Focus on Authors

Adib Bagh (“How to Price Discriminate When Tariff Size Matters”) is an assistant professor with a joint appointment in the departments of mathematics and economics at the University of Kentucky. His research interests include price discrimination using nonlinear pricing mechanisms, game theory, and mathematical economics.

Hemant K. Bhargava (“How to Price Discriminate When Tariff Size Matters”) is an associate dean and the Jerome and Elsie Suran Professor of Technology Management at the Graduate School of Management, University of California, Davis. He studies business strategy and competition for technology products such as information goods, online services, software, electronic gadgets, media and entertainment goods, and alternative energy technologies.

Yuxin Chen (“The Benefit of Uniform Price for Branded Variants”) is the Polk Brothers Professor in Retailing and professor of marketing at the Kellogg School of Management, Northwestern University. Currently, he is visiting the China Europe International Business School as the Zhongkun Group Visiting Chair Professor of Marketing. His primary research areas include competitive strategies, database marketing, structural empirical models, Bayesian econometric methods, and behavioral economics. His research has appeared in journals such as *Marketing Science*, the *Journal of Marketing Research*, *Management Science*, and *Quantitative Marketing and Economics*.

Pradeep Chintagunta (“Editorial—*Marketing Science*: A Strategic Review”) is the Joseph T. and Bernice S. Lewis Distinguished Service Professor of Marketing at the Booth School of Business, University of Chicago. He graduated from Northwestern University and has also served on the faculty of the Johnson School, Cornell University. He is interested in studying consumer, agent, and firm behavior. In particular, he is interested in measuring the effectiveness of marketing activities in pharmaceutical markets, investigating aspects of technology product markets, studying online and off-line purchase behavior, and analyzing household purchase behavior using scanner data.

Tony Haitao Cui (“The Benefit of Uniform Price for Branded Variants”) is an assistant professor of marketing at the Carlson School of Management, University of Minnesota, where he teaches Ph.D., EMBA,

MBA, and undergraduate courses. He received a B.Eng. in fluid machinery and fluid engineering, a B.Eng. in industrial engineering, and an IMBA, all from Tsinghua University; he holds an M.S. in operations and information management and a Ph.D. in managerial science and applied economics, both from the Wharton School. His research focuses on behavioral modeling in marketing, behavioral and experimental economics, competitive strategies, distribution channels, pricing, and marketing-operations interfaces. His research has appeared in journals such as *Marketing Science*, *Management Science*, and *Marketing Letters*. He was named the 2011 Marketing Science Institute Young Scholar.

Yiting Deng (“Invited Paper—A Keyword History of Marketing Science”) is a Ph.D. candidate in marketing at the Fuqua School of Business, Duke University. She received her B.A. in economics, B.S. in statistics, and M.A. in economics from Peking University before joining the Ph.D. program. She also holds a M.S. in statistics from Duke University. Her research interests include social media, advertising, online search, and choices.

Dennis Fok (“Moderating Factors of Immediate, Gross, and Net Cross-Brand Effects of Price Promotions”) is a professor of applied econometrics at the Econometric Institute, Erasmus University Rotterdam. His research interests are in the fields of marketing and applied econometrics. These interests include modeling choice at an individual level as well as at an aggregated level; furthermore, he is interested in nonlinear panels and simulation-based estimation. He publishes on these topics in journals as *Marketing Science*, the *Journal of Marketing Research*, the *Journal of Applied Econometrics*, and the *Journal of Econometrics*.

Brett R. Gordon (“Advertising Effects in Presidential Elections”) is the Class of 1967 Associate Professor of Business at Columbia Business School. He received his Ph.D. in economics from Carnegie Mellon University in 2007 and joined Columbia Business School the same year. His research focuses on empirical industrial organization, with an emphasis on questions pertaining to pricing, innovation, advertising, dynamic oligopoly, and competitive strategy.

