Tat Chan (“A Salesforce-Driven Model of Consumer Choice”) is professor of marketing at the Olin School of Business, Washington University in St. Louis. He received his PhD in economics from Yale University. His research interests are in empirical modeling consumer choice and firm competition using econometric methodologies. He has conducted various research projects in the domain of economics and marketing.

Cheng Chou (“Linear Estimation of Aggregate Dynamic Discrete Demand for Durable Goods: Overcoming the Curse of Dimensionality”) is an assistant professor of economics at the University of Leicester School of Business. His research interests include applied econometrics and quantitative marketing. In particular, he is interested in estimating consumer preference using big data and economics theory when consumers face intertemporal consumption trade-offs and uncertainties of market and in designing new products or service based on estimated preference.

Tinglong Dai (“Salesforce Contracting Under Uncertain Demand and Supply: Double Moral Hazard and Optimality of Smooth Contracts”) is an associate professor at Johns Hopkins Carey Business School. His research, spanning healthcare, marketing, and artificial intelligence, has appeared in top journals such as *Management Science*, *Manufacturing & Service Operations Management*, *Marketing Science*, and *Operations Research*, and has won awards such as the Johns Hopkins Discovery Award, INFORMS Public Sector OR Best Paper Award, and POMS Best Healthcare Paper Award. He received a PhD (2013) from Carnegie Mellon University.

Tim Derdenger (“Linear Estimation of Aggregate Dynamic Discrete Demand for Durable Goods: Overcoming the Curse of Dimensionality”) is an associate professor of marketing and strategy at Carnegie Mellon’s Tepper School of Business and was the Frank and Helen Risch Faculty Development Professor in Business for academic years 2014–2016. Professor Derdenger also coordinates the technology leadership track for Tepper MBA students whose interests lead them to employment in technology firms. Prior to Carnegie Mellon, Tim earned his PhD in economics from the University of Southern California and a BBA from George Washington University. His research interests are divided into two areas: the study of

technology and sports markets. He has publications in *Journal of Marketing Research*, *Marketing Science*, *Management Science*, *Quantitative Marketing and Economics*, *Marketing Letters*, and *Customer Needs and Solutions*. He is also an associate editor for *Management Science* (marketing) and a member of the editorial board for *Marketing Science*. Finally, he is an avid golfer (+1 handicap) and a former four-year collegiate golf scholarship recipient.

Brett Hollenbeck (“Advertising Strategy in the Presence of Reviews: An Empirical Analysis”) is an assistant professor of marketing at the UCLA Anderson School of Management. He earned a PhD in economics from the University of Texas at Austin in 2014.

Sanjay Jain (“Time Inconsistency and Product Design: A Strategic Analysis of Feature Creep”) is a professor and O. P. Jindal Distinguished Chair of Marketing at the Naveen Jindal School of Management, University of Texas at Dallas. His research has been published in the *Journal of Marketing Research*, *Marketing Science*, and *Management Science*. He is an associate editor for the *International Journal of Research in Marketing*, *Management Science*, and *Marketing Science*. He also serves on the editorial board of the *Journal of Marketing Research*.

Kinshuk Jerath (“Salesforce Contracting Under Uncertain Demand and Supply: Double Moral Hazard and Optimality of Smooth Contracts”) is an associate professor of marketing at Columbia Business School. His research focuses on technology-enabled marketing, including online advertising, online and off-line retailing, salesforce management, and customer management. His research has appeared in top journals such as *Marketing Science*, *Journal of Marketing Research*, and *Management Science*. He received a BTech from the Indian Institute of Technology Bombay and a PhD from the Wharton School, University of Pennsylvania.

Dmitri Kuksov (“Opinion Leaders and Product Variety”) is a professor at the Naveen Jindal School of Management, University of Texas at Dallas. He is interested in competitive strategy, markets with imperfect information and search, communication, branding, product line design, and customer satisfaction. He is a department editor of *Management Science*, an associate editor of *Marketing Science*, and a senior editor of *Production and Operations Management*.

Vineet Kumar (“Linear Estimation of Aggregate Dynamic Discrete Demand for Durable Goods: Overcoming the Curse of Dimensionality”) is an assistant professor of marketing at the Yale School of Management. He holds a PhD from Carnegie Mellon University (Tepper School of Business) and an undergraduate degree in engineering from the Indian Institute of Technology, Madras. His research interests lie in technology and digital and technology strategy from a substantive viewpoint and in structural models in terms of methodology. He is especially interested in settings with intertemporal trade-offs and dynamics in consumer and firm decision making. His research has focused on estimating consumer valuation for freemium products and services, pricing under technology transformation, bundling in hardware and software markets, network models and in new methods for obtaining consumer preferences in challenging settings, including highly dynamic environments and with big data. His research is published or will appear in *Marketing Science*, *Management Science*, *Quantitative Marketing and Economics*, and *Marketing Letters* among others.

Chenxi Liao (“Opinion Leaders and Product Variety”) is an assistant professor of marketing at the Chinese University of Hong Kong. She holds a PhD in marketing from the University of Texas at Dallas and a BS in mathematics and applied mathematics from the University of Science and Technology of China. She is interested in pricing, product line design, competitive strategy, consumer uncertainty, channel coordination, and digital marketing.

