Focus on Authors

H. Henry Cao ("Product Strategy for Innovators in Markets with Network Effects") is an assistant professor at University of North Carolina at Chapel Hill. He holds a Ph.D. from University of California at Los Angeles and a Ph.D. from Yale University. His research interest is in the capital markets, and his research has appeared in several journals, including the *Journal of Business*, the *Journal of Finance*, and *Review of Financial Studies*.

Preyas Desai ("Let Me Talk to My Manager: Haggling in a Competitive Environment") is Associate Professor of Business Administration at the Fuqua School of Business, Duke University. He received his Ph.D. from Carnegie Mellon University. His research interests include marketing channels, signaling issues, and marketing of durable products. His recent papers have appeared in *Marketing Science* and *Management Science*.

Ralf Elsner ("Optimizing Rhenania's Direct Marketing Business Through Dynamic Multilevel Modeling (DMLM) in a Multicatalog-Brand Environment") is Vice President of Rhenania Buchversand and Director of Marketing. He received his Ph.D. from WHU, Otto Beisheim Graduate School of Management, in Vallendar near Koblenz, Germany. His research focuses on direct and database marketing optimization. His first paper has appeared in *Interfaces*. Because of successful implementation of his work in practical operations, he was selected as a finalist of the Franz Edelman Award 2002 and winner of the ISMS Practice Prize 2003. He also won the German Alfred Gerardi Dissertation Award 2002 for his thesis.

Joseph A. Foster ("Predicting Sales Takeoff for Whirlpool's New Personal Valet") is Marketing Director of the \$1-billion Brand Fabric Care at Whirlpool Corporation, where he has worked for the last twenty-three years. He has had twenty years of combined sales, marketing, and trade marketing experience in the highly competitive and rapidly evolving major appliance industry, with thirteen years in North America and four years in Europe. He has vast experience in developing and executing strategies for brand building, marketing management, sales & channel management, and product categories.

Xianjun Geng ("Implications of Reduced Search Cost and Free Riding in E-Commerce") is an Assistant Professor in Information Systems at the University of Washington. He received his Ph.D. from the University of Texas at Austin. He holds a B.E. in Automatic Control, a B.A. in Enterprises Management, and an M.E. in Pattern Recognition and Intelligent System from Tsinghua University, China. His current research focuses on new pricing strategies and new market institutions enabled by the Internet, and their impact on electronic commerce.

Peter N. Golder ("Predicting Sales Takeoff for Whirlpool's New Personal Valet" and "Growing, Growing, Gone: Cascades, Diffusion, and Turning Points in the Product Life Cycle") holds a Ph.D. from the University of Southern California and is Associate Professor of Marketing at New York University's Stern School of Business. His research focuses on the market response to really new products, market pioneering, long-term leadership, and

branding. Golder's papers have been published in *Marketing Science*, *Management Science*, the *Journal of Marketing Research*, and several other journals. His research has won several awards, including the AMA-Berry Book Prize and the William F. O'Dell and Frank M. Bass best-paper awards. In 2003, he received AMA's first ever Award for Early Career Contributions to Marketing Strategy, based on his first 10 years of research. Also, last year he was a finalist in the inaugural Marketing Science Conference Practice Prize competition. He serves on the Editorial Review Board of the *Journal of Marketing*.

Arnd Huchzermeier ("Optimizing Rhenania's Direct Marketing Business Through Dynamic Multilevel Modeling (DMLM) in a Multicatalog-Brand Environment") is Professor of Operations Management at the Otto Beisheim Graduate School of Management of WHU in Germany. Formerly, he received his Ph.D. from the Wharton School of the University of Pennsylvania and taught at the Graduate School of Business of the University of Chicago. His research interest focuses on coordination approaches between retailers and manufacturers with focus on promotion planning and direct marketing; the use of real options for global supply chain management, R&D project evaluation, and capacity planning; and models of management quality for industrial excellence. His research has been published in *ECR Journal: International Commerce Review*, the *European Journal of Operational Research*, *Interfaces*, *Management Science*, *Manufacturing & Service Operations Management*, *Operations Research*, and *OR Spectrum*. His research on the Euro introduction was featured on the front pages of *Financial Times* and *The Wall Street Journal Europe*. In 2002, he received the Franz Edelman Finalist Award of INFORMS. In 2003, he won both the ISMS Practice Prize from the Marketing Science Institute and the Management Science Strategic Innovation Prize from the European Association of Operational Research Societies. His outside interests are currently preoccupied by his 3-year-old daughter Alexandra.

