With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

Focus on Authors

Animesh Animesh (“Durable Products with Multiple Used Goods Markets: Product Upgrade and Retail Pricing Implications”) is an assistant professor at the Desautels Faculty of Management, McGill University. He holds a Ph.D. in information systems from the Robert H. Smith School of Business, University of Maryland, and a master’s degree from Carnegie Mellon University. His research explores the impact of Internet and advanced communication and coordination technologies on consumers, firms, markets, and other stakeholders.

Xinlei (Jack) Chen (“Examining Demand Elasticities in Hanemann’s Framework: A Theoretical and Empirical Analysis”) is currently an assistant professor in marketing at the University of British Columbia. He received his Ph.D. in marketing in 2005 from the University of Minnesota and B.Eng. in 1994 from Tsinghua University. His research interests include distribution channels, structural modeling of consumer choice and firm strategies (pricing, advertising, and promotion), new empirical industry organization, and the entertainment industry (movies, video games). In his spare time, he enjoys sports, reading, and playing with his daughter.

Kathleen Cleeren (“Intra- and Interformat Competition Among Discounters and Supermarkets”) is an assistant professor of marketing at Maastricht University, The Netherlands. She received her Ph.D. from the Catholic University of Leuven, Belgium. Her research focuses primarily on competition and the impact of product-harm crises. She received financial support from the European Union in the framework of the Marie Curie Individual Fellowship.

Tony Haitao Cui (“The Length of Product Line in Distribution Channels”) is an assistant professor of marketing at the Carlson School of Management, University of Minnesota, where he teaches Ph.D., MBA, and undergraduate courses. He obtained a B.Eng. in fluid machinery and fluid engineering, a B.Eng. in industrial engineering, and an IMBA in international business, all from Tsinghua University, and he holds an M.S. in operations and information management and a Ph.D. in managerial science and applied economics from The Wharton School of the University of Pennsylvania. His research focuses on competitive strategies, pricing, channels of distribution, and behavioral/experimental economics, and his work has appeared in *Marketing Science* and *Management Science*.

Marnik G. Dekimpe (“Intra- and Interformat Competition Among Discounters and Supermarkets”) is a research professor at Tilburg University (The Netherlands) and a professor of marketing at the Catholic University Leuven (Belgium). He holds a Ph.D. in marketing from the University of California, Los Angeles. He has won best-paper awards for *Marketing Science* (1995, 2001), the *Journal of Marketing Research* (1999), the *International Journal of Research in Marketing* (1997, 2001, 2002), and *Technological Forecasting and Social Change* (2000). He is an academic trustee with both the Marketing Science Institute and AiMark. He serves as editor of the *International Journal of Research in Marketing* and serves on the editorial boards of *Marketing Science*, the *Journal of Marketing*, the *Journal of Marketing Research*, *Marketing Letters*, the *Review of Marketing Science*, and the *Journal of Interactive Marketing*.

Benedict G. C. Dellaert (“Tunnel Vision: Local Behavioral Influences on Consumer Decisions in Product Search”) is a professor of marketing in the Department of Business Economics of the Erasmus School of Economics at Erasmus University Rotterdam, The Netherlands. He holds a Ph.D. from the Eindhoven University of Technology and was previously affiliated with the University of Sydney, Tilburg University, and Maastricht University. His research interests are consumer decision making and (online) customer–producer interaction, and he studies these phenomena in the domains of health, finance, retailing, and travel. His work has appeared in journals in marketing as well as in the various other substantive domains in which he conducts his research.

Ravi Dhar (“Modeling the Underreporting Bias in Panel Survey Data”) is the George Rogers Clark Professor of Management and Marketing, the Director of the Center for Customer Insights, and professor of psychology in the Department of Psychology, all at Yale University. His research awards include the William F. O’Dell Award and the AMA Doctoral Dissertation Award (honorable mention), and he was a finalist for the Paul Green Award. He has published more than 50 papers, proceedings, and book chapters, and he serves on the editorial boards of leading marketing journals, such as the *Journal of Consumer Research* (associate editor), the *Journal of Marketing* (area editor), the *Journal of Marketing Research* (area editor), and *Marketing Science* (area editor), among other journals.

