Vibhanshu Abhishek (“[When the Bank Comes to You: Branch Network and Customer Omnichannel Banking Behavior](#)”) is an associate professor of information systems at the Paul Merage School of Business, University of California, Irvine. His research focuses on the impact of new technologies on consumer behavior, firm strategy, and market structure, more specifically in the context of advertising, retail, and the Internet of Things. He received his PhD from The Wharton School at the University of Pennsylvania in 2012.

Gediminas Adomavicius (“[Consumption and Performance: Understanding Longitudinal Dynamics of Recommender Systems via an Agent-Based Simulation Framework](#)”) is a professor of information and decision sciences at the University of Minnesota and holds the Carolyn I. Anderson chair in Business Education Excellence. He studies recommender systems, machine learning, and electronic market mechanisms. He received the NSF CAREER Award for his research on recommender systems. He has served as senior editor for *Information Systems Research* and *MIS Quarterly* and is a Distinguished Fellow of the INFORMS Information Systems Society.

Edward G. Anderson, Jr. (“[Platform Pricing and Investment to Drive Third-Party Value Creation in Two-Sided Networks](#)”) is the Wright Centennial Professor at the University of Texas McCombs School of Business. Anderson researches distributed innovation, agile product development, and performance improvement in industries, including smartphones, healthcare, and the Internet of Things. Prior to academia, he was a practicing embedded software engineer. He received his PhD from Massachusetts Institute of Technology. He currently serves as department editor for Industry Studies & Public Policy at *Production and Operations Management*. He holds six patents.

Animesh Animesh (“[Financial Returns to Firms’ Communication Actions on Firm-Initiated Social Media: Evidence from Facebook Business Pages](#)”) is an associate professor in information systems at the Desautels Faculty of Management, McGill University, Canada. Animesh has a PhD from the University of Maryland and a master’s degree from Carnegie Mellon University.

He studies adoption, design, and impact of technologies, digital platforms, and business models. His research has been published in top journals, such as *Information Systems Research*, *MIS Quarterly*, *Journal of Operations Management*, and *Marketing Science*.

Ravi Bapna (“[Words Matter! Toward a Prosocial Call-to-Action for Online Referral: Evidence from Two Field Experiments](#)”) is the Curtis L. Carlson Chair in business analytics and information systems at the Carlson School of Management, University of Minnesota, where he also serves as the associate dean for executive education and the academic director of the Carlson Analytics Laboratory. His research investigates social media, social engagement, analytics, economics of information systems, trust and peer influence online, e-market design, grid computing, and the design of the information technology organization.

A. James Baroody (“[Electronic Health Records and the Logics of Care: Complementarity and Conflict in the U.S. Healthcare System](#)”) is a lecturer of management information systems at the Saunders College of Business at Rochester Institute of Technology. He earned his PhD and MS from the Department of Computer Sciences at the University of Wisconsin-Madison. Before joining the Saunders College faculty, Dr. Baroody worked at the National Institute of Standards and Technology and Xerox Corporation. His research interests are health information technology, enterprise information systems, and data-base systems.

John Sibley Butler (“[Social Networks, Funding, and Regional Advantages in Technology Entrepreneurship: An Empirical Analysis](#)”) is the J. Marion West Chair in Constructive Capitalism, McCombs School of Business, University of Texas at Austin. He holds a joint appointment in organizational sociology and is an IC2 Fellow. He is director of the Jon Brumley Texas Venture Labs. He has published widely in organizational science and entrepreneurship. His many books include *Global Issues in Technology Transfer and Development of University-Based Entrepreneurship Ecosystems*. His PhD is from Northwestern University, Evanston, Illinois.

Hasan Cavusoglu (“[Bloatware and Jailbreaking: Strategic Impacts of Consumer-Initiated Modification of Technology Products](#)”) is an associate professor of management information systems in the Sauder School

of Business, University of British Columbia. He received his PhD and MS degrees from the School of Management, University of Texas at Dallas. His current research interests are economics of information systems, economics of information security and privacy, privacy on online social networks, and management of technology and information.