Manfred Krafft ("Optimizing Rhenania's Direct Marketing Business Through Dynamic Multilevel Modeling (DMLM) in a Multicatalog-Brand Environment") holds the Chair of Marketing at the University of Münster, Germany. He is also Director of the Center for Interactive Marketing and Media Management (CIM). Prior to being appointed at the University of Münster, he worked four years as the Otto Beisheim Endowed Chair of Marketing at WHU, Otto Beisheim Graduate School of Management, in Vallendar near Koblenz, Germany. Manfred received his Ph.D. from the University of Kiel. His primary research interests include customer relationship management, direct marketing, e-commerce, and sales management. With a paper on the optimization of direct marketing, he won the INFORMS Society for Marketing Science's Practice Prize in 2003 and was a finalist in the Franz Edelman Award competition in 2002. Manfred's recent papers have appeared in such journals as *Interfaces*, the *International Journal of Research in Marketing*, the *Journal of Marketing*, the *Journal of Marketing Research* and now, for the first time, in *Marketing Science*. Currently, he is editing a book on recent trends in

retailing that is coauthored by more than 20 leading scholars in the field. Manfred has also published books on sales management and customer retention and serves on several editorial boards. In his spare time, he enjoys cycling, literature, and classical music, and he is very proud of his family.

Gary L. Lilien ("The Inaugural ISMS Practice Prize Competition") is Distinguished Research Professor of Management Science in The Smeal College of Business Administration at Pennsylvania State University and is also co-founder and Research Director of the Institute for the Study of Business Markets (www.isbm.org). He is the author or co-author of twelve books (including *Marketing Models* with Phil Kotler and *Marketing Engineering* with Arvind Rangaswamy) and over 90 professional articles. He was Departmental Editor for marketing for the journal *Management Science*; is on the editorial board of the *International Journal for Research in Marketing*; is functional Editor for Marketing and former Editor in Chief for *Interfaces*; and is Area Editor at *Marketing Science*. He is the former President, as well as Vice President/Publications, for The Institute of Management Sciences. He is U.S. Coordinator for, and a Fellow of, the European Marketing Academy and serves on the board of directors of the INFORMS Society for Marketing Science. He is an INFORMS Fellow and was honored as Morse Lecturer for INFORMS, and he received the George E. Kimball Medal for distinguished contributions to the field of operations research. He has received honorary doctorates from the University of Liege, the University of Ghent, and Aston University.

Pam Morrison ("Implementing a Prelaunch Diffusion Model: Measurement and Management Challenges of the Telstra Switching Study") is Associate Professor in Marketing at the University of New South Wales in Sydney. She completed her Ph.D. at the Australian Graduate School of Management after completing an undergraduate degree in economics at the University of Queensland, a graduate degree in commerce at the University of New South Wales, and ten years of senior business experience in government. Her research has been published in *Management Science*, *Research Policy*, the *Journal of Business Research*, and the *Australasian Marketing Journal*. Pam has won the ART Forum Best Paper Award and was a finalist in the Inaugural Marketing Science Practice Prize. Her research interests include the diffusion and adoption of innovations, new product development issues, marketing strategy, and branding.

Charlie Nelson ("Implementing a Prelaunch Diffusion Model: Measurement and Management Challenges of the Telstra Switching Study") is a forecasting and market modeling consultant. He has worked in this field for 30 years and established foreseexchange pty ltd in 2000. He has a B.Sc. degree majoring in mathematical statistics. His research interests include translating insights from market research into better specification of forecasting models.

Devavrat Purohit ("Let Me Talk to My Manager: Hagglng in a Competitive Environment") is Professor of Business Administration at the Fuqua School of Business, Duke University. He received his Ph.D. from the Graduate School of Industrial Administration at Carnegie Mellon University. His research interests are in marketing strategies, especially how they relate to durable goods. His papers on these topics have appeared in a variety of journals, including *Marketing Science*, *Management Science*, and the *Journal of Consumer Research*.

Gautam Ray ("Implications of Reduced Search Cost and Free Riding in E-Commerce") is an Assistant Professor

in Information Systems in the McCombs School of Business at the University of Texas at Austin. He received his Ph.D. from Ohio State University. His research interests are in the area of impact of information technology on firms and markets, specifically about how firms make choices to take advantage of opportunities provided by information technology.

John H. Roberts ("Implementing a Prelaunch Diffusion Model: Measurement and Management Challenges of the Telstra Switching Study") holds a joint appointment as Professor of Marketing at the Australian Graduate School of Management in Sydney and the London Business School. He completed his M.Sc. and Ph.D. at M.I.T. after a Master of Commerce and honours Arts degree at the University of Melbourne and twelve years of senior marketing experience in industry and government. John has won the American Marketing Association's John A. Howard Award, William O'Dell Award, and ART Forum Best Paper Award. He has been Runner Up in the John D.C. Little Award twice and was a finalist for the Inaugural ISMS Practice Prize. He sits on the Editorial Boards of *Marketing Science*, the *Journal of Marketing Research*, the *Journal of Forecasting*, the *International Journal of Research in Marketing*, *Quantitative Abstracts in Marketing*, the *Review of Marketing Science*, and the *Australasian Journal of Marketing*. He is also an Academic Trustee of the Marketing Science Institute. John's research interests include marketing strategy, branding and new products/services, and models of consumer behaviour.

