With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

Focus on Authors

Lerzan Aksoy ("Invited Commentary: Net Promoter, Recommendations, and Business Performance: A Clarification on Morgan and Rego") is an assistant professor of marketing at Koç University in Istanbul, Turkey. She is a co-author of the book, *Loyalty Myths* (with Keiningham, Vavra, and Wallard), and co-editor of the book, *Customer Lifetime Value* (with Keiningham and Bejou). She received the Citations of Excellence "Top 50" Award (the top 50 management papers of approximately 20,000 papers reviewed) from Emerald Management Reviews. She received the Outstanding Paper Award from *Managing Service Quality*. Additionally, three other papers she coauthored were finalists for best papers in *Managing Service Quality* and the *Journal of Service Research*.

Eric T. Anderson ("Research Note: Does Demand Fall When Customers Perceive That Prices Are Unfair? The Case of Premium Pricing for Large Sizes") is the Hartmarx Research Professor and Associate Professor of Marketing at Northwestern University, Kellogg School of Management. He holds a Ph.D. in management science from MIT Sloan School of Management. His research interests include pricing strategy, promotion strategy, and channel management. He has conducted field experiments with numerous retailers to investigate customer price perceptions, segmented pricing strategies, long-run effects of promotions, and cross-channel effects of marketing communication.

Tor Wallin Andreassen ("Net Promoter, Recommendations, and Business Performance: A Clarification on Morgan and Rego") is Professor and Chair of the Department of Marketing. He is the founder and director of Service Forum and the founder of the Norwegian Customer Satisfaction Barometer at the Norwegian School of Management. He holds a Siviløkonom degree from The Norwegian School of Economics and Business Administration, an M.Sc. in marketing (with honors) from the Norwegian School of Management, and a Doctorate of Economics from Stockholm University, School of Business. He has received the Highly Commended Paper Award from *Managing Service Quality*, the Most Downloaded Article Award—Top 200 from the Emerald Group Publishing Limited, and the Citation of Excellence of Highest Quality Rating by Anbar Electronic Intelligence (twice).

Anocha Aribarg ("Research Note: Interbrand Variant Overlap: Impact on Brand Preference and Portfolio Profit") joined Ross School of Business, Univer-

sity of Michigan as an assistant professor in 2004. She has a Marketing Ph.D. from the University of Wisconsin, a B.S. in statistics from Chulalongkorn University, Thailand, and an M.B.A. from the University of Wisconsin–Milwaukee. Her research interests involve integrating econometric modeling, Bayesian statistical inference, and consumer behavior theories to (i) examine consumer complex decision making processes and (ii) address challenging issues in product portfolio management.

Neeraj Arora ("Research Note: Interbrand Variant Overlap: Impact on Brand Preference and Portfolio Profit") is the Arthur C. Nielsen, Jr. Professor of Marketing Research at University of Madison–Wisconsin. He has an undergraduate degree in engineering from Delhi University and an M.B.A. and Ph.D. from Ohio State University. He serves on the editorial board of the *Journal of Marketing Research* and *Marketing Science*. His papers have appeared in the *Journal of Marketing Research*, *Marketing Science*, the *Journal of Consumer Research*, *International Journal of Research in Marketing*, and *Marketing Letters*.

Gérard P. Cachon ("On the Effects of Consumer Search and Firm Entry in a Multiproduct Competitive Market") studies operations management with an emphasis on supply chain management and assortment planning. He explores how new technologies transform competitive dynamics and enable novel operational strategies for the delivery of goods and services. He is the Editor of *Manufacturing & Service Operations Management*, President of the Manufacturing and Service Operations Management Society of INFORMS, and co-author of *Matching Supply with Demand: An Introduction to Operations Management*. His articles have appeared in *Harvard Business Review*, *Management Science*, *Manufacturing & Service Operations Management*, and *Operations Research*, among others. He is the Fred R. Sullivan Professor of Operations and Information Management at the Wharton School of Business, University of Pennsylvania.

