With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

Focus on Authors

Yuxin Chen (“A Theory of Combative Advertising”) is an associate professor of marketing at New York University. He holds a B.S. in physics from Fudan University, and an M.S. and Ph.D. degrees in business administration and marketing, respectively, from Washington University in St. Louis. Before becoming interested in marketing, he studied computer science in the Graduate School of Zhejiang University of Technology. His primary research areas include database marketing, Internet marketing, pricing, Bayesian econometric methods, and marketing research. His research has been previously published in *Marketing Science*, *Management Science*, *Quantitative Marketing and Economics*, and *Journal of Marketing Research*. He is on the editorial boards of *Journal of Marketing*, *Journal of Marketing Research*, *Marketing Science*, and *Quantitative Marketing and Economics*. He is also a research fellow at the Greater China Business Research Institute of Cheung Kong Graduate School of Business.

Pradeep K. Chintagunta (“Quantifying the Economic Value of Warranties in the U.S. Server Market”) is the Robert Law Professor of Marketing at the Graduate School of Business, University of Chicago. He is interested in empirically studying strategic interactions among firms in vertical and horizontal relationships. His research also includes measuring the effectiveness of marketing activities in pharmaceutical markets, investigating aspects of technology product markets, and the analysis of household purchase behavior.

Junhong Chu (“Quantifying the Economic Value of Warranties in the U.S. Server Market”) is an assistant professor of marketing at the Business School of the National University of Singapore. She holds a Ph.D. in marketing and an MBA from the University of Chicago. Her research interests include structural modeling (both classic and Bayesian approaches) of consumer and firm behavior, distribution channels, e-commerce, and retailing.

Tuck Siong Chung (“My Mobile Music: An Adaptive Personalization System for Digital Audio Players”) is an assistant professor of marketing at the Nanyang Business School, Nanyang Technological University, Singapore. He holds a Ph.D. in marketing from the Robert H. Smith School of Business, University of Maryland. His research interests include Bayesian modeling, electronic services, service marketing models, and adaptive learning models.

Esther Gal-Or (“Research Note—Quantity Discounts in Differentiated Consumer Product Markets”) is the Glenn E. Stinson Chair in Competitiveness at the Joseph M. Katz Graduate School of Business. She has also taught as a visiting professor at Technion-Israel Institute of Technology and Kellogg Graduate School of Management, Northwestern University. Her research and teaching interests focus on microeconomics, industrial organization, game theory, and the industrial structure of the healthcare and media markets. The National Science Foundation and other government agencies have sponsored her work, which has been published in economics and management journals, such as *Econometrica*, *Review of Economic Studies*, *Journal of Economic Theory*, *RAND Journal of Economics*, *Journal of Economics and Management Strategy*, *Journal of Business*, *Journal of Marketing Research*, *Management Science*, and *Marketing Science*. She serves on the editorial boards of a variety of economics and management journals.

David Godes (“Content vs. Advertising: The Impact of Competition on Media Firm Strategy”) is an associate professor at Harvard Business School. His research focuses on sales force management, word-of-mouth communication, and media competition. He received his S.M. and Ph.D. from Massachusetts Institute of Technology and a B.S. from the University of Pennsylvania. His articles have appeared, or are forthcoming, in *Marketing Science*, *Management Science*, *Harvard Business Review*, and *Quantitative Marketing and Economics*.

Peter N. Golder (“Findings—Innovations’ Origins: When, By Whom, and How Are Radical Innovations Developed?”) is an associate professor of marketing and the George and Edythe Heyman Faculty Fellow at the Stern School of Business, New York University. He earned his Ph.D. from the University of Southern California, and he was a visiting professor at the Guanghua School of Management, Peking University. His research focuses on market pioneering, innovation, new product strategy, and long-term leadership. It has been recognized with several awards, including the Buzzell Award (twice) from the Marketing Science Institute, the O’Dell Award from *Journal of Marketing Research*, the Frank Bass Award, and the Berry Book Prize from the American Marketing Association.

Avi Goldfarb ("Measuring Brand Value in an Equilibrium Framework") is an assistant professor of marketing at the Rotman School of Management, University of Toronto. He holds a Ph.D. from Northwestern University. His research uses the tools of empirical industrial organization to study branding and the economics of the Internet. His work has appeared in *American Economic Review*, *Quantitative Marketing and Economics*, and *Journal of Economics and Management Strategy*, among others.

