The success of *Management Science* critically depends on the community of scholars who voluntarily contribute their time to provide thoughtful reviews of the manuscripts submitted to the journal. The workload is considerable: In the 2020 academic year (July 2019 through June 2020), *Management Science* received 6,741 reviews from 3,863 individuals. The majority of those reviews were received on or before the due date, which allowed us to complete 79% of our decisions within 90 days.

While we deeply appreciate the service of all those who contribute to our journal, the editorial board has decided to annually grant service awards to those associate editors and reviewers who have offered exceptional service in the manuscript evaluation process.

Associate editors not only read manuscripts, they recruit reviewers, read their reports, and write recommendations to the department editors. All of our associate editors are dedicated to the journal, but some are notable not only for handling a significant number of manuscripts, but also for ensuring a reasonable turnaround time between the date they are assigned a paper and the date that they return their recommendations. We recognize these associate editors with our Meritorious Service Award or, for those who clearly distinguish themselves along both of those dimensions, our Distinguished Service Award.

As with our associate editors, the service of reviewers is critical to the journal. Some graciously agree to review many manuscripts and then consistently write timely, unbiased, and thoughtful reports. We are pleased to grant them our Meritorious Service Award or, for those who demonstrate a remarkable commitment to the journal on each of those attributes, our Distinguished Service Award.

The *Management Science* Distinguished Service Award recipients for the 2020 academic year are as follows:
