Alessandro Acquisti (“The Welfare Impact of Targeted Advertising Technologies”) is the Trustees Professor of Information Technology and Public Policy at Carnegie Mellon University. His award-winning and widely published studies have spearheaded the investigation of disclosure behavior in online social networks and the application of economics and behavioral economics to the study of privacy. He has a PhD from the University of California, Berkeley (UCB), and master degrees from UCB, the London School of Economics, and Trinity College Dublin.

David Antons (“How IT Investments Help Hospitals Gain and Sustain Reputation in the Media: The Role of Signaling and Framing”) is professor and codirector of the Institute for Technology and Innovation Management at RWTH Aachen University. He holds a PhD from Aachen University. He is interested in knowledge sharing, psychological influences of decision making, learning from failure, employee voice, and text mining. He has published in *Academy of Management Review*, *Journal of Management*, *Academy of Management Perspectives*, *Research Policy*, *Journal of Service Research*, and *Journal of Product Innovation Management*.

Subhajyoti Bandyopadhyay (“Sponsored Data: Smarter Data Pricing with Incomplete Information”) is the George W. and Lisa O. Etheridge, Jr. Professor of Information Systems and Operations Management at University of Florida. He received his PhD in MIS from Purdue University in 2002. His work has been published in the areas of information systems, operations management and marketing. His current research interests include economics of information systems and public policy, especially in net neutrality, online media competition, and national broadband policy.

Michael Barrett (“How IT Investments Help Hospitals Gain and Sustain Reputation in the Media: The Role of Signaling and Framing”) is director of research and professor of information systems and innovation studies at Cambridge Judge Business School. He is academic director of Cambridge digital innovation and distinguished visiting professor at the Stockholm School of Economics. His research interests include the adoption and use of digital health and the role of digital innovation in facilitating financial and

social inclusion. He is currently editor-in-chief of *Information & Organization*.

Konstantin Bauman (“Know Thy Context: Parsing Contextual Information from User Reviews for Recommendation Purposes”) is an assistant professor at the Fox School of Business, Temple University. His research interests lie in the area of design science with a focus on developing novel approaches to recommender systems that predict customer preferences and provide better personalized advice. Before joining Fox, he worked as a postdoctoral research scientist at the Stern School of Business, New York University. He received his PhD from the mathematical department of Moscow State University in 2012.

Abhishek Borah (“Creative Appeals in Firm-Generated Content and Product Performance”) is assistant professor of Marketing at INSEAD. He holds a PhD in Marketing from University of Southern California. Abhishek’s research focuses on uncovering insights from unstructured data and returns to marketing strategy with a methodological expertise in computational linguistics. His research has appeared in journals such as *Journal of Marketing*, *Journal of Marketing Research*, *Marketing Science*, *Strategic Management Journal*, and *Harvard Business Review*.

Jianqing Chen (“An Economic Analysis of Rebates Conditional on Positive Reviews”) is a professor in Information Systems at Jindal School of Management, University of Texas at Dallas. He received his PhD from University of Texas at Austin. His research interests are in platform business models, social media and user-generated content, search engine advertising, and economics of information systems. His papers have been published in journals such as *Management Science*, *Information Systems Research*, *MIS Quarterly*, *Journal of Marketing*, and *Journal of Marketing Research*.

Yuan Chen (“What Questions Are You Inclined to Answer? Effects of Hierarchy in Corporate Q&A Communities”) is a professor in the Department of Information Systems and Electronic Commerce, School of Information Management and Engineering, Shanghai University of Finance and Economics. Her research interests are in the areas of crowd behavior, organizational learning, and digital platforms.

Hsing Kenneth Cheng (“What Questions Are You Inclined to Answer? Effects of Hierarchy in Corporate Q&A Communities”; “Sponsored Data: Smarter Data Pricing with Incomplete Information”) is the John B. Higdon Eminent Scholar and Department Chair of the Department of Information Systems and Operations Management, Warrington College of Business, University of Florida. He received his PhD from the University of Rochester. His current research focuses on economic and policy issues of information technology and the internet.