Peter Goos ("Efficient Conjoint Choice Designs in the Presence of Respondent Heterogeneity") is a professor of statistics at the Faculty of Applied Economics of the Universiteit Antwerpen and at the Faculty of Business and Economics of the Katholieke Universiteit Leuven, both in Belgium. Most of his research is concerned with the analysis and design of industrial and marketing experiments. He is the author of the book *The Optimal Design of Blocked and Split-Plot Experiments* and the recipient of the 2004 Shewell Award and the 2006 Lloyd S. Nelson Award (together with Dr. Ivan Langhans and Prof. Dr. Martina Vandebroek) of the American Society for Quality. He also received the 2005 Young Statistician Award of the European Network for Business and Industrial Statistics. His articles have appeared in *Journal of Quality Technology*, *Applied Statistics*, *Computational Biology and Chemistry*, *Technometrics*, *Journal of Statistical Planning and Inference*, and *Journal of Marketing Research*, among others.

Ikuo Ishibashi ("The Existence of Low-End Firms May Help High-End Firms") holds B.A., M.A., and Ph.D. degrees in economics from the University of Tokyo. He has served on the faculty of Aoyama Gakuin University in Tokyo since 2003 and is currently an associate professor there. His research focuses on the study of industrial organization and business economics.

Gareth M. James ("Functional Regression: A New Model for Predicting Market Penetration of New Products") is an associate professor of statistics in the Information and Operations Management Department at the Marshall School of Business, University of Southern California. His areas of statistical specialization include functional data analysis, classification problems, and variable selection methods. His main application areas are in marketing and bioinformatics. He has published over 20 papers on these subjects in leading scholarly journals, such as *Journal of the American Statistical Association*, *Journal of the Royal Statistical Society Series B*, and *Biometrika*. He has also won several research and teaching awards and is an associate editor for *Journal of the American Statistical Association*.

Maarten C. W. Janssen ("Going Where the Ad Leads You: On High Advertised Prices and Searching Where to Buy") is a professor of microeconomics at the University of Vienna. He is also a professor

and a research fellow at the Tinbergen Institute, Erasmus University Rotterdam. Before moving to Vienna, he was the Academic Director of Tinbergen Institute and had visiting positions at Louvain-la-Neuve in Belgium, Sorbonne in Paris, Higher School of Economics in Moscow, and Duke University. He has published numerous articles in journals such as *Review of Economic Studies*, *International Economic Review*, *European Economic Review*, *Journal of Economic Theory*, *Games and Economic Behavior*, and *Journal of Industrial Economics*. His research focuses on industrial organization, though he is currently interested in researching incomplete information in markets (especially consumer search) and auctions. Apart from his academic research, he has been engaged in an increasing number of anti-trust cases over the last years, in The Netherlands, Belgium, and the United Kingdom.

Yogesh V. Joshi ("A Theory of Combative Advertising") is an assistant professor of marketing at the Robert H. Smith School of Business, University of Maryland. He received his Ph.D. in marketing from The Wharton School of the University of Pennsylvania. He holds bachelor's and master's degrees in mechanical engineering from Massachusetts Institute of Technology, and the Indian Institute of Technology Bombay, respectively. His research focuses on competitive marketing strategies, market entry, optimal product portfolios, brand extensions, as well as product innovation and diffusion, and it has appeared in *Marketing Science*.

Qiang Lu ("Measuring Brand Value in an Equilibrium Framework") is a lecturer in marketing at the University of Sydney, Australia. He holds a B.S. in economics from Nankai University, an M.A. in economics from York University, and a Ph.D. in marketing from the University of Toronto. His research interests include Bayesian learning, consumer choice modeling, branding, pricing, and promotions. His work has been previously published in *Marketing Science* and *Statistical Science*.

Xueming Luo ("Quantifying the Long-Term Impact of Negative Word of Mouth on Cash Flows and Stock Prices") is a Eunice & James L. West Distinguished Professor and Associate Professor of Marketing in the College of Business Administration, University of Texas at Arlington. His research focuses on econometric modeling, strategic marketing, and international marketing and business. His work has appeared in journals such as *Marketing Science*, *Journal of Marketing*, *Journal of Marketing Research*, *Journal of the Academy of Marketing Science*, *Journal of International Business Studies*, and *International Journal of Research in Marketing*.