Huseyin Cavusoglu (“[Bloatware and Jailbreaking: Strategic Impacts of Consumer-Initiated Modification of Technology Products](#)”) is a professor of information systems at Naveen Jindal School of Management at the University of Texas at Dallas. He received his MS and PhD degrees from the University of Texas at Dallas in 2003. He also holds a BS degree in industrial engineering from Bogazici University in Turkey. His research lies at the intersection of economics and information systems. He is interested in exploring the economic implications of emerging information technologies and technology artifacts.

Sunghun Chung (“[Financial Returns to Firms’ Communication Actions on Firm-Initiated Social Media: Evidence from Facebook Business Pages](#)”) is an assistant professor of information systems and analytics at the Leavey School of Business at Santa Clara University. He received his BS and PhD from Korea Advanced Institute of Science and Technology. His research interests include FinTech analytics, business value of information technology innovation, and business analytical issue of social media. His research has appeared in *Information Systems Research* and *Information & Management* among others.

Milind Dawande (“[Sustaining a Good Impression: Mechanisms for Selling Partitioned Impressions at Ad Exchanges](#)”) is the Mike Redeker Distinguished Professor in Management at the Naveen Jindal School of Management at the University of Texas at Dallas. His research interests are in optimization theory and its applications to problems in manufacturing and service operations management.

Ming Fan (“[An Empirical Analysis of Seller Advertising Strategies in an Online Marketplace](#)”) is an associate professor in Information Systems at the Foster School of Business, University of Washington. His research interests are in the area of electronic commerce, sponsored product advertising, and economics of information systems. He has published in *Information Systems Research*, *MIS Quarterly*, *IEEE Transactions on Knowledge and Data Engineering*, *Journal of Management Information Systems*, and other journals.

Rajiv Garg (“[Social Networks, Funding, and Regional Advantages in Technology Entrepreneurship: An Empirical Analysis](#)”) is an assistant professor in the Department of Information, Operations, and Risk Management at the McCombs School of Business at the University of Texas at Austin. His expertise is on social data science with a focus on developing novel

cross-disciplinary methods for analyzing information flow. His research work has appeared in top-tier journals and conference proceedings. Rajiv received his PhD from Carnegie Mellon University and two graduate degrees from the University of Southern California.

Dan Geng (“[When the Bank Comes to You: Branch Network and Customer Omnichannel Banking Behavior](#)”) received her PhD in information systems from Singapore Management University. Her research interests include financial services and information technology. She works on areas including omnichannel retail banking operations and credit card-based partnerships. Her research has appeared in various conference proceedings, including those of the International Conference of Information Systems.

Xianjun Geng (“[Bloatware and Jailbreaking: Strategic Impacts of Consumer-Initiated Modification of Technology Products](#)”) is a full professor of management science and Norman Mayer Professor of Business at the A. B. Freeman School of Business, Tulane University. He received his Bachelor of Engineering, Bachelor of Economics, and Master of Engineering from Tsinghua University, Beijing, China, and PhD in information systems from the University of Texas at Austin. His research interests include pricing, information security, business analytics, supply chain management, and behavioral economics.

Anindya Ghose (“[Trade-Offs in Online Advertising: Advertising Effectiveness and Annoyance Dynamics Across the Purchase Funnel](#)”) is the Heinz Riehl Chair Professor of Business at New York University’s Stern School of Business. He is the author of *TAP: Unlocking the Mobile Economy* and the recipient of the INFORMS Information Systems Society Distinguished Fellow Award. In 2017, he was recognized by Thinkers50 as one of the Top 30 Management Thinkers globally most likely to shape the future of how organizations are managed in the next generation. He is the recipient of a National Science Foundation CAREER award.

Joseph M. Golden (“[Words Matter! Toward a Prosocial Call-to-Action for Online Referral: Evidence from Two Field Experiments](#)”) is cofounder/chief executive officer of Collage.com. He completed his PhD in economics at the University of Michigan. He previously worked as an economist at Google and Upwork.