Hongju Liu (“Creation and Consumption of Mobile Word of Mouth: How Are Mobile Reviews Different?”) is Professor of Marketing at the Guanghua School of Management, Peking University. He received his PhD and MBA from the Booth School of Business, University of Chicago. Hongju’s research focuses on the areas of dynamic structural models and technology markets. He has published in leading academic journals such as the *Journal of Marketing Research*, *Management Science*, *Marketing Science*, and *MIS Quarterly*.

Nicholas H. Lurie (“Creation and Consumption of Mobile Word of Mouth: How Are Mobile Reviews Different?”) is Associate Professor of Marketing and the Voya Financial Professor at the University of Connecticut. He has published in the *Journal of Consumer Research*, the *Journal of Marketing Research*, *Marketing Science*, the *Journal of Marketing*, and *Organizational Behavior and Human Decision Processes*. He received his PhD from the Haas School at the University of California at Berkeley, his MBA from the Kellogg School at Northwestern University, and his AB from Vassar College.

Sridhar Moorthy (“Advertising Strategy in the Presence of Reviews: An Empirical Analysis”) holds the Manny Rotman Chair at Rotman School of

Management, University of Toronto. He received his PhD from Stanford University and has taught previously at Rochester, Yale, INSEAD, UCLA, Wharton, and ISB. His research focuses on branding, advertising, and retailing issues, from both empirical and theoretical perspectives. He is an associate editor of *Management Science*, a member of the editorial board of the *Journal of Marketing Research*, and a past area editor of *Marketing Science*.

Unnati Narang (“Mobile App Introduction and Online and Offline Purchases and Product Returns”) is a PhD student in marketing at the Mays Business School, Texas A&M University. Her research models the causal impact of marketing strategies relating to mobile and platform technologies on consumer and firm decisions. Her research interests include mobile marketing, retailing, digital marketing, and education. She is the winner of the 2018 Shankar-Spiegel Best Dissertation Proposal Award.

Davide Proserpio (“Advertising Strategy in the Presence of Reviews: An Empirical Analysis”) is an assistant professor of marketing at University of Southern California Marshall School of Business. He received his PhD in computer science from Boston University in 2016.

Sam Ransbotham (“Creation and Consumption of Mobile Word of Mouth: How Are Mobile Reviews Different?”) is an Associate Professor of Information Systems at the Carroll School of Business at Boston College. In 2014, he was awarded an NSF Career Award for his analytics-based research in information security. He received his BChE, MBA, and PhD from the Georgia Institute of Technology. His research interests include IT security, social media, and the strategic use of IT.

Venkatesh Shankar (“Mobile App Introduction and Online and Offline Purchases and Product Returns”) is the Coleman Chair Professor of Marketing and Director of Research, Center for Retailing Studies, Mays Business School, Texas A&M University. His areas of specialization include digital business, artificial intelligence, marketing strategy, innovation, retailing, international marketing, and pricing. He is a three-time winner of the Kroeber Award for outstanding teaching.

Raphael Thomadsen (“A Salesforce-Driven Model of Consumer Choice”) is associate professor of marketing at the Olin School of Business, Washington University in St. Louis. He received his PhD in economics from Stanford University. He worked at Columbia University and UCLA before joining Washington University. His research interests are in microeconomics/industrial organization, pricing, product offerings and in-store marketing.

Yanwen Wang (“Mobile Hailing Technology and Taxi Driving Behaviors”) is an assistant professor of marketing and behavioural science at the Sauder

School of Business at the University of British Columbia. She earned a PhD in marketing from Emory University in 2014. She focuses on the regulatory implications of marketing actions in a variety of contexts including antismoking campaigns, political advertising, mobile hailing technology, and financial decision making. Her work has appeared in *Marketing Science*. She was nominated as a 2019 MSI young scholar.

Chunhua Wu (“Mobile Hailing Technology and Taxi Driving Behaviors”) is an assistant professor of marketing and behavioural science at the Sauder School of Business at the University of British Columbia. He received his doctoral degree from Olin Business School, Washington University in St. Louis in 2012. His recent research focuses on online advertising networks, e-commerce markets, online and offline price competition, and the impact of mobile apps. His research has appeared in *Marketing Science*.

Bicheng Yang (“A Salesforce-Driven Model of Consumer Choice”) is assistant professor of marketing

and behavioral science at the Sauder School of Business, University of British Columbia. She received her PhD in marketing from the Olin Business School, Washington University in St. Louis. Bicheng’s research focuses on the impact of incentives on employee performance and consumer behavior, and the design of incentive mechanisms to improve firm performance and social welfare.

Ting Zhu (“Mobile Hailing Technology and Taxi Driving Behaviors”) is an associate professor of marketing at the Krannert School of Management at Purdue University. She earned her PhD in marketing from Carnegie Mellon University in 2006. Her research interests focus on entry models, consumer choices, retail competition, pricing, game theory, and empirical IO. She has received numerous awards and grants. Her work has appeared in *Marketing Science*, the *Journal of Marketing Research*, *Quantitative Marketing and Economics*, and the *RAND Journal of Economics*.
