With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

ABOUT AUTHORS

Everett E. Adam, Jr. ("Priority Assignment of OSHA Safety Inspectors") is an associate professor of management at the University of Missouri, Columbia, Missouri 65201. He holds a B.S. in engineering from the University of Missouri, Rolla, an M.S. in industrial management from the University of Missouri, Columbia, and a D.B.A. in production management from Indiana University. His articles have appeared in several professional journals, and he is a member of the Academy of Management, AIDS, APICS, and TIMS. With Ronald J. Ebert, he has written *Production and Operations Management: Concepts, Models, and Behavior*, which will be published by Prentice-Hall in early 1978.

Derek W. Bunn ("Forecasting Political Risk"), M.A. (Cambridge); M.Sc., D.I.C., Ph.D. (London) is C.E.G.B. Research Fellow in Engineering-Economics at Oxford University, Oxford, England. He has held visiting appointments at the International Institute for Applied Systems Analysis in Austria and the Department of Decision Sciences at the University of Southern California. He has published widely in the field of Decision Analysis and Bayesian Forecasting.

John Christensen ("Simulation of Decentralized Planning in Two Danish Organizations Using Linear Programming Decomposition") holds a M.Sc. from Aarhus University, Denmark and is currently a Ph.D. candidate in Accounting at Stanford University, Stanford, California 94305.

Robert C. Dailey ("The Role of Team and Task Characteristics in R&D Team Collaborative Problem Solving and Productivity") is an Assistant Professor at the Graduate School of Business Administration, Tulane University, New Orleans, Louisiana 70118. He holds a D.B.A. in Organizational Behavior from the University of Colorado. He is the author of articles appearing in *Human Relations*, *Psychological Reports*, *Journal of Management Studies*, *Group and Organization Studies*, and others. His present interests include the analysis of antecedents of effectiveness at the individual and group levels in R&D organizations.

Joe A. Dodson ("Models of New Product Diffusion Through Advertising and Word-of-Mouth") is an Associate in the Marketing Services Group at N.W. Ayer ABH International, New York, New York 10019. He received his M.A. and Ph.D. in Management Science from the Krannert School of Management, Purdue University. He previously served on the faculty at Northwestern University. He is a member of TIMS and the American Marketing Association. His articles have appeared in the *Journal of Marketing Research*, *Research in Marketing*, and *Proceedings of the American Statistical Association*.

Phillip Ein-Dor ("Strategic Planning for Management Information Systems") is a Senior Lecturer at the Leon Recanati Graduate School of Business Administration, Tel-Aviv University, Tel-Aviv, Israel. He received a B.A. from Hebrew University of Jerusalem and M.Sc. and Ph.D. degrees from Carnegie-Mellon University. A member of ACM, SMIS, and TIMS, he has published a number of articles on computer system management and management information systems. He is co-author of *Managing Management Information Systems*. (Heath, Lexington, Mass, 1978).

Ellis L. Johnson ("On a Production Allocation and Distribution Problem") is a Research Staff Member in the Research Division of IBM. His interests are in mathematical programming and combinatorics. He received the Ph.D. in Operations Research from the University of California, Berkeley, in 1965, the M.A. in mathematics from the same university in 1962, and the BS in Applied Mathematics from Georgia Tech in 1960. He is a member of the Mathematical Programming Society, an associate editor for *Mathematics of Operations Research*, and is an Adjunct Professor at the University of Waterloo, Waterloo, Ontario.

Thomas G. Mairs ("On a Production Allocation and Distribution Problem") is a group Manager in the Industrial Engineering Department of Frito-Lay, Inc. His responsibility is to develop computer systems for applications in manufacturing. He received the M.S. in Engineering Administration from SMU in 1971 and the B.S. in Industrial and Systems Engineering from the University of Florida, Gainesville, in 1967. He is a member of AIIE.

Vijay Mahajan ("Innovation Diffusion in a Dynamic Potential Adopter Population") is Assistant Professor of Marketing, Ohio State University, Columbus, Ohio 43210. He received a B.S. in Chemical Engineering from Indian Institute of Technology, Kanpur (India), and an M.S. in Chemical Engineering and Ph.D. in Business Administration from the University of Texas at Austin. An active member of TIMS, he has published extensively in journals such as *Decision Sciences*, *Interfaces*, and the *Journal of Marketing Research*. He has consulted for both government and industry, and previously was on the faculty of the State University of New York-Buffalo.

J. K. Mann ("Probability Revision under Act-Conditional States") received a Ph.D. from the University of California, Los Angeles and is currently an Assistant Professor of Economics at the University of California, San Diego, La Jolla, California 92093. Specializing in the Theory of the Firm, she has published papers in the areas of cost analysis, insurance theory and decision theory.

Eitan Muller ("Models of New Product Diffusion Through Advertising and Word-of-Mouth") is Assistant Professor at the University of Pennsylvania, Philadelphia, Pennsylvania 19174 and (from 1979) a lecturer at the Business School, the Hebrew University, Jerusalem, Israel. He holds a B.Sc. in mathematics from the Technion, Israel, and M.M. and Ph.D. in management science from Northwestern University. His main interests are in the economics of marketing and in social choice. He has published in economics journals such as the *Review of Economic Studies* and the *Journal of Economic Theory*. He is a member of TIMS, AMA and AEA.

M. M. Mustafaoglu ("Forecasting Political Risk") is currently employed by the Finance Department of the International E&P Division of Getty Oil Company where he is involved in investment evaluation and strategic planning. He began his career in the petroleum industry as an exploration geophysicist in 1974. He holds a Bachelor's degree in Electrical Engineering from Wichita State University, Kansas, and an MBA in Finance and Quantitative Management Science from the University of Houston.

