With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

ABOUT AUTHORS

A. Charnes ("Evaluating Program and Managerial Efficiency: An Application of Data Envelopment Analysis to Program Follow Through") is University Professor across The University of Texas System and is Director of the Center for Cybernetic Studies, University of Texas at Austin, Austin, Texas 78712. He is a founding member and past President of TIMS.

Son-Nan Chen ("The Sampling Relationship between Sharpe's Performance Measure and Its Risk Proxy: Sample Size, Investment Horizon and Market Conditions") (Ph.D. in Mathematical Statistics and Post-Doctorate in Finance, University of Georgia), is Assistant Professor of Finance, Virginia Polytechnic Institute and State University, Blacksburg, Virginia 24061. He has numerous papers that have appeared (or will appear) in *Journal of Finance*, *Journal of Financial and Quantitative Analysis*, *Quarterly Review of Economics and Business* and *Journal of Financial Research*. He serves as a reviewer for *Journal of Financial and Quantitative Analysis*, *Journal of Financial Research*, and JOURNAL OF BUSINESS RESEARCH.

W. W. Cooper ("Evaluating Program and Managerial Efficiency: An Application of Data Envelopment Analysis to Program Follow Through") is the Foster Parker Professor of Finance and Management in the Graduate School of Business, The University of Texas at Austin, Austin, Texas 78712. He has published numerous articles in *Management Science* as well as other scientific-professional journals.

F. Robert Dwyer ("A Branch and Bound Algorithm for the List Selection Problem in Direct Mail Advertising") is an Associate Professor and Head of the Department of Marketing in the College of Business Administration at the University of Cincinnati, Cincinnati, Ohio 45267. He holds a Ph.D. from the University of Minnesota. He has taught in the U.C. Executive Program and the Institute for Advanced Advertising Studies. He is a member of the American Marketing Association and the Association for Consumer Research. His research has been published in several marketing and behavioral science journals.

James R. Evans ("A Branch and Bound Algorithm for the List Selection Problem in Direct Mail Advertising") is Associate Professor of Quantitative Analysis in the College of Business Administration at the University of Cincinnati, Cincinnati, Ohio 45267. He holds B.S.I.E. and M.S.I.E. degrees from Purdue, and a Ph.D. from Georgia Tech. His research interests include applications of networks and mathematical programming and the develop-

ment of heuristic methodologies. Professor Evans has published in a variety of journals including *Networks*, *Mathematical Programming*, *AIIE Transactions* and others. He is a member of TIMS, ORSA, AIIE, and AIDS.

Andrew J. Hogan ("Decision Problems under Risk and Chance Constrained Programming: Dilemmas in the Transition") is a Ph.D. candidate in Development Studies at the University of Wisconsin, Madison, Wisconsin 53706. He received his B.A. in English from Fairfield University, M.A. in Latin American Studies and an M.A. in Public Administration from New Mexico. He was a Fellow of the Organization of American States in Mexico in 1979-1980. His current research interest is in the economics of crop insurance.

Cheng F. Lee ("The Sampling Relationship between Sharpe's Performance Measure and Its Risk Proxy: Sample Size, Investment Horizon and Market Conditions") is Professor of Finance at the University of Illinois, Urbana, Illinois 61801. He holds the Ph.D. degree from the State University of New York at Buffalo. He is an Associate Editor of the *Journal of Financial and Quantitative Analysis* and a member of the editorial board of the *Journal of Business Research*. He has published extensively with articles appearing in the *Journal of Finance*, the *Journal of Financial and Quantitative Analysis*, the *Review of Economics and Statistics*, and other scholarly journals.

James G. Morris ("Decision Problems under Risk and Chance Constrained Programming: Dilemmas in the Transition") is Associate Professor of Business, University of Wisconsin, Madison, Wisconsin 53706. He received a B.B.A. and an M.B.A. from the University of New Mexico and a Ph.D. in Operations Research from the University of Wisconsin-Madison. He has published papers in *Mathematical Programming*, *Management Science*, *Operational Research Quarterly*, *Naval Research Logistics Quarterly*, *Operations Research*, *Transportation Science* and *The Journal of the Operational Research Society*. His current research interests include location models, stochastic programming and optimal control.

Donald G. Morrison ("A Nonstationary Model of Binary Choice Applied to Media Exposure") is Professor of Business at Columbia University, New York, New York 10027. He received his B.S. in Mechanical Engineering from M.I.T. and Ph.D. in Operations Research from Stanford University. He is the Founding Editor of the new TIMS/ORSA sponsored journal, *Marketing Science* and a former Departmental Editor for *Management Science* and member of the TIMS Council.

His current research involves probabilistic modelling of various marketing and social science phenomena. He is a member of TIMS, ORSA and ASA.

E. Rhodes ("Evaluating Program and Managerial Efficiency: An Application of Data Envelopment Analysis to Program Follow Through") is Assistant Professor of Environmental Analysis and Policy, School of Management, State University of New York at Buffalo, Buffalo, New York 14214. He is currently on academic leave, serving as a Brookings Institution Economic Policy Fellow assigned to the U.S. Department of Interior Office of Policy Analysis. He received an A.B. from Princeton University in Oriental Studies and a Ph.D. in Urban and Public Affairs from Carnegie-Mellon University. His research interests have focused on efficiency analysis of public sector activities, natural resource regulatory processes, and applications of operations research to natural resource management. He is a member of AIDS, AEA, and the National Economic Association.

Darius J. Sabavala ("A Nonstationary Model of Binary Choice Applied to Media Exposure") is Assistant Professor of Marketing and Management Science at Cornell University's Graduate School of Business and Public Administration, Ithaca, New York 14853. He is currently on leave at Bell Telephone Laboratories, Inc. He received a B. Tech. in Electrical Engineering from the Indian Institute of Technology (Bombay) and a Ph.D. from Columbia University. His research interests are in the areas of stochastic modeling of consumer behavior and the analysis of inter-brand competition. His articles have appeared (or will appear) in *Journal of Consumer Research*, *Journal of Business Research* and

Journal of Advertising Research. He is a member of TIMS, American Marketing Association and American Statistical Association.

Howard E. Thompson ("Decision Problems under Risk and Chance Constrained Programming: Dilemmas in the Transition") is Professor of Business at the University of Wisconsin, Madison, Wisconsin 53706. He has B.S. and M.S. degrees in Mathematics from the University of Wisconsin and a Ph.D. in business from the same institution. He is author or co-author of three books on the applications of mathematics to business problems and over 40 articles in professional journals including *Management Science*, *Operations Research* and others. He has served as mathematician and operations research analyst at A.O. Smith Corporation and was visiting Professor of Management Science at Ohio State University.

Ward Whitt ("Approximating a Point Process by a Renewal Process: The View Through a Queue, An Indirect Approach") is Supervisor, Operations Research Analysis Group, Operations Research and Network Capabilities Center, Bell Laboratories, Holmdel, New Jersey. He received an A.B. in mathematics from Dartmouth College in 1964 and a Ph.D. in operations research from Cornell University in 1968. Before joining Bell Laboratories in 1977, he taught one year in the Department of Operations Research at Stanford University and eight years in the School of Organization and Management (formerly Department of Administrative Sciences) at Yale University. His research interests and publications are primarily in the area of stochastic models, especially queues. He is an Associate Editor for *Mathematics of Operations Research* and *Journal of Stochastic Processes and Their Applications*. He is a member of TIMS.
