Focus on Authors

Greg M. Allenby ("Bayesian Statistics and Marketing") is the Kurtz Chair in Marketing at The Ohio State University. He specializes in the study of economic and statistical issues in marketing, focusing on Bayesian methods. Professor Allenby is an Area Editor for *Marketing Science* and is on the editorial board of the *Journal of Marketing Research*. He is also an associate editor of *Quantitative Marketing and Economics* and the *Journal of Business and Economic Statistics*. His research has been published in *Marketing Science*, the *Journal of Marketing Research*, the *Journal of the American Statistical Association*, the *Journal of Econometrics*, the *Journal of Business and Economic Statistics*, and other leading journals.

William Boulding ("Sustainable Pioneering Advantage? Profit Implications of Market Entry Order") is Professor of Business Administration at the Fuqua School of Business, Duke University. His research interests lie in the domain of understanding both the implications of strategic choices and how those choices get made. He is a past Area Editor for *Marketing Science*.

Markus Christen ("Sustainable Pioneering Advantage? Profit Implications of Market Entry Order") is Assistant Professor at INSEAD in Fontainebleau. He holds an M.Sc. in mechanical and production engineering from the Swiss Federal Institute of Technology, an M.B.A. from the University of Oregon, and a Ph.D. from Duke University. His current research interests include issues of valuing, pricing, and acquiring information and the effect of innovation on firm performance. His previous research has appeared in the *Journal of Marketing Research*.

Ely Dahan ("Fast Polyhedral Adaptive Conjoint Estimation") is Assistant Professor of Marketing at the Anderson School of Business at UCLA. He formerly taught at the M.I.T. Sloan School of Management. He received an S.B. in Civil Engineering from M.I.T., an M.B.A. from Harvard Business School, and a Ph.D. in Operations, Information and Technology from Stanford University. He was a Fellow of the Department of Energy and of the American Association of Collegiate Schools of Business (AACSB), and he won a Jaedicke Fellowship while at Stanford. His research focuses on Internet-based new product research methods, securities trading of concepts, mass customization, models of new product prototyping, and the economics of cost reduction. Before returning to academia, he worked as national product manager for W. R. Grace and NEC until 1984, when he founded a computer networking company in Maryland, serving as CEO until the firm was acquired in 1993.

Anita Elberse ("Demand and Supply Dynamics for Sequentially Released Products in International Markets: The Case of Motion Pictures") is an Assistant Professor at Harvard Business School. Prior to joining Harvard, she was a Visiting Fellow at the Wharton School, University of Pennsylvania. She received a Ph.D. from London Business School in 2002. Her main research interests include marketing issues involving media and entertainment industries, the diffusion and adoption of innovations, the impact of digital technologies on marketing, and econometric modeling techniques.

Jehoshua Eliashberg ("Demand and Supply Dynamics for Sequentially Released Products in International Markets: The Case of Motion Pictures") is the Sebastian S. Kresge Professor of Marketing and Professor of Operations and Information Management at the Wharton School, University of Pennsylvania. His research interests include new product development issues, generally focusing on specific industries. He is particularly interested (from a research and consumption standpoint) in the media and entertainment industries. His research in this area has been published in *Marketing Science*, *Management Science*, and the *Journal of Marketing*. It was also the subject of articles appearing in *Fortune*, the *Christian Science Monitor*, *Variety*, the *Washington Post*, *Business Week*, and the *Wall Street Journal*.

John R. Hauser ("Fast Polyhedral Adaptive Conjoint Estimation") is the Kirin Professor of Marketing, Head of the Marketing Group, and leader of the Virtual Customer Initiative at the M.I.T. Sloan School of Management, where he teaches new product development, marketing management, competitive marketing strategy, and research methodology. He is the co-author of two textbooks, *Design and Marketing of New Products* and *Essentials of New Product Management*. He has received both the Converse Award for scientific contributions and the Parlin award for contributions to marketing research. He has won awards for research and for teaching, and his students have won awards for their theses and, later, for their research papers. For six long years he was Editor of *Marketing Science*. Outside interests include sailing, swimming, NASCAR, opera, and country music.

Barbara E. Kahn ("Understanding High Stakes Consumer Decisions: Mammography Adherence Following False-Alarm Test Results") is the Dorothy Silberberg Professor of Marketing at The Wharton School of the University of Pennsylvania. She is also a faculty member of the Graduate Group in the Psychology Department and a Senior Fellow at the Leonard Davis Institute of Health Economics at the University of Pennsylvania. Her primary research interests focus on customer decision making specifically related to (1) variety in assortments or consumer variety-seeking and (2) consumer (patient) decision making in high-consequence/stressful environments. She is currently President of the *Journal of Consumer Research* Policy Board and an academic trustee of the Marketing Science Institute.

Mary Frances Luce ("Understanding High-Stakes Consumer Decisions: Mammography Adherence Following False-Alarm Test Results") is an Associate Professor of Marketing at the Wharton School of the University of Pennsylvania. She is also a Senior Fellow at the Leonard Davis Institute of Health Economics at the University of Pennsylvania. She received her Ph.D. degree in marketing from Duke University. Her primary research interests center around understanding how decision behavior is altered when decisions become consequential or otherwise emotion-laden. Her dissertation article centered around understanding how consumers make "decisions that matter" in a consumer context, and she received the Ferber award for the best dissertation-based article in the *Journal of Consumer Research* (1998).