Rajdeep Grewal (“Stock Market Reactions to Customer and Competitor Orientations: The Case of Initial Public Offerings”) is the Irving & Irene Bard Professor of Marketing at the Smeal College of Business at the Pennsylvania State University; he is also

the associate research director of the Institute for the Study of Business Markets there. He received his Ph.D. in 1998 from the University of Cincinnati. His research focuses on empirically modeling strategic marketing issues and has appeared in prestigious journals such as the *Journal of Marketing*, *Journal of Marketing Research*, *Marketing Science*, *Management Science*, *Quantitative Marketing and Economics*, and *Strategic Management Journal*. Currently, he serves as an associate editor for the *Journal of Marketing Research* and an area editor for the *Journal of Marketing*.

Dominique Hanssens ("Editorial—*Marketing Science: A Strategic Review*") is the Bud Knapp Distinguished Professor of Marketing at the UCLA Anderson School of Management, where he has been on the faculty since 1977. His research focuses on quantitative models that improve our understanding of marketing impact on business performance. From 2005 to 2007, he served as Executive Director of the *Marketing Science Institute* in Cambridge, MA. In 2010, he was elected a fellow of the INFORMS Society for Marketing Science.

Wesley R. Hartmann ("Advertising Effects in Presidential Elections") is an associate professor of marketing at the Stanford Graduate School of Business. He holds a Ph.D. in economics from the University of California, Los Angeles. He is interested in applying and developing econometric techniques to analyze questions relevant to marketing and economics. His current research focuses on dynamic choice contexts, pricing, social interactions, and targeted marketing.

John R. Hauser ("Editorial—*Marketing Science: A Strategic Review*") is the Kirin Professor of Marketing at the MIT Sloan School of Management, where he teaches new product development, marketing management, competitive marketing strategy, and research methodology. He has consulted for a variety of corporations on product development, sales forecasting, marketing research, voice of the customer, defensive strategy, and research and development management. Among his awards include the Converse Award for contributions to the science of marketing and the Parlin Award for contributions to marketing research. He is a founder and principal at Applied Marketing Science, Inc., a former trustee of the Marketing Science Institute, a fellow of INFORMS and of the INFORMS Society of Marketing Science, and serves on many editorial boards. He enjoys sailing, NASCAR, opera, and country music.

Csilla Horváth ("Moderating Factors of Immediate, Gross, and Net Cross-Brand Effects of Price Promotions") is an assistant professor of marketing at the Institute for Management Research, Radboud University, Nijmegen, the Netherlands. Her research interests include modeling dynamic marketing processes,

branding, self-control, and harmful consumer behavior. She publishes in journals such as the *Journal of Marketing Research*, *International Journal of Research in Marketing*, *Marketing Letters*, and *International Journal of Forecasting*.

Dmitri Kuksov ("A Model of the 'It' Products in Fashion") is a professor of marketing at the Naveen Jindal School of Management, the University of Texas at Dallas; previously, he worked at Washington University in St. Louis. He holds a Ph.D. in marketing from Haas Business School of the University of California, Berkeley. His research interests include competitive strategy, markets with incomplete information, consumer communication and networks, branding and product line strategy, and customer satisfaction. He received 2005 Frank M. Bass Dissertation Award; two of his papers were finalists for 2007 John D. C. Little Award, and one was a finalist for INFORMS 2012 Long Term Impact Award. He is an associate editor of *Marketing Science*, *Management Science*, and *Quantitative Marketing and Economics*.

Vardit Landsman ("The Relationship Between DTCA, Drug Requests, and Prescriptions: Uncovering Variation in Specialty and Space") is an assistant professor of marketing at the Recanati Business School, Tel Aviv University (Israel), and the Erasmus School of Economics, Erasmus University Rotterdam (the Netherlands). Her fields of interest include the implementation of new modeling approaches to the study of marketing phenomena. Her work involves the study consumer choice and, in particular, the analysis of choice processes within new markets, as well as the study of marketing issues in the context of life sciences. Her work has been published in the *Journal of Marketing* and *Quantitative Marketing and Economics*.