Bas Donkers (“Tunnel Vision: Local Behavioral Influences on Consumer Decisions in Product Search”) is an associate professor of marketing in the Department of Business Economics of the Erasmus School of Economics at Erasmus University Rotterdam, The Netherlands. In his research, he focuses on the intersection between consumer behavior and econometric modeling, matching model specification to consumer decision processes. His research has appeared in journals in marketing and various other disciplines.

Denzil G. Fiebig (“The Generalized Multinomial Logit Model: Accounting for Scale and Coefficient Heterogeneity”) is a professor of economics in the Australian School of Business at the University of New South Wales. He received his Ph.D. in economics from the University of Southern California and is a fellow of the Academy of Social Sciences in Australia. His current research interests are in microeconometrics with an emphasis on modelling choice behavior in various areas of health economics utilizing both stated and revealed preference data. His research has appeared in journals such as the *Journal of Econometrics*, *Journal of Business and Economic Statistics*, *Review of Economics and Statistics*, *International Journal of Forecasting*, *Journal of Forecasting*, *Journal of Health Economics*, *Health Economics*, and *Marketing Letters*.

Natasha Zhang Foutz (“Research Note—Prerelease Demand Forecasting for Motion Pictures Using Functional Shape Analysis of Virtual Stock Markets”) is an assistant professor of commerce at the McIntire School of Commerce, University of Virginia. She holds a Ph.D. in marketing from Cornell University. She teaches and researches in the area of media and entertainment marketing. Her research has been published in the *Journal of Marketing Research* and other refereed journals and conference proceedings. She has taught marketing management, choice models, and entertainment marketing at the undergraduate, MBA, and Ph.D. levels. She is also a recipient of several teaching awards.

Katrijn Gielens (“Intra- and Interformat Competition Among Discounters and Supermarkets”) is an associate professor at the Kenan-Flagler Business School at the University of North Carolina at Chapel Hill. She received her Ph.D. in marketing from the Catholic University Leuven. Her work has been published in the *International Journal of Research in Marketing*, *Journal of Consumer Research*, *Journal of Marketing*, and *Journal of Marketing Research*. Her primary research interest is in the area of retailing and product innovations.

Jacob Goldenberg (“Database Submission—The Evolving Social Network of Marketing Scholars”) is a professor of marketing at the School of Business Administration at the Hebrew University of Jerusalem

and a visiting professor at the Columbia Business School. He received his Ph.D. from the Hebrew University of Jerusalem in a joint program of the School of Business Administration and Racach Institute of Physics. His research focuses on creativity, new product development, diffusion of innovation, complexity in market dynamics, and social networks effects. He has published in papers in the *Journal of Marketing*, the *Journal of Marketing Research*, *Management Science*, *Marketing Science*, *Nature Physics*, and *Science*. In addition, he is an author of two books by the Cambridge University Press.

Liang Guo (“Information Acquisition and Sharing in a Vertical Relationship”) is an assistant professor of marketing at the Hong Kong University of Science and Technology, China. He holds a Ph.D. in business administration (marketing) from the University of California, Berkeley, and he holds a B.A. in economics from Beijing University, China. His recent research projects investigate preference uncertainty, stockpiling, channel interaction, information acquisition and sharing, social communication, and voluntary quality disclosure. His research work has been accepted for publication at the *Journal of Economics and Management Strategy*, *Management Science*, and *Marketing Science*.

Haresh Gurnani (“Durable Products with Multiple Used Goods Markets: Product Upgrade and Retail Pricing Implications”) is a department chair and professor of management at the University of Miami, where he also holds the Leslie O. Barnes Professorship in Logistics. Prior to joining the University of Miami, he was an assistant professor of information and systems management at the School of Business and Management at the Hong Kong University of Science and Technology. He received a bachelor’s degree in mechanical engineering from the Indian Institute of Technology, New Delhi, and an M.S. in operations research and a Ph.D. in operations management from Carnegie Mellon University. His primary research interests are in supply chain inventory management; bargaining and game theory applications in supply chains; and interface issues with marketing, economics, and information systems. He has received several awards, including the William W. Cooper Award for the Best Doctoral Dissertation in the area of Business and Economics, the William Larimer Fellowship, a Richard Cyert Fellowship nomination, the University of Miami Excellence in Teaching nomination, and the Franklin Prize for Teaching Excellence. He is a senior editor for *Production and Operations Management* and the *Journal of Flexible Services and Manufacturing* and area/associate editor for *IIE Transactions*. His articles have been published in numerous technical journals. He has interacted extensively with corporations such as IBM, AT&T, General

Motors, and Texas Instruments, along with various Asian companies. He is a member of INFORMS, the Production and Operations Management Society, and the Manufacturing & Service Operations Management Society.