Xiufeng Cheng (“Achieving a Balance Between Privacy Protection and Data Collection: A Field Experimental Examination of a Theory-Driven Information Technology Solution”) received a PhD degree of management science from Central China Normal University (CCNU). He received a master degree of software engineering from University of Wisconsin-Lacrosse. He has been an associate professor in CCNU since 2015 and a postdoctoral fellow and software engineer of system architect in Institute of Scientific and Technical Information of China (ISTIC) since 2018. His professional affiliations include software engineering and information systems design.

Muller Y. M. Cheung (“Seeker Exemplars and Quantitative Ideation Outcomes in Crowdsourcing Contests”) is a lecturer of information systems in the School of Business and Management, Hong Kong University of Science and Technology. He received his PhD in information systems from Hong Kong University of Science and Technology. His research interests include human-computer interaction, crowdsourcing, enterprise systems, and information security.

Yulin Fang (“The Role of Vendor Legitimacy in IT Outsourcing Performance: Theory and Evidence”) is a professor in the Faculty of Business and Economics at University of Hong Kong. He obtained his PhD at Ivey School of Business, Western University, Canada. His research is focused on digital innovation, social media, and e-commerce. He has published in major IS journals, such as *Information Systems Research*, *MIS Quarterly*, and the *Journal of Management Information Systems*.

Abhijeet Ghoshal (“Modifying Transactional Databases to Hide Sensitive Association Rules”) is an assistant professor of information systems at the Gies College of Business, University of Illinois Urbana-Champaign. He received his PhD from University of Texas at Dallas. His current interests include recommendation system design, data sharing, privacy, and software support. His contributions have appeared in *Information Systems Research*, *MIS Quarterly*, *INFORMS Journal on Computing*, *Production and Operations Management*, and the *Journal of Management Information Systems*.

Priyanga Gunarathne (“Racial Bias in Customer Service: Evidence from Twitter”) is an assistant

professor of business administration at the Joseph M. Katz Graduate School of Business, University of Pittsburgh. She received her PhD from the Simon Business School of the University of Rochester in 2018. Her research interests are in the areas of digital platforms, user-generated content, artificial intelligence, electronic privacy, and consumer behavior.

Zhiling Guo (“An Economic Analysis of Rebates Conditional on Positive Reviews”) is an associate professor of Information Systems at Singapore Management University. She received her PhD from University of Texas at Austin. Her recent research focuses on platform business models, fintech innovations, digital payments, cloud computing, and data analytics. Her works appear in *Management Science*, *MIS Quarterly*, *Information Systems Research*, *INFORMS Journal on Computing*, *Journal of Management Information Systems*, and *Production and Operations Management*, among others.

Ola Henfridsson (“Extending Digital Ventures Through Templating”) is a professor of business technology at the Miami Herbert Business School, University of Miami. He has also been appointed a WBS Distinguished Research Environment Professor at the Warwick Business School and a KIN Fellow at VU Amsterdam. His research interests relate to digital innovation, platforms, and technology management. His research has been published in journals such as *Academy of Management Review*, *Information Systems Research*, *MIS Quarterly*, and *Organization Science*.

Yi-Chun (Chad) Ho (“What’s in a ‘Username’? The Effect of Perceived Anonymity on Herding in Crowdfunding”) is an associate professor at the School of Business, George Washington University. He received his PhD from the Foster School of Business, University of Washington. His research interests include sharing economy, digital marketing, social media, and e-commerce. He has published in top-tier business journals, such as *Information Systems Research* and *Production and Operations Management*.

Jian Huang (“An Economic Analysis of Rebates Conditional on Positive Reviews”) is a professor in the School of Management Science and Engineering, Nanjing University of Finance and Economics. He received his PhD in management science and engineering from Nanjing University in 2007. His research interests are in economics of information system and operations, platform-based business models and decision analysis. His papers have been published in academic journals, including *IIE Transactions*, *Decision Sciences*, *European Journal of Operational Research*, *Transportation Research Part E*, and others.

