With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

ABOUT AUTHORS

Maryam Alavi ("An Evolutionary Strategy for Implementing Decision Support Systems") is an Assistant Professor of MIS in the College of Business Administration, University of Houston, Houston, Texas 77004. She has a B.S. in computer science and mathematics from the State University of New York at Buffalo and an M.S. in computer science and Ph.D. in management information systems from The Ohio State University. Prior to joining the faculty at the University of Houston, she was a systems analyst of OCLC, Inc. and research scientist at Battelle Memorial Institute where she was involved in planning, evaluation and design of computer based information systems. Her current research interests are in the areas of planning and design of management information systems and decision support systems. She is a member of TIMS and AIDS.

Douglas N. Behrman ("Sources of Job Related Ambiguity and Their Consequences Upon Salespersons' Job Satisfaction and Performance") is an Assistant Professor of Marketing at the College of Business Administration of the Florida State University, Tallahassee, Florida 32306. He received his B.A. from the University of North Carolina, his M.B.A. from San Diego State University, and his Ph.D. in marketing from the University of North Carolina. His previous articles deal with issues in the application of multivariate statistical models and with measurement problems in sales force research. His current research concerns behavioral aspects of sales force management.

William J. Bigoness ("Sources of Job Related Ambiguity and their Consequences upon Salespersons' Job Satisfaction and Performance") is an Associate Professor of Business Administration in the Graduate School of Business Administration, University of North Carolina, Chapel Hill, North Carolina 27514. He received his M.L.I.R. and Ph.D. from Michigan State University. His research interests include labor-management relations and conflict management. His research has appeared in the *Academy of Management Journal*, *Journal of Applied Psychology*, and *Organizational Behavior and Human Performance*.

Philip H. Birnbaum ("Contingencies for Interdisciplinary Research: Matching Research Questions with Research Organizations") is currently an Associate Professor of Management at Indiana University on leave during the 1981-1982 academic year as a Fulbright Fellow at the University of Hong Kong. He received his Ph.D. in 1975 from the University of Washington. His current research interests

include research management, technology transfer, and strategic responses of high technology firms and research universities to federal regulation. He is the co-author of two books and has published articles which have appeared in journals such as *Management Science*, *The Academy of Management Journal*, *Decision Sciences*, and *Human Relations*. He is a member of TIMS, The Academy of Management, AIDS, AAAS, and other scholarly associations.

W. Steven Demmy ("Operating Characteristics of an Inventory System with Rationing") is Associate Professor of Management Science at Wright State University, Dayton, Ohio 45435, where he teaches and performs research in the areas of production and inventory control, management information systems, and business applications of operations research. He holds Ph.D., M.S., and B.I.E. degrees from The Ohio State University, majoring in industrial engineering and operations research for all degrees. He is a registered professional engineer, a Certified Public Accountant, and a Certified Professional Logistician. He is a member of TIMS and ORSA.

Jehoshua Eliashberg ("Risk Sharing and Group Decision Making") is an Assistant Professor at the J. L. Kellogg Graduate School of Management, Northwestern University, Evanston, Illinois 60201. During the Spring Quarter of 1980/81, he was a Visiting Assistant Professor at The Graduate School of Business at the University of Chicago. He received a B.Sc. (1970) in Electrical Engineering from the Technion-Israel Institute of Technology at Haifa, an M.B.A. from Tel-Aviv University (1973) and a D.B.A. (1978) in Quantitative Business Analysis and Marketing from Indiana University. His previous publications have appeared in *Management Science*. He is a member of TIMS, ORSA, AIDS, ASA and the American Marketing Association. His major research interests include the areas of analysis of conflict situations, decision theory and multi-attribute decision-making.

John C. Henderson ("An Evolutionary Strategy for Implementing a Decision Support System") is an Associate Professor of Management and Director of the Center for Information Systems Research at Florida State University, Tallahassee, Florida 32306. He received his Ph.D. in Operations Research from the University of Texas at Austin. His current research interests include Design and Implementation of DSS and MIS, Behavioral Decision Theory and the application of DSS in the public sector. His work has appeared in *Management Science*, *MIS Quarterly*, *Academy of*

Management Review, *Omega* and *IEEE Transaction on Management*. He is a member of AIDS, TIMS and SGSR.