Noriaki Matsushima ("The Existence of Low-End Firms May Help High-End Firms") received his D.Eng. degree from Tokyo Institute of Technology in

2001. He served on the faculty of Shinshu University in Nagano from 2001 to 2005 and has served on the faculty of Kobe University as an associate professor since 2005. His research focuses on the study of industrial organization and business economics.

Debanjan Mitra ("Findings—Innovations' Origins: When, By Whom, and How Are Radical Innovations Developed?") earned his Ph.D. from New York University and is currently an Assistant Professor of Marketing at Warrington College of Business Administration of the University of Florida. His research focuses on the long-term effects of quality and innovation, and how these effects differ across organizations and markets. His research has been published in *Marketing Science*, *Management Science*, and *Journal of Marketing Research*, and it has been recognized with the Marketing Science Institute's Buzzell Award and as Finalists of INFORMS' John D.C. Little and Frank Bass awards.

Sridhar Moorthy ("Measuring Brand Value in an Equilibrium Framework") is the Manny Rotman Professor of Marketing at Rotman School of Management, University of Toronto. He received his Ph.D. from Stanford University, and has taught previously at the University of Rochester, Yale University, INSEAD, University of California, Los Angeles, The Wharton School of the University of Pennsylvania, and the Indian School of Business. His current research focuses on branding, advertising, and retailing issues. His previous work, which has been published in journals such as *Marketing Science*, *Journal of Consumer Research*, and *RAND Journal of Economics*, has examined the relationship between advertising and product quality, product differentiation in a competitive environment, and price-matching guarantees in retailing. He is the Vice President of Education for the INFORMS Society of Marketing Science, an area editor of *Marketing Science*, an associate editor of *Quantitative Marketing and Economics*, and serves on the editorial board of *Journal of Marketing Research*. He is a coauthor (with Philip Kotler and Gary Lilien) of the book *Marketing Models*.

Marielle C. Non ("Going Where the Ad Leads You: On High Advertised Prices and Searching Where to Buy") is a post-doctorate researcher at the University of Groningen, The Netherlands. She holds a Ph.D. degree from the Tinbergen Institute, Erasmus University Rotterdam. Until now, her research has focused on consumer and firm behavior in situations of costly information acquisition.

Elie Ofek ("Content vs. Advertising: The Impact of Competition on Media Firm Strategy") is an associate professor in the marketing unit at the Harvard Business School. He holds a B.Sc. in electrical engineering from Technion-Israel Institute of Technology, and M.A. and Ph.D. degrees in economics and business, respectively, from Stanford University. His

research focuses on new product strategies in fast-changing, technology-driven business environments. He explores relationships between R&D and marketing decisions, and is particularly interested in how firms integrate marketing input when formulating innovation strategy. He also examines the implications of information technology and new media on product/content offerings. His work has appeared in *Marketing Science* and *Management Science*.

Jagmohan S. Raju ("A Theory of Combative Advertising") is the Joseph J. Aresty Professor of Marketing at The Wharton School of the University of Pennsylvania. He received his Ph.D. from Stanford University, and has taught courses at the Anderson School, University of California, Los Angeles. His previous research has focused on pricing, short-term price discounts, store brands, sales force compensation, distribution channels, strategic alliances, corporate image advertising, mergers, and assessing the strategic value of new information. His papers have received awards such as the John D.C. Little Award and the Frank Bass Award. He has served, or is serving, as one of the thesis advisors for Abhik Roy, Sanjay Dhar, Rajeev Tyagi, Wilfred Amaldoss, Serdar Sayman, Yusong Wang, Ye Hu, Tony Cui, Andres Musalem, S. Sajeesh, and Upender Subramanian. He is currently the marketing departmental editor of *Management Science*, and was formerly the President of INFORMS Society of Marketing Science.

Roland T. Rust ("My Mobile Music: An Adaptive Personalization System for Digital Audio Players") holds the David Bruce Smith Chair in Marketing at the Robert H. Smith School of Business, University of Maryland, where he is also Chair of the Marketing Department and the Executive Director of the Center for Excellence in Service. He has won several academic awards, including Gilbert A. Churchill Award for Lifetime Achievement in Marketing Research and the Career Contributions to the Services Discipline Award from the American Marketing Association, the Outstanding Contributions to Research in Advertising Award from the American Academy of Advertising, the Elsevier Distinguished Marketing Scholar Award from the Society of Marketing Advances, and the Henry Latané Distinguished Doctoral Alumnus Award from the University of North Carolina at Chapel Hill. He is also a Fellow of the American Statistical Association and has won numerous best article and book awards. He is the founder and Chair of the American Marketing Association's annual Frontiers in Service Conference, and was founding editor of *Journal of Service Research*. He is currently Editor of the *Journal of Marketing*. A national class distance runner in his collegiate days, he has been inducted into the DePauw University Athletic Hall of Fame.