Anandasivam Gopal (“[Is the Grass Greener? On the Strategic Implications of Moving Along the Value Chain for IT Service Providers](#)”) is the Dean’s Professor of Information Systems at the Robert H. Smith School of Business, University of Maryland, College Park. He received a PhD in information systems from the Tepper School of Business, Carnegie Mellon University. His research interests are in the economics of information systems, focusing on digital platforms, technology-related entrepreneurship, and innovation.

He serves as a senior editor for *Information Systems Research*.

Alok Gupta (“Consumption and Performance: Understanding Longitudinal Dynamics of Recommender Systems via an Agent-Based Simulation Framework”) is the Associate Dean for Faculty and Research at the Carlson School of Management, University of Minnesota. He is the Curtis L. Carlson Schoolwide Chair in Information Management and the former chair of the Information and Decision Sciences Department. His research focuses on economic engineering of systems. He received the NSF CAREER Award for research on dynamic pricing mechanisms in 2001. He is an INFORMS ISS Distinguished Fellow and a Fellow of the Association for Information Systems.

Kunsoo Han (“Financial Returns to Firms’ Communication Actions on Firm-Initiated Social Media: Evidence from Facebook Business Pages”) is an associate professor of information systems at Desautels Faculty of Management, McGill University. He received his PhD from the University of Minnesota and his BS and MS from KAIST. His research interests include IT outsourcing, business value and impacts of IT, and IT-enabled channels. His work has appeared in *Information Systems Research*, *MIS Quarterly*, *Production and Operations Management*, *Journal of Management Information Systems*, and *Sloan Management Review* among others.

Sean Hansen (“Electronic Health Records and the Logics of Care: Complementarity and Conflict in the U.S. Healthcare System”) is an associate professor of management information systems and the Department Chair of Management Information Systems, Marketing, and Digital Business at the Saunders College of Business at Rochester Institute of Technology. He earned his PhD and MBA from the Weatherhead School of Management at Case Western Reserve University. His research focuses on the impact of health information technology, information systems development methods, and distributed collaboration.

Ganesh Janakiraman (“Sustaining a Good Impression: Mechanisms for Selling Partitioned Impressions at Ad Exchanges”) is the Ashbel Smith Professor of Operations Management at the Naveen Jindal School of Management at the University of Texas at Dallas. His research interests include stochastic inventory theory and auctions for procurement.

Jaehwuen Jung (“Words Matter! Toward a Prosocial Call-to-Action for Online Referral: Evidence from Two Field Experiments”) is an assistant professor of management information systems at Fox School of Business, Temple University. The unifying theme of his research is to causally examine the impact of new technology channels, digital platforms,

and technology-enabled features on user behavior and firms’ outcomes. He received a PhD in business administration from the Carlson School of Management at the University of Minnesota.

Sabari Rajan Karmegam (“Is the Grass Greener? On the Strategic Implications of Moving Along the Value Chain for IT Service Providers”) is a doctoral candidate in information systems at the Robert H. Smith School of Business, University of Maryland, College Park. His research interests focus on the information economics and social norms in online platforms, entertainment analytics, and IT services. He worked in the IT consulting industry in various capacities for 11 years before starting his PhD program. He continues to consult and conducts research with leading online platforms and start-ups.

Wolfgang Ketter (“Consumption and Performance: Understanding Longitudinal Dynamics of Recommender Systems via an Agent-Based Simulation Framework”) is professor of information systems and Director of the Institute of Energy Economics at the University of Cologne, where research he leads focuses on how digital transformation can create a faster and more stable transition to sustainable energy and mobility. He is also professor and director at Erasmus University and energy policy advisor to the German government. He has served as editor for *Information Systems Research* and *MIS Quarterly* and is Program Chair of ICIS 2021.

Balaji R. Koka (“Is the Grass Greener? On the Strategic Implications of Moving Along the Value Chain for IT Service Providers”) is an associate professor at the Jones Graduate School of Business, Rice University. He received his PhD in strategic management from the University of Pittsburgh. His research interests are in the areas of network evolution, organizational change, dynamic capabilities, and offshoring. He has published in journals, such as *Strategic Management Journal*, *Academy of Management Review*, and *MIS Quarterly*. He has served on the editorial boards of *Strategic Management Journal*, *Academy of Management Review*, and *Academy of Management Journal*.