Jimmy Huang (“Extending Digital Ventures Through Templating”) is a professor of information systems and associate dean for global engagement and student recruitment at Nottingham University Business School, University of Nottingham. His research

focuses primarily on the process, dynamics and transformative effects of digital technology, specifically in the context of digital ventures. His research has been published in the top information systems journals, and he is an associate editor for *Information & Management*.

Carol Hsu (“The Role of Vendor Legitimacy in IT Outsourcing Performance: Theory and Evidence”) is a professor at University of Sydney Business School. She received her PhD in information systems from the London School of Economics and Political Science. Her research interests focus on information security management, information technology adoption and digital transformation. Her work has been published in *Information Systems Research*, *MIS Quarterly*, the *Journal of Management Information Systems*, the *Journal of the AIS*, and other outlets.

Yang Jiang (“What’s in a ‘Username’? The Effect of Perceived Anonymity on Herding in Crowdfunding”) is an assistant professor of information systems at the School of Business, Nanjing University. She received her PhD from the School of Management, Harbin Institute of Technology. Her current research interests include crowdfunding, online two-sided markets, and financial market and social media. Her research has been published in premier journals such as *Information Systems Research*.

Abhishek Kathuria (“Ghosts in the Machine: How Marketing and Human Capital Investments Enhance Customer Growth When Innovative Services Leverage Self-Service Technologies”) is an assistant professor of information systems and BAT Research Fellow at the Indian School of Business. He received his PhD from Emory University. His research examines the business value of IT, focusing on innovation, digital platform strategies, and emerging economies. His work has been published in *Journal of Management Information Systems* and *Information Systems Research*, among others, and received multiple best paper awards at various academic conferences.

Mark Keil (“Functional IT Complementarity and Hospital Performance in the United States: A Longitudinal Investigation”) is a Regents’ Professor of University System of Georgia and the John B. Zellars Professor of computer information systems at the J. Mack Robinson College of Business, Georgia State University. He has published more than 120 peer reviewed journal articles, and his work has been cited more than 23,000 times according to Google Scholar. He holds BSE, SM, and DBA degrees from Princeton University, MIT Sloan School, and Harvard Business School, respectively.

Jiban Khuntia (“Ghosts in the Machine: How Marketing and Human Capital Investments Enhance Customer Growth When Innovative Services Leverage Self-Service Technologies”) is an associate professor of information systems at Business School, University of Colorado Denver. His research interests are in emerging IT service innovation and health

information technologies. His work has appeared in *Journal of Management of Information Systems* and *Production and Operations Management*, among others. He earned his PhD from the University of Maryland. Before that, he has more than a decade of experience in IT and supercomputing areas.

Benn R. Konsynski (“Ghosts in the Machine: How Marketing and Human Capital Investments Enhance Customer Growth When Innovative Services Leverage Self-Service Technologies”) is the George S. Craft Distinguished University Professor of Information Systems and Operations Management at Goizueta Business School, Emory University. He held faculty positions at University of Arizona and Harvard Business School and served as adviser and board member on public and private corporations. He was named Baxter Research Fellow at Harvard and Hewlett Fellow at The Carter Center. He has numerous publications and holds a PhD in computer science from Purdue University.

Tat Koon Koh (“Seeker Exemplars and Quantitative Ideation Outcomes in Crowdsourcing Contests”) is an associate professor of information systems in the School of Business and Management, Hong Kong University of Science and Technology. He received his PhD from Carnegie Mellon University. His current research focuses on online platforms and crowd-based innovation.

