (“The Effects of Diversity in Global, Distributed Collectives: A Study of Open Source Project Success”) is an assistant professor at the Katz School of Business, University of Pittsburgh. She received a B.S. and M.S. in Information Systems from Carnegie Mellon University and a Ph.D. from the University of Maryland, College Park. Her current research is focused on Internet mediated work processes. Her work appears in journals including *Statistical Science* and the *Journal of the AIS*.

Cary Deck (“Sequential Pricing of Multiple Products: Leveraging Revealed Preferences of Retail Customers Online and with Auto-ID Technologies”) is a professor of economics in the Sam M. Walton College of Business at the University of Arkansas where he also directs the Behavioral Business Research Laboratory. Dr. Deck is an affiliate of the Economic Science Institute at Chapman University and is Co-Editor of the *Southern Economic Journal*. His research focuses on the impact of institutions on market outcomes and strategic behavior. He received his Ph.D. in economics from the University of Arizona.

Rajiv M. Dewan (“Pricing of Wireless Services: Service Pricing vs. Traffic Pricing”) is a professor of computers and information systems and senior associate dean for faculty and research at the Simon School of Business, University of Rochester. Professor Dewan has teaching and research interests in electronic commerce, organizational issues in management of information systems, the information technology industry, and financial information systems. He has won three best paper awards for research, all done in collaboration with his colleagues at the Simon School. His current research interests include marketing on the Internet, employment contracts in the software industry, the use of standards in managing information systems, and the use of electronic documents in business workflow automation. His papers have appeared in *Information Systems Research*, *Management Science*, *Journal of Management Information Systems*, *Journal on Computing*, *Decision Support Systems*, and *IEEE Transactions on Computers*.

Amy Farmer (“Sequential Pricing of Multiple Products: Leveraging Revealed Preferences of Retail Customers Online and with Auto-ID Technologies”) is a professor of economics and holder of the Martin chair in business in the Sam M. Walton College of Business at the University of Arkansas where she also directs the Global Community Development Program. She is an applied game theorist focusing on conflict resolution with research interests in law and

economics and economics of the family. She received her Ph.D. in economics from Duke University.

Marshall Freimer (“Pricing of Wireless Services: Service Pricing vs. Traffic Pricing”) is a professor of management science and of computers and information systems at the Simon School of Business, University of Rochester. Professor Freimer has teaching and research interests in applied probability and optimization. His work appears in management, engineering, economics, statistics and mathematics journals. His recent papers have appeared in *Information Systems Research*, *Journal of Management Information Systems*, and *Marketing Science*. He is the co-author with Leonard S. Simon of the book *Analytical Marketing*. He has held a Ford Foundation Faculty Fellowship and has won the Simon School Superior Teaching Award.

Xianjun Geng (“Contracting Information Security in the Presence of Double Moral Hazard”) is an assistant professor in information systems at the Jindal School of Management, University of Texas at Dallas. He received his Ph.D. in Information Systems from the University of Texas at Austin. His recent research focuses on how Internet-enabled IT transforms consumer behavior and firm strategy. His work has appeared or is forthcoming in academic journals such as *Management Science*, *Information Systems Research*, *MIS Quarterly*, *Journal of Marketing*, and *Marketing Science*.

Kim Huat Goh (“The Framing Effects of Multipart Pricing on Consumer Purchasing Behavior of Customized Information Good Bundles”) is an assistant professor in the Division of IT and Operations Management in Nanyang Business School, Nanyang Technological University. He received his Ph.D. in business administration (information systems) from the Carlson School of Management, University of Minnesota. His research areas include behavioral economics, consumer behavior in technology mediated environments, electronic markets and the value of IT. He has previously published in *MIS Quarterly* and the *Journal of Management Information Systems*.

Varun Grover (“Do Large Firms Become Smaller By Using Information Technology?”) is the William S. Lee (Duke Energy) Distinguished Professor of Information Systems at Clemson University. He has published extensively in the information systems field, with nine recent articles ranking him among the top four researchers based on top-tier publications as well as citation impact (h-index). Dr. Grover is Senior Editor (Emeritus) for *MIS Quarterly*, and the *Journal of the AIS* and is a Fellow of the Association for Information Systems

Saurabh Gupta (“An Investigation of the Appropriation of Technology-Mediated Training Methods Incorporating Enactive and Collaborative Learning”)

is an associate professor at Coggin College of Business at University of North Florida, Jacksonville, FL. He completed his Doctorate in MIS at the University of Georgia in Athens, GA. He also holds a B.B.A. from Gujarat University, India, PGDM from Nirma University (India) and M.B.A. from University of Georgia. His work experience and research interests are in the areas of IT training, knowledge management and ERP implementation.

Kun Shin Im (“Do Large Firms Become Smaller By Using Information Technology?”) is a professor of information systems at the School of Business, Yonsei University. He holds a Ph.D. in MIS from University of South Carolina and a Ph.D. in Accounting from Yonsei University. His research interests include organizational effectiveness of IT, IT impact on individual behaviors, and IT Innovation. He has published several studies in these areas in *MIS Quarterly*, *Information Systems Research*, and *Journal of the AIS*.