Carl F. Mela ("Invited Paper—A Keyword History of Marketing Science") is the T. Austin Finch Foundation Professor of Marketing at Duke University, where he teaches brand management and the marketing core. His research focuses on the long-term effects of marketing activity and new media. His articles appear in the *Journal of Marketing Research*, *Marketing Science*, the *Journal of Marketing*, the *Harvard Business Review*, and the *Journal of Consumer Research*, and he has received or been nominated for more than 25 best paper awards. His home page is located at <http://www.duke.edu/~mela>.

Vishal Narayan ("Modeling Consumer Learning from Online Product Reviews") is an assistant professor of marketing at the Johnson School at Cornell University. His primary research interests lies in studying social interactions and how such interactions affect consumer preferences and choices. He seeks to develop econometric methods that would lead to improved managerial decision making in the areas of

pricing, product development, and demand estimation. More recently, he has developed an interest in studying marketing issues specifically pertaining to shopping behavior in emerging markets.

Thomas Otter ("Successive Sample Selection and Its Relevance for Management Decisions") is a professor of marketing in the faculty of business and economics of Goethe University Frankfurt. He received his Ph.D. from the Vienna University of Economics and Business Administration (WU-Wien). His research interests are in the development and application of Bayesian techniques to help conceptualize and solve problems in marketing and marketing research.

Jagmohan Singh Raju ("Editorial—*Marketing Science: A Strategic Review*") is the Joseph J. Aresty Professor of Marketing at the Wharton School and the Chair of Wharton's Marketing Department. He has a Ph.D. from the Graduate School of Business at Stanford University. His previous research has won the Frank M. Bass Award as well as the John D. C. Little Award. He has served as a departmental editor for the marketing department of *Management Science*, president of INFORMS Society for Marketing Science, and secretary treasurer of the INFORMS College of Marketing.

Jason Roos ("Invited Paper—A Keyword History of Marketing Science") is an assistant professor of marketing at the Rotterdam School of Management, Erasmus University Rotterdam. His dissertation, "Hyper-Media Search and Consumption" (Duke University, 2012), was a winner of the 2012 ISMS Doctoral Dissertation Proposal Competition. His research focuses on issues related to new media and the Internet, as well as the entertainment industry. His website is located at <http://www.jasonmtroos.com>.

Alok R. Saboo ("Stock Market Reactions to Customer and Competitor Orientations: The Case of Initial Public Offerings") is an assistant professor of marketing at the J. Mack Robinson College of Business, Georgia State University. He received a Ph.D. in marketing from the Smeal College of Business, Pennsylvania State University. His research interest lies in exploring the performance effectiveness of firms' marketing strategies.

Kannan Srinivasan ("Editorial—*Marketing Science: A Strategic Review*") is the Rohet Tolani Distinguished Professor of International Business and the H.J. Heinz II Professor of Management, Marketing and Information Systems, Tepper School of Business, Carnegie Mellon University. He has published more than 60 articles in leading marketing, management, and statistics journals and holds five patents. He serves as the president of INFORMS Society for Marketing Science and as an advisory board member for *Marketing Science*. He is also an associate editor of *Management Science* and *Quantitative Marketing and*

Economics and a member of the editorial board of the *Journal of Marketing Research*.

Richard Staelin ("Editorial—*Marketing Science: A Strategic Review*") is the Edward and Rose Donnell Professor of Business Administration at the Fuqua School of Business, Duke University. He graduated many years ago from the University of Michigan and taught at Carnegie Mellon University (for 13 years), the University of Chicago (for 1 semester), and the Australian Graduate School of Management (for 1 year) prior to his arrival at Duke in 1982; since then, he has been deputy dean (twice), associate dean of executive education, executive director for the Tera-data Center for CRM, and the initial managing director of Global Executive MBA (GEMBA) at Duke. He also was deeply involved in setting up the Duke Goethe, Duke Seoul University, and Nazarbayev University alliances. He has taught in the daytime MBA program and every executive MBA program ever offered by Duke; he is currently teaching the core marketing course in the new Master of Management Studies (MMS) program. He has published more than 80 papers in academic journals and has received best paper awards at the *Journal of Marketing Research*, the *Journal of Marketing*, and *Marketing Science* as well as the Outstanding Educator Award and the Converse Award from the American Marketing Association.