Gerald Häubl ("Tunnel Vision: Local Behavioral Influences on Consumer Decisions in Product Search") is the Canada Research Chair in Behavioral Science and an associate professor of marketing at the University of Alberta's School of Business. He is the founding director of the Institute for Online Consumer Studies (<http://iocs.org>). He received M.S. and Ph.D. degrees in business administration and marketing from the Vienna University of Economics and Business Administration (Wirtschaftsuniversität Wien) in his native Austria. His primary research interests are consumer decision making, human-information interaction, decision assistance for consumers, and the construction of preference and value. His work has been published in *Marketing Science*, the *Journal of Experimental Psychology*, the *Journal of Consumer Research*, the *Journal of Consumer Psychology*, the *Sloan Management Review*, the *International Journal of Research in Marketing*, the *International Marketing Review*, the *Journal of Interactive Marketing*, *Marketing Letters*, the *Communications of the Association for Computing Machinery*, and other journals. Among his various recreational interests, he especially enjoys hiking up mountains with his family, his collaborators, and whoever else he can talk into joining him.

Ganesh Iyer ("Information Acquisition and Sharing in a Vertical Relationship") is the Edgar F. Kaiser Professor of Business Administration at the Haas School of Business, University of California, Berkeley. He received his Ph.D. in management from the University of Toronto. His research interests include coordination in distribution channels, competitive strategy, Internet strategy, customer information markets, and the effects of bounded rationality on competitive markets. He is an area editor for *Marketing Science* and an associate editor for *Quantitative Marketing and Economics*. His research has appeared in a number of journals, including *Marketing Science*, *Management Science*, and the *Journal of Marketing Research*.

Wolfgang Jank ("Research Note—Prerelease Demand Forecasting for Motion Pictures Using Functional Shape Analysis of Virtual Stock Markets") is an associate professor in the Department of Decisions, Operations and Information Technologies at the Smith School of Business, University of Maryland, and Director, Center for Complexity in Business. He is interested in using ideas from statistics and data mining to crunch complex data problems, and he has published over 50 refereed articles and book chapters in the areas of statistics, data mining, information systems, and marketing. He teaches courses at the

undergraduate, graduate, and executive levels in the areas of data mining and quantitative marketing. He has received numerous awards, including the top 15% teaching award for teaching MBA core classes.

Michael P. Keane ("The Generalized Multinomial Logit Model: Accounting for Scale and Coefficient Heterogeneity") is an Australian Research Council (ARC) Federation fellow at the University of Technology Sydney, where he serves as a distinguished university professor in both economics and marketing. He is also a research fellow of the W. P. Carey School of Business at Arizona State University. His past appointments include professor of economics at Yale, New York University, and the University of Minnesota. He received his Ph.D. from Brown in 1990 and his B.S. from the Massachusetts Institute of Technology in 1983. He has published over 70 refereed articles in top journals in both economics and marketing, in such diverse areas as labor economics, econometrics, industrial organization, macroeconomics/finance, public economics, international trade, health economics, experimental economics, political economy, and consumer choice behavior. He is perhaps best known for work in the late 1980s that developed a practical method to estimate multinomial probit models with many alternatives (the so-called "GHK" algorithm), for pioneering work (with Ken Wolpin) on methods for solving complex dynamic programming problems, and for applications of these new methods to study human capital investment over the life cycle, dynamic models of consumer demand, and welfare policy.

Dmitri Kuksov ("When More Alternatives Lead to Less Choice") is an associate professor at Olin Business School of the Washington University in St. Louis and has a Ph.D. in marketing from the Haas School of Business of the University of California, Berkeley. His research interests include studying competitive strategy, consumer and firm behavior in markets with incomplete information, consumer communication and networks, branding and product line strategy, and customer satisfaction. His work has appeared in the *Journal of Marketing Research*, *Marketing Science*, *Management Science*, the *Journal of Economic Theory*, and several mathematics journals. He received the 2005 Frank M. Bass Dissertation Award, and two of his papers were finalists for the 2007 John D. C. Little Award. He currently serves on the editorial boards of *Marketing Science* and *Review of Marketing Science*.

