Focus On Authors

Andrew T. Ching (“The Effects of Publicity on Demand: The Case of Anti-Cholesterol Drugs”) is an associate professor at the Rotman School of Management and department of economics, University of Toronto. His research focuses on developing new empirical models and estimation methods to understand the forward-looking behavior of consumers and firms, and how they interact in a dynamic game environment; he has applied these new techniques to study new technology adoption decisions by consumers, demand for new and used digital products, how marketing mix and word-of-mouth affects consumer choice and firms’ decisions. He has received the Young Economist Award from the European Economic Association in 2003, Honorable Mention of the Dick Wittink Prize Award in 2011, and a major grant from the Social Science and Humanities Research Council. He has published research articles in *Econometrica*, *Management Science*, *Marketing Science*, *Quantitative Marketing and Economics*, *Journal of Banking and Finance*, *International Economic Review*, *Journal of Applied Econometrics*, and *International Journal of Industrial Organization*. He is currently serving as an associate editor at *Management Science*, and on the editorial review board at *Marketing Science*; he has also previously served as a guest associate editor at *Journal of Marketing Research*.

Pradeep K. Chintagunta (“Impact of Competition on Product Decisions: Movie Choices of Exhibitors”) is the Joseph T. and Bernice S. Lewis Distinguished Service Professor of Marketing at the Booth School of Business, University of Chicago. He is interested in empirically studying consumer, agent, and firm behavior. He is currently the coordinating editor at *Quantitative Marketing and Economics*.

Robert Clark (“The Effects of Publicity on Demand: The Case of Anti-Cholesterol Drugs”) holds a Ph.D. in economics from the University of Western Ontario and is a full professor at HEC Montréal’s department of applied economics. His research interests are in industrial organization, microeconomics, and marketing. His research has been published in leading journals such as the *American Economic Review*, *American Economic Journal: Microeconomics*, the *Journal of International Economics*, the *Journal of Industrial Economics*, *Quantitative Marketing and Economics*, and the *Journal of Law and Economics*.

Preyas S. Desai (“The Strategic Role of Exchange Promotions”) is the Spencer R. Hassell Professor of Business Administration at the Fuqua School of Business, Duke University. He received his Ph.D. from

Carnegie Mellon University. His research covers a wide range of topics in marketing strategy, distribution channels, and marketing of durable products. His articles on these topics have appeared in top tier academic journals such as *Marketing Science*, *Management Science*, *Journal of Marketing*, *Journal of Marketing Research*, and *Quantitative Marketing and Economics*.

Stephen L. France (“An Analysis and Visualization Methodology for Identifying and Testing Market Structure”) is currently an assistant professor of business quantitative analysis at Mississippi State University. He received a BSc in computer science from the University of Durham, an MSc in statistics and management science from the University of the West of England, and a Ph.D. in quantitative marketing and supply chain management from Rutgers University. He has published in the areas of multidimensional scaling, dimensionality reduction, information visualization, cluster analysis, and cultural consensus analysis. He is a member of INFORMS, the Classification Society, and the Psychometric Society.

Sanjoy Ghose (“An Analysis and Visualization Methodology for Identifying and Testing Market Structure”) is a professor of marketing and the Associate Dean of Research and Doctoral Program at the Sheldon B. Lubar School of Business, University of Wisconsin–Milwaukee. He has a Ph.D. in marketing from Carnegie Mellon University. He also has an M.S. from Carnegie Mellon University, and an MBA from Washington State University. His BTech (Honors) in electrical engineering is from the Indian Institute of Technology at Kharagpur. He has previously published his research in journals such as the *Journal of Marketing Research*, *Journal of Marketing*, *European Journal of Operational Research*, and *Production and Operations Management Journal*.

Ignatius Horstmann (“The Effects of Publicity on Demand: The Case of Anti-Cholesterol Drugs”) is a professor of business economics at the Rotman School of Management, University of Toronto and Co-Director of the Rotman Institute for International Business. He has a B.A. in english from St. Joseph’s University and a Ph.D. in economics from Boston College. He spent 21 years in the economics department at the University of Western Ontario before moving to Rotman. He has numerous published articles on issues ranging from the development of multinational enterprises to international trade policy to advertising/marketing to negotiations and bargaining. In addition to his current research focus on advertising and promotional activity,

his research focuses on firm organization, outsourcing, and intermediation in international trade.

Bing Jing ("Lowering Customer Evaluation Costs, Product Differentiation, and Price Competition") is an associate professor of marketing at the Cheung Kong Graduate School of Business. He received a Ph.D. in business administration from University of Rochester. Previously, he was an assistant professor at the Stern School of Business at New York University.