Xinlei (Jack) Chen ("Assessing the Consequences of a Channel Switch" and "Informing, Transforming, and Persuading: Disentangling the Multiple Effects of Advertising on Brand Choice Decisions") is currently assistant professor in marketing at the University of British Columbia. He received his Ph.D. in marketing in 2005 from University of Minnesota and B.E. in 1994 from Tsinghua University. His research interest includes distribution channels, structural modeling of

consumer choice and firm strategies (pricing, advertising, and promotion), new empirical industry organization, and entertainment industry (movie, video game). In his spare time he enjoys sports, reading, and playing with his daughter.

Bruce Cooil ("Invited Commentary: Net Promoter, Recommendations, and Business Performance: A Clarification on Morgan and Rego") is Professor of Management at the Owen Graduate School of Management, Vanderbilt University. His research interests include the adaptation of grade-of-membership and latent class models for marketing and medical research, estimation of qualitative data reliability, large sample estimation theory, and extreme value theory. He has also written and consulted on models for mortality, medical complications, medical malpractice, and automobile insurance claims. His publications have appeared in business, statistics, and medical journals, including the *Journal of Marketing Research*, the *Journal of Marketing*, *Psychometrika*, the *Journal of the American Statistical Association*, *Annals of Probability*, *Circulation*, and the *New England Journal of Medicine*.

Arnaud De Bruyn ("Offering Online Recommendations with Minimum Customer Input Through Conjoint-Based Decision Aids") is Assistant Professor of Marketing at ESSEC Business School in Paris and Associate Director for the Marketing Engineering Program at the Institute for the Study of Business Markets at Pennsylvania State University. His research interests, teaching, and consulting practice coincide at the frontier of marketing, operations research, and computer science. He has consulted for several companies and nonprofit organizations in the areas of direct-marketing fundraising and database marketing.

Jean-Pierre Dubé ("Cross-Brand Pass-Through in Supermarket Pricing" and "Category Pricing with State-Dependent Utility") is Professor of Marketing and Neubauer Faculty Fellow at the Graduate School of Business, University of Chicago, where he has also been a faculty member since 2000. His research applies economic models of empirical industrial organization to study marketing problems. His current areas of research include the competitive dynamics associated with pricing and advertising, durable goods adoption, price discrimination, industrial market structure for branded goods, and Internet marketing. He is an associate editor for *Marketing Science* and serves on the editorial board of *Quantitative Marketing and Economics*, *Product and Operations Management*, and *Recherche et Application en Marketing*. He has also served as a reviewer for several journals in marketing and economics. He has published several articles in the *Journal of Marketing Research*, *Management Science*, *Marketing Science*, *Marketing Letters*, and *Quantitative Marketing and Economics*.

Lawrence Feick ("Publish and Prosper: The Financial Impact of Publishing by Marketing Faculty") is Professor of Business Administration at the Katz School at the University of Pittsburgh. He currently serves as the University's Senior Director of International Programs and the Director of the University Center for International Studies. In the past, he has served as the Katz School's Associate Dean, Interim Dean, and as Director of the University's International Business Center (a federally funded CIBER). He teaches in the areas of marketing management and international marketing. He also researches in the areas of consumer information search, international marketing, word-of-mouth influence, and the analysis of categorical data. He earned his Ph.D. at Pennsylvania State University and his undergraduate and master's degrees at the University of Delaware. He has published articles in *Marketing Science*, the *Journal of Consumer Research*, the *Journal of Marketing*, the *Journal of Marketing Research*, *International Journal of Research in Marketing*, the *Journal of Retailing*, *Personality & Social Psychology Bulletin*, *Psychological Bulletin*, and *Public Opinion Quarterly*. He has developed a train-the-trainers program on the use of simulations and games and case studies in teaching marketing concepts. He is the coauthor of *Country Manager*, an international marketing simulation game and has been a visiting professor at a number of universities around the world.