Karthik N. Kannan (“The Association between the Disclosure and the Realization of Information Security Risk Factors”) is currently an associate professor of management at Krannert School of Management and a faculty fellow with the Center for Education and Research in Information Assurance and Security (CERIAS) at Purdue University. He received his Ph.D. from Carnegie Mellon University in 2003. His research interests are pricing in digital contexts, and economics of information security and piracy.

Atanu Lahiri (“Pricing of Wireless Services: Service Pricing vs. Traffic Pricing”) is an assistant professor of information systems at Foster School of Business, University of Washington. Professor Lahiri has research interests in economics of telecommunications, piracy, software security, and healthcare IT. His papers have appeared in *Journal of Management Information Systems*, *Management Science*, *Manufacturing & Service Operations Management*, and *Decision Support Systems*. His teaching interests include data networks, information security, and cloud computing.

Chul Ho Lee (“Contracting Information Security in the Presence of Double Moral Hazard”) is a visiting professor in management and MIS department in Williams College of Business, Xavier University. He received his Ph.D. in Management Science from the University of Texas at Dallas. His research focuses on economics of information security.

Huigang Liang (“Ensuring Employees’ IT Compliance: Carrot or Stick?”) is an associate professor at College of Business, East Carolina University. His research focuses on IT issues at both individual and organizational levels including avoidance, compliance, assimilation, decision process, and healthcare informatics. His work has appeared in *MIS Quarterly*, *Information Systems*, *Journal of MIS*, *Journal of*

AIS, *Communications of the ACM*, *Decision Support Systems*, *Information Systems Journal*, and *Journal of Strategic Information Systems*, among others. He received his Ph.D. from Auburn University.

Srinivasan Raghunathan (“Contracting Information Security in the Presence of Double Moral Hazard”) is a professor in information systems at the Jindal School of Management, University of Texas at Dallas. He received his Ph.D. from the University of Pittsburgh. His current research focuses on economics of information security and value of information sharing in supply chains. His work has appeared in journals such as *Management Science*, *Information Systems Research*, *Journal on Computing*, *Decision Analysis* and various *IEEE Transactions*.

T. Ravichandran (“Governance of Interorganizational Information Systems: A Resource Dependence Perspective”) is a professor in the Lally School of Management & Technology, RPI. His research expertise and interests are in the following areas: strategic implications of information technology, supply chain management and business-business electronic markets, innovation diffusion and assimilation and organizational renewal and growth through innovation. His research in some of these areas has been funded by grants from the National Science Foundation, Ministry of Education, Singapore, John Broadbent Endowment for Research in Entrepreneurship and Pontikes Center for the Management of Information. His research has been published in journals such as the *Communications of the ACM*, *Decision Sciences*, *European Journal of Information Systems*, *IEEE Transactions on Engineering Management*, *Information Systems Research*, *Information Technology and Management*, *Logistics Information Systems*, *Journal of Management Information Systems* and *MIS Quarterly*. He currently serves as a Department Editor of *IEEE Transactions on Engineering Management*. In the recent past, he has served as a member of the Editorial Review Board of *IEEE Transactions on Engineering Management* and as an Associate Editor of *MIS Quarterly* and *Information Systems Research*. He has also served as a guest editor for the ACM Database for *Advances in MIS*.

Pasha Shabalin (“Efficiency with Linear Prices? A Game-Theoretical and Computational Analysis of the Combinatorial Clock Auction”) holds a diploma in Informatics and a Ph.D. in Information Systems from the TU München. He also completed a graduate program on Technology Management. Pasha was involved in different IT projects as a software developer and a software architect. He worked as a consultant on spectrum auctions and on auction design for industrial procurement markets.

Katherine J. Stewart (“The Effects of Diversity in Global, Distributed Collectives: A Study of Open Source Project Success”) is an associate professor of

information systems at the R. H. Smith School of Business, University of Maryland at College Park. She received a B.S. in Business Administration from the University of Florida and a Ph.D. from the University of Texas at Austin. Dr. Stewart has served on the editorial boards of *Information Systems Research*, *Management Science*, *Journal of Management Information Systems*, and the *Journal of the AIS*.

Tracy Sykes (“Digital Divide Initiative Success in Developing Countries: A Longitudinal Field Study in a Village in India”) is an assistant professor at the University of Arkansas. She has previously worked at the Australian National University and the National Science Foundation. Her research focuses on leveraging social network theory, methods, and analyses to understand technology-related phenomena in organizations and society. Her work has been published in various journals, including *MIS Quarterly*, *Information Systems Research*, *Production and Operations Management*, and the *Journal of the American Medical Informatics Association*.

James T. C. Teng (“Do Large Firms Become Smaller By Using Information Technology?”) is Eunice and James L. West Distinguished Professor at the University of Texas at Arlington. He has a Ph.D. degree in Information Systems from the University of Minnesota. He has published extensively in leading information systems journals such as *Information Systems Research*, *MIS Quarterly*, *Journal of MIS*, and *Decision Sciences*. His research interests include knowledge management, implementation of enterprise systems, and the impact of information technology on the individuals, organizations and economy.