Robert W. Keidel ("Theme Appreciation as a Construct for Organizational Change") is an Assistant Professor of Industrial Relations and Organizational Behavior at Temple University, Philadelphia, Pennsylvania 19122. He received his B.A. from Williams College, and his M.B.A. and Ph.D. from the Wharton School, University of Pennsylvania. He served as a Program Consultant at the National Center for Productivity and Quality of Working Life and currently is a Senior Consultant at the Wharton Applied Research Center, University of Pennsylvania. His research interests include strategic QWL development and interorganizational change.

Jean-Louis Malouin ("Formulating Technology Policy and Planning Industrial R&D Activities") is a Professor of Operations Management in the Faculté des sciences de l'administration, Université Laval, Québec, Canada G1K 7P4. He has a bachelor's and master's degree from Université Laval in Commerce and a Ph.D. from the UCLA in Operations Management. His articles appeared in *AIIE Transactions*, *Industrial Relations/Relations Industrielles*, *Canadian Chartered Accountant*. His major research interests are in the management of technology and R&D, scheduling, inventory control and system design. He is a member of TIMS/CORS/ORSA.

Steven Nahmias ("Operating Characteristics of an Inventory System with Rationing") is Professor of Quantitative Methods at the University of Santa Clara, Santa Clara, California 95053. He holds a B.A. in Mathematics and Physics from Queens College, a B.S. in Industrial Engineering from Columbia University, and M.S. and Ph.D. degrees in Operations Research from Northwestern University. He has authored or co-authored about forty articles which have appeared in a variety of journals. He is a member of TIMS and ORSA and currently serves as an associate editor for *Management Science*. His primary research interests are in stochastic modelling and inventory control.

Muhittin Oral ("Formulating Technology Policy and Planning Industrial R&D Activities") is an associate professor of Operations Research in the Faculté des sciences de l'administration, Université Laval, Québec, Canada G1K 7P4. He has previously been with the Marmara Scientific and Industrial Research Institute, Gebze, Turkey; University Associates, Inc., Cleveland, Ohio; the National Coal Board, London, U.K.; and the Scientific and Technical Research Council of Turkey, Ankara. Professor Oral received his Ph.D. in Operations Research from Case Institute of Technology. His research interests are in the management of technology and R&D,

inventory control, scheduling and production planning. His articles appeared in journals such as *Management Sciences*, *AIIE Transactions*, *Technological Forecasting and Social Change*, *Journal of Operations Management*, etc. He is a member of TIMS/ORSA/CORS and ORST (Turkey).

William D. Perreault, Jr. ("Source of Job Related Ambiguity and Their Consequences Upon Salespersons' Job Satisfaction and Performance") is a Professor at the Graduate School of Business Administration of the University of North Carolina, Chapel Hill, North Carolina 27514. His previous publications have appeared in a number of journals, including *Management Science*, the *Journal of Marketing Research*, the *Journal of Marketing*, *Decision Sciences*, the *Journal of Consumer Research*, and *Journal of Business*. His current research interests focus on problems in industrial marketing and behavioral research methods.

R. Joël Rahn ("Formulating Technology Policy and Planning Industrial R&D Activities") is an associate professor of Operations Management in the Faculté des sciences de l'administration, Université Laval, Québec, Canada G1K 7P4. He has a bachelor's and a master's degree from the University of Toronto and a Ph.D. from MIT, all in applied mathematics. His major research interests are in the system dynamics of energy economic and industrial systems and technological forecasting. He is a member of TIMS/ORSA/CORS and IEEE.

Robert L. Winkler ("Risk Sharing and Group Decision Making") is Distinguished Professor of Quantitative Business Analysis in the Graduate School of Business, Indiana University, Bloomington, Indiana 47401. For the 1980-1981 academic year he was a Visiting Professor at INSEAD, Fontainebleau, France. He received a B.S. from the University of Illinois and a Ph.D. from the University of Chicago, and he has held visiting positions at the University of Washington, the International Institute for Applied Systems Analysis, and Stanford University. He is the author of two books and numerous journal articles. His primary research interests involve probability forecasting, Bayesian inference, and statistical decision theory. He is a member of TIMS and is currently serving as a Departmental Editor for *Management Science*.

Jehiel Zif ("Managerial Strategic Behavior in State-Owned Enterprises—Business and Political Orientations") is a Senior Lecturer of Business Administration at Tel-Aviv University, Tel-Aviv, Israel and was a Visiting Professor at Northeastern University. He has been a consultant to international firms and government agencies and published books and papers on public and international marketing. He is a member of TIMS and a previous chairman of the Israeli chapter.