Juan Feng ("Research Note: Optimal Mechanism for Selling a Set of Commonly Ranked Objects") is an assistant professor of decision and information sciences at Warrington College of Business, University of Florida. She holds a B.A. in economics from Renmin University of China and a Ph.D. in information systems from Pennsylvania State University, with a dual title in operations research. Her current research interests include economics of information gatekeepers, sponsored search auctions, and E-commerce applications. She is on the editorial board of *Decision Support Systems*.

Sachin Gupta ("Cross-Brand Pass-Through in Supermarket Pricing") is the Henrietta Louis Johnson Professor of Management and Professor of Marketing at the Johnson Graduate School of Management, Cornell University. He has published numerous articles in the *Journal of Marketing Research*, *Management Science*, and *Marketing Science*, and he is on the editorial boards of several major journals. He is also an avid road biker.

Chuan He ("Research Note: Vertical Information Sharing in a Volatile Market") is Associate Professor of Marketing at the Leeds School of Business of University of Colorado at Boulder. His fields of specialization and research include advertising, search, pricing strategies, and channel contracts. He holds a

Ph.D. in marketing from Washington University in St. Louis and an M.A. in economics from the University of Toronto.

James D. Hess (“That’s What I Thought I Wanted? Miswanting and Regret for a Standard Good in a Mass-Customized World”) is C. T. Bauer Professor of Marketing Science at the University of Houston. He wanted to be an economist, so he did his doctoral training in the Economics Department of MIT. No regrets. A decade down his career path, he wanted to switch to marketing science in order to write papers with his buddy, Eitan Gerstner. No regrets. He wanted to relax his audience in seminars by singing the abstract. No regrets. He wanted to help the INFORMS community that kindly invited him in from the cold of economics, so he served as President of the Society on Marketing Science and as Area Editor for *Marketing Science*. No regrets. He wanted to incorporate a more nuanced psychology in analytic models of pricing, product assortment, retailing, and status goods. No regrets. *That’s* what he thought he wanted!

Gunter J. Hitsch (“Category Pricing with State-Dependent Utility”) is Associate Professor of Marketing at the Graduate School of Business, University of Chicago. He holds a B.A. from the University of Vienna and a Ph.D. in economics from Yale University. Much of his research is concerned with dynamic decision problems and dynamic competition in marketing and industrial organization. His recent and ongoing work addresses optimal product launches, advertising scheduling over time, dynamic pricing and price competition under brand loyalty and switching costs, and pricing in markets with indirect network effects.

Eelko K. R. E. Huizingh (“Offering Online Recommendations with Minimum Customer Input Through Conjoint-Based Decision Aids”) is Associate Professor of Business Development at University of Groningen, The Netherlands. His research focuses on the intersection of innovation, marketing, and information technology. He is co-author of several books, including *Applied Statistics* (with SPSS, Sage), and over 250 publications. He serves as Vice President of Scientific Affairs for the International Society for Professional Innovation Management (ISPIM). He was awarded a William Evans Fellowship by the University of Otago in 2003 and was a visiting scholar at both Pennsylvania State University and the University of Otago.

George John (“Assessing the Consequences of a Channel Switch”) is the Pillsbury-Gerot Chair in Marketing at the Carlson School of Management, University of Minnesota. He received his bachelor’s degree in aeronautical engineering from the Indian Institute of Technology, Madras, India in 1974 and his M.B.A. from the University of Illinois in 1974. After

completing his Ph.D. in marketing from Northwestern in 1981, he served on the faculty of the School of Business at the University of Wisconsin–Madison until 1987, when he moved to the Carlson School of Management. His research interests center around inter-organizational relations and marketing in high-technology environments. He has published on these topics in several journals, including the *Journal of Marketing Research*, the *Journal of Marketing*, *Marketing Science*, *Organization Science*, and the *Journal of Law, Economics and Organization*.

