With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

ABOUT AUTHORS

Kenneth R. Baker ("An Analytic Framework for Evaluating Rolling Schedules") is a Professor in the Amos Tuck School of Business, Dartmouth College, Hanover, New Hampshire 03755. He received an A.B. from Harvard College and a Ph.D. from Cornell University. He has written a number of technical articles and a textbook on sequencing and scheduling. He is presently an Associate Editor for Logistics, for *Management Science*.

Harlan Crowder ("Cluster Analysis: An Application of Lagrangian Relaxation") is a member of the optimization group at IBM's Thomas J. Watson Center, Yorktown Heights, New York 10541. He holds a B.S. from East Texas State University and an M.S. from New York University. His research interests are primarily in the area of mathematical programming and optimization with emphasis on computational aspects of problem solving methods. He is a member of ACM, and ACM SIGPLAN technical committee on APL. He is on the editorial board of *Mathematical Programming*, and is a member of the committee on algorithms of the Mathematical Programming Society.

Mohamed I. Dessouky ("The Cut Search Algorithm with Arc Capacity and Lower Bounds") is Associate Professor of Industrial Engineering at the University of Illinois, Urbana, Illinois 61801. He holds the B.S., M.S. and Ph.D. (Ohio State University). He is a member of TIMS, ORSA, AIIE and PMI.

Arie Hordijk ("Linear Programming and Markov Decision Chains") is professor of operations research in the department of mathematics at the University of Leiden, The Netherlands. He received a Ph.D. in mathematics from the University of Amsterdam. He is an associate editor of *Mathematics of Operations Research*.

Katarzyna Iwaniec ("An Inventory Model with Full Load Ordering") is Assistant Professor at the Institute of Telecommunication in Warsaw, Poland. She received an M.D. degree from the University of Warsaw in 1971. Four years later she got a Ph.D. from the Mathematical Institute of the Polish Academy of Sciences. Her mathematical interest is inventory models.

L. C. M. Kallenberg ("Linear Programming and Markov Decision Chains") is a staff member in the Department of Mathematics at the University of Leiden, The Netherlands. He received a M.S. degree in mathematics from the same university. His current research interests are in dynamic programming and combinatorial optimization. He is a member of the Mathematical Programming Society.

R. R. Meyer ("Two-Segment Programming") is Associate Professor of Computer

Sciences at the University of Wisconsin, Madison, Wisconsin 53706. He received a B.S. in Mathematics from Caltech and an M.S. and Ph.D. in Computer Sciences from the University of Wisconsin-Madison. He has published articles in *Mathematical Programming*, *SICOP*, and *J. ACM*, and is co-editor of two books. His current research interests include integer programming and nonlinear programming.

John M. Mulvey ("Cluster Analysis: An Application of Lagrangian Relaxation") is an Assistant Professor at the School of Engineering and Applied Science, Princeton University, Princeton, New Jersey 08540. He received a B.S. in general engineering and an M.S. in computer science from University of Illinois and an M.S. and Ph.D. in management science from University of California, Los Angeles. He was a member of the technical staff at TRW Systems Group 1969-1975 and has consulted for many government agencies and private companies. His articles have appeared in various professional journals. He is currently interested in large-scale network and combinatorial programs.

David W. Peterson ("An Analytic Framework for Evaluating Rolling Schedules") is a Professor at the Duke University Graduate School of Business Administration, Durham, North Carolina 27706. He holds degrees in electrical engineering from Wisconsin and Stanford, and has been on the faculties of Northwestern University, the University of Illinois (Chicago Circle) and the International Institute of Management (Berlin). His research interests include control theory, simulation, mathematical programming, and the structuring of quantitatively-based legal arguments.

Steve Phillips, Jr. ("The Cut Search Algorithm with Arc Capacity and Lower Bounds") is Associate Professor of Systems Analysis at the University of Texas at Arlington, Texas 76019. He holds the B.S., M.B.A., M.S., and the Ph.D. (University of Illinois). He is a member of TIMS, ORSA, AIIE, and ASEE.

Stephen A. Smith ("Estimating Service Territory Size") is a Research Scientist at Xerox Corporation's Palo Alto Research Center, Palo Alto, California. He received a B.S. from the University of Cincinnati and an M.S. from Stevens Institute, both in mathematics, and a Ph.D. in engineering, economic systems, from Stanford University. He is a member of ORSA and TIMS and has written several articles dealing with system maintenance and reliability.

James K. Weeks ("A Simulation Study of Predictable Due-Dates") is an Assistant Professor of Business Administration, School of

Business and Economics, University of North Carolina at Greensboro, North Carolina 27412. He received a B.A. in Business Administration from Methodist College, an M.B.A. from East Carolina University, and a Ph.D. in Business Administration from the University of South Carolina. He has published in *Decision Sciences*, *Management Science*, and *Production and Inventory Management*. He is a member of AIDS, APICS, TIMS, and the Academy of Management.

Howard J. Weiss ("The Computation of Optimal Control Limits for a Queue with Batch Services") is Assistant Professor of Operations Research at Temple University, Philadelphia, Pennsylvania 19122. He earned

a B.S. in Applied Mathematics/Computer Science from Washington University and an M.S. and Ph.D. in Industrial Engineering/Management Science from Northwestern University. He is a member of TIMS and ORSA and the past president of the Philadelphia joint TIMS/ORSA Chapter.

Norman Keith Womer ("Learning Curves, Production Rate, and Program Costs") is Associate Professor of Economic Analysis in the School of Engineering at the Air Force Institute of Technology. He received an A.B. in economics from Miami University in 1966 and a Ph.D. in economics from Penn State in 1970. His current research is in managerial economics and statistical cost estimation.

INSTITUTIONAL MEMBERS

THE BOSTON CONSULTING GROUP, INC.

Boston, Massachusetts

DIAGMA CONSULTANTS

Paris, France

GENERAL ELECTRIC

New York, New York

THE HENDRY CORPORATION

Croton-on-Hudson, New York

IBM

Armonk, New York

LEVER BROTHERS COMPANY

New York, New York

MANAGEMENT DECISION SYSTEMS, INC.

Weston, Massachusetts

MCKINSEY & COMPANY

New York, New York

MOBIL OIL CORPORATION

New York, New York

THE PROCTER & GAMBLE COMPANY

Cincinnati, Ohio

R.J. REYNOLDS TOBACCO COMPANY

Winston-Salem, North Carolina 27102

STANDARD OIL COMPANY

(Indiana)

Chicago, Illinois

XEROX CORPORATION

Stamford, Connecticut

For information regarding Institutional Membership, write to:
Mrs. Mary R. DeMelim, 146 Westminster Street, Providence, Rhode Island 02903.