Rajiv Kohli (“How IT Investments Help Hospitals Gain and Sustain Reputation in the Media: The Role of Signaling and Framing”) is the John N. Dalton Memorial Professor of Business at the Raymond A. Mason School of Business, William & Mary. His research is published in *Management Information Systems Quarterly*, *Management Science*, *Information Systems Research*, *Journal of Management Information Systems*, and *Journal of Operations Management* among other journals. He currently serves as a senior editor for *Information Systems Research*.

Jae-Nam Lee (“The Role of Vendor Legitimacy in IT Outsourcing Performance: Theory and Evidence”) is a professor of management information systems (MIS) at Korea University Business School in Seoul, Korea. He holds MS and PhD degree in MIS from the Korea Advanced Institute of Science and Technology. His research interests are IT outsourcing, information security management, and the business ecosystem. His published research articles appear in *Information Systems Research*, *MIS Quarterly*, the *Journal of the AIS*, and others.

Bailing Liu (“Achieving a Balance Between Privacy Protection and Data Collection: A Field Experimental Examination of a Theory-Driven Information Technology Solution”) is an associate professor in the School of Information Management, Central China Normal University. She received PhD degree in computer science from Huazhong University of Science and Technology in 2010. Her research interests include

information privacy, privacy protection, and mobile commerce. She was the principal investigator of three research projects on information security (2011) and privacy protection (2015, 2020) funded by National Natural/Social Science Foundation of China.

Martin J. Liu (“[Extending Digital Ventures Through Templating](#)”) is a professor of marketing and innovation and associate dean for research and knowledge exchange at the Nottingham University Business School China. He is also a visiting professor at the University of Aberdeen. He works with many digital entrepreneurial firms in China, and his research interest relates to how firms’ achieve their marketing goals with digital innovation mechanisms and digital channels.

Yang Liu (“[What Questions Are You Inclined to Answer? Effects of Hierarchy in Corporate Q&A Communities](#)”) is a PhD candidate in management science and engineering at the School of Information Management and Engineering, Shanghai University of Finance and Economics. Her research interests include knowledge communities, social networks, and online platforms.

Veronica Marotta (“[The Welfare Impact of Targeted Advertising Technologies](#)”) is an assistant professor at the Carlson School of Management, University of Minnesota. She has a PhD in information systems and management from Carnegie Mellon University, and master degrees from Carnegie Mellon University, Tilburg School of Economics and Business, and the University of Rome, Tor Vergata. Marotta’s research interests include the social and economic impact of information technologies, with a particular focus on online privacy, social media, and digital markets.

Xiaowei Mei (“[Sponsored Data: Smarter Data Pricing with Incomplete Information](#)”) is an assistant professor in the Department of Management and Marketing, Hong Kong Polytechnic University. He received his PhD in information systems and operations management from the University of Florida. His current research focuses on telecommunications networks, social network analysis, and economics of information systems.

Syam Menon (“[Modifying Transactional Databases to Hide Sensitive Association Rules](#)”) is a professor of information systems at University of Texas at Dallas. He received his PhD from the University of Chicago. His current interests include crowdsourcing, data sharing, privacy, and recommendation system design. His contributions have appeared in *Management Science*, *Information Systems Research*, *MIS Quarterly*, *Operations Research*, *INFORMS Journal on Computing*, and many other outlets including various IEEE and ACM transactions.

Abhay Nath Mishra (“[Functional IT Complementarity and Hospital Performance in the United States: A Longitudinal Investigation](#)”) is a Kingland Faculty Fellow in business analytics and an associate professor of

information systems and business analytics at Ivy College of Business, Iowa State University. He received his PhD from University of Texas at Austin. His research has been published in *Information Systems Research*, *Management Science*, *MIS Quarterly*, *Production and Operations Management*, *Journal of Operations Management*, *Journal of the American Medical Informatics Association*, and *MISQ Curation*.