Børge Obel ("Simulation of Decentralized Planning in Two Danish Organizations Using Linear Programming Decomposition") is Associate Professor of Management at Odense University, Denmark. He received Ph.D. and M.Sc. degrees in Operations Research from Aarhus University, Denmark. His papers have appeared in *Journal of Management Studies*, *OMEGA*, *The Scandinavian Journal of Economics*, and other professional journals.

G. Richard Patton ("A Simultaneous Equation Model of Corporate Strategy") is an Assistant Professor of Business Administration at the Graduate School of Business, University of Pittsburgh, Pittsburgh, Pennsylvania 15261. He holds a Ph.D. in Strategic Management from the Krannert Graduate School of Management, Purdue University. His research on strategic management has appeared in several journals as well as presentations and proceedings for a number of national conferences.

Robert A. Peterson ("Innovation Diffusion in a Dynamic Potential Adopter Population") is Professor of Marketing Administration and Senior Research Fellow, the Institute for Constructive Capitalism, University of Texas, Austin, Texas 78712. He received M.S. and Ph.D. degrees from the University of Minnesota. He is the author or co-author of nearly one hundred publications, including *Strategic Marketing Problems* (Allyn and Bacon, 1978). A member of several professional societies, he is currently a section editor for the *Journal of Marketing* and the *Journal of Marketing Research*.

Dan Schendel ("A Simultaneous Equation Model of Corporate Strategy") (Ph.D. Stanford) is an Associate Professor at the Graduate School of Management, Purdue University, West Lafayette, Indiana 47907. His re-

search interests lie in strategic models of performance, strategic planning system design, and no- and slow-growth turnaround strategies. He has co-authored *Strategy Formulation: Analytical Concepts* (West Publishing Co., 1978), is the co-editor of *Strategic Management: A New View of Business Policy and Planning* and has authored a number of articles in the Strategic Management area.

Bertram Schoner ("Probability Revision under Act-Conditional States") received a B. Eng. in Electrical Engineering from McGill University, an M.B.A. from the University of Western Ontario, and a Ph.D. from Stanford University. He is a Professor of Marketing and Quantitative Methods at Simon Fraser University, Burnaby, British Columbia, Canada and is currently a Visiting Fellow at the Hoover Institution on War, Revolution, and Peace. He is co-author of a book on marketing research and has published papers on decision analysis and on the multi-national corporation.

Eli Segev ("Strategic Planning for Management Information Systems") is a Senior Lecturer of Business Administration in the Faculty of Management-The Leon Recanati Graduate School of Business Administration, Tel-Aviv University, Tel-Aviv, Israel. He received his B.Sc. in Industrial Engineering and Management from Technion, Israel Institute of Technology, M.B.A. from Tel-Aviv University and D.B.A. from Harvard Business School. He has published extensively in the areas of strategic decision making and management information systems, and co-authored *Managing Management Information Systems* (Heath, Lexington, Mass., 1978).

Kurt Spielberg ("On a Production Allocation and Distribution Problem") is a Senior Staff Member, IBM Scientific Computing, White Plains, New York. He received a B.S. in Physics (Summa cum Laude) from the City College of New York and a Ph.D. from the University of Vienna. He is associate editor of *Mathematical Programming* and member of ORSA, SIGMAP and the Mathematical Programming Society. His current interests and publications are in mathematical and integer programming, with emphasis on enumerative methods, distribution and location problems, interactive computing, scheduling and large scale optimization.

Shaler Stidham, Jr. ("Socially and Individually Optimal Control of Arrivals to a GI/M/1 Queue") is Associate Professor in Industrial Engineering and Operations Research at North Carolina State University, Raleigh, North Carolina 27607. He previously was Assistant Professor of Operations Research at Cornell University, and has held visiting positions at Aarhus University and the Technical University in Denmark. He received a B.A. in Mathematics from Harvard College, a M.S. in Operations Research and Computing from Case Institute of Technology, and a Ph.D. in Operations Research

from Stanford University. His primary research interests are in design and control of stochastic systems.

R. R. Vemuganti ("On the Feasibility of Scheduling Lot Sizes For Two Products On One Machine") is an Associate Professor and Chairman of the Quantative Studies Department at the University of Baltimore, Baltimore, Maryland 21201. He holds an M.A. in Mathematics from Andhra University, India, and M. Stat. from the Indian Statistical Institute and a Ph.D. in Operations Research from the Johns Hopkins University. His articles

have appeared in several professional journals. He is an associate member of ORSA.

Glenn W. Wakefield ("On a Production Allocation and Distribution Problem") has eight years of experience in the Corporate Management Services Department of Frito-Lay, Inc. His current position is project analyst with responsibility for developing software for mini-computers in manufacturing applications. He is working toward a masters degree at the University of Dallas, Dallas, Texas.

**CHAIRPERSON
MANAGEMENT SCIENCE AND COMPUTERS
EDWIN L. COX SCHOOL OF BUSINESS
SOUTHERN METHODIST UNIVERSITY**

The search committee of the Edwin L. Cox School of Business at Southern Methodist University invites your inquiry concerning the chairperson position in the Management Science and Computers subject area. The chairperson will provide academic leadership for teaching and research in fields of applied operations research, business statistics and computer applications. Qualifications include distinguished performance in teaching and research equivalent to that required for appointment to an associate or full professorship, commitment to quality business education, interest and demonstrated ability to provide academic leadership, and capacity for significant relationships with the business community. Competitive salary and support.

Interested candidates are urged to send their resume to:

Associate Dean James T. Rothe
Edwin L. Cox School of Business
Southern Methodist University
Dallas, Texas 75275

Southern Methodist University is an Equal Opportunity, Affirmative Action Employer.