Miklos Sarvary ("Content vs. Advertising: The Impact of Competition on Media Firm Strategy") is a professor of marketing at INSEAD in France. Previously, he was a faculty member at Harvard Business School and at the Graduate School of Business, Stanford University. He studied physics at Eötvös Loránd University in Hungary, earned an M.S. in statistics from École Nationale Supérieure des Mines de Paris, and holds a Ph.D. in management from INSEAD. His current research focuses on competition in media markets with special emphasis on new media (e.g., online advertising). His previous research has addressed the marketing of information products and the global diffusion of telecommunications products. His work has been published in *Marketing Science*, *Management Science*, *Journal of Marketing Research*, *California Management Review*, *Marketing Letters*, and *Technological Forecasting and Social Change*. He is area editor of *Marketing Science*, an associate editor of *Quantitative Marketing and Economics*, and serves on the editorial boards of *International Journal of Research in Marketing*, *Review of Marketing Science*, and *Journal of Interactive Marketing*.

Rachel Shacham ("Findings—Innovations' Origins: When, By Whom, and How Are Radical Innovations Developed?") is a doctoral candidate at the Stern School of Business, New York University. She joined the program after graduating from Harvard University with a B.A. in applied mathematics and from New York University with an M.A. in economics. Her interests include the development of empirical models for addressing partially observed dynamic processes, particularly in novel environments. She presented her work and was invited to present at the marketing conference in Israel. She was New York University's AMA-Sheth Doctoral Consortium Fellow in 2007.

Ashish Sood ("Functional Regression: A New Model for Predicting Market Penetration of New Products") is an assistant professor of marketing at Goizueta School of Business, Emory University. He has a Ph.D. in marketing from Marshall School of Business, University of Southern California, a bachelor's degree in electrical engineering from Delhi College of Engineering, Delhi University, and an MBA in marketing with a specialization in management of technology from Nanyang Technological University, Singapore. He has worked in the industry for 12 years managing sales and distribution of industrial products, product and supplier quality, and new product development with Crompton Greaves Ltd. in India, and Philips Electronics in Singapore. His primary research interests are in the areas of innovation, technology management, and financial analysis. His research has been published in *Journal of Marketing*, *Marketing Science*, *Journal of Computational Statistics*, and *Data Analysis*, and has been featured in many

popular press publications. He is an expert in quality management and total quality management, and has conducted assessments of organizations for the Singapore Quality Award. He was the Lead Assessor for international standards ISO 9001 and ISO 14001, and consulted with firms in India and Singapore on quality and environmental management. He serves as a reviewer for several top journals and presents his research regularly at academic conferences worldwide.

Ramanathan Subramaniam ("Research Note—Quantity Discounts in Differentiated Consumer Product Markets") is an assistant professor of marketing at the School of Business, University of Kansas. He received his Ph.D. in marketing from the Joseph M. Katz Graduate School of Business, University of Pittsburgh. Prior to receiving his Ph.D., he earned his B.Tech. from the Institute of Technology, Banaras Hindu University in India and his MBA from Xavier Labor Relations Institute in India, and his M.S. from the Tepper School of Business, Carnegie Mellon University. His primary research interests include pricing strategy and auction theory.

Gerard J. Tellis ("Functional Regression: A New Model for Predicting Market Penetration of New Products") is Director of the Center for Global Innovation, Neely Chair of American Enterprise, and Professor of Marketing at the Marshall School of Business, University of Southern California. He specializes in innovation, global market entry, new product growth, advertising, and pricing, and has published over 80 papers in leading scholarly journals and books on these topics. He has won 15 awards, including four of the most prestigious awards in the field of marketing: the Frank M. Bass, William F. O'Dell, Harold D. Maynard (twice), and Vijay Mahajan Award for lifetime contributions to marketing strategy. He is a trustee of the Marketing Science Institute, and a Senior Research Associate and former Visiting Chair of Innovation, Marketing, and Strategy at the Judge Business School, University of Cambridge. He has also been a Visiting Fellow of Sidney Sussex College, Cambridge University, and a Distinguished Visitor, Erasmus University Rotterdam. He is on the executive boards of the INFORMS Society for Marketing Science, European Marketing Academy, the North American Society for Marketing Education in India, and the Product Development and Management Association. He is an associate editor of *Journal of Marketing Research* and a guest area editor for *Marketing Science*. For several years, he has served on the editorial review boards of *Journal of Marketing Research*, *Journal of Marketing*, and *Marketing Science*.

