With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

ABOUT AUTHORS

Gerald G. Brown ("Automatic Identification of Generalized Upper Bounds in Large-Scale Optimization Models") is an Associate Professor of Operations Research and Computer Science at the Naval Postgraduate School, Monterey, California 93940. He earned his Ph.D. from the University of California, Los Angeles, and is a contributing member of ACM, ASA, ORSA, and TIMS.

John E. Ettlie ("Manpower Flows and the Innovation Process") is an Associate Professor of Management, DePaul University, Chicago, Illinois 60604, and currently is principal investigator of a study funded by the National Science Foundation entitled, "A Longitudinal Study of Technological Innovation in the Food Processing Sector". He received his Ph.D. from Northwestern University and has published articles on the innovation process recently in *Decision Sciences* (with Albert H. Rubenstein), *Psychological Reports*, and *Management Science* (with David B. Vallenga). He coauthored (with Albert H. Rubenstein) a recent report for the Transportation Systems Center of the U.S. Department of Transportation entitled, "Stimulating the Flow of Innovations to the Automotive Industry: Three Case Studies and Some Potential Administrative Experiments." He is a member of TIMS, AIDS, and the Academy of Management.

Ralph Katz ("External Communication and Project Performance: An Investigation into the Role of Gatekeepers") is an Associate Professor of Organizational Theory at the Sloan School of Management at MIT, Cambridge, Massachusetts 02139. In addition to problems of technology transfer, he has studied the effects of job longevity on employee attitudes and behaviors and is currently examining the effectiveness of long-tenured R & D project teams. He received his M.B.A. in operations research and his Ph.D. in organization behavior from the Wharton Graduate School at the University of Pennsylvania.

Kenneth E. Kendall ("Formulating Blood Rotation Policies with Multiple Objectives") is an Associate Professor in the College of Business Administration, The University of Nebraska, Lincoln, Nebraska 68588. He earned his Ph.D. degree at the State University of New York at Buffalo. He has been involved with regional blood banking since 1969, serving both as a researcher and a consultant for numerous blood service organizations. His publications have appeared in *Management Science*, *Operations Research*, *Medical Care*, *Transfusion*, *Journal for the International Society for Technology Assessment*, *Long Range Planning*, *Information and Management*, and others. He is a member of TIMS, ORSA,

AIDS, APICS, SMIS, and AABB, and the Academy of Management.

John W. Keon ("The Bargain Value Model and a Comparison of Managerial Implications with the Linear Learning Model") is an Assistant Professor of Marketing at the Graduate School of Business, New York University, New York, New York 10006. He received a B.S. in Physics from the University of Lowell and worked as a Development Physicist before going to the Wharton School University of Pennsylvania to earn an M.S. in Operations Research and a joint Ph.D. in Marketing/Operations Research. An active member of TIMS and the American Marketing Association, he has published several articles on marketing management models and marketing research techniques.

Dennis S. Kira ("The Demand for a Risky Asset") is an Assistant Professor of Quantitative Methods at Lakehead University, Thunder Bay (P7B 5E1), Ontario, Canada. His primary interests lie in the area of decision making under uncertainty. His education includes a B.Sc. and M.Sc. in Mathematics from Simon Fraser University and Ph.D. degree from the University of British Columbia, Canada. He is a member of TIMS, ORSA, and AIDS.

Yoram Kroll ("Sample vs. Population: Mean-Variance Efficient Portfolios") is an Assistant Professor of Finance at the Hebrew University of Jerusalem, Israel and a Visiting Assistant Professor of Finance at the Wharton School University of Pennsylvania, Philadelphia, Pennsylvania 19104. He has written articles in Finance and Decisionmaking under Uncertainty. His main areas of interest are as follows: Stochastic Dominance Criteria, Efficiency Analysis Under Conditions of Risk and Capital Budgeting Problems.

Sang M. Lee ("Formulating Blood Rotation Policies with Multiple Objectives") is a Regents Professor of the University of Nebraska-Lincoln system, the First National Bank Lincoln Distinguished Professor of Management Science and Chairman of the Management Department at the University of Nebraska, Lincoln, Nebraska 68588. He received his M. B.A. from Miami University (Ohio) and Ph.D. from the University of Georgia in Management Science. His primary teaching and research interests are in the management science area. He has authored or coauthored 15 books and over 100 journal articles. He is a member of ORSA, TIMS, AIDS, and the Academy of Management. He is a Fellow of AIDS.