Tunay Tunca (“Fighting Fire with Fire: Commercial Piracy and the Role of File Sharing on Copyright Protection Policy for Digital Goods”) is an associate professor of decision, operations, and information technology at Robert H. Smith School of Business at University of Maryland. He received his Ph.D. in Business Administration from Stanford University in 2002. His research interests include economics of technology and operations management, theoretical and empirical analysis of procurement contracts and auctions, economics of network security, digital goods and piracy, and the role of information and forecasting in supply chains.

Jackie Rees Ulmer (“The Association between the Disclosure and the Realization of Information Security Risk Factors”) is currently an associate professor of management information systems and a faculty fellow with the Center for Education and Research in Information Assurance and Security (CERIAS) at Purdue University. She received her Ph.D. from the University of Florida in 1998. Her research interests include information security, privacy, and machine learning in business intelligence.

Joseph S. Valacich (“Breaking the Ice in B2C Relationships: Understanding Pre-Adoption E-Commerce Attraction”) is an Eller Professor of MIS in the Eller College of Management at the University of Arizona and a Fellow of the Association for Information Systems. He received the Ph.D. degree from The University of Arizona (MIS) (1989), and the M.B.A. and B.S. (computer science) degrees from The University of Montana. His primary research interests include human-computer interaction, cyber security, deception detection, technology-mediated collaboration, individual and group decision making, and e-business.

Viswanath Venkatesh (“Digital Divide Initiative Success in Developing Countries: A Longitudinal Field Study in a Village in India”) is a Distinguished Professor and Billingsley Chair at the University of Arkansas. He has published in and served on the editorial boards of leading IS, organizational behavior, operations management, marketing and psychology journals, with citations to his work being over 17,000 and 6,000 per Google Scholar and Web of Science respectively. He has published a book to help junior academics in their pursuit of success (<http://road2successbook.com>). He runs an IS research rankings website (<http://vvenkatesh.com/ISRranking>).

Tawei Wang (“The Association between the Disclosure and the Realization of Information Security Risk Factors”) is currently an assistant professor of accounting at the University of Hawaii at Manoa. He received his Ph.D. from Krannert Graduate School of Management at Purdue University in 2009. His research interests are information security, IT management, and mandatory as well as voluntary disclosures.

Jane Webster (“Multicommunicating: Juggling multiple conversations in the workplace”) received her Ph.D. from New York University and is the E. Marie Shantz Professor of MIS at Queen’s University, Canada. She has served as a Senior Editor for *MIS Quarterly*, VP of Publications for AIS, and advisor for AIS-SIGCHI. She has published in journals such as the *Academy of Management Journal*, *Communication Research*, *Information Systems Journal*, *MIS Quarterly*, and *Organization Science*. Her current research concerns information systems and technologies to support environmental sustainability.

John D. Wells (“Breaking the Ice in B2C Relationships: Understanding Pre-Adoption E-Commerce Attraction”) is an associate dean for professional programs and an associate professor in the Isenberg School of Management at the University of Massachusetts Amherst. He received his B.B.A. degree in Management from the University of Oklahoma and M.S. and Ph.D. degrees in Management Information

Systems from Texas A&M University. His research has focused on the influence of system design characteristics on human perceptions and behavior primarily in the area of business-to-consumer (B2C) E-Commerce.

Liansheng Wu ("Ensuring Employees' IT Compliance: Carrot or Stick?") is professor and chair of the accounting department, Guanghua School of Management, Peking University. His research interests include accounting standard setting, earnings management, corporate governance, and managerial accounting. His work has appeared in *Journal of Accounting and Public Policy*, *Journal of Banking and Finance*, *Applied Economics*, and *International Review of Economics and Finance*. He serves on the editorial board of *International Journal of Managerial and Financial Accounting* and *International Journal of Management Development*.

Qiong Wu ("Fighting Fire with Fire: Commercial Piracy and the Role of File Sharing on Copyright Protection Policy for Digital Goods") is a Director in the Fixed Income Research division of Bank of China International in Hong Kong, China. She received her Ph.D. in Business Administration from

Stanford University in 2007, M.S. degree in computer science and B.S. degrees in computer science and economics from Beijing University. Her research has previously appeared in such journals as *Management Science* and *Chinese Journal of Software*.

Yajiong Xue ("Ensuring Employees' IT Compliance: Carrot or Stick?") is an associate professor at East Carolina University. She received her Ph.D. from Auburn University. Her research has appeared in *MISQ*, *ISR*, *JMIS*, *JAIS*, *ISJ*, *JSIS*, *Communications of the ACM*, *Decision Support Systems*, *International Journal of Production Economics*, *International Journal of Medical Informatics*, and others. Her research interests include IT governance, strategic management of information technology, and healthcare information systems.

Georg Ziegler ("Efficiency with Linear Prices? A Game-Theoretical and Computational Analysis of the Combinatorial Clock Auction") holds a diploma in Financial Mathematics and a Ph.D. in Information Systems from the TU München. In his research he focuses on pricing in combinatorial auctions. He is interested in optimization, game theory, and experimental research.
