With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

NOTES ABOUT AUTHORS

A. Charnes ("A Goal Programming Model for Media Planning" and "Note on an Application of a Goal Programming Model for Media Planning") is Walter P. Murphy Distinguished Professor of Mathematics at Northwestern University. He received a Ph.D. in mathematics from the University of Illinois. Dr. Charnes has published over 200 research papers and books in management science and applied mathematics. "DEMON: Decision Mapping via Optimum Go-No Networks—A Model for Marketing New Products" (written with W. W. Cooper, J. K. DeVoe and D. B. Learner) appeared in *Management Science* in July 1966. Dr. Charnes is currently engaged in research on the mathematics of management, systems analysis, and biomathematics. He is a founding member and past President of TIMS; a Fellow of AAAS, the Econometric Society, and ORSA; and a member of TIMS, AMS, ASA, ISI, SIAM, and ASEE.

W. W. Cooper ("A Goal Programming Model for Media Planning" and "Note on an Application of a Goal Programming Model for Media Planning") is Professor of Economics and Industrial Administration, Graduate School of Industrial Administration, Carnegie-Mellon University. He is also Vice-President for Management Sciences and Economics, University Science Center in Pittsburgh. Professor Cooper received an A.B. degree in economics from the University of Chicago. He is the author of *Mathematical Programming for Better Media Selection* (American Association of Advertising Agencies Group IV, 1961); and he co-authored (with A. Charnes) *Management Models and Industrial Applications of Linear Programming*, 2 vols. (John Wiley & Sons, Inc.). His published articles include (with A. Charnes, J. K. DeVoe and D. B. Learner) "DEMON: Decision Mapping via Optimum Go-No Networks—A Model for Marketing New Products," *Management Science*, July 1966. Professor Cooper's present research interests include modeling and interpreting management and social problems and processes. He is a member of TIMS, ORSA, Econometric Society, and the American Accounting Association.

J. K. DeVoe ("A Goal Programming Model for Media Planning") is Vice President, Director of Marketing Services, and Account Group Manager for Cargill, Wilson & Acree in Richmond, Virginia. He is also Director of New Products Group, Inc., a subsidiary of CW&A in Richmond. Mr. DeVoe was formerly a Vice President at Batten, Barton, Durstine & Osborn, Inc. He attended Ohio State University where he received a B.S. degree in industrial engineering and an M.S. degree in sciences. Mr. DeVoe's publications include "Plans, Profits and the Marketing Program," 1965 American Marketing Association 48th World Congress Proceedings, and (with A. Charnes, W. W. Cooper and D. B. Learner) "DEMON: Decision Mapping via Optimum Go-No Networks—A Model for Marketing New Products," *Management Science*, July 1966. He is a member of TIMS, American Marketing Association, and the American Institute of Industrial Engineers.

D. B. Learner ("A Goal Programming Model for Media Planning" and "Note on an Application of a Goal Programming Model for Media Planning") is Vice President and Director of Research at Batten, Barton, Durstine & Osborn, Inc., in New York City. He attended Ohio State University, earning the B.A., M.A., and Ph.D. degrees in psychology. He has published a number of articles, including (with A. Charnes, W. W. Cooper and J. K. DeVoe) "DEMON: Decision Mapping via Optimum Go-No Networks—A Model for Marketing New Products," *Management Science*, July 1966. Dr. Learner is a member of TIMS, ORSA, American Psychological Association, Psychometric Society, American Society of Mechanical Engineers, American Institute of Electrical Engineers, Market Research Society, and Copy Research Society.

Benjamin Lipstein ("Test Marketing: A Perturbation in the Market Place") is Senior Vice President-Research, Information Services and Marketing, Sullivan, Stauffer, Colwell & Bayles, Inc., in New York City. He was formerly an Adjunct Professor at the Bernard M. Baruch School of Business, City College. He received a B.A. from Brooklyn College and an M.A. and Ph.D. in economics from Columbia University. Dr. Lipstein's many published papers include "A Mathematical Model of Consumer Behavior," *Journal of Marketing Research*, August 1965; and "The Design of Test Marketing Experiments," *Journal of Advertising Research*, December 1965. He is a member of TIMS, ORSA, American Marketing Association, American Statistical Association, Mathematical Association of America, Society of Industrial and Applied Mathematics, and AAAS.