Stefan Stremersch ("The Relationship Between DTCA, Drug Requests, and Prescriptions: Uncovering Variation in Specialty and Space") holds a chair in marketing and is the Desiderius Erasmus Distinguished Chair of Economics at the Erasmus School of Economics, Erasmus University Rotterdam (the Netherlands) and a professor of marketing at the IESE Business School, Universidad de Navarra (Spain). His current research interests are in innovation acceptance/diffusion, marketing of innovations, marketing of technology and life sciences, and international marketing. He has won several awards, such as the Harold H. Maynard Best Paper Award of the *Journal of Marketing* (2002), the J.C. Ruigrok Prize (2005) for the most productive young researcher in the social sciences in the Netherlands (only once in four years awarded to an economist), and the AMA Early Career Award in Marketing Strategy (2008). He also received the 2004 Research Prize at Erasmus University Rotterdam for outstanding research performance, selected among all Erasmus faculty across all disciplines and schools.

Sriram Venkataraman ("The Relationship Between DTCA, Drug Requests, and Prescriptions: Uncovering Variation in Specialty and Space") is an assistant professor of marketing at the Kenan-Flagler Business School, University of North Carolina at Chapel Hill. He received his Ph.D. from Cornell University. His research investigates marketing pertinent questions in

the entertainment, pharmaceutical, and U.S. automobile industries. His work has appeared in journals such as *Marketing Science*, *Management Science*, and *American Economic Review*.

Stephan Wachtel ("Successive Sample Selection and Its Relevance for Management Decisions") studied at Christian-Albrechts-Universität zu Kiel, specializing in innovation, new media and marketing, distributive trade, statistics, and econometrics. Until January 2012, he was research associate at the chair of services marketing at Goethe University Frankfurt, Germany. After finishing his Ph.D, he is working as a business analyst.

Kangkang Wang ("A Model of the 'It' Products in Fashion") is a doctoral student at the Olin Business School, Washington University in St. Louis.

Sha Yang ("Modeling Consumer Learning from Online Product Reviews") is a professor of marketing at the Marshall School of Business, University of Southern California. She received a B.A. in international economics from Renmin University, China; and an M.S. in statistics, M.A. in marketing, and Ph.D. in marketing from the Ohio State University. Her primary research focuses on understanding and modeling household purchase behavior (especially the interdependent consumer decision making) and market competition. Her recent research interest focuses on

Internet advertising. Her research has been published in leading journals such as *Marketing Science*, *Management Science*, the *Journal of Marketing Research*, the *Journal of Marketing*, and *Quantitative Marketing and Economics*.

Yi Zhao ("Modeling Consumer Learning from Online Product Reviews") is an assistant professor of marketing at the J. Mack Robinson College of Business, Georgia State University. He received his Ph.D. in marketing from the Hong Kong University of Science and Technology. His research interests include understanding dynamics and interaction of consumers' preferences, empirically the modeling of firms' competitive strategy and Bayesian estimation methods. His papers have appeared in leading journals such as *Marketing Science* and the *Journal of Marketing Research*.

Ying Zhao ("Modeling Consumer Learning from Online Product Reviews") is an associate professor of marketing at the Hong Kong University of Science and Technology. She received her Ph.D. from University of California, Berkeley. Her research interests include empirical modeling of competitive strategies, pricing, consumer choice models, and consumer decision making. Her papers have appeared in the *Journal of Marketing Research*, *Management Science*, *Marketing Science*, and *Journal of Business*.