Martina Vandebroek ("Efficient Conjoint Choice Designs in the Presence of Respondent Heterogeneity") is Professor of Statistics at the Faculty of Business and Economics and at the Leuven Statistics

Research Centre of the Katholieke Universiteit Leuven in Belgium. Having acquired expertise in the optimal design of industrial experiments, she is currently looking into the optimal design of conjoint and discrete choice experiments. She is the recipient of the 2006 Lloyd S. Nelson Award (together with Prof. Dr. Peter Goos and Dr. Ivan Langhans). Her articles have appeared in leading journals as *Journal of Quality Technology*, *Technometrics*, *Journal of Marketing Research*, *Computational Statistics & Data Analysis*, *Journal of International Money and Finance*, *Chemometrics*, and *Intelligent Laboratory Systems*.

Michel Wedel ("My Mobile Music: An Adaptive Personalization System for Digital Audio Players") is the PepsiCo Professor of Consumer Science at the Robert H. Smith School of Business, University of Maryland, and honorary Professor of Marketing at the University of Groningen, The Netherlands. His main research interests are in the application of statistical and econometric methods to marketing problems, in particular to the analysis of eye-tracking data. He has over 150 publications in *Journal of the American Statistical Association*, *Journal of Econometrics*, *Journal of Classification*, *Journal of Business and Economic Statistics*, *Journal of Consumer Research*, *Journal of Marketing Research*, *Journal of Marketing*, *Marketing Science*, *Psychometrika*, and *Quantitative Marketing and Economics*, among others. He is area editor for *Journal of Marketing Research* and *Marketing Science*, and serves on the editorial boards of *Journal of Marketing*, *Journal of Classification*, and *Quantitative Marketing and Economics*. He has received the O'Dell Best Paper Award from *Journal of Marketing Research* and the Hendrik Muller Award from The Netherlands Royal Academy of the Sciences for outstanding lifetime contributions to the social sciences. He has been ranked the most productive academic in business and economics in The Netherlands and has published several monographs on market segmentation and visual marketing, among others.

Jie Yu ("Efficient Conjoint Choice Designs in the Presence of Respondent Heterogeneity") is a pre-

doctoral researcher at the Faculty of Business and Economics of the Katholieke Universiteit Leuven in Belgium. She received a bachelor's degree in mechanical engineering from the Shenyang Institute of Aeronautic Engineering in China, followed by a master's degree in industrial management and an M.S. in statistics from the Katholieke Universiteit Leuven. In her research, she focuses on the design of conjoint choice experiments.

Z. John Zhang ("A Theory of Combative Advertising") is a professor of marketing and Murrel J. Ades Professor at The Wharton School of the University of Pennsylvania. He earned a bachelor's degree in engineering automation and philosophy of science from Huazhong University of Science and Technology in China. He holds a Ph.D. in history and sociology of science from the University of Pennsylvania and a Ph.D. in economics from the University of Michigan. Prior to joining Wharton in 2002, he taught pricing and marketing management at the Olin School of Business, Washington University in St. Louis for three years and at Columbia Business School for five years. His research focuses primarily on competitive pricing strategies, the design of pricing structures, and channel management. He has published numerous articles in top marketing and management journals on various pricing issues such as measuring consumer reservation prices, price-matching guarantees, targeted pricing, access service pricing, the choice of price promotion vehicles, channel pricing, price wars, and the pricing implications of advertising. He has also developed an interest in the movie and telecom industries. He currently serves as associate editor for *Quantitative Economics and Marketing*. He is also an area editor for *Marketing Science*, and is on the editorial board for *Journal of Marketing*, and *Journal of Interactive Marketing*. In 2001, he won the John D.C. Little Best Paper Award and the Frank Bass Best Dissertation Award, along with his coauthors, for contributions to the understanding of targeted pricing with imperfect targetability.