W. Reinecke ("A Goal Programming Model for Media Planning") is Director of Media and OR for Henderson Advertising Agency in Greenville, South Carolina. He was formerly Supervisor of Linear Programming for Batten, Barton, Durstine & Osborn, Inc., in New York City. Mr. Reinecke received a B.S. degree in engineering from the U.S. Naval Academy.

Borje O. Saxberg ("The Management of Scientific Manpower") is Professor of Administrative Theory and Organizational Behavior in the Graduate School of Business Administration, University of Washington. He received a B.Econ. from the Swedish Institute of Economics (Finland), a B.S. in management and technology from Oregon State University, and an M.S. in management and a Ph.D. in business from the University of Illinois. In addition, he was a post-doctoral Ford Foundation Faculty Study Fellow at Cornell University (sociology, anthropology, social psychology). Dr. Saxberg's articles have appeared in a number of journals, including the *Journal of Finance*, *Business Horizons*, *Harvard Business Review*, and *Economie Appliquée* (France). He is a contributor to and co-editor of *The Business World* (Houghton-Mifflin Co., 1967), and *Comparative Administrative Theory* (University of Washington Press, in press). Dr. Saxberg's present research concerns the relationship between shiftwork and technology, and shiftwork for professional and managerial personnel. He is a member of the Academy of Management, Society for Applied Anthropology, American Management Association, and the American Academy of Political and Social Sciences.

George Schussel ("Job-Shop Lot Release Sizes") is the Manager of the In-

formation Systems Division at Brown Engineering, a Teledyne Company in Huntsville, Alabama. He did the work resulting in this article prior to assuming his current duties, when he was directing the work of the Management Science Staff at Northrop Corporation and concurrently serving as Assistant Professor at the University of Southern California. He received an A.B. in physics from U.C.L.A., an M.S. in applied mathematics from Harvard, and a D.B.A. from the Harvard Business School. Dr. Schussel has published articles in *Datamation*, the *Journal of the Astronomical Sciences*, and the *Journal of Industrial Engineering*; his first article for *Management Science* appeared in June 1967. Dr. Schussel is a member of TIMS, AAAS, ORSA, and AIIE.

John W. Slocum, Jr. ("The Management of Scientific Manpower") is Assistant Professor of Management at Pennsylvania State University. He is also a consultant for the Mellon National Bank and Trust Company and Standard Steel Corporation. He received a B.B.A. in management from Westminster College, an M.B.A. in industrial relations from Kent State University, and a D.B.A. in organizational theory from the University of Washington. Dr. Slocum is the author of "Group Cohesiveness and Academic Achievement," *Journal of College Management* (April 1968); and of "Sensitivity and Self-Awareness Changes in Individuals," scheduled for publication in the *Journal of Training and Development* in August 1968. His present research deals with group cohesiveness and its effects on productivity in an academic environment. Dr. Slocum is a member of the American Management Association.

E. F. Snow ("Note on an Application of a Goal Programming Model for Media Planning") is Acting Director of Operations Research and Associate Research Director for Batten, Barton, Durstine & Osborn, Inc., in New York City. He is also Visiting Lecturer in Marketing in the Graduate School of Industrial Administration, Carnegie-Mellon University. Mr. Snow received a B.S. in mechanical engineering from the University of Illinois and an M.S. in industrial administration from the Graduate School of Industrial Administration at Carnegie Institute of Technology. In addition to his account responsibilities at BBDO, he is engaged in research on new product planning systems and on media planning systems. Mr. Snow is a member of TIMS, the American Marketing Association, National Society of Professional Engineers, and the American Society of Mechanical Engineers.

Glen L. Urban ("A New Product Analysis and Decision Model") is Assistant Professor of Management at the Alfred P. Sloan School of Management at M.I.T. He received a B.S. in mechanical engineering and an M.B.A. in marketing from the University of Wisconsin, and a Ph.D. in management from Northwestern University. Dr. Urban is co-author (with D. B. Montgomery) of the forthcoming book *Management Science Models in Marketing*, and co-editor (with D. B. Montgomery) of *Applications of Management Science in Marketing*, both to be published by Prentice Hall. His current research interests include new product information systems, models for product selection, and product line decisions. Dr. Urban is a member of TIMS, ORSA, and the American Marketing Association.