Beibei Li (“When the Bank Comes to You: Branch Network and Customer Omnichannel Banking Behavior”) is the Anna Loomis McCandless Chair and associate professor of information systems at the H. John Heinz III College of Carnegie Mellon University. She received her PhD with distinction from the Leonard N. Stern School of Business at New York University. She has extensive experience at leveraging both observational data analytics and experimental analysis with a strong focus on modeling customer behavior across online, offline, and mobile channels for decision support.

Sameer Mehta (“Sustaining a Good Impression: Mechanisms for Selling Partitioned Impressions at Ad Exchanges”) is a PhD student in management science (information systems concentration) at the Naveen Jindal School of Management at the University of Texas at Dallas. His research focuses on the economics of information systems and operational issues in technology markets.

Syam Menon (“Bargaining over Data: When Does Making the Buyer More Informed Help?”) is a professor of information systems at the University of Texas at Dallas. He received his PhD from the University of Chicago. His current interests include crowdsourcing, data sharing, privacy, and recommendation system design. His contributions have appeared in *Management Science*, *Information Systems Research*, *MIS Quarterly*, *Operations Research*, *INFORMS Journal on Computing*, and many other outlets, including various Institute of Electrical and Electronics Engineers (IEEE) and Association for Computing Machinery (ACM) Transactions.

Vijay Mookerjee (“Bargaining over Data: When Does Making the Buyer More Informed Help?” “Sustaining a Good Impression: Mechanisms for Selling Partitioned Impressions at Ad Exchanges”) holds a PhD in management with a major in management information systems from Purdue University. He serves (or has served) on the editorial board of several peer-reviewed journals, including *Management Science*, *Information Systems Research*, and *Operations Research* and is the Charles and Nancy Davidson Chair in Information Systems at the Naveen Jindal School of Management at the University of Texas at Dallas. His current research interests include social networks, optimal software development methodologies, content delivery systems, the economic design of expert systems and machine learning systems, and the optimal design of e-commerce servers, web server capacity planning, software development, and expert systems.

Geoffrey G. Parker (“Platform Pricing and Investment to Drive Third-Party Value Creation in Two-Sided Networks”) is professor of engineering at Dartmouth College. He has made seminal contributions to the field of network economics as codeveloper of the theory of “two-sided” markets. Parker serves in numerous editorial capacities and serves as department editor for the e-business and operations at *Production and Operations Management*. He received a BSE from Princeton and MS and PhD from the Massachusetts Institute of Technology.

Alain Pinsonneault (“Financial Returns to Firms’ Communication Actions on Firm-Initiated Social Media: Evidence from Facebook Business Pages”), Fellow-Royal Society of Canada, National Order of Québec, and Association of Information Systems,

is a Distinguished James McGill Professor and the Imasco Chair at McGill University. His research interests include the impacts of IT, user adaptation, and the digital economy. His research has appeared in *Management Science*, *MIS Quarterly*, *Information Systems Research*, *Journal of Management Information Systems*, and *Organization Science*. He has served on the editorial boards of several journals, including *MIS Quarterly*, *Information Systems Research*, *Organization Science*, and *Journal of Management Information Systems*.

William M. Rand (“Is the Grass Greener? On the Strategic Implications of Moving Along the Value Chain for IT Service Providers”) is an associate professor of marketing at the Poole College of Management, North Carolina State University. He received a PhD in computer science from the University of Michigan. He uses computational modeling techniques to help understand and analyze complex systems, such as information diffusion, organizational learning, and economic markets. He has received funding from the National Science Foundation, DARPA, Google, and the Marketing Science Institute. His work has been published in *Journal of Marketing*, *Management Science*, and *Journal of Operations Management*.

Jyotishka Ray (“Bargaining over Data: When Does Making the Buyer More Informed Help?”) is an assistant professor in the Management Department of California State University, East Bay. He completed his doctorate with an information system concentration from the University of Texas at Dallas in 2017. His research interests include software demonstration and commercialization of software products. He has also published in *Production and Operations Management*. He has six years of managerial experience in the automobile manufacturing industry.