Haim Levy ("Sample vs Population: Mean-Variance Efficient Portfolios") is a Professor of Finance at the Hebrew University of Jerusalem, Israel. He also served as a visiting pro-

professor at University of Illinois, University of California, Berkeley, University of Florida, Gainesville, and the Wharton School at the University of Pennsylvania. He has written numerous articles and several books in the area of finance, statistics, and decision making under uncertainty. His main areas of interest are: Stochastic Dominance, Decision Making under Inflationary Conditions and the CAPM and the Investment Holding Period.

Roy E. Marsten ("A Mixed-Integer Programming Approach to Air Cargo Fleet Planning") is currently an Associate Professor of Management Information Systems at the University of Arizona, Tucson, Arizona 85721. He received a B.S. and M.S. from the University of Michigan and a Ph.D. from UCLA. He taught at Northwestern University at MIT before moving to the University of Arizona. His research is focused on development and implementation of algorithms for integer programs and large-scale linear programs. He is a member of TIMS, ORSA, ACM, and MPS.

Michael R. Muller ("A Mixed-Integer Programming Approach to Air Cargo Fleet Planning") is currently Director of Market Planning and Analysis for the Flying Tiger Line, 7401 World Way West, International Airport, Los Angeles, California 90009. He holds a B.S. and an M.B.A. from UCLA. He was Manager of Crew Planning at the time the work described in this paper began. He has presented several papers dealing with air transportation at TIMS/ORSA meetings.

Rakesh K. Sarin ("Performance-Based Incentive Plans") is Assistant Professor of Operations Management at the University of California, Los Angeles, California 90024. He received a B.E. in mechanical engineering from the M. R. Engineering College, Jaipur, an M.B.A. from The Indian Institute of Management, Ahmedabad, and an M.S. and Ph.D. from the University of California, Los Angeles. He has been on the faculties of Purdue University and The Indian Institute of Management, Ahmedabad and worked in the Decision Analysis section of the Woodward-Clyde Consultants, San Francisco. His research interests include decision analysis, long term forecasting, and energy applications. He is a member of ORSA and TIMS and has published in a number of professional journals.

David S. Thomen, Captain, USMCR ("Automatic Identification of Generalized Upper Bounds in Large-Scale Optimization Mod-

els") is an instructor at the Marine Corps' Computer Sciences School at MCDEC, Quantico, Virginia. A graduate in mathematics and economics from Alma College in 1971, he received his M.S. in Operations Research from the Naval Postgraduate School in 1979. He is also an Airborne Reconnaissance Officer in the Marine RF-4B aircraft.

Michael L. Tushman ("External Communication and Project Performance: An Investigation into the Role of Gatekeepers") is an Associate Professor in the Management of Organizations Division of Columbia University's Graduate School of Business, New York, New York 10027. He received his B.S.E.E. degree from Northwestern University, an M.S. in organizational behavior from Cornell University and his Ph.D. in organizational psychology from the Sloan School of Management at MIT. He has extensively studied the impact of communication networks on performance in R & D settings. His more general research and teaching interests center on the linkage between organizational factors and innovation.

Robert L. Winkler ("Performance-Based Incentive Plans") is Distinguished Professor of Quantitative Business Analysis in the Graduate School of Business, Indiana University, Bloomington, Indiana 47401. For the 1980-1981 academic year he is a Visiting Professor at INSEAD, Fontainebleau, France. He received a B.S. from the University of Illinois and a Ph.D. from the University of Chicago, and he has held visiting positions at the University of Washington, the International Institute for Applied Systems Analysis, and Stanford University. He is the author of two books and numerous journal articles. His primary research interests involve probability forecasting, Bayesian inference, and statistical decision theory.

William T. Ziemba ("The Demand for a Risky Asset") is Professor of Management Science in the Faculty of Commerce, University of British Columbia, Vancouver, British Columbia (V6T 1W5), Canada. His current research is in the areas of stochastic and mathematical programming, energy policy modeling, quantitative finance and gambling models. He holds a B.S.Ch.E. degree from the University of Massachusetts and M.B.A. and Ph.D. degrees from the University of California, Berkeley. He is a member of TIMS, ORSA and CORS and is the CORS editor of *INFOR* and an associate editor of *Management Science*.