Jifeng Mu (“[Creative Appeals in Firm-Generated Content and Product Performance](#)”) is professor of marketing at Alabama A&M University. He has expertise in technological innovation, marketing strategy, and marketing analytics. He holds PhD degrees in Marketing from the University of Washington, and Management Science and Engineering Management from Xi’an Jiaotong University. He publishes in *Information Systems Research*, *Journal of the Academy of Marketing Science*, *Decision Sciences*, and *IEEE Transactions on Engineering Management*, and elsewhere.

Eivor Oborn (“[How IT Investments Help Hospitals Gain and Sustain Reputation in the Media: The Role of Signaling and Framing](#)”) is professor of healthcare management in innovation and organisational change at Warwick Business School, UK. She earned her PhD at Cambridge Judge Business School and is currently an honorary fellow there. Eivor has published work in *Academy of Management Journal*, *Organization Science*, *Information Systems Research*, and *Management Information Systems Quarterly*. Her research interests are in healthcare, digital innovation and information and communication technologies, and organizational theory.

Jeong-ha (Cath) Oh (“[Functional IT Complementarity and Hospital Performance in the United States: A Longitudinal Investigation](#)”) received her PhD from University of Washington at Seattle. She served as an assistant professor at Georgia State University. Her research has been published in *Information Systems Research* and *Production and Operations Management*.

Wanda Orlikowski (“[The Digital Undertow: How the Corollary Effects of Digital Transformation Affect Industry Standards](#)”) is the Alfred P. Sloan Professor of Information Technologies and Organization Studies in the Sloan School of Management, Massachusetts Institute of Technology. Her research examines digital work with a particular focus on the reconfiguring of organizing practices with contemporary digital technologies. She received a BComm (honors) and MComm from the University of the Witwatersrand, and her PhD from New York University.

Paul A. Pavlou (“[Achieving a Balance Between Privacy Protection and Data Collection: A Field Experimental Examination of a Theory-Driven Information Technology Solution](#)”) is the Dean of the C. T. Bauer College of Business, University of Houston. He is also the Cullen Distinguished Chair Professor of Information Sciences. His research has been cited over 70,000 times by Google Scholar, and he was recognized among the “World’s

Most Influential Scientific Minds” by Thomson Reuters. He was ranked number one in the world in publications in the top two information systems journals, *MIS Quarterly* and *Information Systems Research*, during 2010–2016.

Stavros Polykarpou (“How IT Investments Help Hospitals Gain and Sustain Reputation in the Media: The Role of Signaling and Framing”) is an assistant professor (lecturer) at Exeter Business School and the Initiative for the Digital Economy at Exeter, London. He holds a PhD from University of Cambridge. His research at the intersection of organizing emerging and algorithmic technologies and performing value in the digital age has been published in *Information and Organization*, and the *Cambridge Handbook of Qualitative Digital Research*. He was awarded the OCIS Division Best Paper Award at AoM (2020).

Jingchuan Pu (“What Questions Are You Inclined to Answer? Effects of Hierarchy in Corporate Q&A Communities”) is an assistant professor in the Department of Supply Chain and Information Systems at the Smeal College of Business, Pennsylvania State University. He received his PhD from Warrington College of Business, University of Florida. His research focuses on social media (public and corporate), fintech, and e-commerce.

Jiayin Qi (“Creative Appeals in Firm-Generated Content and Product Performance”) is professor and dean of the Institute of Artificial Intelligence and Change Management, and Key Laboratory of Data Science and Management Decision at Shanghai University of International Business and Economics. She received her PhD from Xi’an Jiaotong University, China.

Liangfei Qiu (“What Questions Are You Inclined to Answer? Effects of Hierarchy in Corporate Q&A Communities”; “Sponsored Data: Smarter Data Pricing with Incomplete Information”) is the PricewaterhouseCoopers Associate Professor in the Department of Information Systems and Operations Management, Warrington College of Business, University of Florida. He received his PhD from the University of Texas at Austin. His current research focuses on prediction markets, social networks and social media platforms, telecommunications networks, and economics of information systems.