P. B. (Seethu) Seetharaman ("The Additive Risk Model for Purchase Timing" and "Modeling Multiple Sources of State Dependence in Random Utility Models: A Distributed Lag Approach") is Assistant Professor of Marketing at the John M. Olin School of Business at Washington University, St. Louis. He holds a B.Tech in Chemical Eng. from IIT-Madras, an M.S in Chemical Eng. from the University of Utah, and a Ph.D in Management from Cornell University. His previous work has appeared in the *Journal of Marketing Research*, *Marketing Science*, the *International Journal of Research in Marketing*, the *Journal of Business and Economic Statistics*, *Advances in Econometrics*, and *Marketing Letters*. While his research, thus far, has dealt with the application of econometric models to scanner panel data, it is now branching out into new substantive areas such as customer databases, pharmaceutical drugs, competitive movie diffusion, online auctions, etc.

Baohong Sun ("Product Strategy for Innovators in Markets with Network Effects") is an associate professor of marketing at the Tepper Graduate School of Business, Carnegie Mellon University. She holds a Ph.D. from University of Southern California. Her research interests include modeling rational consumer decisions using structural models, studying consumption and its impact on long-term promotion effect, evaluating promotion effectiveness on consumer choice behavior, cross-selling of products with natural order, and new product forecasting. Her research has appeared in several journals, including the *Journal of Marketing Research*, the *Journal of Econometrics*, and the *Journal of Business and Economic Statistics*.

Gerard J. Tellis ("Predicting Sales Takeoff for Whirlpool's New Personal Valet" and "Growing, Growing, Gone: Cascades, Diffusion, and Turning Points in the Product Life Cycle") is the Neely Chair in American Enterprise and Director of the Center for Global Innovation at the Marshall School of Business, University of Southern California. He has been Visiting Chair of Innovation at the Judge Institute, Cambridge University, UK and a Distinguished Visitor,

Erasmus University, Rotterdam, The Netherlands. Tellis specializes in technological innovation, new product growth, advertising, and pricing. He has published over 50 books and articles in leading scholarly journals and has won many prestigious awards, including the Bass, Odell, Maynard (twice), and AMA/Berry awards. He has been on the editorial review boards of the *Journal of Marketing Research*, the *Journal of Marketing*, and *Marketing Science* for several years. In his spare time he coaches soccer and tends his orchard.

Andrew B. Whinston ("Implications of Reduced Search Cost and Free Riding in E-Commerce") is the Hugh Roy Cullen Centennial Chair Professor in Information Systems in the McCombs School of Business at the University of Texas at Austin. He is Professor in the Departments of Economics and Computer Science as well and is a Fellow of the IC2 Institute, Austin, and the Director of the Center for Research in Electronic Commerce, for several years a pioneering research facility in Electronic Commerce. He received his Ph.D. in management from Carnegie Mellon University. His current research spans various realms of Electronic Commerce, its impact on business protocols and processes, on organizational structure and corporate networks, electronic publishing, electronic education, complementarity of convergent computational paradigms, and business value of IT. He is the coauthor of several books in Electronic Commerce, prominent among them being *Frontiers of Electronic Commerce*, *The Economics of Electronic Commerce*, and *Electronic Commerce—A Manager's Guide*. He has also published more

than 250 papers in leading academic journals in economics, business, and computer science.

Dazhong Wu ("Implications of Reduced Search Cost and Free Riding in E-Commerce") is a doctoral candidate in Information Systems in the McCombs School of Business at the University of Texas at Austin. He holds a B.E. in Precision Instruments from Tsinghua University and an M.S. in Management Science from Peking (Beijing) University. His research interests include studying information service and pricing strategies, consumer search, and channel coordination in electronic markets.

Jinhong Xie ("Product Strategy for Innovators in Markets with Network Effects") is Associate Professor of Marketing at the Warrington College of Business Administration, University of Florida. She previously taught at the William E. Simon Graduate School of Business Administration, University of Rochester. She holds a Ph.D. in Engineering and Public Policy from Carnegie Mellon University, an M.S. in Optimal Control from the Second Academy of the Ministry of Astronautics (Beijing), and a B.S. in Electrical Engineering from Tsinghua University (Beijing). Her current research interests include innovation strategies, network effects, economics of tickets, and independent product information and marketing strategy. Her research has been published in *Marketing Science*, *Management Science*, the *Journal of Marketing Research*, the *Journal of Product Innovation Management*, the *Journal of Marketing*, the *Journal of Service Research*, *California Management Review*, and *IEEE Transactions on Engineering Management*.