Timothy L. Keiningham (“Invited Commentary: Net Promoter, Recommendations, and Business Performance: A Clarification on Morgan and Rego”) is Senior Vice President and Head of Consulting at Ipsos Loyalty. He is the author of several management books and numerous scientific papers. His most recent book, *Loyalty Myths* (co-written with Vavra, Aksoy, and Wallard), poses the fallacies of most of the conventional wisdom surrounding customer loyalty. He has received best-paper awards from the *Journal of Marketing*, the *Journal of Service Research*, and *Managing Service Quality* and has received the Citations of Excellence “Top 50” Award from Emerald Management Reviews. Additionally, two papers that he coauthored were finalists for best paper in *Managing Service Quality*, and he also received the Best Reviewer Award from the *Journal of Service Research*.

Parthasarathy Krishnamurthy (“That’s What I Thought I Wanted? Miswanting and Regret for a Standard Good in a Mass-Customized World”) is Bauer Faculty Research Fellow and Associate Professor of Marketing at the University of Houston. He received his Ph.D. in Marketing from Pennsylvania State University. He studies consumer decision making, which focuses on aspects such as decision uncertainty, decision conflict, self-regulation, and decision inertia. His research has been published in the *Journal of Consumer Research*, *Organizational Behavior*, and *Human Decision Processes*, among others. Partha is a student of South Indian classical music. He learns from his teacher in India in a virtual classroom, courtesy Skype. Saturday mornings transform him into a side-kick *sempei* in his son Vaidya’s karate class.

John C. Liechty (“Offering Online Recommendations with Minimum Customer Input Through Conjoint-Based Decision Aids”) is Associate Professor of Marketing and Statistics at Smeal College of Business Administration at Pennsylvania State University. His research focuses on empirical models and methods for estimating demand functions and developing Bayesian methodology that can be used to solve empirical marketing problems and then extended into other domains. He has published work in the areas of marketing, statistics, and psychology. He is currently a member of the editorial board for *Marketing Science*

and has written papers that were finalists for the John D. C. Little Award and the Green Award.

Gary L. Lilien ("Offering Online Recommendations with Minimum Customer Input Through Conjoint-Based Decision Aids") is Distinguished Research Professor of Management Science at Smeal College of Business Administration at Pennsylvania State University and is also Co-Founder and Research Director of the Institute for the Study of Business Markets (www.isbm.org). He is the author or co-author of twelve books, including *Marketing Models* and *Marketing Engineering*, and over 100 professional articles. He is a former departmental editor for *Marketing for Management Science*; he is on the editorial board of *International Journal for Research in Marketing*; he is an area editor for *Marketing Science*; and is a former editor-in-chief of and is currently the Marketing area editor for *Interfaces*. He is a former President, as well as Vice President of Publications, for The Institute of Management Sciences. He is Vice President for External Relations and a Fellow of the European Marketing Academy, and he also serves as Vice President of External Relations for the INFORMS College on Marketing. He is an inaugural INFORMS Fellow, was honored as Morse Lecturer for INFORMS, and also received the Kimball Medal from INFORMS for distinguished contributions to the field of operations research. He has received honorary doctorates from the University of Liege, the University of Ghent, and Aston University.

Johan Marklund ("Research Note: Vertical Information Sharing in a Volatile Market") is Associate Professor of Production Management at Lund University, Sweden. He holds an M.S. in industrial engineering from Linköping University, Sweden, and a Ph.D. in production management from Lund University. His research interests include inventory theory, supply chain management, and logistics, with a special focus on stochastic multiechelon inventory problems.

Nitin Mehta ("Informing, Transforming, and Persuading: Disentangling the Multiple Effects of Advertising on Brand Choice Decisions") is Assistant Professor of Marketing at the Rotman School of Management, University of Toronto. He received his Ph.D. from Carnegie Mellon University. His research interests focus on econometric modeling of consumer's search behavior; econometric modeling of behavioral phenomena (memory, confirmatory bias) on brand choices; and econometric modeling of consumer's brand choice, purchase incidence, and quantity decisions for single- and multiple- product categories.

Vikas Mittal ("Publish and Prosper: The Financial Impact of Publishing by Marketing Faculty") is the J. Hugh Liedtke Professor of Management-Marketing at the Jones School of Management, Rice University.