Huaxia Rui (“Racial Bias in Customer Service: Evidence from Twitter”) is the Xerox Chair Professor at the Simon Business School of University of Rochester. He is broadly interested in data science, causal inference, and the economics of information systems. His research has been published in leading academic journals, such as *Information Systems Research*, *MIS Quarterly*, *Journal of Management Information Systems*, *Management Science*, *Production and Operation Management*, *Journal of Financial Economics*, and *Journal of Mathematical Economics*.

Hyun-Sun Ryu (“The Role of Vendor Legitimacy in IT Outsourcing Performance: Theory and Evidence”) is an assistant professor at Soon Chun Hyang

University. She holds a PhD from Korea University Business School. Her research interests include service innovation with technology, specifically fintech. Her published articles appear in *Information and Management*, *IEEE Transactions on Engineering Management*, *Service Industries Journal*, and others.

Terence J. V. Saldanha (“Ghosts in the Machine: How Marketing and Human Capital Investments Enhance Customer Growth When Innovative Services Leverage Self-Service Technologies”) is an associate professor of information systems at Terry College of Business, University of Georgia. He received his PhD in information systems from Ross School of Business, University of Michigan. His research interests span the business value of IT and the role of IT in innovation. His research is published in *MIS Quarterly*, *Information Systems Research*, *Journal of MIS*, *Journal of Operations Management*, and *Production and Operations Management*.

Torsten Oliver Salge (“How IT Investments Help Hospitals Gain and Sustain Reputation in the Media: The Role of Signaling and Framing”) is a professor and codirector of the Institute for Technology and Innovation Management at RWTH Aachen University, Germany. Oliver is also a fellow of Cambridge Digital Innovation, University of Cambridge, where he received his PhD. Oliver’s work on technology, innovation, and organization theory has been published in *Academy of Management Review*, *Journal of Applied Psychology*, *Journal of Management*, and *MIS Quarterly*, among others.

Sumit Sarkar (“Modifying Transactional Databases to Hide Sensitive Association Rules”) is the Charles and Nancy Davidson Chair of Information Systems in the Naveen Jindal School of Management, University of Texas at Dallas. He received his PhD from University of Rochester. His recent publications are in the areas of personalization, data privacy, crowdsourcing, and sponsored search.

Susan Scott (“The Digital Undertow: How the Corollary Effects of Digital Transformation Affect Industry Standards”) is a professor of information systems and innovation at The London School of Economics and Political Science (LSE). She investigates the digital transformation of work focusing on the following areas: valuation practices and evaluative apparatus, information infrastructures and standards, and digital business. She received a BA from University of London; an MSc from the LSE; and a PhD from University of Cambridge.

Abraham Seidmann (“Racial Bias in Customer Service: Evidence from Twitter”) is a distinguished fellow of the Information Systems Society, the Everett W. Lord Distinguished Faculty Scholar of Information Systems, associate research director for Health Analytics and Digital Health at the Questrom Digital Business Institute, and a senior fellow of Boston University Institute for Health System Innovation & Policy. He is a national expert in the

area of digital health and the author of 100 research articles with more than 8,700 research citations.

Detmar W. Straub (“The Role of Vendor Legitimacy in IT Outsourcing Performance: Theory and Evidence”) is research professor and IBIT Fellow at Temple’s Fox School of Business. A Regents Professor Emeritus of University System of Georgia, he formerly held an endowed professorship at Georgia State University. He has over 225 papers in journals such as *Information Systems Research*, *MIS Quarterly*, *Journal of Management Information Systems*, *Organization Science*, and *Management Science*. His current research theorizes about digital transformation, but also cybersecurity and a wide variety of other technological innovations such as artificial intelligence.

Ning Su (“The Role of Vendor Legitimacy in IT Outsourcing Performance: Theory and Evidence”) is an associate professor at the Ivey Business School, Western University, Canada. He received his PhD from New York University’s Stern School of Business, his master’s degree from University of Toronto, and his bachelor’s degree from Fudan University. His research, which explores digital innovations, sourcing strategies, and public policies, has been published in *Information Systems Research*, *MIS Quarterly*, *Decision Sciences*, *the MIT Sloan Management Review*, and other outlets.