Yogesh V. Joshi ("Turf Wars: Product Line Strategies in Competitive Markets") is an associate professor at the Robert H. Smith School of Business at the University of Maryland, College Park. He works in the areas of marketing and innovation. His research focuses on strategic marketing decisions, product differentiation, brand strategy, social influence, the diffusion of innovations, and new product development. He teaches/has taught courses on customer centric innovation in the undergraduate program, new product development in the MBA program, innovation analytics in the M.S. in marketing analytics program, and mathematical models in marketing in the Ph.D. program.

Romana Khan ("Will a Fat Tax Work?") is a visiting associate professor of marketing at Özyegin University. She earned her Ph.D. in marketing from the Kellogg School of Management at Northwestern University. Her research interests include public policy, pricing and price discrimination, and customization of marketing interventions. Her research has appeared in journals such as *Marketing Science*, *Journal of Marketing Research*, *Psychological Science*, and *Journal of Regional Science*.

Michael Lewis ("The Unintended Consequences of Countermarketing Strategies: How Particular Antismoking Measures May Shift Consumers to More Dangerous Cigarettes") is an associate professor of marketing at the Goizueta Business School at Emory University. He earned a Ph.D. in marketing from Northwestern University, an MBA from the University of Chicago, and M.S. and B.S. degrees in industrial engineering from the University of Illinois. His research focuses on consumer loyalty programs, methods for customer valuation, and dynamic pricing.

Hyunwoo Lim ("The Effects of Publicity on Demand: The Case of Anti-Cholesterol Drugs") is an assistant professor at the School of Business, Ajou University. He holds a Ph.D. in management from the University of Toronto and an MBA and a B.S. in computer engineering from Seoul National University. His research interests include content analysis, structural modeling, and pharmaceutical marketing. In 2010 he was the finalist (runner-up) for the MSI Alden G. Clayton Dissertation Proposal Competition.

Mitchell J. Lovett ("The Role of Paid, Earned, and Owned Media in Building Entertainment Brands: Reminding, Informing, and Enhancing Enjoyment") is an associate professor in the Simon Business School at

the University of Rochester. He earned a B.A. from Ohio Wesleyan University, an MBA from Boise State University, and a Ph.D. from Duke University. His research uses quantitative models to study marketing phenomena including political marketing, advertising, consumer learning, word-of-mouth, and private brands. His research has been published in *Marketing Science*, the *Journal of Marketing Research*, the *Quarterly Journal of Political Science*, and *Marketing Letters*.

Kanishka Misra ("Will a Fat Tax Work?") is an assistant professor of marketing at the Ross School of Business, University of Michigan. He holds a Bachelor's degree in mathematics from the University of Cambridge and a Ph.D. in marketing from Northwestern University. His current research projects focus on issues related to pricing and public policy. His work has been published in *Marketing Science*, *Journal of Econometrics*, *American Economic Journal: Macroeconomics*, *Psychological Science*, and *Economic Letters*.

A. Yeşim Orhun ("Impact of Competition on Product Decisions: Movie Choices of Exhibitors") is an assistant professor of marketing at the Ross School of Business, University of Michigan. She earned a Ph.D. in marketing from University of California at Berkeley. Her empirical work focuses on strategic interactions in the domain of quality, product assortment, and location choice.

Devavrat Purohit ("The Strategic Role of Exchange Promotions") is the Ford Motor Company Professor of Business Administration at the Fuqua School of Business, Duke University. He received his Ph.D. from the Graduate School of Industrial Administration at Carnegie Mellon University. His research interests are primarily in the marketing of technology products and durable goods. His research appears in journals such as *Management Science*, *Marketing Science*, *Journal of Consumer Research*, and *Journal of Marketing Research*.

David J. Reibstein ("Turf Wars: Product Line Strategies in Competitive Markets") is the William Stewart Woodside Professor at the Wharton School, University of Pennsylvania. His research focuses on competitive marketing strategies, marketing metrics, and product line decisions, among other issues. His marketing metrics work has focused on linking marketing metrics to financial consequences resulting in his most recent book, entitled *Marketing Metrics: The Definitive Guide to Measuring Marketing Performance*, 2nd ed. He is the Immediate Past Chairman of the Board of Directors of the American Marketing Association. A former Executive Director of the Marketing Science Institute, he consults extensively with companies worldwide, including GE, Pfizer, Johnson & Johnson, Rohm and Haas, and others.