Elie Ofek ("R&D, Marketing, and the Success of Next-Generation Products") is an Assistant Professor of Business Administration at the Harvard Business School at Harvard University. He received a B.Sc. in Electrical Engineering from the Technion (Israel Institute of Technology) and an M.A. in Economics and a Ph.D. in Business, both from Stanford University. His primary research interests are in new product strategy, competition in technology-intensive environments, and ability to learn from customers to facilitate innovation and knowledge creation. His research has also appeared in *Management Science* and in a previous issue of *Marketing Science*.

Arvind Rangaswamy ("A Fuzzy Set Model of Search and Consideration with an Application to an Online Market") is the Jonas H. Anchel Professor of Marketing at Penn State, where he is also the Research Director of the eBusiness Research Center. He received a Ph.D. in marketing from Northwestern University, an M.B.A. from the Indian Institute of Management, Calcutta, India, and a B.Tech from the Indian Institute of Technology, Madras, India. Before joining Penn State, he was a faculty member at the J. L. Kellogg Graduate School of Management at Northwestern University and at the Wharton School, University of Pennsylvania. He has published in several marketing journals, including *Marketing Science*, *Management Science*, the *Journal of Marketing Research*, the *Journal of Marketing*, the *International Journal of Research in Marketing*, the *Journal of Interactive Marketing*, and *Marketing Letters*. His basic research philosophy is not to make a tradeoff between relevance and rigor—having one without the other is like having root beer without the float! For further details, visit www.arvind.info.

Peter E. Rossi ("Bayesian Statistics and Marketing") is Joseph T. Lewis Professor of Marketing and Statistics at the Graduate School of Business, University of Chicago. He received his Ph.D. from University of Chicago and B.A. from Oberlin College. He has published over 40 articles in refereed journals in marketing, economics, statistics, and econometrics, including *Marketing Science*, the *Journal of Marketing Research*, *American Economic Review*, the *Journal of the American Statistical Association*, *Econometrica*, the *Journal of Political Economy*, the *Journal of Econometrics*, *Biometrika*, the *Journal of Business and Economic Statistics*, and the *Journal of Economic Theory*. His areas of research interest include pricing and promotion, target marketing, direct marketing, micromarketing, limited dependent variable models, and Bayesian statistical methods. A fellow of the American Statistical Association and the *Journal of Econometrics*, he is founding editor of *Quantitative Marketing and Economics* and past Associate Editor for the *Journal of the American Statistical Association*, the *Journal of Econometrics*, and the *Journal of Business and Economic Statistics*.

Miklos Sarvary ("R&D, Marketing, and the Success of Next-Generation Products") is Associate Professor of Marketing at INSEAD (Fontainebleau, France). Before joining

INSEAD, he was a faculty member at the Harvard Business School and the Graduate School of Business at Stanford University. He has a Ph.D. in Management from INSEAD. His research focuses on information and knowledge marketing with special emphasis on information provision (content and sale) and technology (delivery). His previous work focused on the global diffusion of telecommunications products. His research has been published in *Marketing Science*, *Management Science*, the *Journal of Marketing Research*, the *California Management Review*, *Marketing Letters*, and *Technological Forecasting and Social Change*. He is an Associate Editor of *Quantitative Marketing and Economics* and a member of the Editorial Boards of *Marketing Science*, the *International Journal of Research in Marketing*, and *Review of Marketing Science*.

Duncan I. Simester ("Fast Polyhedral Adaptive Conjoint Estimation") is an Associate Professor at the Sloan School of Management at M.I.T. He holds undergraduate and graduate degrees in law and commerce from the University of Auckland, New Zealand, and a Ph.D. from M.I.T. His published research focuses on competitive retail strategies, organizational design, the measurement of consumer response, and the application of optimization methods to marketing problems. He is an Associate Editor of *Management Science* and is an Area Editor of *Marketing Science*.

Olivier Toubia ("Fast Polyhedral Adaptive Conjoint Estimation") is a graduate student in Marketing at the M.I.T. Sloan School of Management. He is a graduate from Ecole Centrale Paris (Paris, France) and received an S.M. in Operations Research from M.I.T. This paper is part of a stream of research aimed at offering a new approach to conjoint analysis and experimental designs. The other focus of his dissertation is the study of the idea generation process and of the impact of incentives on creativity.

Jianan Wu ("A Fuzzy Set Model of Search and Consideration with an Application to an Online Market") is the A. B. Freeman Assistant Professor of Marketing at A. B. Freeman School of Business at Tulane University. He received his Ph.D. in Business Administration from Smeal College of Business Administration (1998) and his M.S. in Statistics from Department of Statistics (1994), The Pennsylvania State University. He also received an M.S. in Mathematics from Huazhong University of Science and Technology (1986) and a B.S. in Mathematics from Xiangtan University (1983) in Xiangtan, China. His research has been published in the *Journal of Marketing Research* and the *International Journal of Research in Marketing*. His article in IJRM won an Honorable Mention for 2000. His research interests are in the areas of developing quantitative methods to understand consumer multistage choice process and customer perception, preference, and satisfaction, in general, and their applications to electronic markets, in particular.
