With 12,500 members from nearly 90 countries, INFORMS is the largest international association of operations research (O.R.) and analytics professionals and students. INFORMS provides unique networking and learning opportunities for individual professionals, and organizations of all types and sizes, to better understand and use O.R. and analytics tools and methods to transform strategic visions and achieve better outcomes. For more information on INFORMS, its publications, membership, or meetings visit <http://www.informs.org>

ABOUT AUTHORS

Ronald D. Armstrong ("The Multiple-Choice Nested Knapsack Model") is an Associate Professor of Operations Research at the University of Texas at Austin, Austin, Texas 78712. His research interests include scheduling algorithms and applications of mathematical programming in statistics. He is the co-author of articles appearing in *Management Science*, *Operations Research* and *JASA*. He is a member of ORSA and TIMS.

Joseph Blackburn ("Improved Heuristics for Multi-Stage Requirements Planning Systems") is Associate Professor of Management in the Owen Graduate School of Management at Vanderbilt University, Nashville, Tennessee 37203. He received his B.S. Ch.E. from Vanderbilt University, M.S. Ch.E. from University of Wisconsin and Ph.D. in Operations Research from Stanford University. He has previously taught at the University of Chicago, Stanford University and Boston University. His current research interests are material requirements planning systems and new product introduction models. He is a member of TIMS, ORSA, AIDS and APICS.

Dana L. Farrow ("User Involvement in Information System Development: A Conflict Model and Empirical Test") is Assistant Professor of Management in the School of Business and Organizational Sciences at Florida International University, Miami, Florida 33199. He holds degrees in engineering and administration and the Ph.D. in Organizational and Industrial Psychology from the University of Rochester. His current research interests include the study of effective managerial leadership in different types of organizations, and the detection and correction of unfair employment discrimination. Among the journals in which he has published or had articles accepted for publication are the *Journal of Applied Psychology*, *Journal of Management Studies*, *Management Science*, *Journal of Personality and Social Psychology*, and *Human Relations*.

Dennis Kira ("Performance of a Regulatory Agency as a Function of Its Structure and Client Environment: A Simulation Study") is an Associate Professor of Management Science at Concordia University, Montreal, Quebec, Canada H3G 1M8. He has published several articles in the field of stochastic dominance and resource management. He is a member of CORS.

Shelby H. McIntyre ("An Experimental Study of the Impact of Judgment-Based Marketing Models") is an Assistant Professor at the University of Santa Clara, Santa Clara, California 95053. He received a B.Sc. in Industrial Engineering, an M.B.A. and a Ph.D. all from Stanford University. His current research interests focus on the improvement of business decisions by the use of judgment

based models. His research has appeared in the *Journal of Applied Psychology*, the *Journal of Marketing Research*, and the *Academy of Management Journal*, among others. He is an active business consultant.

Robert Millen ("Improved Heuristics for Multi-Stage Requirements Planning Systems") is an Associate Professor of Operations Management at Northeastern University, Boston, Massachusetts 02115. He spent the previous academic year at the Graduate School of Management, UCLA. The focus of his current research is the effective coordination of decisions in multi-stage production systems. His previous publications have appeared in *Management Science*, *Decision Sciences*, *Journal of Operations Management*, and elsewhere. He is a member of TIMS, AIDS, and APICS.

George E. Monahan ("A Survey of Partially Observable Markov Decision Processes: Theory, Models, and Algorithms") is an Assistant Professor at the College of Management, Georgia Institute of Technology, Atlanta, Georgia 30332. He received a B.B.A. in Quantitative Methods from the University of Wisconsin-Milwaukee, and an M.S. in Management and a Ph.D. in Managerial Economics and Decision Sciences from Northwestern University. He has published papers in *Operations Research* and the *Journal of Applied Probability*. His current research interests deal with dynamic, stochastic optimization problems arising in production and marketing contexts. He is a member of TIMS and ORSA.

Daniel Robey ("User Involvement in Information System Development: A Conflict Model and Empirical Test") is Associate Professor of Management at Florida International University, Miami, Florida 33199. He has also served on the faculties of the University of Pittsburgh and Marquette University. He earned his Doctorate and Masters degrees from Kent State University and holds a B.S. degree from Wittenberg University. He is author of *Designing Organizations: A Macro Perspective*, (Irwin, 1982) and *Organizational Development: Progress and Perspectives*, (Macmillan, 1981). He has published articles in *Organizational Behavior and Human Performance*, *Academy of Management Journal*, *Decision Sciences*, *Academy of Management Review*, *Human Relations*, *Interfaces*, and other journals. His current research interests include the impact of information systems on organization and management, related implementation problems, and managerial decision styles.

Fritz W. Scharpf ("Performance of a Regulatory Agency as a Function of Its Structure and Client Environment: A Simulation Study") is a Director of the International Institute of Management Science Centre, Berlin, West Germany. He is an expert in public administration and author of several books in

the field. His current interests focus upon labor market policies.

Prabhakant Sinha ("The Multiple-Choice Nested Knapsack Model") is an Associate Professor of Quantitative Studies at the Graduate School of Management, Rutgers University, Newark, New Jersey 07102. He has contributed to *Management Science*, *Operations Research*, and *Mathematical Programming*. His research interests are in resource allocation in menu planning and marketing.

William A. Thompson ("Performance of a Regulatory Agency as a Function of Its Structure and Client Environment: A Simulation Study") is Assistant Professor at the School of Forestry and Environmental Studies, Duke University, Durham, North Carolina 27706. He received his Ph.D. from the University of British Columbia in 1975. His research interests are in simulation and resource management. He is a member of TIMS.

Ilan Vertinsky ("Performance of a Regulatory Agency as a Function of Its Structure and Client Environment: A Simulation Study") is a chairman of the Policy Analysis Division at the University of British Colum-

bia, Vancouver, British Columbia, Canada V6T 1W5. He is also professor of Animal Resource Ecology, Management Science and Policy Analysis. Currently he is an Editor of *INFOR*. His publications are in the fields of resource management, optimization, risk analysis, organizational theory and zoology.

Andris A. Zoltners ("The Multiple-Choice Nested Knapsack Model") is an Associate Professor of Marketing in the Graduate School of Management at Northwestern University, Evanston, Illinois 60201. He received an M.S. in mathematics from Purdue University and an M.S. and Ph.D. in industrial administration from Carnegie-Mellon University. His major research interest is in the application of management science concepts and computer-oriented decision systems in marketing. His research articles have appeared in several journals including *Management Science*, *Journal of Marketing Research*, *Journal of Marketing*, *Operations Research*, *Mathematical Programming*, and *ACM*. He is a member of ORSA and TIMS and is an Associate Editor of *Management Science*.