Vishal Singh ("The Unintended Consequences of Countermarketing Strategies: How Particular Antismoking Measures May Shift Consumers to More Dangerous

Cigarettes”; “Will a Fat Tax Work?”) is an associate professor of marketing at the Stern School of Business at New York University. He earned a Ph.D. in marketing from Northwestern University’s Kellogg School of Management. His general research interests lie in the domain of data driven business strategies, with a focus on retail competition, competitive pricing, database marketing, customer management, and empirical industrial organization. His more recent work focuses on leveraging large databases to generate psychological insights and guide policies in public health.

Richard Staelin (“The Role of Paid, Earned, and Owned Media in Building Entertainment Brands: Reminding, Informing, and Enhancing Enjoyment”) is the Edward and Rose Donnell Professor of Business Administration at the Fuqua School of Business, Duke University. He graduated from the University of Michigan and taught at Carnegie Mellon University (13 years), the University of Chicago (one semester) and the Australian Graduate School of Management (one year) prior to his arrival at Duke in 1982; since then he has been Deputy Dean (twice), Associate Dean of Executive Education, Executive Director for the Tera-data Center for CRM, and the initial Managing Director of GEMBA at Duke; he also was deeply involved in setting up the Duke Goethe, Duke Seoul University, and Nazarbayev University alliances; he has taught in the full-time Daytime MBA, the MMS, and the DKU programs and every Executive MBA program ever offered by Duke; he is currently teaching the core marketing course in the DKU program. He has published over 80 papers in academic journals and has received best paper awards at *Journal of Marketing Research*, *Journal of Marketing*, and *Marketing Science* and the Outstanding Educator award and the Converse Award from the AMA; he also served on the editorial boards of *Marketing Science*, *Journal of Marketing Research*, *Journal of Marketing*, *International Journal of Research in Marketing*, and *Journal of Consumer Research* and was the editor-in-chief of *Marketing Science* and the consulting editor for the *Journal of Marketing*’s special issue on customer relationship management. He has served on over 40 Ph.D. committees and is Chairman of the Board of Directors for a small biotech firm (BioElectronics) and heads the Advisory Board for another start up, Bivarus. He was elected an inaugural Fellow in ISMS and AMA and is a Fellow in INFORMS; he was president of ISMS, the INFORMS Society of Marketing Science.

Sriram Venkataraman (“Impact of Competition on Product Decisions: Movie Choices of Exhibitors”) is an assistant professor of marketing at the Kenan-Flagler

Business School, University of North Carolina–Chapel Hill. His research investigates econometric models of consumer demand and competitive interactions and big-data analytics.

Yanwen Wang (“The Unintended Consequences of Countermarketing Strategies: How Particular Antismoking Measures May Shift Consumers to More Dangerous Cigarettes”) is an assistant professor of marketing at the Leeds School of Business at the University of Colorado, Boulder. She earned a Ph.D. from the Goizueta School of Business at Emory University. She also holds an MPhil from the University of New South Wales and a Bachelor of Management from Fudan University. Her research interests include counter-marketing and relationship management. She applies a variety of methods based on the nature of the problems such as dynamic programming, state space models, and field experiments.

Hema Yoganarasimhan (“Estimation of Beauty Contest Auctions”) is an assistant professor at the Foster School of Business at the University of Washington. She works on models of social influence and network effects, fashion, and auctions. Her work has received many awards including the MSI Clayton Doctoral Dissertation Award, Frank M. Bass Outstanding Dissertation Award, and John D. C. Little Best Paper Award, and she was recently nominated as an MSI young scholar.

Z. John Zhang (“Turf Wars: Product Line Strategies in Competitive Markets”) is the Murrel J. Ades Professor and Director of the Penn China Center at the Wharton School, University of Pennsylvania. His research focuses on targeted pricing and other pricing strategies, competitive strategies, market entry, and channel and retail management. Recent work probed the complex, unintended pitfalls of targeted pricing—the process of targeting a competitor’s customers with lower prices—in the fast-moving Internet age. His research suggested that while this approach is not for every business, it can be an effective tool under the right circumstances. He also provided guidelines to help companies understand when targeted pricing might play an effective role in their marketing strategy.

Bo Zhou (“The Strategic Role of Exchange Promotions”) is an assistant professor of marketing at the Robert H. Smith School of Business at the University of Maryland, College Park. He received his Ph.D. in marketing from Duke University and an M.A. in economics from the University of Southern California. His research interests include competitive marketing strategies, marketing of technology, emerging markets, and behavioral economics. His research appears in *Journal of Marketing Research* and *Marketing Science*.