Prior to holding this position, he was the Thomas Marshall Professor of Marketing at the Katz Graduate School of Business and an associate professor of psychiatry at the School of Medicine, University of Pittsburgh. His work has been published in the *Journal of Consumer Research*, the *Journal of Marketing*, the *Journal of Marketing Research*, and *Marketing Science*. In 2006, he was awarded the William O'Dell Award for his paper published in the *Journal of Marketing Research*. He serves on the editorial boards of the *Journal of Consumer Research*, the *Journal of Marketing*, and the *Journal of Marketing Research*. He holds a B.A. in business administration from the University of Michigan, Ann Arbor and a Ph.D. from the Temple University. His current research interests include examining how satisfaction affects firm performance in light of strategic factors like diversification, corporate governance, CEO compensation, and corporate social responsibility.

Neil A. Morgan ("Rejoinder: Can Behavioral WOM Measures Provide Insight into the Net Promoter® Concept of Customer Loyalty?") is Associate Professor and the Nestlé-Hustad Professor of Marketing in the Kelly School of Business, Indiana University. He received his Ph.D. in business administration from the University of Wales. His research interests cover marketing strategy implementation and linkages between marketing-related resources and capabilities and firm performance. His current research projects focus on brand strategy, category management, marketing and brand management capabilities, and customer feedback systems.

Feisal Murshed ("Publish and Prosper: The Financial Impact of Publishing by Marketing Faculty") is an assistant professor of marketing and e-business at Towson University. He received his Ph.D. in marketing from the Katz Graduate School of Business, University of Pittsburgh in 2005. He earned his M.B.A. from Wright State University and his undergraduate degree in business from Dhaka University. Before joining the Towson faculty, he taught at University of Michigan–Flint, and there he received "golden apple" for teaching excellence. The emphasis of his current research is on the return of marketing investment, capabilities of the firms, and issues related to CRM. He is a native of Bangladesh, and prior to commencing to the doctoral education, he worked for several years in the area of sales and distribution. His research appears in the *Journal of Marketing Research* and *Harvard Business Review*.

Om Narasimhan ("Assessing the Consequences of a Channel Switch" and "Informing, Transforming, and Persuading: Disentangling the Multiple Effects of Advertising on Brand Choice Decisions") is Associate Professor of Marketing in the Carlson School of Marketing, University of Minnesota. His research interests include innovation in high-technology markets,

empirical industrial organization issues in channels, and structural models of advertising.

Lopo L. Rego (“Rejoinder: Can Behavioral WOM Measures Provide Insight Into the Net Promoter® Concept of Customer Loyalty?”) is Assistant Professor of Marketing in the Henry B. Tippie College of Business, University of Iowa. He received his Ph.D. in business administration from the University of Michigan. His research interests focus on the influence marketing strategies and marketing actions have on firm financial performance, and in particular on identifying marketing metrics that promote shareholder value.

Peter E. Rossi (“Category Pricing with State-Dependent Utility”) is Joseph T. and Bernice S. Lewis Professor of Marketing and Statistics at the Graduate School of Business, University of Chicago. He received his Ph.D. from University of Chicago and B.A. from Oberlin College. His work has been published widely in the areas of marketing, economics, statistics, and econometrics in journals such as *Quantitative Marketing and Economics*, *Marketing Science*, the *Journal of Marketing Research*, *American Economic Review*, the *Journal of the American Statistical Association*, *Econometrica*, the *Journal of Political Economy*, the *Journal of Econometrics*, *Biometrika*, the *Journal of Business and Economic Statistics*, and the *Journal of Economic Theory*. These articles have more than 1300 cites as measured by the ISI Web of Science. He is a co-author of *Bayesian Statistics and Marketing*, a John Wiley Series in probability and statistics. His areas of research interest include pricing and promotion, target marketing, direct marketing, micromarketing, limited dependent variable models, and Bayesian statistical methods. A fellow of the American Statistical Association and the *Journal of Econometrics*, he is also the founding editor of *Quantitative Marketing and Economics* and is past associate editor for the *Journal of the American Statistical Association*, the *Journal of Econometrics*, and the *Journal of Business and Economic Statistics*. He is Director of the Kilts Center for Marketing at the Graduate School of Business, University of Chicago.