Yong Tan (“What’s in a ‘Username’? The Effect of Perceived Anonymity on Herding in Crowdfunding”) is the Michael G. Foster Endowed Professor of Information Systems at the Michael G. Foster School of Business, University of Washington, and a Distinguished Fellow of the INFORMS Information Systems Society. His research interests include social media and networks, sharing economy, fintech, mobile and electronic commerce, and big data analytics. He has published in *Information Systems Research*, *Management Science*, and *Management Information Systems Quarterly*, among others.

Youyou Tao (“Functional IT Complementarity and Hospital Performance in the United States: A Longitudinal Investigation”) is an assistant professor in the Department of Information Systems and Business Analytics, Loyola Marymount University. She received her PhD in computer information systems from Georgia State University. Her research focus is on healthcare analytics and informatics. In particular, she applies the lenses of IT complementarity, business value, causal reasoning, and predictive analytics to examine the myriad intriguing issues in the healthcare industry.

Alexander Tuzhilin (“Know Thy Context: Parsing Contextual Information from User Reviews for Recommendation Purposes”) is Leonard N. Stern Professor of Business at New York University. His research interests include personalization, recommender systems and artificial intelligence where he produced over 150 research publications. He was a general and a program chair of the International Conference on Data Mining,

and the Recommender Systems Conference, and served on the editorial boards of several journals, including as the editor-in-chief of the *Transactions on Management Information Systems*.

Lai Wei (“Sponsored Data: Smarter Data Pricing with Incomplete Information”) is an associate professor in the Department of Management Science at Antai College of Economics and Management, Shanghai Jiao Tong University. He received his PhD from University of Florida. His work has been accepted for publication in journals including *Information Systems Research*, *Production and Operations Management*, and *Transportation Science*. His research interests lie in the interface between operations management and information system.

Yue Wu (“The Welfare Impact of Targeted Advertising Technologies”) is an assistant professor in the Katz Graduate School of Business, University of Pittsburgh. Yue obtained his PhD degree from INSEAD in 2016. His previous work has appeared in the *Journal of Marketing Research*, *Management Science*, *Manufacturing & Service Operations Management*, *Marketing Science*, and others. Wu’s research interests include applied microeconomic theory, deceptive practices and their regulations, and platform strategies.

Xiangbin Yan (“What’s in a ‘Username’? The Effect of Perceived Anonymity on Herding in Crowdfunding”) is a professor of management science and engineering at the School of Economics and Management, University of Science and Technology Beijing. He received his PhD from the School of Management, Harbin Institute of Technology. His research interests include ecommerce, social media analytics, crowdfunding, social network analysis, and business intelligence. His research has been published in top journals such as *Information Systems Research* and *Production and Operations Management*.

Jonathan Zhang (“Creative Appeals in Firm-Generated Content and Product Performance”) is associate professor of marketing at Colorado State University. His expertise includes digital transformations, omnichannel retail, and quantitative marketing models. He has published in *Marketing Science*, *Journal of Marketing*, *Journal of the Academy of Marketing Science*, *California Management Review*, *MIT Sloan Management Review*, and *Harvard Business Review*. Jonathan holds a PhD in marketing from Columbia University.

Kaifu Zhang (“The Welfare Impact of Targeted Advertising Technologies”) is the head of operations in the Taobao Marketplace at Alibaba Group. Prior to joining Alibaba, he was an assistant professor at Cheung Kong Graduate School of Business and an assistant professor and Xerox Junior Chair in the Tepper School of Business at Carnegie Mellon University. Zhang received a PhD from INSEAD in 2012. His previous work has appeared in the *Journal of Marketing Research*, *Management Science*, and *Marketing Science*.