Param Vir Singh (“Trade-Offs in Online Advertising: Advertising Effectiveness and Annoyance Dynamics Across the Purchase Funnel”) is the Carnegie Bosch Chair, Director of PNC Center for Financial Services Innovation, and professor of business technologies at the Tepper School of Business, Carnegie Mellon University. He investigates the use of social technologies to solve business problems. He is the recipient of Information System Society’s Sandra Slaughter Early Career Award. He is an associate editor for *Management Science* and a senior editor for *Information Systems Research*. He holds a PhD from the University of Washington.

Bryan Stephens (“Social Networks, Funding, and Regional Advantages in Technology Entrepreneurship: An Empirical Analysis”) is a postdoctoral associate in the Fuqua School of Business at Duke University. He received his PhD from the University of Texas at Austin in 2018.

Haoyan Sun (“An Empirical Analysis of Seller Advertising Strategies in an Online Marketplace”) is an assistant professor at Lehigh University. She received her PhD in Information Systems from Foster School of Business at the University of Washington. Her research applies empirical methods to study the problems related to the effect of emerging technologies on user behavior, business strategy, and platform dynamics. She uses econometric modeling, Bayesian analysis, and social network analysis in different topics of research.

Tianshu Sun (“Words Matter! Toward a Prosocial Call-to-Action for Online Referral: Evidence from Two Field Experiments”) is an assistant professor at the Marshall School of Business, University of Southern California. His research addresses how firms can use field experiments in conjunction with big data to improve business decisions. His research focuses on how digital and data-driven interventions can influence information sharing among individuals, and integrate offline and offline world. He has given 70 talks at top universities/conferences and has published in *Management Science*, *Information Systems Research*, and *Journal of Health Economics*.

Burcu Tan (“Platform Pricing and Investment to Drive Third-Party Value Creation in Two-Sided Networks”) is an assistant professor at the University of New Mexico. She received her PhD in operations management from the University of Texas at Austin. Her research interests include platform business strategy, strategic sourcing, and supply chain risk management.

Yong Tan (“An Empirical Analysis of Seller Advertising Strategies in an Online Marketplace”) is the Michael G. Foster Endowed Professor of Information Systems at the Michael G. Foster School of Business, University of Washington. His research interests include electronic, mobile, and social commerce, big data, economics of information systems, social and economic networks, and health IT. He has published in

Management Science, *Information Systems Research*, and *MIS Quarterly*, among others. He is a senior editor of *Information Systems Research*.

Vilma Todri (“Trade-Offs in Online Advertising: Advertising Effectiveness and Annoyance Dynamics Across the Purchase Funnel”) is an assistant professor at the Goizueta Business School of Emory University. Her research examines the effectiveness of digital strategies as well as how digital interactions in technology-mediated environments affect consumers’ decisions. Her research has been published at various premier venues, such as *Information Systems Research*, *MIS Quarterly*, and *Conference on Knowledge Discovery and Data Mining*. Vilma received her PhD from New York University in 2016.

Jingjing Zhang (“Consumption and Performance: Understanding Longitudinal Dynamics of Recommender Systems via an Agent-Based Simulation Framework”) is an associate professor of operations and decision technologies at the Kelley School of Business, Indiana University. Her research interests include personalization techniques, recommender systems, and human-computer interactions. Her work has been published in journals, including *MIS Quarterly*, *Information Systems Research*, *INFORMS Journal on Computing*, and *IEEE Transactions on Knowledge and Data Engineering*.

Mi Zhou (“When the Bank Comes to You: Branch Network and Customer Omnichannel Banking Behavior”) is a PhD candidate in information systems and management at Carnegie Mellon University’s Heinz College. Her research interests focus on the interaction between individual behavior and digital transformation in both online and offline markets. Prior to joining Carnegie Mellon University, she received her bachelor’s in e-commerce from Beijing University of Posts and Telecommunications and her master’s in management science and engineering from Tsinghua University.