Duncan I. Simester (“Does Demand Fall When Customers Perceive That Prices Are Unfair? The Case of Premium Pricing for Large Sizes”) is a professor at M.I.T.’s Sloan School of Management, where he holds the NTU Chair in Management Science. This paper is one of a series of studies co-authored with Eric Anderson that use field studies conducted in retail settings. These include several studies that focus on evaluating the long-run effect of marketing decisions, together with a stream of work investigating the role of price cues. Duncan is on the editorial boards of the *Journal of Materials Research*, *Marketing Science*, and *Management Science*, and he is an editor for *Operations Research*.

Niladri Syam (“That’s What I Thought I Wanted? Miswanting and Regret for a Standard Good in a

Mass-Customized World”) is Bauer Faculty Research Fellow and Assistant Professor of Marketing at the University of Houston. He finds that scholarly research is an exception to the idea of regretting miswanted products. He has often miswanted this or that research topic, because what he had set out to investigate was later found to be undoable (by him). But there were no regrets: chasing up those blind alleys was fun. He is an ardent believer in the possibility of modeling diverse phenomena and looks forward to the day when someone can build models to answer questions such as: “Is counter-counter-factual, just factual?,” or “Are two birds missed, when the stone doesn’t exist?”

Christian Terwiesch (“On the Effects of Consumer Search and Firm Entry in a Multiproduct Competitive Market”) is Associate Professor in the Operations and Information Management Department at the Wharton School of Business, University of Pennsylvania. He teaches and conducts research in the areas of operations management and product development. His work on product development, concurrent engineering, and production ramp-up has appeared in leading academic journals, including *Management Science*, *Operations Research*, *Manufacturing & Service Operations Management*, and *Organization Science*. He is the co-author of *Matching Supply with Demand: An Introduction to Operations Management*.

Maria Ana Vitorino (“Category Pricing with State-Dependent Utility”) is a doctoral candidate at the Graduate School of Business, University of Chicago. She holds an undergraduate degree in business administration from the Catholic University of Portugal and a master’s degree in statistics from the London School of Economics. Her research interests include firms’ pricing strategies, consumer choice models, and the use of game-theoretic models to explain the strategic impact of firms’ entry decisions. Broadly, she is interested in empirical applications of statistics and economic models of industrial organization to marketing.

Thomas Vossen (“Research Note: Vertical Information Sharing in a Volatile Market”) is Assistant Professor in the Leeds School of Business at the University of Colorado at Boulder. He received his Ph.D. in management science from the University of Maryland and holds an M.S. in computer science from Eindhoven University of Technology. His research interests focus on the value of information and collaboration within planning and scheduling problems, in particular related to air traffic flow management. In 2003, he was awarded the INFORMS Transportation Science and Logistics Section dissertation prize, while he also received honorable mention in the dissertation prize competition of the INFORMS Aviation Applications section.

Kenneth C. Wilbur (“A Two-Sided, Empirical Model of Television Advertising and Viewing Markets”) is an Assistant Professor of Marketing at the Marshall School of Business, University of Southern California. He received his Ph.D. in economics from the University of Virginia in 2005. His primary research interests are media markets, advertising effectiveness, retail distribution, and industrial organization.

Yi Xu (“On the Effects of Consumer Search and Firm Entry in a Multiproduct Competitive Market”)

is Associate Professor in the Robert H. Smith School of Business at University of Maryland. He received a B.E. and an M.S. from Beijing University of Aeronautics and Astronautics, an M.S. from Louisiana State University, and a Ph.D. from the Wharton School of Business, University of Pennsylvania. His primary research interests include supply chain management, new product development, and marketing and operations interfaces. His articles have appeared in *Manufacturing & Service Operations Management*, *Naval Research Logistics*, and *IIE Transactions*, among others.