Barak Libai ("Database Submission—The Evolving Social Network of Marketing Scholars") is an associate professor of marketing at the Recanati Graduate School of Business Administration, Faculty of Management, Tel Aviv University. He had previously been on the faculty of Technion-Israel Institute of Technology and was a visiting associate professor at the

MIT Sloan School of Management. His research centers around customer social influence and, in particular, on understanding social interaction dynamics on the growth of markets for new products and on the value of customers, products, and firms. He actually believes that 20 years from now, everyone will use agent-based models. His research has been published in *Marketing Science*, the *Journal of Marketing*, the *Journal of Marketing Research*, the *International Journal of Research in Marketing*, and the *Journal of Service Research*, among others.

Yunchuan Liu ("The Length of Product Line in Distribution Channels") is an assistant professor of business administration at College of Business, University of Illinois at Urbana-Champaign. He received a Ph.D. in marketing from Columbia University. His research interests include pricing strategy, retailing, and distribution channel management. His work has been previously published in *Marketing Science* and *Management Science*.

Jordan Louviere ("The Generalized Multinomial Logit Model: Accounting for Scale and Coefficient Heterogeneity") is a professor of marketing and Executive Director, Centre for the Study of Choice (CenSoC) in the Faculty of Business at University of Technology Sydney. He focuses on experimental analysis of choice behavior, preference elicitation methods, and measurement models. His current interests include conceptual frameworks for measuring and modeling brand equity, best-worst choice and measurement models, factors that influence differences in unobserved variability (error variances), and changes in preferences in experimental panels over time.

Nitin Mehta ("Examining Demand Elasticities in Hanemann's Framework: A Theoretical and Empirical Analysis") is an associate professor of marketing at the Rotman School of Management, University of Toronto. He received his Ph.D. from Carnegie Mellon University. His research interests focus on econometric modeling of consumer's search behavior; econometric modeling of behavioral phenomena (memory, confirmatory bias) on brand choices; and econometric modeling of consumer's brand choice, purchase incidence, and quantity decisions for single and multiple product categories.

Eitan Muller ("Database Submission—The Evolving Social Network of Marketing Scholars") is a professor of marketing at the Stern School of Business, New York University, and is the Nathan Galston Professor of Hi-Tech Marketing at the Leon Recanati Graduate School of Business Administration, Tel Aviv University. His work deals mainly with managerial issues of new product introduction, including answers to question such as the following: "Will network externalities accelerate or decelerate the growth of a new product?" "How ubiquitous is the chasm

phenomenon and what can firms do in order to cross it successfully?" "Under what condition does it pay for an airline to increase ticket price over time as the flight date approaches rather than give last-minute deals?" "How can one measure the monetary effects of a word-of-mouth program in a social network?" He has published over 60 papers in numerous marketing and economics journals in marketing and economics. He is a member of the editorial review boards of the *Journal of Marketing* and the *Journal of Marketing Research*, and he is an area editor for *Marketing Science* and the *International Journal of Research in Marketing*.

Om Narasimhan ("Examining Demand Elasticities in Hanemann's Framework: A Theoretical and Empirical Analysis") is an associate professor of marketing at the Carlson School of Management, University of Minnesota. His research interests include innovation in high-technology markets, empirical industrial organization issues in channels, and structural models of advertising.

Saibal Ray ("Durable Products with Multiple Used Goods Markets: Product Upgrade and Retail Pricing Implications") is an associate professor in the operations management area of the Desautels Faculty of Management at McGill University. He holds a Ph.D. in applied operations research from the Department of Management Sciences at the University of Waterloo. His main research interest can be broadly categorized as supply chain management with an emphasis on supply chain risk management, time-based competition, dynamic pricing, and product acquisition strategy. His research has been accepted or published in such reputable journals as *Management Science*, *Operations Research*, *Manufacturing and Service Operations Management*, *Production and Operations Management*, *IIE Transactions*, and the *European Journal of Operational Research*. In addition, he has holds or has held a number of grants from the government of Canada (NSERC and SSHRC) and the government of Québec (FQRSC and FRSQ).

Stefan Stremersch ("Database Submission—The Evolving Social Network of Marketing Scholars") holds a chair in marketing and is the Desiderius Erasmus Distinguished Chair of Economics at the Erasmus School of Economics, Erasmus University Rotterdam (The Netherlands) and a visiting professor of marketing at the IESE Business School, Universidad de Navarra (Spain). His current research interests are in innovation acceptance/diffusion, marketing of technology and science, and international marketing. His work has appeared in journals such as the *International Journal of Research in Marketing*, the *Journal of Marketing*, the *Journal of Marketing Research*, *Marketing Science*, and *Management Science*, and has been covered by both national and international press (e.g. *The Economist*). He has won several awards, such as the

Harold H. Maynard Best Paper Award of the *Journal of Marketing* (2002), the J. C. Ruigrok Prize (2005) for the most productive young researcher in the social sciences in The Netherlands (only once in four years awarded to an economist), and the AMA Early Career Award in Marketing Strategy (2008). He also received the 2004 Research Prize at Erasmus University Rotterdam for outstanding research performance, selected among all Erasmus faculty across all disciplines and schools. He is also active in service to the academic marketing community; he is an editorial board member for several journals and serves as editor of the *International Journal of Research in Marketing*, together with Don Lehmann.

Frank Verboven ("Intra- and Interformat Competition Among Discounters and Supermarkets") has been a professor of economics at the Catholic University Leuven since 2000. His main research area is empirical industrial organization with applications to competition policy and marketing. He has developed and estimated structural models of demand and entry to understand firms' pricing and distribution strategies.

J. Miguel Villas-Boas ("When More Alternatives Lead to Less Choice") is the J. Gary Shansby Professor of Marketing Strategy at the Haas School of Business, University of California, Berkeley. He holds a Ph.D. in applied economics from the Massachusetts Institute of Technology. His research interests include competitive strategy, design of marketing organizations, customer relationship management, customer recognition, product line design, and industrial organization. His research has appeared in several journals, including *Marketing Science*, *Management Science*, the *Journal of Economic Theory*, the *RAND Journal of Economics*, the *Journal of Marketing Research*, and the *Journal of Economics and Management Strategy*. He received the 2009 ISMS Long Term Impact Award, and three of his papers have been finalists for the John D. C. Little Best Paper Award. He is an area editor for *Marketing Science*, an associate editor for *Management Science* and *Quantitative Marketing and Economics*, and an editorial board member for the *Journal of Marketing Research* and the *International Journal of Research in Marketing*.

Nada Wasi ("The Generalized Multinomial Logit Model: Accounting for Scale and Coefficient Heterogeneity") is a research fellow at the School of Finance

and Economics and Centre for the Study of Choice, University of Technology Sydney. She received her B.A. in economics from Thammasat University, Thailand, and her Ph.D. in economics from University of California, San Diego. She is also a visiting professor at the University of Chicago–University of the Thai Chamber of Commerce Research Center, Thailand. Her research focuses on discrete-choice models (consumer choice behaviors in particular), applied microeconomics, and environmental economics.

Sha Yang ("Modeling the Underreporting Bias in Panel Survey Data") is an associate professor of marketing at New York University's Leonard N. Stern School of Business. Her primary research focuses on understanding household purchase behavior and market competition in the analysis of scanner panel data, store-level data, and survey data. Her recent research interests focus on interdependent consumer decision making, social network effect, search engine advertising, and survey response style. Her research has been published in leading marketing journals, including *Marketing Science*, *Management Science*, the *Journal of Marketing Research*, the *Journal of Marketing*, and *Quantitative Marketing and Economics*.

Shuya Yin ("Durable Products with Multiple Used Goods Markets: Product Upgrade and Retail Pricing Implications") is an assistant professor at the Paul Merage School of Business at the University of California, Irvine. She holds a Ph.D. in management science with a minor in transportation and logistics from the Sauder School of Business at the University of British Columbia. Her recent research addresses various problems in decentralized retail supply chains by using noncooperative and cooperative game theory. Her research has been published in academic journals such as *Management Science*, *Operations Research*, and *Naval Research Logistics*.

Yi Zhao ("Modeling the Underreporting Bias in Panel Survey Data") is a fellow at the Center for Excellence in Brand and Customer Management, J. Mack Robinson College of Business at the Georgia State University. His research interests include empirical modeling of consumer choice behavior, dynamic models, and empirical modeling of competitive strategies. He has published papers in the *Journal of Marketing Research* and *Marketing Science*.
